## Editorial Comment.

Each week brings noticeable results in the completion of the buildings of the Panama-Pacific Exposition. The trees are being planted, the buildings are assuming form and shape and color and before long the palatial city will stand out in a splendid and matchless symmetry.

Three things will contribute to make this exposition something above and beyond any heretofore held. Its setting and surroundings, its color, and the landscape gardening. For the climate here gives possibilities for horticultural exhibits never before enjoyed, and the grounds will represent the infinite variety of trees and flowers that flourish here at all times of the year. San Franciscans do not realize what is being held here in their midst. It is time to boost the exposition, to find out what is being done and write to your friends about it.

The report of the State Board of Equalization shows that there will be no deficiency of revenue but that there will be a surplus of some \$250,000 for the fiscal year beginning July 1. This is a good showing for the new system of taxation and that the corporations are paying their just share of the taxes. Great talk has been made as to the extravagance of the Johnson administration, but the facts speak for themselves. The Commissions have saved their cost many times over to the people of the State. And the increase of taxable property owing to the disclosures of property heretofore hidden gives a more equitable distribution of the burden of taxation.

The Examiner comes forward with a full page editorial in favor of the purchase of the United Railroads by the municipality. It will no doubt claim all credit for anything that any body may do that will bring about the result. As the question will be up to the people in the near future it should receive the earnest attention of all citizens.

And here are some things to be considered. When Francis J. Heney was fighting the peoples' battles in the Graft Prosecution, when these millions of watered capital of the United Railroads were being unloaded on the people, this same Examiner was daily cartooning him and heaping ridicule and abuse upon him in the most cowardly manner. The Chronicle was daily explaining that Calhoun was being held up by corrupt politicians and wasting tons of printers' ink in telling the people how municipal ownership would never be a success. Now when the game is called and it is seen that the facts are finally to be determined

these two great molders of public opinion come out in favor of the purchase by the city of the street car lines.

Calhoun and the Chronicle have claimed that private business could not compete with the city. That is true when private business is over capitalized as is the United Railroads. Neither could such over capitalized business compete with any other kind of legitimate business. And the system of finance is well illustrated where Calhoun sought to make up for the fictitious capital by land speculation that had nothing to do with the legitimate business of the railroad.

It is up to the city to solve the problem of its urban transportation. What with the Railroad Commission as it is now constituted and the publicity that has been forced upon the United Railroads the things which have been done by that corporation will never again be attempted. And it is now a question whether we can afford to buy the street railways and thus unify the system and get better results than under a divided management.

Japan still holds that California has violated the treaty obligations between the United States and Japan. Why other states that have exactly similar laws have not violated the same treaty is not mentioned. So far as Japan is concerned it does not matter about the other states as they only care to colonize California.

The action of Secretary Bryan was eminently fair to California. Now the newspapers that are his political enemies in this state are taking sides with Japan. And it is the sentiment in the East against California that Japan relies upon more than any thing else.

When Roosevelt was President he insisted California allow the Japanese the privileges of our public schools without knowing any of the facts of the case at first hand. And in the present instance it is doubtful if he would have been as fair to all concerned as is the present administration.

Big business is pulling the old, old stunt of creating business depression and hard time to be blamed upon the administration. The disclosures of the past few years have put a crimp in the most approved methods of robbing the public. And the readjustment of these methods is causing the lack of activity until thing get adapted to the new order.

### HOW FAST WE LIVE.

Abraham Lincoln never said "Hello, central," never dodged an automobile, never held a strap in a trolley car, never pushed a button for light, never heard a phonograph and never posed for a motion picture, and yet Abraham Lincoln died only forty-eight years ago.—Hayne de Grace Republican.

## Pasadena's Municipal Lighting Plant and What It Has Saved Its owners.

By C. W. Kohner, General Manager  
Pasadena Municipal Lighting  
Department.

About seven years ago Pasadena built a power plant for the distribution of electrical energy for light and power purposes. The city was compelled to establish its municipal because of poor service rendered by the local central station and the high cost for same at the time.

The retail rate charged by the private corporation before the municipal plant was installed was 15c per kwh. At the time axtation was made for a municipal plant the rate was lowered to 12½c per kwh, for the first 666 kwh, used in one month, less 10% for prompt payment of bills. In view of the fact that very few concerns used as much as 666 kwh, in one month, almost all users paid the maximum rate. The city plant at this time established an 8c rate. After accumulating sufficient business the rate was again lowered to 7c. Business came fast, and the cost of production was lowered at a very rapid rate, hence the present 5c base rate for lighting was established as per the following schedule:

"Class A"—The first 100 kilowatt hours, or less, of energy furnished in any one month to any consumer, 5c per kilowatt hour.

"Class B"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 100 kilowatt hours and not exceeding 500 kilowatt hours 4½c per kilowatt hour.

"Class C"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 500 kilowatt hours and not exceeding 1,000 kilowatt hours, 4c per kilowatt hour.

"Class D"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 1,000 kilowatt hours and not exceeding 2,000 kilowatt hours, 3½c per kilowatt hour.

"Class E"—The kilowatt hours of energy furnished in any one month to any consumer over 2,000 kilowatt hours 3c per kilowatt hour.

"Class A Arc"—The first 100 kilowatt hours, or less, of energy furnished in any one month to any consumer, 4.9c per kilowatt hour.

"Class B Arc"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 100 kilowatt hours, and not exceeding 500 kilowatt hours, 4½c per kilowatt hour.

"Class C Arc"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 500 kilowatt hours, 4c per kilowatt hour.

A minimum monthly charge of 50c per meter of three kilowatt capacity or less, and 20c for each additional kilowatt of meter capacity required, shall be made for each meter.

The city base rate for power begins at 4c and scales down as follows:

"Class A Power"—The first 100 kilowatt hours of energy or less, furnished in any one month to any consumer, 4c per kilowatt hour.

"Class B Power"—The kilowatt hours furnished in any one month to any consumer in excess of 100 kilowatt hours, and not exceeding 300 kilowatt hours, 2½c per kilowatt hour.

"Class C Power"—The kilowatt hours

of energy furnished in any one month to any consumer in excess of 300 kilowatt hours, and not exceeding 500 kilowatt hours, 2½c per kilowatt hour.

"Class D Power"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 500 kilowatt hours and not exceeding 1,000 kilowatt hours, 2c per kilowatt hour.

"Class E Power"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 1,000 kilowatt hours and not exceeding 2,000 kilowatt hours, 2c per kilowatt hour.

"Class F Power"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 1,500 kilowatt hours and not exceeding 2,000 kilowatt hours, 1.9c per kilowatt hour.

"Class G Power"—The kilowatt hours of energy furnished in any one month to any consumer in excess of 2,000 kilowatt hours and not exceeding 3,000 kilowatt hours, 1.8c per kilowatt hour.

"Class H Power"—The kilowatt hours of energy furnished in any one month to any consumer over 3,000 kilowatt hours, 1.2c per kilowatt hour.

A monthly minimum charge will be collected for electrical energy of \$1.00 per meter of 1½ kilowatt capacity or less and 75c for each additional kilowatt of meter capacity required.

The plant has earned all operating charges, including interest and depreciation, and in addition had accumulated a surplus of \$41,749.16 as shown by the report for the fiscal year ending June 30, 1913. To this will be added the surplus ranging between twenty-five and thirty thousand dollars for the present fiscal year, as shown by the report issued December 31 for the year ending December 31, 1913. It is a well-known fact that it is very rare that any concern entering business accumulates a profit the first few years of its existence. This has been no less so in the history of Pasadena's municipal lighting works. The first year of its life it did not make all proper expenses; neither did it the second year; however, in the third year, the tide was turned and a surplus was shown, and each succeeding year the surplus has increased. Of course the saving effected by reason of the difference in rates was more than sufficient to offset the deficiency of the first two years.

In addition to being a self-sustaining enterprise, the saving resulting to the citizens of Pasadena by reason of the difference in rates charged before municipal ownership and those charged since has been tremendous. Up to June 30, 1912, the saving amounted to \$408,000. To this should be added a saving resulting for the year ending June 30, 1913, which if compared on the basis of the old rate of 10c for six months and a maximum rate of 5c for six months, according to the rates paid by some of the other Southern California cities, the saving would be not less than \$149,083.96, making a grand total when figured the first way of \$621,-

625.96, or when figured the second way of \$557,083.96.

In addition to the reduction in rates for commercial light and power, there has been a great saving in the cost of street lighting as compared with the rates formerly paid by the city to its competitor. Street arc lamps now cost 23% less, incandescent street lighting 10% less and ornamental cluster lighting 20% less than formerly paid the private corporation. At the time the city began lighting its streets, it had the benefit of only 50,000 candle power for which it paid \$15,808.40. At the present time the candle power on the streets amounts to 267,500, or 4½ times more light, for which the city paid the past year \$15,711.93.

The average rate received for street lighting for the year ending December 31, 1913, was \$0.0491, while the rate received for commercial and residence lighting was \$0.0495.

One great advantage in addition to the lowering of the cost is that the service rendered for street illumination is far superior to anything the city ever had before it began the illumination of its streets from its own municipal plant.

The citizens of Pasadena have saved sufficient, by reason of the difference in electric rates, to pay for the entire plant. The value of the plant, including all assets, as of June 30, 1913, after writing off \$102,463.06 for depreciation, amounted to \$341,400.25, while the bonds outstanding at that time amounted to only \$281,875.00.

The plan of financing the property has been to use the interest fund, depreciation fund and surplus fund for extensions and construction rather than issue additional bonds, so long as these funds have been sufficient to complete the necessary extensions. However, there would be no objection to issuing bonds for additional extensions if it was thought necessary to do so. Up to the present time there has not been the need for any additional bond issues. The citizens much preferred to invest the depreciation fund in extensions than to deposit it and only realize 2% return from its use as compared with that of earning 8.1% if used for extensions.

The total number of customers at this time is 6,215. The kilowatt capacity of the station is 3,000, while the kilowatt capacity of the lines, transformers and meters amounts in round figures to 5,500.

In developing the business, the management stated that, as the volume of business increased, certain reductions could be made. All promises made have been fulfilled. Rates have been reduced as promised in every case; the last reduction in rates is that of the minimum, which took effect April 18, at which time the minimum for lighting will be 50c for residence consumers, thus benefiting a large volume of the small users. Your attention is drawn to the fact that the small user of electrical energy in Pasadena receives an exceedingly low rate, namely, 5c for the first quantity.

The plant has presented a striking example of what can be accomplished in any community where the people will co-operate by patronizing an enterprise that belongs to them such as the one under consideration.

The low rates stimulate the volume of business and thereby reduce the cost, enabling more people of moderate means to participate in the benefits and conveniences of such modern utilities.

It is of interest to compare the re-

ports of the Southern California Edison Company and the Municipal Lighting Department, which were filed with the City Clerk, covering the year ending December 31, 1913. All utilities operating in Pasadena have to file annual reports in January covering the year ending December 31.

The service given by the municipal plant is A-1 and the people are highly pleased with the success they have had in operating their first profit earning utility.

	Edison	City

**Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.**

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 5 story and base, Class C construction, \$40,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Post street west of Larkin, and has been arranged with two and three room apartments on the first four floors and a large residence for the owner on the fifth floor. Plans provide for steam heat, wall beds, elevator service, hot water supply and vacuum cleaning. All suites will have private baths which will be finished in tile. Tile and marble will be used in the entrance. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$20,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Bertha Oberfeld. The building will be erected at the southeast corner of Fillmore and Green streets, covering an area of 60½ feet by 77½ feet. There will be a number of two and three room apartments with private baths and wall beds. Plans provide for steam heat. Interiors will be finished in pine with elm panels. Exterior of the building will be covered with rustic tile and cement plaster on metal lath. Carpentry work will be done by the owner and other parts of the work will be segregated.

**SAN FRANCISCO**—Apartment house, 6 story and base, reinforced concrete, \$16,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, C. A. Meussdorffer. The building will be erected on the east side of Jones street

north of Sutter, having a frontage of 30 feet and a depth of 55 feet. There will be six large apartments finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and will be equipped with showers. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame. Cost not stated. Architect, William Wilde, Albany Bldg., Oakland. Owner, Henry Holst. The building will be erected on Orchard street at the corner of Brook, and has been designed to contain four suites of four rooms and bath each. Pine will be used for interior finish. Some oak floors will be specified. There will be open fire places. Mantels will be of tile. Wall beds are specified. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, brick and steel. Cost not stated. Architect, F. H. Gentry, Marsh Bldg., L. A. Owners, Business Properties Co. The building will be erected at the corner of Moneta avenue and Santa Barbara, covering an area of 50 by 120 feet. There will be several stores besides the entrance on the first floor. Upper floors will be arranged in two and three room suites, with private baths and wall beds. Interior finish will be

of pine and redwood with some elm panels. There will be steam heat and a hot water supply. Bath rooms will have the wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with pressed brick. Plans are being revised.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame, \$15,000. Architects, Rhodes & Marisch, 3372 16th street, S. F. The building will be erected in East Oakland, and has been designed to contain fifteen apartments. Interiors will be finished in pine throughout. There will be a central heating system and a hot water supply. All suites will have private bath rooms and wall beds. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**PORTLAND, ORE.**—Apartment house, 2 story and base, frame, \$20,000. Architects, E. S. Rasmussen & Son, 277 Peerless Place, Portland. Owner's name withheld. The building will be erected at the southeast corner of 21st and East Irving streets, and will contain twenty-three suites of two and three rooms. There will be steam heat, a hot water system and portable vacuum cleaning. Interior finish will be of pine throughout. There will be private baths and wall beds. Exterior of the building will be covered with rustic tile and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**SEATTLE, WASH.**—Apartment house, 5 story and base, brick and steel, \$50,000. Architects, American Bridge Co., Arcade Bldg., Seattle. Owner, A. L. Spotts. The building will cover an area of 60 by 112 feet, and has been designed to contain 42 suites of three rooms each. Interiors will be finished in pine throughout. There will be steam heat, elevator service, a hot water system and vacuum cleaning. All suites will have private bath rooms and wall beds. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## BONDS.

**PIRU SCHOOL DISTRICT, Ventura Co.**—An election will be held here on July 6th to vote bonds of \$4,000 to be used in the erection of a school building and improvements.

**SEBASTOPOL, SCHOOL DISTRICT, Sonoma Co.**—A bond election will be held here on July 15th for the purpose of voting bonds in the sum of \$26,000 to secure funds for the erection of a school building, the purchase of a site and the necessary equipment for same.

**NAPA, Napa Co.**—The City Council has decided that two bond issues, one for a motor-driven fire engine and other fire apparatus to cost \$12,000, and a second to provide \$10,000 for the laying of storm sewers, would be submitted to the people on July 16th. Both issues were defeated in December of 1913.

**SACRAMENTO, CAL.**—The Initiative petition for the issuance of \$1,250,000 of State bonds for the erection of a building to house all the State offices in Los Angeles has won its place on the ballot. The measure carries the title of "Los Angeles Building Act."

**NAPA, Napa Co.**—The City Council has decided to call for new bids for the

\$25,000 worth of bonds voted for a bridge across the river at East First street. A legal error in the advertisement caused the cancellation of the first bids.

**MECCA ROAD DISTRICT, Riverside Co.**—A bond election will be held here July 18th for voting bonds in the sum of \$50,000, same to be used in the constructing and improving of highways.

**RICHMOND, Contra Costa Co.**—The Supervisors have decided on July 9th for the date of opening bids for the \$75,000 worth of the \$150,000 issue of the bonds of the Richmond School District.

**FRESNO, Cal.**—The calling of a bond election for a new Hall of Records will come up for consideration before the Board of Supervisors at their next meeting. The building will cost approximately \$100,000, this sum being recommended by the last grand jury. An election was held on the same question six years ago, but was defeated by a vote of 223.

**BARNES SCHOOL DISTRICT, Kern Co.**—Bids will be received here by the Clerk of the Board of Supervisors for bonds in the sum of \$5,000 until July 14th.

**BAKERSFIELD SCHOOL DISTRICT, Kern Co.**—Bids will be received by the Clerk of the Supervisors until July 13th for bonds in the sum of \$10,000, to be used in the erection of a school building and the necessary equipment of same.

**STINE SCHOOL DISTRICT, Kern Co.**—Bids will be received by the Supervisors on July 14th for bonds amounting to \$6,000, funds to be used in the improving of the school district.

**BROWNGOLD SCHOOL DISTRICT, Kern Co.**—Bids are now being received by the Supervisors for bonds in the sum of \$5,000. Bids will close July 14th. The proceeds of the bonds to be used in improving the district.

**BELLINGHAM, Wash.**—Bonds in the sum of \$100,000 have been voted for the construction of a high school building here.

**MILTON, Ore.**—Bonds in the sum of \$18,000 have been voted for the construction of a water system.

**EUGENE, Ore.**—Bonds amounting to \$111,000 have been sold for the construction of a high school building.

**DALLAS, Ore.**—\$12,000 in bonds have been voted here for the construction of a septic tank and building site.

**ASHLAND, Ore.**—\$175,000 in bonds were voted here and carried. The funds will be used in the construction of a water system.

**SILVERTON, Ore.**—An election will be held soon in School District No. 4 to vote \$12,000 bonds for the erection and additions of school buildings.

**HOOD RIVER, Ore.**—An election held here for the purpose of voting bonds amounting to \$10,000 was defeated by a large majority.

**EPHRATA, Wash.**—Bonds amounting to \$15,000 were voted here recently, the proceeds to be used in the construction of school buildings.

**PULLMAN, Wash.**—Smith and Paschall of Seattle have purchased \$20,000 bonds to be used in the improving of a water system in this city.

**TURLOCK, Stanislaus Co.**—Following the order of the State Railroad Commission for a new \$10,000 Southern Pacific depot, conditional upon the city's acquiring as a parking portion 75x100, petitions are now in circulation asking the Board of Trustees to

call a bond election for the purpose of raising funds to purchase same. No amount is specified. The Board will soon call a meeting for the discussion of the question.

**KEIKMAN HIGH SCHOOL DISTRICT, Fresno Co.**—A resolution has been passed requesting that a bond issue be called for the voting of bonds to erect a high school building here. This will be the second election held on this question.

**PARLER SCHOOL DISTRICT, Fresno Co.**—An election will be held here on July 11th to vote bonds in the sum of \$3,600 to erect a high school building.

**LIVE OAK SCHOOL DISTRICT, Sutter Co.**—The Trustees have decided to call another bond election to raise funds in the sum of \$5,000 to be used in the erection of a high school building. The election held on June 15th on the same proposition was lost by a small vote.

**RICHMOND, Contra Costa Co.**—Directors of the Elks' Hall Association have ordered the sale of \$15,000 additional stock.

**HENDERSON SCHOOL DISTRICT, Shasta Co.**—An election held here on June 24th for the purpose of voting bonds for the erection of a new school building carried by a vote of 16 to 1. The bonds will be issued at once, and the contracts to be let for the erection of the building, which is to be completed for the fall term of school.

**MAYFIELD, Santa Clara Co.**—A bond election held here on June 26th was defeated. There were 194 votes cast, 115 for the issue and 79 against. The election failed to carry by 15 votes.

**AUBURN, PLACER CO., CAL.**—An election here for the bonding of the Auburn School District for \$47,000 carried by a majority of 418. The funds will be used in the purchasing of a site, the erection of a building and the purchasing of the necessary equipment.

## BRIDGES AND DAMS.

**YOLO, YOLO CO., CAL.**—Trestle timber and reinforced concrete. Cost not stated. Engineer, State Highway Commission. Forum Bldg., Sacramento. Owners, State of California. Plans have been completed and figures are now being taken by the State Highway Commissioners for the construction of a timber and reinforced concrete trestle over the Yolo By-Pass. Bids will be opened on July 20th. Plans and specifications can be secured from the State Highway Commission.

**SAN FRANCISCO**—Tunnel construction, \$3,300,000. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications are complete for the construction of the Twin Peaks Tunnel. This tunnel will be 12,000 feet long, 38 feet wide and will be lined throughout with reinforced concrete. There will be two car tracks, four stations including the two portals. A general contract will be let. Bids will be opened by the Board of Public Works on August 19th. Complete information can be secured from the City Engineer.

**SANTA CLARA AND SAN BENITO COS., CAL.**—Bridge, steel and concrete. Cost not stated. Engineers, Associated County Surveyors of Santa Clara and San Benito Counties. Owners, Santa Clara and San Benito Counties. Plans

are complete for a steel and reinforced concrete highway bridge to be erected over Pacheco Creek on the Hollister Road. Bids are now being taken and will be opened on July 20th. Plans and specifications can be secured upon application to either of the County Surveyors.

**SAN GREGORIO, SAN MATEO CO., CAL.**—Highway bridge, reinforced concrete and steel. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans are complete and figures are now being called for on the construction of a steel and reinforced concrete bridge over the San Gregorio Creek in San Mateo County. Bids will be opened by the Board of Supervisors on July 20th. Plans and specifications can be secured from the County Surveyor.

**UKIAH, MENDOCINO CO., CAL.**—Bridges, frame and concrete. Cost not stated. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Bids will be opened on July 7th for constructing four timber bridges in Mendocino County. Plans and specifications can be secured from the County Surveyor.

**STANISLAUS CO., CAL.**—Bridges, 3 timber and 1 concrete. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Bids will be opened on July 10th for this work. Plans and specifications can be secured from the County Surveyor.

**PORTLAND, ORE.**—Bridge and viaduct, \$56,000. Engineer, E. W. Holmes, Portland. Owners, City of Portland. The bridge and viaduct will be erected over the Southern Pacific and Oregon-Washington Railroad and Navigation Co.'s tracks at Holgate street. The steel work alone will cost about \$56,000. The viaduct proper will be 300 feet long with two approaches each 150 feet. The bridge will have two spaces and will be 28 feet wide with two six-foot sidewalks. Plans are now being prepared.

## Contracts Awarded.

**DURHAM, BUTTE CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineers, Leonard & Day, Rialto Bldg., S. F. Owners, Butte County. Contractors, Chico Iron Works, Chico. Structural steel. Contract price, \$12,000.

## CHURCHES.

### Contracts Awarded.

**FRESNO, FRESNO CO., CAL.**—Church, 1 story and base, brick and frame, \$21,000. Architect, Henry F. Starbuck. Fresno. Owners, German Lutheran Congregation. Contractor, A. W. Flewe, Fresno, general construction. Barrett-Hicks Co., plumbing and sheet metal work.

## FACTORIES & WAREHOUSES.

**CALIFORNIA**—Reduction plant, reinforced concrete. Cost not stated. Architect's name not given. Owners, Sonoma Magnesite Co., Philan Bldg., S. F. The Sonoma Magnesite Co., 116 Philan Bldg., has completed arrangements for opening one of the largest deposits of magnesite in the United States, and will commence shipping their products within three weeks. Eastern capital has been interested, and their engineers are now looking over the ground in an effort to secure the most favorable site for a plant.

Two locations are being considered. One in Sonoma County about seven miles from Casadero, and the other at Sausalito, Marin County. Over \$160,000 will be spent in constructing the plant. Mr. Bee and Mr. Johnson, 116 Phelan Bldg., are in charge of the work.

**SAN FRANCISCO**—Factory, 3 story and base, brick and steel, \$5,000. Architect, John Little, 604 Mission street. Owners, Bothin Estate. The premises recently destroyed by fire at 12-11 Natoma street are to be repaired. The work will require new interior finish plastering, window frames and sash and electric work. Plans for this work are complete and figures are now being taken.

**OAKLAND, CAL.**—Bakery plant, 2 and 3 story and base. Class A construction. Cost not stated. Architects, Hightell & Headman, Phelan Bldg., S. F. Owners, California Baking Co., Inc. This company has secured a large tract in Oakland and have had preliminary plans prepared for a Class A plant, which will cover a large ground area. Construction will be either of brick and steel or reinforced concrete. Plans provide for a general office building and the plant. The most modern sanitary appliances will be installed. Exterior will probably be faced with cement plaster. Mr. Loesch, representing the owners, is now in the east, and details of construction will not be made public until his return.

**FOLSOM, SACRAMENTO CO., CAL.**—Shop building, 1 story and base, reinforced concrete, \$10,000. Architect, State Department of Engineering, Sacramento. Owners, State of California. The building will cover an area of 90 by 120 feet and will be built by prison labor. The estimate of \$23,000 is placed on materials only. Plans have been completed and work will be started at once.

## FIRE HOUSES AND JAILS.

**RED BLUFF, TEHAMA CO., CAL.**—Jail, 2 story and base, brick and steel. Cost not stated. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners Tehama County. Revised plans for this work have been completed and are now out for figures. Bids will be opened on July 7th. The building will contain the office of the County Sheriff, wards for male and female prisoners and a guard room. There will be steam heat and a hot water supply. Special jail equipment will be required. Exterior of the building will be faced with cement plaster. Plans can be secured from the architect or from the County Clerk.

## FLATS.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$5,000. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, Mary Parker, 2253 15th street, S. F. The building will be erected on the north side of 19th street east of Dolores, and has been designed to contain three modern flats of five rooms each. Interior finish will be of pine throughout. There will be an open fire place in each living room with tile mantel. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, Mrs. Cosgrove. The building will be erected at the corner of 17th avenue and Anza street, and has been designed for a store on the first floor and two flats of five rooms each on the upper floor. Interior will be finished in pine throughout. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Henry Hansen, 158 Divisadero street, S. F. The building will be erected on the south side of Lincoln west of 19th avenue. The building will have a frontage of 25 feet and a depth of 55 feet, and has been designed to contain three flats of four and five rooms. Interior finish will be of pine and redwood with some hardwood floors. There will be a large open fire place in each living room. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Flats, 2, 2 story and base, frame, \$5,000 each. Architect, none. Owner, J. Johnson. The buildings will be erected on the south side of Lake street near 15th avenue, and each has been designed to contain two modern flats of five rooms each. Interiors will be finished in pine with some elm panels. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will be finished in tile with composition floors. Exteriors of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and the will be done by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$4,000. Architect, T. Patterson Ross, 210 California street, S. F. Owner, John Beck. The building will be erected on the south side of State west of Castro, and has been designed to contain two flats of five rooms each, covering an area of 25 by 46 feet. Interior will be finished in pine with some elm panels. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with shiplap. Pressed brick base will be used. Work will be done by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Flats, alteration, frame construction, \$2,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The present building located on East 14th near 5th avenue will undergo extensive alterations. The work will require new plastering, painting, plumbing, electric work and interior finish. Plans are complete and the work will be done by Day Labor.

## GOVERNMENT WORK AND SUPPLIES.

**Douglas, Wyo., Post Office.**  
J. F. Jenkins & Co., Ocala, Fla., who has the contract for the construction of the U. S. post office at Douglas, Wyo.,

will use fixtures and material manufactured by the following named firms in the construction of the building: Plumbing fixtures, Crane Co.; cast iron column radiators, Kewanee Boiler Works; wall radiators, American Radiator Co.; non-conducting coverings, H. W. Johns-Manville Co.; radiator valves, Crane Co.; cabinet and tablet, Frank Adam; conduit, Mark Mfg. Co.; rubber-covered wire, John A. Roehling's Sons Co.; lighting fixtures, Gas Fixture & Brass Co.; pendant switches, General Electric Co.; canopy switches, Cutler-Hammer Mfg. Co.; keyless sockets, Webber Electric Co.; reflectors and glassware, Macbeth-Evans Glass Co.; air valves for radiators, American Radiator Co.; snap switches, Arrow Electric Co.; damper regulator, American Radiator Co.; air valves for end of steam mains, American Radiator Co.; plug receptacles, Harvey-Hubbell Co.; insulating joints, Macallin.

## Berkeley, Cal., Post Office.

As previously reported, the contract for the construction, complete, of the U. S. post office at Berkeley, Cal., was awarded to the Van Sant-Houghton Co., 503 Market street, San Francisco, Cal., at \$120,650. In the construction of the building the following fixtures and material can be used: Plumbing fixtures, John Douglas Co.; cast iron column radiators and wall radiators, American Radiator Co.; radiator valves, Crane Co.; damper regulator, American Radiator Co.; air valves for radiators, J. P. Marsh; air exhausting apparatus, Bishop-Babcock Co.; thermostatic element for controlling oil supply, American Radiator Co.; cabinet and tablet, A. G. Electric & Mfg. Co.; conduit, American Conduit Co.; rubber-covered wire, Simplex Wire & Cable Co.; flush switches, General Electric Co.; plug receptacles, Harvey-Hubbell; air valves for end of steam mains, Monash-Yunker Co.

## Diversion Work.

The Secretary of the Interior has authorized the Reclamation Service to execute contract with the Morrison-Knudsen Co., of Boise, Idaho, for the construction of Three-Mile Falls diversion works in connection with the Umatilla project, Oregon. The contract price is \$31,865. It is understood that no work will be authorized until receipt of certificate from the district counsel that no serious defect in the right of way is known to exist.

## Santa Fe Indian School, Dormitory.

The contract for the construction of an addition to brick dormitory at the Santa Fe Indian School, N. Mex., has been awarded to J. A. Harlan & Son, Albuquerque, N. Mex., at \$16,228.

## Fort Casey, Water Main.

The bid of Jones & Cranten, of Port Townsend, Wash., \$2,950 in amount, has been accepted for installing cast iron water main at Fort Casey, Wash.

## Cement, Bakers, Utah.

The Secretary of the Interior has authorized the Reclamation Service to execute contracts with the Ogden Portland Cement Co., at Bakers, Utah, and the Union Portland Cement Co., at Devil's Slide, Utah, for 5,500 bags of Portland cement for each company for use on the Jackson Lake dam, Minidoka irrigation project, Idaho. The contract price in each case is \$1.33 per bbl f. o. b. factory.

**Yuma, Ariz., Highway Bridge.**

The following bids were received by the Commissioner of Indian Affairs, Department of the Interior, Washington, D. C., for the construction of a steel highway bridge across the Colorado river at Yuma, Ariz.:

Item 1, for all steel in superstructure, except steel in curbs and reinforcing steel in road and foot walks, erected and painted; 2, for reinforced concrete roadway, foot walks, and curbs; 3, for plank roadway and foot walks, with timber guard rail and furring for stringers; 4, for concrete abutments and piers; 5, for grading approaches; 6, unit price for addition or omission of concrete in abutments and pier to be added to or deducted from item 4.

Omaha Structural Steel Works, Omaha, Neb., item 1, \$75,000; 2, \$51,316; 3, \$9,136.50; 4, \$4,041; 5, \$16,794; 6, \$14 per cu yd.

The Clinton Bridge Works, Clinton, Iowa, item 1, \$56,700.

The Midland Bridge Co., Kansas City, Mo., item 1, \$50,180; 2, \$9,137; 3, \$4,250; 4, \$20,180; 5, \$160; 6, \$15 per cu yd.

Penn Bridge Co., Beaver Falls, Pa., item 1, \$52,380; 2, \$9,591; 3, \$3,750; 4, \$16,427; 5, \$500; 6, \$9 per cu yd.

The Snare & Triest Co., New York City, item 1, \$52,264; 2, \$9,740; 3, \$5,055; 4, \$21,000; 5, \$400; 6, \$9 per cu yd.

The Missouri Valley Bridge and Iron Co., Leavenworth Kans., item 1, \$38,466; 2, \$9,008; 3, \$5,789; 4, \$17,387; 5, \$231; 6, \$13 per cu yd.

**—HALLS & SOCIETY BLDGS—**

SAN JOSE, SANTA CLARA CO., CAL.—Lodge Hall, 4 or 5 story base, Class A construction, \$100,000. Architect, Louis Lenzen, 116 South 2nd street, San Jose. Owners, Native Sons of the Golden West. Funds have been secured for the construction of a modern lodge building, which will be erected on N. 1st street south of Santa Clara, covering a considerable ground area. Construction will be fireproof throughout. There will be stores on the first floor, lodge rooms, offices of the organization, banquet hall, library and social rooms on the upper floors. Interior will be finished in pine and hardwood veneer with maple floors in the dance room. Plans provide for steam heat, elevator service, metal window sash and frames. Exterior will be faced with artificial stone, pressed brick and terra cotta. Preliminary plans have been prepared.

COLUSA, COLUSA CO., CAL.—Furniture, Hall of Records. Cost not stated. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Colusa County. Bids will be opened on July 7th for furnishing metal furniture, desks, chairs, filing cabinets, etc., for the new Hall of Records. Full particulars can be obtained from the architect.

EL MONTE, LOS ANGELES CO., CAL.—City Hall, 1 story, reinforced concrete. Cost not stated. Architect, City Engineer, El Monte, Cal. Owners, City of El Monte. Plans have been completed for a one-story City Hall, which will contain the executive offices, city jail and fire department. Interior finish will be of pine throughout. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are complete and may be obtained from the City Clerk. Bids will be opened on July 6th.

SEATTLE, WASH.—Lodge building, 3 story and basement steel and reinforced concrete, \$120,000. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Seattle Masonic Temple Association. The building will be erected at the southwest corner of Pine and Harvard streets, covering an area of 120 by 110 feet. There will be stores on the first floor, offices of the organization, a large banquet room and ball room. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are now being taken.

**HOSPITALS**

NAPA, NAPA CO., CAL.—Hospital, chambers cottage, 1 story, frame and plaster, \$13,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans have been completed for a chambers cottage at the Napa State Hospital. The sum of \$13,000 is available for construction. Bids are now being taken and will be opened by the State Board of Control in two weeks.

VENTURA, VENTURA CO., CAL.—Hospital group, frame and plaster, \$75,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. A new state institution will be erected at Ventura. The first work to be undertaken will be the construction of a frame hospital building and two cottages. About \$75,000 is available for this work. Preliminary plans only have been prepared. Bids will be called for in about three months.

NORWALK, LOS ANGELES CO., CAL.—Hospital group, 2 story, brick, fireproof, \$160,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. A new institution for the care of the state insane is to be erected at Norwalk. All buildings, consisting of a main administration building, hospital, employees' quarters, power house and commissary, will be of brick construction. The administration building and hospital will be erected first. A central steam heating plant will follow. Interior finish will be of pine. Exterior of all buildings will be faced with pressed brick. The architectural department is now engaged on preliminary studies. Bids will not be called for within six months.

STOCKTON, SAN JOAQUIN CO., CAL.—Hospital dairy building, frame and concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids are now being called for and will be opened on July 25th for the construction of new dairy buildings at the Stockton State Hospital. Plans and specifications can be secured from the State Department of Engineering, Sacramento.

HANFORD, KINGS CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$40,000. Architect, Ernest J. Kump, Fresno. Owners, St. Dominican Sisters. Plans have been prepared for a modern two-story fireproof hospital, covering an area of 50 by 102 feet. The first floor will contain office, operating room, and nurses' quarters. Upper floor will be arranged for male and female wards and private rooms. Modern hospital plumbing will be installed. There will be steam heat and a vac-

uum cleaning system. Exterior of the building will be faced with cement plaster. Plans are being prepared.

**HOTELS.**

SAN FRANCISCO—Hotel, 15 story and base. Class A construction, \$150,000 or more. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, J. Sockolov. This building has been mentioned several times before and a steel contract has recently been let for \$52,500. The building will be of fireproof construction and will contain a total of 140 guest rooms besides the hotel lobby and offices. Interior finish will be of pine and hardwood. There will be steam heat, elevator service, a hot water system and vacuum cleaning system. Ornamental plaster will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures are being taken.

SACRAMENTO, CAL.—Hotel, 9 story and base. Class A construction, \$225,500. Architect, L. G. Burgen, Holbrook Bldg., S. F. Owner's name withheld. The building will be erected on one of the prominent business corners of the city and will be of fireproof construction throughout, with a complete steel frame, reinforced concrete walls, concrete floors and brick exterior walls. There will be two stores on the first floor besides the hotel lobby. Upper floors will contain a total of 176 rooms, 70 per cent of which will have private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

NORTH BEND, ORE.—Hotel, 5 story and base, brick and steel, \$100,000. Architect, George Courtney, North Bend. Owner's name withheld. The building will be erected on a corner lot and will cover a considerable ground area. There will be stores, hotel lobby, dining room and kitchen on the first floor. Upper floors will contain a total of 110 rooms, the majority of which will have private baths. Interior finish will be of pine. There will be steam heat, a hot water supply and automatic elevator. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

**Contracts Awarded.**

SEATTLE, WASH.—Hotel, 4 story and base, brick and frame, \$100,000. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yessler Estate. Contractor, Hans Pederson, Madison Bldg., Seattle. Contract price, \$100,000.

**PANAMA - PACIFIC EXPOSITION WORK.**

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, \$25,000. Architect, State Architect of Iowa, Waterloo, Iowa. Owners, State of Iowa. Commissioner G. E. Wilson of Iowa has arrived in San Francisco and is stopping at the St. Francis Hotel. Plans for a two-story frame and plaster building have been prepared by Iowa architects at Waterloo and will reach this city within a week, when bids will be taken. About \$25,-

noon will be spent in construction.

**SAN FRANCISCO**—Concession building, 1 story, frame and plaster. Cost not stated. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Canadian Pacific Railroad, Architect Edward T. Foulkes is taking figures for the construction of a frame and plaster pavilion to be erected by the Canadian Pacific Railroad at the Panama-Pacific Exposition.

**SAN FRANCISCO**—Exhibit building, 1 story, frame and plaster. Cost not stated. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owner, A. A. Gunst. The building will house a large and costly exhibit of the well-known tobacco man. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**SAN FRANCISCO**—Settees and benches. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans are complete and figures have been taken for furnishing benches and settees for the Exposition Grounds. About 9,000 feet of benches will be required. A contract will be awarded in a day or two.

**SAN FRANCISCO**—Concession buildings, 4, 1 story, frame and plaster, \$160,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mr. McConnell. Architect Edward T. Foulkes has prepared plans and work is now underway on four concession buildings on the Exposition Grounds owned by Mr. McConnell, which will cost in the neighborhood of \$160,000. Work is being supervised by Mr. Donocan. These concessions are to be known as The Creation, The Monitor and the Merrimac, Vicksburg and Naren Palace.

**SAN FRANCISCO**—Exhibit building, 1 story, frame and plaster. Cost not stated. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Territory of Hawaii. Bids will be opened in the office of the architect on July 1st for the construction of this building. A complete list of these figures will appear in the next issue of the Building and Industrial News.

**SAN FRANCISCO**—Exhibit Flour mill, etc., \$25,000. Architect, Edward G. Garden, Phelan Bldg., S. F. Owners, Sperry Flour Co. Architect Edward G. Garden is preparing plans for a large exhibit to be erected by the Sperry Flour Co. in Block No. 10 of the Food Products Palace at the Panama-Pacific Exposition. The space is 62 feet 9 inches by 117 feet 3 inches, and will contain a complete mill plant, bake shop, grain testing laboratories, ten booths and special space to be devoted to the demonstration of the best methods of preparing cereals. The work will cost in the neighborhood of \$25,000 exclusive of the mill machinery.

**SAN FRANCISCO**—Exhibit building, 1 story and base, frame and plaster, \$45,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, New Zealand. Working drawings are now being prepared for a large exhibit building which will house the displays to be sent by New Zealand. Exterior of the building will be covered with cement plaster. Bids will be called for shortly.

**SAN FRANCISCO**—Exhibit building, 2 story, frame and plaster. Cost not stated. Architect's name not given. Owners, Denmark, represented by Sec-

retary Herman Korrell, Lack Bldg. The building will represent one of the famous old castles of Denmark. The work has been financed by the Danish American Society of San Francisco. Plans are complete and will shortly be put out for figures which will be confined to members of the society.

#### Contracts Awarded.

**SAN FRANCISCO**—Exhibit building, 2 story, frame and plaster, \$15,902. Architect's name not given. Owners, State of Virginia. Contractors, Aal Franz and Fred P. Fischer, S. F. Contract price, \$15,902.

### RAILROAD CONST., STATIONS AND EQUIPMENT.

**SAN FRANCISCO**—Car Barn, 2 and 3 story, reinforced concrete. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the second Municipal Car Barn, which is to be erected on the block bounded by 18th, Hampshire, York and Mariposa streets. The building will cover an area of 200 by 382 feet and will have a capacity of 196 cars. Construction will be fire-proof with reinforced concrete walls, floors and roof slabs. Plans have been completed and figures for the excavating will be opened on July 8th. General construction will be figured in about one month.

### RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$6,000. Architect, A. E. Peyser, 2257 Union street, S. F. Owner, C. O. Berg, Balboa Bldg., S. F. The dwelling will be erected on Buena Vista Terrace south of Duboce, and has been designed to contain eight rooms and bath. Interior finish will be of pine and hardwood veneer with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath and pressed brick veneer. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$2,750 each. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. These two houses will be erected on the west side of 12th avenue near Anza, and each will contain six rooms and bath. Pine and elm trim will be used. There will be some hardwood floors. Open fire places will be used in the living rooms. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,850. Architect, none. Owner, J. H. Thorup, 261 26th avenue, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on 25th avenue near Anza street. Interior finish will be of pine throughout. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on

metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on the east side of 4th avenue north of California street and will contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be a large open fire place in the living room with a tile mantel. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, John Downey, 3972 23rd street, S. F. The dwelling has been designed for a seven-room house, and will be erected on 25th street near Sanchez. Pine and redwood finish will be used. Oak floors are specified for the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile of brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

**SAN FRANCISCO**—Residences, 2, 2 story and base, frame, \$10,000 each. Architects, MacDonald & MacDonald, Holbrook Bldg., S. F. Owners, Graeme-MacDonald Building Co., Holbrook Bldg. These two houses will be erected on Sea Cliff west of 25th avenue, commanding a beautiful view of the bay and city. They will rank as the highest class houses ever built for sale in San Francisco. Each dwelling will contain six bed rooms with private baths, living room, dining room, library, den and reception hall besides the kitchen and help's quarters. Interiors will be finished in mahogany and white enamel with hardwood floors. There will be furnace heat, open fire places and automatic water heaters. Vacuum cleaning will be installed. Exteriors will be covered with Caen stone. Plans are complete and the work will be done by Day Labor. Following the completion of these two houses the same owners will erect several other similar dwellings in the same neighborhood.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,250. Architect, none. Owners, Oscar Heyman & Bro., 742 Market street, S. F. The dwelling has been designed for a seven-room house with bath, and will be erected on Balboa street west of 44th avenue. Interior finish will be of pine with some hardwood veneer and hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and floor. Exterior of the house will be covered with cement plaster and rustic. Plans are complete and work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,200. Architect, A. Howard Peterson, Blake Bldg., Oakland. Owner, John J. Sjoberg. The dwelling has been designed for a seven-room house with bath and will be erected on

Hampel street. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, H. E. Hanson, 1734 University avenue, Berkeley. The first floor of the building will be used for a large department store. Second floor will contain apartments. Interior finish will be of pine throughout. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans will be ready for figures about July 10th.

## THEATRES.

OAKLAND, CAL.—Theatre and store, 2 story and base. Class A construction, \$70,000. Architect, Edward T. Foulkes, Crocker Bldg., S. E. Owners, Bishop Co. The building will be erected at the northwest corner of 11th and Harrison streets and will be fireproof throughout. Plans have been revised and figures are again being taken. Exterior will be faced with cement plaster.

## SEALED PROPOSALS.

## PROPOSALS FOR EXCAVATION.

EXCAVATION—Department of the Interior, United States Reclamation Service, Montrose, Colo.—Sealed proposals will be received at the office of the United States Reclamation Service, Montrose, Colo., until 4 o'clock p. m. July 4, 1914, for the construction of about 3.4 miles of the Selig canal and 3.5 miles of the Upper Selig extension canal of the Selig canal system, Uncompaghe Valley project, in the vicinity of Montrose, Colorado. This work involves the excavation of about 145,000 cubic yards of material in open cut. For particulars address the United States Reclamation Service, Montrose, Colo., or 319 Commonwealth Building, Denver, Colo. FRED D. PYLE, project manager.

## PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR, 858—Proposals for Cast Iron Water Pipe and Fittings, Valves, Steel Rail, Angle Bars, Frogs, Switches, Switch Stands, Steel Shapes and Plates, Steel Bolts, Steel Cable, Rivets, Bolts, Boat Spikes, Turnbuckles, Nails, Steel Washers, Galvanized Wire Lath, Copper Screening, Brass Bars, Copper Bars, Sheet Copper, Sheet Brass, Bronze Bars, Stanchions, Lead Pipe, Motor-Driven Woodworking, Shaper, Wood Trimmers, Motor-Driven Sailmaker's Sewing Machine, Leather Belting, Blotting Paper, Flour, and Pine Dipper Sticks.—Sealed proposals will be received at the office of the General Purchasing Officer, the Panama Canal, Washington, D. C., until 10:30 a. m. July 6, 1914, and will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular may be obtained from this office or the offices of the Assistant Purchasing Agent, 1036 North Point Street, San Francisco, Cal.; also from the Engineer's office in the following cities: Seattle, Wash., Los Angeles, Cal., E. C. BOGGS, Major, Corps of Engineers, U. S. Army, General Purchasing Officer.

## PROPOSALS FOR BOILERS.

BOILERS—Sealed proposals indorsed "Proposals for Boilers and Accessories" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 11, 1914, and then and there publicly opened, for furnishing and installing four 100-horsepower, water-tube boilers, a fan and motor, valve, piping and all other accessories in the central power plant, United States naval hospital, Las Animas, Colo. Plans and specifications can be obtained on application to the bureau, H. R. STANFORD, chief of bureau.

## PROPOSALS FOR BUILDING.

PURSUANT to Resolution No. 5226, N. S. passed June 23rd, 1914, the Council of the City of Oakland will receive bids for furnishing of all materials, labor and workmanship required in connection with the construction, erection and finish of carpentry and millwork, plumbing and gas fitting, commission roofing, sheet metal and skylights, glass and glazing, iron painting, electric, automatic, fire extinguishing system, architectural metal, heating and ventilating, for the building of an Auditorium, to be erected on the grounds of Peralta Park located on the southerly side of Twelfth street between Fallon street and Lake Shore avenue in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals prepared and furnished by the City through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bids for Auditorium," (specifying work bid upon), addressed to the Council and deposited by the bidder, or his agent, with said Council while in session between 11 o'clock a. m. and 12 o'clock noon, Pacific Time, on the 14th day of July, 1914, in the room of the City in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and public declared in open session of the Council.

All said materials, labor and workmanship to be consist of that required by and be in accordance with the plans, drawings, and specifications prepared herefor and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent, 10%, of the aggregate amount of the proposal. Such check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bond of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty days after receiving notice of award.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the Auditor the faithful performance of the contract, and in amount equal to twenty-five per cent, (25%) of the amount named in the agreement. The contractor shall execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing material to be used upon the said work, and in an amount equal to fifty per cent, (50%) of the amount named in said agreement.

A bound set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The plans and drawings may be had at said office of the Supervising Architect after June 25th, 1914, within a reasonable time after application, and deposit of twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant; additional copies will, however, be furnished, provided the applicant pays the cost of reproduction. Such additional copies to be returned to the Architect together with the first set. Information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted. Each bid shall bear the affidavit of the bidder as required by Section 196 of the Charter of the City of Oakland.

FRANK M. SMITH, City Clerk.

## PROPOSALS FOR WHARF.

WHARF—Sealed proposals indorsed "Proposals for Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 22, 1914, and then and there publicly opened, for a timber and pile wharf at the United States naval coal depot, San Francisco, Cal. Estimated cost, \$3,500. Plans and specifications can be obtained on application to the bureau of the commanding officer of the coal depot, H. R. STANFORD, chief of bureau.

## NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed proposals or bids will be received by the Board of Supervisors of Santa Clara County, Cal., in their rooms in the Court House, in the City of San Jose, in said county, up to 11 o'clock a. m. of Monday, July 20, 1914, for the construction of a steel highway bridge over Pacheco Creek between the boundaries of San Benito and Santa Clara at the road leading from Hollister to San Felipe, in accordance with plans and specifications for said bridge jointly prepared by the Surveyors of Santa Clara and San Benito counties, which file in the Chambers of the Board of Supervisors of Santa Clara county.

Each bid must be accompanied by a certified check in the sum of ten per cent of the amount bid, drawn upon some reliable bank in favor of Henry A. Pfister, County Clerk, as indicated damages in case the successful bidder fails to file a satisfactory bond as required by said Board within five days after the faithful performance of the conditions of the contract.

Bids for this work will also be received by the Board of Supervisors of Santa Clara county, in the town of Hollister, at the contract for said work will be awarded to the successful bidder as may be agreed upon by the Board of Supervisors of San Benito county and the Board of Supervisors of Santa Clara county as the lowest responsible bidder for said work.

The Board reserves the right to reject any and all bids.

All bids must be addressed to Henry M. Ayer, Chairman of the Board of Supervisors of Santa Clara county, and indorsed "Bids for Steel Highway Bridge over Pacheco Creek."

By order of the Board of Supervisors of Santa Clara county.

Attest: HENRY A. PFISTER, Clerk.

By F. A. Schilling, Deputy Clerk.

## NOTICE TO BIDDERS.

NOTICE is hereby given that the Clerk of the Board of Supervisors of the County of Mendocino, State of California, will receive at his office in Ukiah, Mendocino County, California, up to 2 p. m. of Tuesday, July 7th, 1914, sealed bids for the construction of a wooden bridge across Poonkinney Creek near the new Two-Rivers and Covelto Road in the Third Supervisor District of said county.

Plans and specifications for this work have been duly adopted by the Board of Supervisors of said county, the office of said clerk, to which said plans and specifications all bidders are hereby referred.

All bids to be sealed and accompanied by a certified check for 10 per cent of the amount of the bid.

The successful bidder will be required to enter into a contract with said County for the construction of said bridge, and will also be required to give a bond in half the total amount of said bid for the faithful performance of the work, and another bond in like amount for the protection of material men and laborers or mechanics employed on the work.

The Board reserves the right to reject any and all bids.

HALE McCOWEN, Clerk of the Board of Supervisors.

## NOTICE TO BIDDERS.

Cash, a bidder's bond, or a certified check in the sum of ten per centum

(10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. E. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Elevator Work, California State Library, State Capitol Building, Sacramento, California."

[SIGNED] W. E. McCLURE,  
State Engineer.

NOTICE TO CONTRACTORS.

PROPOSALS are now being received from various manufacturers of lawn settees and benches for use on the Exposition Grounds. Between 7,000 and 8,000 five foot benches will be required.

Full information may be had by applying at the office of the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco.

Bids will be received until Tuesday morning, June 30th, 1914, at 9 A. M.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (\*)

PROPOSALS FOR TURBINE.

TURBINE—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. July 14, 1914, for furnishing a variable head turbine for the Salt River Project, Arizona. For particulars address U. S. Reclamation Service, 105 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

PROPOSALS FOR METAL FLUMES.

METAL FLUMES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until 2 o'clock p. m. July 1, 1914, for furnishing about 1,756 linear feet of metal flumes of various diameters ranging from 5 feet 9 inches to 11 feet 6 inches. For particulars address the United States Reclamation Service, Washington D. C. or Great Falls, Mont. F. H. NEWELL, director.

PROPOSALS FOR BRIDGE WORK.

NOTICE is hereby given that sealed proposals or bids will be received by the Board of Supervisors of Santa Clara County, California, in their rooms in the Court House, in the City of San Jose, up to 11 o'clock a. m. of Monday, July 20, 1914, for the construction of a reinforced concrete extension to the bridge over Llagas Creek on San Martin Avenue in accordance with plans and specifications on file in the chambers of the Board of Supervisors.

Each bid must be accompanied by a certified check in the sum of ten per cent of the amount bid, drawn upon some reliable bank in favor of Henry A. Pfister, County Clerk, as liquidated damages in case the successful bidder fails to file a satisfactory bond as required by said Board within five days for the faithful performance of the conditions of the contract.

The Board reserves the right to reject any and all bids.

All bids must be addressed to Henry M. Ayer, Chairman of the Board of

Supervisors of Santa Clara County, and indorsed "Bids for Extension of Bridge at San Martin Avenue."

By order of the Board of Supervisors of Santa Clara County.

Attest: HENRY A. PFISTER,  
Clerk.

By F. A. Schilling, Deputy Clerk.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that the Board of Trustees of the City of Fresno, County of Fresno, State of California, on Monday, the 6th day of July, 1914, beginning at the hour of 8 o'clock p. m. and ending at the hour of 9 o'clock p. m. of said day, will be in session at the Council Chamber in the City Hall of said City of Fresno, for the purpose of receiving, and will receive proposals or bids for the following:

A combined mixer and heater for bituminous road mixtures, the same to have a capacity of approximately ten cubic feet per batch of mixed material, with approximately a six-horsepower engine to operate the mixer, and with approximately a twelve-horsepower boiler for heating and mixing.

Bidders must submit specifications therewith with their bids.

Said bids will be opened at the hour of 9 o'clock p. m. on said 6th day of July, 1914, and all bids must be accompanied by a check certified by a responsible bank, payable to the order of the Mayor and City Clerk of said City of Fresno, for an amount not less than ten per cent of the amount of the proposal.

The Board of Trustees reserves the right to reject any or all bids made.

The successful bidder shall within five days after contract has been awarded make and execute a written contract therewith with said City of Fresno in form approved by the City Attorney of said City, and shall also make and execute a bond to said City and file the same with the City Clerk in a sum not less than one-half of the total amount of said bid, which said bond shall be conditioned that said combined mixer and heater shall be delivered to said City of Fresno, in accordance with the specifications submitted therewith, within the time specified in said contract, not to exceed in any event ninety days from the date of said contract.

Dated this 9th day of June, 1914.

W. H. RYAN,  
City Clerk of the City of Fresno.

NOTICE TO CONTRACTORS.

SEALED bids will be received by the Clerk of the Board of Supervisors of Marin County, California, up to 2 o'clock p. m. of Tuesday, the 7th day of July, 1914, for the construction of a wooden bridge with concrete foundations to be constructed at the crossing of Nicasio Creek between Stations "C1" and "C2" upon the proposed new road in Road Districts Nos. 4 and 6, Marin County, California.

All in strict accordance with the plans and specifications therewith now on file in the office of the County Clerk of said County.

Each bid shall be accompanied by a certified check drawn on any responsible bank for an amount not less than ten per cent of the aggregate of the proposal and made payable to the order of the Chairman of the Board of Supervisors of Marin County, as a guarantee that the bidder will enter into a contract for the performance of said work.

The Board reserves the right to reject any or all bids.

R. E. GRAHAM,  
Clerk of the Board of Supervisors.

PROPOSALS FOR REINFORCED CONCRETE BRIDGE.

OFFICE of the Clerk of the City of Napa, City Hall, Napa, California.

Notice is hereby given that in pursuance of an order of the City Council of the City of Napa, made and entered on the 2nd day of June, 1914, plans and specifications were adopted by the City Council for building a reinforced steel and concrete bridge across Napa River where East First street crosses said river, which plans and specifications are now on file in the City Clerk's office.

And further notice is hereby given that sealed bids will be received by the undersigned at his office for constructing said bridge according to plans and specifications, and opened on **Thursday, July 2nd, 1914, at 2:30 p. m.** No bid will be received unless accompanied by a certified check or certificate of deposit equal to 5 per cent of the total amount of bid, made payable to the City Clerk of the City of Napa; said check or certificate will be returned to the party or parties whose bids are not accepted, and to the party whose bid is accepted, upon his entering into a contract with said City of Napa for said work and giving such bond as the Council may hereafter determine.

Copies of plans, specifications and contract may be had upon application to the City Clerk and upon a deposit of \$10, which will be returned to applicant upon his returning said plans and other papers in good condition. Bidders shall bid only upon forms which will be furnished upon application.

The Council reserves the right to reject any and all bids.

By order of the City Council,  
DAVID C. SCHREINER,  
City Clerk.

#### PROPOSALS FOR BUILDING.

**BUILDING, ETC.**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at **3 p. m. July 20, 1914**, for the construction, complete (including mechanical equipment, including heating, ventilation and approaches), of the United States post office at Bozeman, Mont. Two-story and basement building, ground area 4,900 square feet, partially fire-proof construction, stone and brick facing and composition roof. Drawings and specifications may be obtained from the custody of the State at Bozeman, Mont., or at this office, in the discretion of the supervising architect, O. WEN-DERTH, supervising architect.

#### PROPOSALS FOR GENERATOR.

**GENERATOR**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until **2 o'clock p. m. July 14, 1914**, for furnishing one vertical alternating-current generator for the Salt River project, Arizona. For particulars apply to U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

#### NOTICE TO CONTRACTORS.

**NOTICE IS HEREBY GIVEN** that the Board of Education of the City of Fresno School District will receive sealed bids for building, constructing and making alterations and additions to the present **Shop Building** located on Block No. 122, Fresno City (known as High School Block) and furnishing all work and materials therefor, according to the plans and specifications, which may be seen at the office of W. D. Coates Jr., Room 626 Rowell Building, where the terms and conditions of bidding may be learned. Bids must be addressed to C. C. Starr, Secretary, and left at his office in the High School Building on or before **5 p. m. July 2nd, 1914**, when the bids will be opened. The Board reserves the right to reject any or all bids.

By order of said Board of Education,  
C. C. STARR, Secretary.

#### ADDITIONAL TERMS AND CONDITIONS.

All bids must be sealed and have a copy of this notice attached and be accompanied by a certified check in the sum of at least 10% of such bid, said sum to be forfeited to the undersigned in the event of the bid being accepted and the bidder failing to execute or neglecting within 5 days after notice of acceptance of bid to enter into a satisfactory contract with the undersigned for the construction and completion and the furnishing of all work, labor and material necessary thereto.

#### PROPOSALS FOR DREDGING.

**DREDGING**—U. S. Engineer, Office 445 Custom House, San Francisco, Cal.—Sealed proposals for dredging in San Joaquin River and Stockton Channel, Cal., will be received here until **10 a.**

**m. July 25, 1914**, and then publicly opened. Information on application. S. A. CHERNEY, major engineers.

#### STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION.

##### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 335 Forum Bldg., Sacramento, Cal., until **2 o'clock P. M. on July 20th, 1914**, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made.

The proposed concrete and timber trestles in Yolo County across the Yolo River-pass, on the southerly side of the Southern Pacific Railroad, a length of about 3 miles.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

H. H. FLESCH, Director.  
NEWELL D. DARLINGTON,  
CHARLES F. STERN,  
California Highway Commission.  
AUSTIN B. FLETCHER,  
Highway Engineer.  
CHARLES C. CARLETON,  
Acting Secretary.

Dated: June 23, 1914. (P)

##### NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock, noon, Monday, July 20th, 1914**, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the **Gymnasium California School for Deaf and Blind, Berkeley, California**, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the

Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Gymnasium, California, School for Deaf and Blind, Berkeley, California."

(SIGNED) W. F. McCLURE,

State Engineer. (\*)

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Laundry, Southern California State Hospital, Patton, California."

(SIGNED) W. F. McCLURE,

State Engineer. (\*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

#### SAN FRANCISCO.

**STATE EXHIBIT BUILDING**—2 story, frame and plaster, \$25,000. San Francisco, Architect, State Architect of Iowa, Waterloo, Iowa. Owners, State of Iowa, Commissioner G. E. Wilson of Iowa has arrived in San Francisco and is stopping at the St. Francis Hotel. Plans for a two-story frame and plaster building have been prepared by Iowa architects at Waterloo and will reach this city within a week when bids will be taken. About \$25,000 will be spent in construction.

**CONCESSION BUILDING**—1 story, frame and plaster. Cost not stated. San Francisco, Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Canadian Pacific Railroad. Architect Edward T. Foulkes is taking figures for the construction of a frame and plaster pavilion to be erected by the Canadian Pacific Railroad at the Panama-Pacific Exposition.

**EXHIBIT BUILDING**—1 story,

frame and plaster. Cost not stated. San Francisco, Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owner, M. S. Gunst. The building will house a large and costly exhibit of the well-known tobacco man. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**SETTEES AND BENCHES**—Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans are complete and figures have been taken for furnishing benches and settees for the Exposition grounds. About 9,000 feet of benches will be required. A contract will be awarded in a day or two.

**CONCESSION BUILDINGS**—4, 1 story, frame and plaster, \$160,000. San Francisco, Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mr. McConnell. Architect, Edward T. Foulkes has prepared plans and work

is now underway on four concession buildings on the Exposition grounds owned by Mr. McConnell, which will cost in the neighborhood of \$100,000. Work is being supervised by Mr. Donovan. These concessions are to be known as The Creation, The Monitor and The Merrimac, Yicksburg and Naren Palace.

**EXHIBIT BUILDING**—1 story, frame and plaster. Cost not stated. San Francisco. Architect, C. W. Dickey. Central Bank Bldg., Oakland. Owners, Territory of Hawaii. Bids will be opened in the office of the architect on July 1st for the construction of this building. A complete list of these figures will appear in the next issue of the Building and Industrial News.

**EXHIBIT FLOUR MILL, ETC.**—\$25,000. San Francisco. Architect, Edward G. Garden. Phelan Bldg., S. F. Owners, Sperry Flour Co. Architect Edward G. Garden is preparing plans for a large exhibit to be erected by the Sperry Flour Co. in Block No. 10 of the Food Products Palace at the Panama-Pacific Exposition. The space is 62 feet 9 inches by 117 feet 3 inches, and will contain a complete mill plant, bake shop, grain testing laboratories, ten booths and special space to be devoted to the demonstration of the best methods of preparing cereals. The work will cost in the neighborhood of \$25,000, exclusive of the mill machinery.

**EXHIBIT BUILDING**—2 story, frame and plaster, \$15,000. San Francisco. Architect, Lewis P. Hobart. Crocker Bldg., S. F. Owners, New Zealand. Working drawings are now being prepared for a large exhibit building which will house the displays to be sent by New Zealand. Exterior of the building will be covered with cement plaster. Bids will be called for shortly.

**EXHIBIT BUILDING**—2 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, Denmark, represented by Secretary Herman Korrell, Lick Bldg. The building will represent one of the famous old castles of Denmark. The work has been financed by the Danish American Society of San Francisco. Plans are complete and will shortly be put out for figures, which will be confined to members of the society.

**RESIDENCE**—2 story and base, frame, \$6,000. San Francisco. Architect, L. E. Peyser, 2257 Union street, S. F. Owner, C. O. Berg, Balboa Bldg., S. F. The dwelling will be erected on Buena Vista Terrace south of Duboce, and has been designed to contain eight rooms and bath. Interior finish will be of pine and hardwood veneer with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath and pressed brick veneer. Plans are complete and the work will be done by Day Labor.

**RESIDENCES**—2, 2 story and base, frame, \$2,750 each. San Francisco. Architect, none. Owner, A. R. Lapham, 511 12th avenue, S. F. These two houses will be erected on the west side of 12th avenue near Anza, and each will contain six rooms and bath. Pine and elm trim will be used. There will

be some hardwood floors. Open fire places will be used in the living rooms. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$2,850. San Francisco. Architect, none. Owner, J. H. Thorup, 261 26th avenue, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on 25th avenue near Anza street. Interior finish will be of pine throughout. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 20 Presidio Terrace, S. F. The dwelling will be erected on the east side of 16th avenue north of California street, and will contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be a large open fire place in the living room with a tile mantel. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, John Downey, 3972 23rd street, S. F. The dwelling has been designed for a seven-room house and will be erected on 25th street near Sanchez. Pine and redwood finish will be used. Oak floors are specified for the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

**RESIDENCES**—2, 2 story and base, frame, \$10,000 each. San Francisco. Architects, MacDonald & MacDonald, Holbrook Bldg., S. F. Owners, Graeme-Macdonald Building Co., Holbrook Bldg., S. F. These two houses will be erected on Sea Cliff west of 25th avenue, commanding a beautiful view of the bay and city. They will rank as the highest class houses ever built for sale in San Francisco. Each dwelling will contain six bed rooms with private baths, living room, dining room, library, den and reception hall besides the kitchen and help's quarters. Interiors will be finished in mahogany and white enamel with hardwood floors. There will be furnace heat, open fire places and automatic water heaters. Vacuum cleaning will be installed. Exteriors will be covered with Caen stone. Plans are complete and the work will be done by Day Labor. Following the completion of these two houses the same owners will erect several similar dwellings in the same neighborhood.

**RESIDENCE**—2 story and base, frame, \$4,250. San Francisco. Architect, none. Owners, Oscar Heyman & Bro., 742 Market street, S. F. The

dwelling has been designed for a seven-room house with bath, and will be erected on Balboa street west of 11th avenue. Interior finish will be of pine with some hardwood veneer and hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and floor. Exterior of the house will be covered with cement plaster and rustic. Plans are complete and work will be done by Day Labor.

**APARTMENT HOUSE**—5 story and base. Class C construction, \$10,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Post street west of Larkin and has been arranged with two and three room apartments on the first four floors and a large residence for the owner on the fifth floor. Interior will be finished in pine and elm with hardwood finish in the fifth floor. Plans provide for steam heat, wall beds, elevator service, hot water supply and vacuum cleaning. All suites will have private baths which will be finished in tile. Tile and marble will be used in the entrance. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$20,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Bertha Oberfeld. The building will be erected at the southeast corner of Fillmore and Green streets, covering an area of 60½ feet by 77½ feet. There will be a number of two and three room apartments with private baths and wall beds. Plans provide for steam heat. Interiors will be finished in pine with elm panels. Exterior of the building will be covered with rustic and cement plaster on metal lath. Carpentry work will be done by the owner and other parts of the work will be segregated.

**APARTMENT HOUSE**—6 story and base, reinforced concrete, \$40,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, C. A. Meussdorffer. The building will be erected on the east side of Jones street north of Sutter, having a frontage of 30 feet and a depth of 55 feet. There will be six large apartments finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and will be equipped with showers. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

**REDUCTION PLANT**—Reinforced concrete. Cost not stated. California. Architect's name not given. Owners, Sonoma Magnesite Co., Phelan Bldg., S. F. The Sonoma Magnesite Co., 416 Phelan Bldg., has completed arrangements for opening one of the largest deposits of magnesite in the United States, and will commence shipping their products within three weeks. Eastern capital has been interested, and their engineers are now looking over the ground in an effort to secure the most favorable site for a plant

Two locations are being considered, one in Sonoma County, about seven miles from Casadero, and the other at Sausalito, Marin County. Over \$160,000 will be spent in constructing the plant. Mr. Bee and Mr. Johnson, 416 Phelan Bldg., are in charge of the work.

**FACTORY**—3 story and base, brick and steel, \$5,000. San Francisco, Architect, John Eitler, 604 Mission street, S. F. Owners, Bothin Estate. The premises recently destroyed by fire at 12-14 Natoma street are to be repaired. The work will require new interior finish plastering, window frames and sash and electric work. Plans for this work are complete and figures are now being taken.

**FLATS**—1 story and base, frame, \$5,000. San Francisco, Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, Mary Parker, 2355 15th street, S. F. The building will be erected on the north side of 19th street east of Dolores, and has been designed to contain three modern flats of five rooms each. Interior finish will be of pine throughout. There will be an open fire place in each living room with tile mantel. Bath rooms will have the wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**FLATS**—2 story and base, frame, \$5,000. San Francisco, Architects, Rhodes & Marisch, 3372 16th street, S. F. Owner, Mrs. Cosgrove. The building will be erected at the corner of 17th avenue and Anza street, and has been designed for a store on the first floor and two flats of five rooms each on the upper floor. Interior will be finished in pine throughout. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owner, Henry Hansen, 158 Divisadero street, S. F. The building will be erected on the south side of Lincoln west of 16th avenue. The building will have a frontage of 25 feet and a depth of 55 feet, and has been designed to contain three flats of four and five rooms. Interior finish will be of pine and redwood with some hardwood floors. There will be a large open fire place in each living room. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**FLATS**—2, 2 story and base, frame, \$5,000 each. San Francisco, Architect, none. Owner, J. Johnson. The buildings will be erected on the south side of Lake street near 17th avenue, and each has been designed to contain two modern flats of five rooms each. Interiors will be finished in pine with some elm panels. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will be finished in tile with composition floors. Exteriors of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**FLATS**—2 story and base, frame, \$1,000. San Francisco, Architect, T. Patterson Ross, 310 California street, S. F. Owner, John Beck. The building will be erected on the south side of State west of Castro, and has been designed to contain two flats of five rooms each, covering an area of 25 by 16 feet. Interior will be finished in pine with some elm panels. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with shiplap. A pressed brick base will be used. Work will be done by Day Labor. Materials are now being purchased.

**CAR BARN**—2 and 3 story, reinforced concrete. Cost not stated. San Francisco, Engineer, City Engineer. Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the second Municipal Car Barn which is to be erected on the block bounded by 18th, Hampshire, York and Mariposa streets. The building will cover an area of 200 by 382 feet and will have a capacity of 196 cars. Construction will be fireproof with reinforced concrete walls, floors and roof slabs. Plans have been completed and figures for the excavating will be opened on July 8th. General construction will be figured in about a month.

**HOTEL**—15 story and base. Class A construction, \$150,000 or more. San Francisco, Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, J. Sockolov. This building has been mentioned several times before and a steel contract has recently been let to the Central Iron Works for \$52,500. The building will be of fireproof construction and will contain a total of 140 guest rooms besides the hotel lobby and offices. Interior finish will be of pine and hardwood. There will be steam heat, elevator service, a hot water system and vacuum cleaning system and vacuum cleaning. Ornamental plaster will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are complete and segregated figures are being taken.

**STORES AND DANCE HALL**—2 story and base. Class A construction, \$75,000. San Francisco, Architects, Cunningham & Politeo, First National Bank Bldg., S. F. owner, Walter E. Dean. The building will be erected at the corner of Eddy and Jones streets, covering a full Fifty Vara lot. Construction will be class A throughout. Exterior will be faced with pressed brick and terra cotta. Plans are being prepared.

**OFFICE ADDITION AND ALTERATION**—Cost not stated. San Francisco, Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, San Francisco Commercial Club. The rooms of the club on the 14th floor of the Merchants' Exchange Bldg., will be enlarged and entirely refinished. Associated with the architect in this work is Frederick Whitton, 251 Kearny street, who will supervise all construction.

**STORES**—1 story, frame, \$7,000. San Francisco, Architect, Edward Garden, Phelan Bldg., S. F. Owners, Lange Investment Co. The building will be erected at the corner of Carl and Cole streets, and will contain several modern stores. Interiors will be finished

in pine throughout. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

**TUNNEL CONSTRUCTION**—\$3,300,000. San Francisco, Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications are complete for the construction of the Twin Peaks Tunnel. This tunnel will be 12,000 feet long, 38 feet wide and will be lined throughout with reinforced concrete. There will be two car tracks, four stations including the two portals. A general contract will be let. Bids will be opened by the Board of Public Works on August 19th. Complete information can be secured from the City Engineer.

### Contracts awarded.

**EXHIBIT BUILDING**—2 story, frame and plaster, \$15,902. San Francisco, Architect's name not given. Owners, State of Virginia. Contractors, Val Franz and Fred P. Fischer, S. F. Contract price, \$15,902.

### OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base,  
frame, \$3,200. Oakland, Cal. Archi-  
tect, A Howard Peterson, Blake Bldg.,  
Oakland. Owner, John J. Sjoberg. The  
dwelling has been designed for a seven-  
room house with bath, and will be  
erected on Hampel street. Interior will  
be finished in pine and hardwood veneer.  
Hardwood floors will be used in  
the living room, dining room and re-  
ception hall. There will be furnace  
heat and open fire places. Mantels will  
be of tile. Exterior of the house will  
be covered with cement plaster on  
metal lath. Plans are complete and fig-  
ures are being taken.

RESIDENCE — 2 story and base,  
frame, \$5,000. Berkeley, Alameda Co.,  
Cal. Architect, none. Owner, H. E.  
Hanson, 1724 University avenue, Berke-  
ley. The house has been designed for  
a seven-room dwelling and will be  
erected on Derby street west of Dana.  
Interior finish will be of pine and red-  
wood. Hardwood floors will be used  
in the principal rooms. There will be  
furnace heat and open fire places.  
Mantels will be of tile. Bath room will  
have tile wainscot and composition  
floor. Exterior of the house will be  
covered with rustic and shingles. Plans  
are in the hands of the owner and  
work will be done by Day Labor.

RESIDENCE — 2 story and base,  
frame, \$1,000. Oakland, Cal. Archi-  
tects, Elite Planners, 1844 5th avenue,  
Oakland. Owner, James Langham. The  
dwelling will be erected in Adams  
Point, and will contain seven rooms,  
bath and sleeping porch. Interior fin-  
ish will be of pine with some elm  
panels. Hardwood floors will be used  
throughout. There will be furnace  
heat and open fire places. Mantels will  
be of tile. Bath room will have tile  
wainscot and composition floor. Ex-  
terior of the house will be covered  
with cement plaster on metal lath.  
Plans are being prepared and when  
complete the work will be done by  
Day Labor.

RESIDENCE — 2 story and base,  
frame. Cost not stated. Oakland, Cal.  
Architect, Chester H. Miller, Daifziel  
Bldg. Oakland. Owner, Jessie A. Ber-  
ger. The dwelling has been designed  
for a seven-room house with bath and

sleeping porch, and will be erected on  
21st street near 5th avenue. Interior  
finish will be of pine throughout.  
Hardwood floors will be used in the  
principal rooms. Plans provide for  
furnace heat and open fire places. Man-  
tels will be of tile. Bath room will  
have tile wainscot and composition  
floor. An automatic water heater will  
be installed. Exterior of the house  
will be covered with cement plaster on  
metal lath. Plans are complete and  
figures are being taken.

RESIDENCE — 2 story and base,  
frame. Cost not stated. Berkeley,  
Alameda Co., Cal. Architect, Sidney B.  
Newson, Nevada Bank Bldg., S. F.  
Owner, E. B. Davis. The dwelling will  
be erected at the southeast corner of  
Brookside and Claremont avenues, and  
will cover a large ground area. A ga-  
rage will also be erected on the prop-  
erty. Interior of the house will be  
finished in pine and hardwoods with  
hardwood floors in the principal rooms.  
There will be furnace heat and open  
fire places. Mantels will be of tile or  
brick. Bath rooms will be finished in  
tile. Automatic water heaters will be  
installed. Exterior of the dwelling  
and garage will be covered with ce-  
ment plaster on metal lath. Revisions  
have been completed and plans are  
now out for figures for the second  
time.

RESIDENCE — 2 story and base,  
frame, \$4,500. Oakland, Cal. Archi-  
tect, H. Schultze, 512 East 17th street,  
Oakland. Owner, Dr. W. W. Shannon.  
The dwelling will be erected on Lake  
Shore Drive and has been designed to  
contain seven rooms and bath. Inter-  
ior finish will be largely of pine with  
some hardwood veneer. Hardwood  
floors will be used in the principal  
rooms. There will be furnace heat  
and open fire places. Mantels will be  
of tile. An automatic water heater  
will be installed. Bath room will have  
tile wainscot and composition floor.  
Exterior of the house will be covered  
with cement plaster on metal lath.  
Plans are complete and figures are be-  
ing taken.

RESIDENCE — 2 story and base,  
frame. Cost not stated. Oakland, Cal.  
Architect, John Hudson Thomas, First  
National Bank Bldg., Berkeley. Own-  
er, H. E. Jackson. The dwelling will  
be erected in Crocker Highlands and  
has been designed to contain seven  
rooms, bath and sleeping porch. Inter-  
ior will be finished in pine through-  
out. Hardwood floors will be used in  
the principal rooms. There will be  
furnace heat and open fire places.  
Mantels will be of tile. Bath room will  
have tile wainscot. An automatic  
water heater will be installed. Ex-  
terior of the house will be covered  
with cement plaster on metal lath.  
Plans are now being prepared.

RESIDENCE — 2 story and base,  
frame. Cost not stated. Berkeley,  
Alameda Co., Cal. Architect, John  
Hudson Thomas, First National Bank  
Bldg., Berkeley. Owner, E. L. Brock.  
The dwelling has been designed for a  
seven-room house with bath and sleep-  
ing porch, and will be erected in Berke-  
ley Highlands. Interior will be  
finished in pine and hardwoods. Hard-  
wood floors will be used in the living  
room, dining room and reception hall.  
Plans provide for furnace heat and  
open fire places. Mantels will be of  
tile or brick. Bath room will have  
tile wainscot and composition floor.  
An automatic water heater will be in-  
stalled. Exterior of the house will be

covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**RESIDENCE**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. T. Froble. The dwelling will contain seven rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Working drawings are nearly complete and figures will be called for shortly.

**APARTMENT HOUSE**—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, Henry Holst. The building will be erected on Orchard street at the corner of Brook, and has been designed to contain four suites of four rooms and bath each. Pine will be used for interior finish. Some oak floors will be specified. There will be open fire places. Mantels will be of tile. Wall beds are specified. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**APARTMENT HOUSE**—3 story and base, frame. \$15,000. Oakland, Cal. Architects, Rhodes & Marisch, 3372 16th street, S. F. The building will be erected in East Oakland, and has been designed to contain fifteen apartments. Interiors will be finished in pine throughout. There will be a central heating system and a hot water supply. All suites will have private bath rooms and wall beds. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**BAKERY PLANT**—2 and 3 story and base, Class A construction. Cost not stated. Oakland, Cal. Architects, Rigibetti & Headman, Phelan Bldg., S. F. Owners, California Baking Co., Inc. This company has secured a large tract in Oakland and have had preliminary plans prepared for a class A plant, which will cover a large ground area. Construction will be either of brick and steel or reinforced concrete. Plans provide for a general office building and the plant. The most modern sanitary appliances will be installed. Exterior will probably be faced with cement plaster. Mr. Loesch, representing the owners, is now in the east, and details of construction will not be made public until his return.

**FLATS**—Alteration, frame construction, \$2,000. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The present building located on East 14th near 5th avenue will undergo extensive alterations. The work will require new plastering, painting, plumbing, electric work and interior finish. Plans are complete and the work will be done by Day Labor.

**THEATRE AND STORE**—2 story and base, Class A construction, \$70,000. Oakland, Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Eislup Co. The building will be erected at the northwest corner of 11th and Harrison streets and will be three

throughout. Plans have been revised and figures are again being taken. Exterior will be faced with cement plaster.

**STORES**—1 story, frame, \$10,000. Oakland, Cal. Architect, Milton Liechtenstein, 111 Ellis street, S. F. Owner, Jesse Steinhardt. The building will be erected at the southwest corner of 21st and Broadway, and has been designed to contain six stores. Interiors will be finished in pine. There will be patent store fronts. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

HOSPITAL—2 story and base, reinforced concrete, \$49,000. Hanford, Kings Co., Cal. Architect, Ernest J. Kump, Fresno. Owners, St. Dominic Sisters. Plans have been prepared for a modern two-story fireproof hospital, covering an area of 50 by 102 feet. The first floor will contain office, operating room and nurses' quarters. Upper floor will be arranged for male and female wards and private rooms. Modern hospital plumbing will be installed. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SCHOOL—3 story and base, brick and steel, \$265,000. Fresno, Fresno Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Money has been made available for the construction of the new Fresno State Normal School, and the architectural department is now busy on the working drawings. Bids will be called for within three months. Further mention will be made of the work.

## Contracts Awarded.

CHURCH—1 story and base, brick and frame, \$21,000. Fresno, Fresno Co., Cal. Architect, Henry F. Starbuck, Fresno. Owners, German Lutheran Congregation. Contractor, A. W. Plewe, Fresno, general construction. Barrett-Hicks Co., plumbing and sheet metal work.

## SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

FURNITURE, HALL OF RECORDS—Cost not stated. Colusa, Colusa Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Colusa County. Bids will be opened on July 7th for furnishing metal furniture, desks, chairs, filing cabinets, etc.,

for the new Hall of Records. Full particulars can be obtained from the architect.

**RESIDENCE**—2 story and base, frame and stone, \$6,000. Sisson, Siskiyou Co., Cal. Architect, James W. Pachek, Acheson Bldg., Berkeley. Owner, Dr. T. C. Burnett. The dwelling has been designed for an eight-room house with bath. Interior finish will be of pine with some hardwood veneer and hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or stone. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with stone and cement plaster on metal lath. Plans are being figured.

**RESIDENCE**—2 story and base, frame, \$6,500. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, W. B. Bennett. The dwelling will be erected in Bours Park, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

**RESIDENCE**—1 story and base, frame, \$3,200. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, F. B. Hubbard. The dwelling will be erected in Tuxedo Park, and has been designed to contain seven rooms and bath. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Charles Finnell, 421 East Jefferson street.

**BRIDGES**—Frame and concrete. Cost not stated. Ukiah, Mendocino Co., Cal. Owners, Mendocino County. Bids will be opened on July 7th for constructing four timber bridges in Mendocino County. Plans and specifications can be secured from the County Surveyor.

**BRIDGES**—3, timber and 1 concrete. Cost not stated. Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Bids will be opened on July 10th for this work. Plans and specifications can be secured from the County Surveyor.

**JAIL**—2 story and base, brick and steel. Cost not stated. Red Bluff, Tehama Co., Cal. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Tehama County. Revised plans for this work have been completed and are now out for figures. Bids will be opened on July 7th. The building will contain the office of the County Sheriff, wards for male and female prisoners and a guard room. There will steam heat and a hot water supply. Special jail equipment will be required. Exterior of the building will be faced with cement plaster. Plans can be secured from the architect or from the County Clerk.

**SHOP BUILDING**—1 story and base,

reinforced concrete, \$10,000. Folsom, Sacramento Co., Cal. Architect, State Department of Engineering, Sacramento. Owners, State of California. The building will cover an area of 90 by 120 feet and will be built by prison labor. The estimate of \$23,000 is placed on materials only. Plans have been completed and work will be started at once.

**HOSPITAL DAIRY BUILDING**—Frame and concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids are now being called for and will be opened on July 25th for the construction of new dairy buildings at the Stockton State Hospital. Plans and specifications can be secured from the State Department of Engineering, Sacramento.

**HOTEL**—6 story and base. Class A construction, \$225,500. Sacramento, Cal. Architect, L. G. Burgen, Holbrook Bldg., S. F. Owner's name withheld. The building will be erected on one of the prominent business corners of the city and will be of fireproof construction throughout, with a complete steel frame, reinforced concrete walls, concrete floors and brick exterior walls. There will be two stories on the first floor besides the hotel lobby. Upper floors will contain a total of 176 rooms, 70 per cent of which will have private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

**SCHOOL**—1 story and base, frame and plaster, \$15,000. Cortland, Sacramento Co., Cal. Architect, P. J. Herold, Forum Bldg., Sacramento. Owners, Cortland School District. The building has been designed to contain four class rooms and an assembly hall. Interior finish will be of pine throughout. There will be steam radiators. Composition blackboards are specified. Exterior of the building will be covered with cement plaster. Plans are nearly complete and figures will be called for shortly.

**TRESTLE**—Timber and reinforced concrete. Cost not stated. Yolo, Yolo Co., Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed and figures are now being taken by the State Highway Commissioners for the construction of a timber and reinforced concrete trestle over the Yolo By-Pass cuts and be opened on July 20th. Plans and specifications can be secured from the State Highway Commission.

#### Contracts Awarded.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, F. H. Gentry, Marsh Bldg., L. A. Owners, Business Properties Co. The building will be erected at the corner of Moneta avenue and Santa Barbara, covering an area of 50 by 120 feet. There will be several stores besides the entrance on the first floor. Upper floors will be arranged in two and three room suites, with private baths and wall beds. Interior finish will be of pine and redwood with some em panels. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with pressed brick. Plans are being revised.

CITY HALL—1 story, reinforced concrete. Cost not stated. El Monte, Los Angeles Co., Cal. Architect, City Engineer, El Monte, Cal. Owners, City of El Monte. Plans have been completed for a one story City Hall which will contain the executive offices, city jail and fire department. Interior finish will be of pine throughout. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are complete and may be obtained from the City Clerk. Bids will be opened on July 6th.

HOSPITAL GROUP—Frame and plaster, \$75,000. Ventura, Ventura Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. A new state institution will be erected at Ventura. The first work to be undertaken will be the construction of a frame hospital building and two cottages. About \$75,000 is available for this work. Preliminary plans only have been prepared. Bids will be called for in about three months.

HOSPITAL GROUP—2 story, brick

and fireproof \$160,000. Norwalk, Los Angeles Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. A new institution for the care of the state insane is to be erected at Norwalk. All buildings, consisting of a main administration building, hospital, employees' quarters, power house and commissary, will be of brick construction. The administration building and hospital will be erected first. A central steam heating plant will follow. Interior finish will be of pine. Exterior of all buildings will be faced with pressed brick. The architectural department is now engaged on preliminary studies. Bids will not be called for within six months.

RESIDENCE—2 story brick and frame, \$25,000. Los Angeles, Cal. Architect, B. Cooper Corbett, Union Oil Bldg., L. A. Owner, Thos. O'Neil. The dwelling has been designed for a four-teen-room house with four baths and will be erected in Windsor Square. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be a central heating plant and open fire places. Bath rooms will be finished in tile and equipped with showers. Exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame and plaster, \$75,000. Los Angeles, Cal. Architects, Foss Designing Co., 100 East Colorado street, L. A. Owner, W. J. Bettingen. The dwelling will be erected on Hillcrest avenue in the Oak Knoll District, and has been designed in the Colonial style. There will be fifteen rooms, five baths and servants' quarters. A garage will also be erected on the property. Interior will be finished in pine and hardwood and white enamel. A central heating plant will be installed. Bath rooms will be finished in tile and equipped with showers. Exterior of the house and garage will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$6,000. Pomona, Los Angeles Co., Cal. Architect, C. E. Wolfe, Pomona. Owner, Rev. M. J. Connealy. The house has been designed to contain thirteen rooms and three baths. Interior finish will be of oak and mahogany. There will be three open fire places with tile or brick mantels. Bath rooms will be finished in tile. Hardwood floors are specified. There will be furnace heat. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—1 story, frame, \$2,000. Pomona, Los Angeles Co., Cal. Architect, C. E. Wolfe, Pomona. Owner, Geo. Stubbs, Pomona. The house has been designed for a six-room dwelling with bath. Interior finish will be of pine throughout. There will be a large open fire place in the living room. Mantel will be of tile. Exterior will be covered with stone and rustic. Plans are complete and figures are being taken.

SCHOOL—1 story and base, frame, \$6,000. Tropic, Los Angeles Co., Cal. Architects, Tuttle & Angel, Delta Bldg., L. A. owners, Tropic School District. The building will contain two class rooms with an assembly hall. Interior will be covered with cement plaster. Plans are complete and bids will be opened on July 2nd.

## EXPOSITION NOTES.

The largest flag pole in the world  
has been placed on the grounds of the  
Panama-Pacific International Ex-  
position on the site of the Oregon building.  
The pole was shaped from a single fir  
tree given by the citizens of Astoria,  
Oregon. It is 230 feet long and more  
than five feet across the butt. It ar-  
ries a flag 16 feet long.

One of the famous German dirigibles  
will be seen at the Panama-Pacific In-  
ternational Exposition. Baron von  
Brandenstein, representative of the  
Farvesal Airship company of Berlin, is  
in San Francisco and has just made  
the final arrangements. He states that  
the dirigible that will be brought to  
the Exposition will be 250 feet long,  
will have a speed of 45 miles an hour  
and the gondola will afford accommo-  
dation for 20 to 25 passengers. The  
hanger will be built near the aviation  
field.

The Virginia commissioners to the  
Panama-Pacific International Ex-  
position dedicated the site for the Virginia  
building on June 15th. This state  
structure is to be one of the many in-  
teresting features of the exposition, as it  
will be a reproduction of George Wash-  
ington's Mount Vernon home. Actual  
furniture used in the Washington home  
will be provided by Miss Nannie Ran-  
dolph Heath, official hostess for Vir-  
ginia. The furniture has been in the  
Heath, Randolph and Lee families for  
generations.

Chinese Commissioners to the Pan-  
ama-Pacific International Exposition  
arrived June 15th and work has begun on  
the Chinese pavilion, which is to be a  
duplicate of one of the palaces of the  
Forbidden City. The commissioners are  
Hsi-chen Huang and Yueh-lu Shu.  
David S. Young, an American born  
Chinese, is secretary. Thirty-two ar-  
tisans were brought and they have built  
a temporary home on the beach while  
the Chinese building is under way.  
Every courtesy was shown the foreign-  
ers and the workmen were the first to  
be admitted under the special act of  
Congress admitting laborers for ex-  
position work.

Ground breaking exercises for Hawaii  
building will take place early in July.  
John Hughes, commissioner from  
Hawaii is in San Francisco arranging  
for the details. The former flag of the  
kingdom and of the republic, which is  
now the standard of the territory will  
be raised by the great-great-grand-  
daughter of Captain Beckley, who de-  
signed the flag in 1807.

The officials of the Panama-Pacific  
International Exposition have been  
notified that the Imperial Austrian  
Commission has been formal to have  
charge of Austria's participation. The  
commission entrances some of the most  
prominent men in the nation. Dr.  
Ernst Fister, manager of the commis-  
sion is leaving at once for San Fran-  
cisco with his architect.

# INCREASE IN SLATE PRODUCTION, OVER 6,000,000 School Slates and 3,500,000 Square Feet of Blackboard Slates— Enters into Many Industries.

The production of slate is one of the important lesser industries of the United States. In 1913 the output of slate in this country was valued at \$6,175,176, an increase of \$12,158 compared with 1912, according to A. T. Coons, of the United States Geological Survey, in the chapter on slate from "Mineral Resources" for 1913. The increase did not represent any unusual activity in the slate trade, it was caused by an advance in the average price of the material itself. In fact, as compared with 1904, ten years ago, when the slate output was valued at \$5,817,195, the output in 1913 shows an increase in value of only 10 per cent.

All the eight producing States except Maryland, Vermont, and Virginia increased in total value of output of slate over 1912, the largest increase, 11.62 per cent, being in Maine.

The value of mill stock, including slate sold for all purposes other than roofing, increased from \$1,407,133 in 1912 to \$1,714,111 in 1913, a gain of \$307,281. Exclusive of blackboard and school slates, the mill stock increased from 5,765,273 square feet, valued at \$1,013,220, in 1912, to 6,312,011 square feet, valued at \$1,233,828, in 1913, an increase of 546,738 square feet in quantity and \$220,618 in value. Mill stock includes slate used in blackboards, school slates, flooring, wainscoting, vats, tiles, sinks, laundry tubs, grave vaults, sanitary ware, refrigerator shelves, floor bins and dough troughs for bakeries, electric switchboards, mantels, hearths, well caps, and billiard, laboratory, kitchen, and other table tops.

In 1913 the output of roofing slate was reported as 1,112,944 squares, valued at \$1,161,062, a decrease as compared with 1912 of 28,344 squares in quantity and of \$175,123 in value. The number of school slates sold in 1913 was 6,174,526, valued at \$51,313, and the blackboard material amounted to 3,504,162 square feet, valued at \$126,703. The value of this "educational" slate was \$475,000.

A copy of this report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

# INCREASED CEMENT PRODUCTION.

The year 1913 was a record-breaker in the cement industry, according to Ernest F. Burchard, of the United States Geological Survey, in a chapter from "Mineral Resources, 1913," just published. The total quantity of Portland, natural, and puzzolan cement produced in the United States last year was the greatest in the history of the cement industry, amounting to 92,949,162 barrels, valued at \$2,091,169, compared with 82,571,191 barrels, valued at \$67,161,513 in 1912.

The total production of Portland cement in 1913 as reported to the Geological Survey, was 92,997,131 barrels, valued at \$2,557,617, the production for 1912 was 82,438,996 barrels, valued at \$67,006,928. The quantity of Portland cement produced, 92,997,131 barrels, is equivalent to 15,827,626 long tons, compared with a production of pig iron for 1913 of 15,966,391 long tons.

Portland cement production is

nearly 50.5 per cent of the quantity of pig iron.

Of the 113 producing plants in the United States in 1913, 23 were in the State of Pennsylvania, whose output was 28,701,815 barrels of Portland cement, the largest quantity produced by any one State. The second greatest production came from Indiana, with 10,872,574 barrels, and California was third, with 6,159,182 barrels.

The natural cement produced in the United States in 1913 amounted to 744,658 barrels of 265 pounds each, valued at \$345,889, compared with an output of 821,231 barrels, valued at \$367,222, in 1912, a decrease in 1913 of 76,573 barrels and of \$21,333 in value. Puzzolan cement was manufactured in 1913 at three plants in the United States, in Alabama, Ohio, and Pennsylvania. The output of puzzolan and Collos cements in 1913 was 107,313 barrels, valued at \$97,663, compared with 91,864 barrels, valued at \$77,363 in 1912, an increase in quantity of 15,449 barrels and in value of \$20,300.

The United States has a comparatively small export trade in cement. In 1913 the total quantity exported was only 2,964,358 barrels, most of which was Portland cement valued at \$1,270,666, compared with 4,215,232 barrels, valued at \$6,160,341, in 1912.

# Proposals.

## NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received by General Enrique Loynaz del Castillo, Commissioner of Cuba, at Room 207, Palace Hotel, San Francisco, California, at 2 P. M., Tuesday, July 7th, 1914, for Constructing the Cuban Building, at the Panama-Pacific International Exposition. In accordance with plans and specifications on file in the office of the Director of Works of the Panama-Pacific International Exposition Company, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco.

Each proposal must be accompanied by a certified check payable to the order of General Enrique Loynaz del Castillo, Commissioner of Cuba, in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made, all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract, the sureties thereon must be satisfactory to General Enrique Loynaz del Castillo, Commissioner of Cuba.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of Republic of Cuba.

Plans and specifications for the work may be obtained from the Director of Works of the Panama-Pacific International Exposition Company, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, California, by depositing \$25.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Twenty-five Dollars to the Republic of Cuba.

GENERAL ENRIQUE LOYNAZ DEL CASTILLO,

Commissioner of Cuba. (S)

## NOTICE TO CONTRACTORS.

## PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore

# LLOYD C. COMEGYS COMMERCIAL ATTORNEY

Advertising Service

902 Mutual Savings Bank Bldg.

Cor. Market & Kearny, Kearny 3864

and Chestnut Streets, San Francisco, California, at 9:00 A. M., Thursday, July 9, 1914, for Constructing The Sentinel Pier in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company, in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (S)

## NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McCLure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Tuesday, July 21st, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the Cottage for Epileptics, Sonoma State Home, Eureka, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany the bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on return of plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McCLure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Cottage for Epileptics, Sonoma State Home, The Eureka, California."

(SIGNED) W. F. McCLure,  
State Engineer. (S)

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

## What Advertising Can Do.

It can give general publicity to your trade name and goods in the locality you desire to cover, through the use of newspaper, magazine, program, mail and bill-board advertising. The results would come to you through the sales made by your representatives or selling-houses in those localities. Such advertising so establishes the character and value of your offerings or products as to largely relieve your salesmen from so establishing or informing regarding who you are and the general lines that you offer.

This leaves the salesmen or selling-houses free to devote their entire time to actual sales making and eliminates a large amount of waste effort on their part in connection with your offerings.

Advertising may be very profitably used in obtaining inquiries regarding your offerings and getting in touch with live prospects or those whose minds have already been directed or centered upon taking your proposition. These inquiries or leads to prospects may then be turned over to your representatives or salesmen, who thus can produce many times the results that they otherwise could if left alone to scatter their efforts in a general way.

### GOOD WILL:

The good will of a firm that is established through advertising coming direct from the house is the most valuable kind, in that it cannot be materially affected by the presence or absence of any particular salesman.

### CATALOGUES AND PRICE LISTS:

Each particular business must determine whether it is wise to use these and to what extent. Some things are sold entirely from a quality standpoint and then descriptive catalogues are valuable, but others are sold entirely upon their price, and it is for these a price-list will produce business, or at least bring the customer to make a comparison with your prices and those of the other firms.

### CALENDARS:

Caleendars I consider valuable only for trade name purposes and it is a serious question of how valuable they are, as these days the person likely to receive your calendar is also likely to receive anywhere from two to five others. It then becomes questionable whose calendar will be retained and displayed.

### ADVERTISING:

In plain words, it means explaining to possible customers of whatever you have to offer, who you are, and what you have to offer. Notice, I say to possible customers and it is right here where so much money is lost in advertising, even when it is properly done and con-

tains real pulling or selling power. Be sure you are advertising to possible customers of your particular offerings and not to the general public or to those who would under most circumstances not want them. A trade magazine is one of the very best mediums for reaching the exact people in your line.

LOYD C. COMEGYS.

### EXPOSITION NOTES.

An A. 1. thriller at the Panama-Pacific International Exposition will be "Aerospace," a huge inverted pendulum which will lift sightseers 250 feet in the air, seven stories higher than the Flatiron Building, New York, and even higher than the famed Ferris Wheel at the World's Columbian Exposition at Chicago. Visitors will sit comfortably in great cars on their aerial jaunts.

German art is to be represented at the Panama-Pacific International Exposition by the most comprehensive collection of modern art that has been sent from that nation to any exposition. A cablegram has been received by the Chief of the Fine Arts Department stating that 400 paintings in oil, a full share of sculpture, blacks and whites and process pictures will be included in the exhibit.

Old Nuremberg, of interest to the student because of its historical associations, will be found in the "Zone" at the Panama-Pacific International Exposition at San Francisco in 1915. This will be an exact copy of Nuremberg, the romantic village of Franz Hals' time where robber barons held the world at bay. Another concession will be a miniature reproduction of the Panama Canal, costing \$250,000. 20,000 people will be able to pass its locks every half hour.

A flexible wire window screen that a Wisconsin man has invented is attached to the lower sash in such a manner that it unrolls and fills the window to whatever extent the sash be raised.

Thomas G. Stallsmith, U. S. Commissioner for the Panama-Pacific International Exposition to the Orient and Straits Settlements has returned from an eight months circle of the globe and as the result of his visit the following nations have accepted the invitation of the President of the United States to participate and have appropriated the sums named for the purpose: China, \$1,500,000; Australia, \$400,000; New Zealand, \$250,000; Philippine Islands, \$600,000; Cochín and Indo China, \$300,000; Java, \$250,000, and Siam, \$300,000.

The King of Siam will be represented at the Panama-Pacific International Exposition by his brother, Rajani, and he will send also a sacred white elephant, Siamese dancing girls and other features typical of the nation. A battalion of Siamese troops is to attend and the officers will be carried in the King's private yacht.

Dallas, Texas, is the first city officially to enter an aeroplane in the around-the-world aviation race of the Panama-Pacific International Exposition. Cap-

tain J. H. Worden, aviator now with the Mexican federal army, is to be the pilot and the machine is called "The Dallas." The city has agreed to build the machine and will back his flight with \$250,000. He is the first aviator to participate with his machine in actual warfare in the western hemisphere.

Ground was broken on the site of the Ohio building of the Panama-Pacific International Exposition on June 11th. The Ohio site adjoins the site of the Illinois building.

The Vanderbilt Cup and the Grand Prix automobile races have been granted to the Panama-Pacific International Exposition for 1915. Hollis E. Cooley, chief of Special Events of the exposition and W. L. Hughson, chairman of the racing committee, have returned from New York City where they made the necessary preliminary arrangements for the races.

General Loynaz del Castillo, Cuban Exposition Commissioner, has informed the Department of Horticulture of the Panama-Pacific International Exposition that Cuba will send specimens of all its principal floral species and that a special ship will be chartered for the purpose and will come through the Panama Canal, landing its cargo directly at the Exposition grounds.

Switzerland has expressed her intention to participate in the Exposition. The Swiss pavilion will be the center of the golden jubilee of the North American Schweitzer Bund, to be held July 31st to August 1, 1915, at the exposition.

One of the most important corollaries of the Aerial Race Around the World, organized by the Panama-Pacific International Exposition, will be the bringing together at the exposition of the Sixth World's Aeronautical Congress. Such men as Ch. Maurain, Le Directeur Institut Aerotechnique de l'Université de Paris; R. T. Glazebrook, C. B., M. A., D. E., F. R. S., Director National Physical Laboratory, Teddington, England; Chairman British Government Advisory Committee on Aeronautics; Baron Deutsche de la Meurthe, President Aero Club of France; Dr. L. Prandtl, University of Göttingen, are among the delegates to the congress, who will come from all over the world to discuss the advances made in the science of aerial navigation and to consider from a scientific standpoint the results of the World Flight.

This congress, the sixth one of its kind that has ever been held, will be the first that has been brought together since the real development of practical aviation. The first was assembled at Paris in 1889 on the initiative of Jannsen, the French Astronomer, and each of the succeeding congresses have been held coincidental with universal exhibitions. Eleven years passed before the second congress was held in 1900 and six more before the third at Milan. The fourth met at Nancy three years later and the fifth at Turin in 1911.

No such opportunity for the gathering of important data concerning the navigation of the air has ever been afforded to compare with the observations made by the pilots of the various types of aircraft while they are circling

ing the globe. These reports will be presented to the congress for discussion and comment and will be purely of scientific interest.

The sporting side of the world race will be under the supervision of the Aero Club of America, which is affiliated with the Federation Aéronautique Internationale, the International body having sporting jurisdiction over all aviation sporting events throughout the world. The Aeronautical Society in the United States, allied with the Aeronautical Society of Great Britain, which inaugurated the movement for the congress, is the second oldest aeronautical organization in the world and the oldest of the kind in the United States.

The organizing committee of the congress is composed of Hudson Maxim, Ingles M. Uppercu, Thomas A. Hill, Alfred W. Lawson and Ernest L. Jones. Among the prominent delegates from the United States are Prof. David L. Gallup, W. E. Worcester, Polytechnic Institute; William J. Hammer, Clifford B. Le Page, M. E. Asst. Professor of Physics, Stevens Institute; T. R. MacMeehan, expert technical observers of dirigibles; N. B. Sellers, John E. Sloane, head of the Sloane Aeroplane Company, and Captain Chambers, head of the aviation department of the United States Navy.

#### FARMERS AND THE COMPENSATION ACT.

At the last session of the Legislature, when the Workmen's Compensation, Insurance and Safety Act was being considered, committees of farmers from all parts of the State visited the Capitol and urged that farm laborers be exempted from its provisions. The farmers believed that the Compensation Act would place upon them a heavy burden in the form of compensation to be paid to injured farm workers. The Legislature complied with their request.

The preceding Legislature by law had removed the three prime defenses, i. e., the assumption of risk, the fellow servant rule, and the doctrine of contributory negligence, which, under common law, had protected the employer in damage suits. With these defenses removed it had become common for juries to render verdicts against employers in favor of injured workers, ranging from \$5,000 to \$20,000 and costs, to say nothing of attorneys' fees, loss of time, vexation, annoyance and bitterness of feeling created between the workers and their employers. The farmer, being exempted from the provisions of the Compensation Act, remains under this possible heavy liability. The cost of limited insurance, giving only partial protection and covering damage awards by juries, is the same as for Unlimited Compensation Insurance which affords the farmer complete protection. Unlimited Compensation Insurance may be taken only after electing to come under the Compensation Act. It provides remuneration for the injured workers and conserves the friendly relations between employer and employee.

Since January 1st, 1914, when the Compensation Act became effective, over two thousand farmers have voluntarily come under that law and have thus protected themselves against heavy jury awards covering their

compensation liability by taking insurance. The rate for insurance covering farm labor is 1 1/2% of the farmer's annual payroll. They have wisely done this because they know that to do otherwise is to assume the risk, if in moderate circumstances, of possible ruin. By electing compensation and taking out insurance their injured workers are assured of ninety days' free medical treatment, and such other compensation as the law provides, thus saving these injured workers and their dependents from falling below the poverty line and becoming possible objects of charity. These farmers now realize, as they did not at the time of their opposition to the Compensation Act, that the new law gives protection to them and their workers.

Since the enactment of the Compensation Law, the State itself has gone into the insurance business. It has done this, not for profit, but to protect employers against possible excessive rates, to insure prompt settlement of claims, and to make insurance available to the smallest employer in the remotest nooks and corners of the State.

The Industrial Accident Commission, 525 Market Street, San Francisco, will, upon request, forward a blank, which, when filled out, signed and returned to the Commission, will bring the farmer under the Compensation Act. A further request to the Commission for an insurance application blank will enable the farmer to apply for insurance in the State Fund.

#### BONDS PROPOSED FOR UNIVERSITY BUILDINGS.

BERKELEY, June 23, 1914.—That through initiative proceedings the people of California should be asked to vote approval for a bond issue of \$1,500,000 for permanent buildings for the University of California, has been decided by the Alumni Association of the University of California.

Petitions are being circulated by the alumni calling for the placing on the ballot at the general election in November of an initiative measure authorizing this bond issue. Blank petitions can be obtained from the Secretary of the Alumni Association of the University of California, Berkeley. They should be returned with the signatures in July.

The permanent buildings the alumni have decided to ask the State to provide for the University are a new Agricultural Building, to accommodate some of the 500 students in that rapidly growing college and to house the work of the agricultural experts who are yearly adding to the annual production of California farms many times the amount of this whole proposed bond issue; a Chemistry Building—the present chemical laboratories, built to accommodate three hundred students, are now used to teach more than two thousand; an addition to complete the new University Library, first occupied two years ago, the Library's storage capacity of 200,000 volumes is already overtaxed and there is not enough room to hold the readers; and a large new class-room building, to replace the decrepit old fire-trap, North Hall. Since the students are increasing by one-sixth per annum, the class-room building is a most urgent need. Long ago the classroom facilities were exhausted and new classes are meeting

in cellars, attics, and out-of-doors, for lack of proper rooms.

Bill Brown, a contractor, who labored each day,

Was heard by his neighbor one morning to say,

"Doggone that old cellar, I don't see the reason

It gets full of water in each rainy season.

I painted the walls and I put in a sump; The water we get nearly chokes up the pump.

But it leaks like the mischief and fills up again

And today it's as full as it ever has been."

His neighbor, it happened, had recently sent

For a book that explained waterproofing cement.

So he went up to Bill and said, "Cheer up, old top.

If you want some ideas I will grow you a crop."

"You're the Judge," read the title, and Bill went inside

And pored o'er the book 'til it got through his hide;

That cellar of his could be dry as a bone,

He could fix it up once, and then leave it alone;

The directions were simple and Bill wrote them down.

Then 'phoned Parrott & Co., the dealers in town,

To send out cement and some sand, and a bit

Of that waterproof paste that they call Ceresit.

He mixed up some mortar as soon as they came,

With Ceresit carefully tempered the same.

On the floor of the basement some concrete he placed

About three inches thick, and he also made haste

To keep the pump going so it could set well,

And then left the concrete to dry for a spell.

He plastered the walls with the mortar he made,

And a one inch top coat on the concrete he laid;

He covered all the corners with workmanlike care,

And followed instructions he found written there

In the book before mentioned, and when he was through

He said, "Now we'll see if that book is all true.

For if I'm the Judge, I can tell you right here

If they're guilty I'll send them across for a year."

A day or so later the pump was shut down,

And Bill was the happiest man in the town.

For the cellar was dry, and as clean as a whistle,

And Bill wrote the Ceresit Co. this epistle:

"Dear Sirs: There are cellars down here by the score—

I've waterproofed one, and I'll waterproof more.

The owners will pay a good figure to get

A cellar where you can get out of the wet.

For you've got the goods, and you just set me down

A Ceresit user for life. William Brown."

## Editorial Comment.

### A SPLENDID SHOWING BY THE RECLAMATION SERVICE.

Under the favoring hand of Franklin K. Lane, Secretary of the Interior, who takes a keen interest in the prosperity and development of the West, the Reclamation Service is doing great work this year.

Every dollar of the Reclamation Fund of about \$23,000,000 has been allotted to the twenty-five large irrigation projects that have been under way for several years, and they will be pushed to completion.

Among these great undertakings is the Rio Grande project, in New Mexico and Texas, which will water 180,000 acres of desert land. Its Elephant Butte dam across the Rio Grande River, 120 miles north of Del Paso, will cost \$5,000,000, be 300 feet high, and create a reservoir among the largest in the world—larger than any in Egypt or India. It will hold water enough to cover the State of Connecticut ten inches deep.

Another great undertaking in hand is known as the Boise project, to irrigate 215,000 acres in Idaho. Across the Boise River is being built the Arrowrock dam, to be 350 feet high—the highest dam in the world. It will store 250,000 acre-feet of water, which means water enough to cover 250,000 acres to a depth of one foot.

No doubt the Reclamation Service has made mistakes, and at times has exposed itself to just criticism, but on the whole, like the Panama Canal, its achievements afford a splendid demonstration of the efficiency of Government engineering work when free from political direction and control.

In American Forestry for June the accomplishments of the Service are thus summed up by its Statistician, C. J. Blanchard:

Up to June 30, 1913, the Reclamation Service had constructed about 8,000 miles of canals, several of which carry whole rivers.

It had built four of the great dams of the world. Its wagon roads have a mileage of 700, telephones 2,331, transmission lines 351, railroads 51.

It has purchased 1,532,544 barrels of cement and manufactured in its own plant 423,887 barrels. The total excavation of rock and earth on that date amounted to 99,245,768 cubic yards.

It employed, on an average, 7,616 men during the year.

In the past season its canal systems were prepared to irrigate 1,192,274 acres, and 641,397 acres were actually watered.

The crop returns amounted to nearly \$15,000,000, or an average of \$25 per acre.

The total net investment at the close of the fiscal year, June 30, 1913, was \$7,174,282.

The total irrigable area under present projects is slightly more than 5,000,000 acres.

That this is a most admirable showing the better may be understood when the reader is mindful of the fact that nearly all the land thus made productive by irrigation was originally desert or semi-arid in character, of little or no value without water.

The Federal Government never has spent money more wisely than in this reclamation of public lands by means of irrigation, thus providing many thousands of homes for actual settlers.

In a few instances, as at Orland, in the Sacramento Valley, the Reclamation Service has provided irrigation works for lands under private ownership, the cost to be repaid to the Government, without interest, as in the case of public lands, but these cases are exceptional. Their results, however, further the general purpose of the Reclamation Act—that of peopling the West.

Under the liberal policies adopted by Secretary Lane, there is good reason to believe the Iron Canyon project, for the irrigation of thousands of acres in the upper part of the Sacramento Valley, will yet be taken up by the Reclamation Service, when money becomes available for the purpose from its revolving fund.

In fact, that was one of the very first projects which the engineers of the Service desired to undertake, believing the results would make a highly creditable showing for the Reclamation Act.

Unfortunately, at that time the land-owners most concerned were not so sensible of the value of irrigation as they have since become.—Sacramento Bee.

The dry dock to be constructed at the Union Iron Works will soon be started. This means a great deal for San Francisco. Not only in the number of men it will employ, but in the basis it will make for shipping interests and a port for the Navy. The coming years look like they would be prosperous whether the prosperity dinners succeed in wishing prosperity on us or not.

The engineers of the Panama Canal must be congratulated on the fact that they have built the canal within the original estimates of unit costs—something very rare in work of this magnitude. The estimate of cost of dry excavation for the Culebra cut was 80 cents per cubic yard, and it was actually built at a cost of 78.18 cents. The estimate of \$8 per cubic yard for concrete in the locks was also above the actual cost, which was \$7.14 per yard at Gatun, \$5.89 at Pedro Miguel, and \$5.37 at the Miraflores locks. Boreding in the harbors and entrances was estimated at 25 cents per cubic yard. The actual cost was 23.25 to 25.52 cents per cubic yard.

## Bricks and Brick Making.

Arthur E. Brown, B.Sc., London.

Reprinted from Construction.

The materials of which bricks are made are in every sense common and perhaps for this reason alone the trade of brickmaking is generally looked upon as a low grade and common one. The uninitiated man says and thinks bricks are easy to make. You dig a lump of common clay, put it into a heavy and ungainly looking machine made mostly of common cast iron, the wheels go round and out come bricks, which only require baking and they are ready for use in their millions. A simple proposition, indeed! Yet, I would remind you that immense sums of money have been lost, and very few fortunes made by this apparently simple business.

Clay, the staple material (not a mineral, by the way, in the legal sense), is found in many varieties in all parts of the globe, and the most important consideration of all in manufacture is the large bulk of material used and manipulated for a small ultimate return. The many varieties have as many various characteristics, and the problems of the business consist chiefly in discovering the best methods of utilizing these characteristics to the best advantage and overcoming those that are technically objectionable.

**Geology.**—Clays are found in two categories geologically, surface clays and geological deposits. The first named are those of more recent formation found in all parts of the world in comparatively shallow beds which have been deposited by ice, rivers or lakes in what is called the Pleistocene period. Such prehistoric remains as are found in them belong chiefly to the animal kingdom. There are not frequent, and consist usually of bones of large mammals.

The geological clays are of varying age. It may be sufficient to note further that clay in general is the product of the decomposition or disintegration of granitic or other igneous rocks and that all clays possess certain chemical and physical properties in common.

**Chemistry.**—It is frequently supposed that chemistry must play an important role in brickmaking. This is true, obviously to a certain extent and in some branches of clay making its importance is great. In the more ordinary use of clay for brickmaking, chemistry is, however, of comparatively meagre value.

Chemistry tells us that clay is a compound of silica and alumina in fixed chemical proportions. It is what is called a hydrated silicate of alumina. Chemically, clay is toxic and this only, but in nature clays present almost infinite variety by reason of the presence of other substances. They contain free silica or sand in widely varying proportion. They contain also free oxide of iron, to which the red color of the Suffolk brick and the blue color of the Staffordshire blue brick are due.

They contain alkalies—potash and soda, refractory earths—magnesia and lime; many contain small quantities of

oxide of titanium, a so-called rare earth. These are all in comparatively small proportions, and whatever plastic clay we analyze it is found to contain somewhere in the neighborhood of 85 per cent of silica and alumina. Silica is sand. Alumina is the oxide of that peculiar light untarnishable metal aluminum, which has given chemists so much trouble to produce commercially, and metal workers so much trouble to handle and fashion for use. The few other materials found in clay have far less influence on the final product than does the varying physical condition of silica and alumina.

The presence of iron oxide has effect on the color, and the presence of lime also. The presence of lime and alkalis have marked effect on the fusibility of the clay under great heat. In these matters, chemical analysis is of assistance to us, but even so, practical examination will tell us all we need to know in these respects without analysis. The presence of water which can be measured by analysis interests us only when we turn to a physical examination of the properties of clay.

**Physics.**—Clay is unique, though to many it is only dirt, because it is the only substance found in nature possessing the property of plasticity, by virtue of which clay may be changed in form without breaking up or destroying its continuity, or may be joined without the use of any cement material. In nature, most clays are only in a semi-plastic state, and become quite plastic when water is added to them. The purer the clay the more plastic it is in the natural clay beds, provided the silicate of alumina is in a state of division sufficiently fine. It would seem that this important property is due to the fact that silicate of alumina can absorb water in large volume, at the same time becoming gelatinous and swelling up. It is this property that makes clay impermeable to water. From this explanation we can easily understand that when clay is dried and the gelatinous particles lose their water they become less in volume and shrink.

We all know that clay shrinks in drying because of the way clayey soil cracks in summer time. It is also pretty widely known that the more "sticky" the clay is the more it cracks when dried. This is apparent, is because it is purer and contains more of the gelatinous silicate of alumina in a given volume than a sandier clay or loam which shrinks less in drying. It will be clear, then, that a sticky or strong pipe or the clay shrinks more in percentage than a sandy clay, but there is more in the matter than this. Given a sandy, less sticky or "milder" clay, the amount it shrinks in drying depends also on the shape and size of the sand particles. These are surrounded by the gelatinous material when wet, and at a certain stage in drying, they come so close together in the mass as to touch each other. Now, if the sand grains are rough and angular, their further movement is arrested, whereas if fine and round they can

slide on one another into still closer positions, and so shrinkage continues further.

When a clay with fine round sand grains dries, shrinkage goes on till arrested by the grains getting as close together as is possible, but still the gelatinous pure clay surrounding them goes on shrinking, with the result that spaces or pores begin to be formed in the mass, into which air enters. We thus arrive at another condition in which the pores formed in the clay gradually lose water throughout the whole mass. The size of these pores depending on the size and shape of the grains, we get two different states in different kinds of clay. The one is called porosity and the other permeability. They are only different degrees of the same thing, but they are interesting to the brickmaker because of the difference in quality of the brick produced and the different results obtained by different processes of manufacture.

All clays found in nature become porous when dried, but those with the larger angular grains are permeable even before drying. This peculiarity is of great importance in a building, for the striking reason that a permeable brick will better resist the weather and will also "breathe" or allow air to pass through the walls. This is easily understood and is illustrated by a simple proposition. Take a glass tube with a bore of say one-eighth of an inch, or a straw, and one can easily blow through it. But take the broken stem of a thermometer which has a very fine bore and it is not possible. The passage of water is of corresponding ease or difficulty.

Now I can well believe that my arguments may convince you that the permeable brick will let more air pass than the merely porous one, but you will say that the same applies to water. This is true, but two points even in this connection still indicate that the permeable brick is best for buildings. The first is that, provided the wall is not too exposed to constant driving rains in which case it should be built hollow, the water dries out very rapidly when the rain stops. In our variable climate, the permeable brick will usually dry out completely between the rain periods and before any water has penetrated the wall, and will rain let air through. The porous brick will not, because it takes proportionately longer to dry than it does to wet. The second point is the effect of frost. It is well known that water expands just before freezing. That is why it cracks our water pipes. The same thing happens inside a brick, but when the water in a permeable brick freezes, the holes are large enough to let the ice squeeze out when formed and no harm is done. In a porous brick (that is one with extremely fine pores) the ice cannot squeeze out for the same reason as you cannot blow through a minute tube, and so it bursts the face of the brick instead.

I must speak here in passing, of two kinds of brick in which the properties

of porosity and permeability are of quite a different nature. These are the bricks made by the semi-dry process of manufacture, of which more later. In one type the shale is pressed into shape in a nearly dry state and plasticity is not present at any stage of the process. When burned in the kilns no change of physical condition of the clay takes place. Shale is in the form of flakes, and the interior of the brick, therefore, is in an irregular condition with no direct uniform pores or tubes in it. Yet it contains a proportion of spaces with air in them. The outside surface is more compressed than the inside, and is smoothed or polished by the action of the steel moulds in which they are pressed. When, therefore, after a long exposure to wet, the interior becomes more or less soaked or sudden with water, frost will produce the same disastrous results as with the "porous" non-permeable brick, but in a still greater degree. And once the skin is broken greater disintegration is still more rapid.

The second type is generally made by the semi-dry process, but on burning in the kiln the clay begins to melt and becomes vitrified. It is then practically impervious to water and suffers no harm in frosty weather. It is a good sound brick, but it does not breathe at all, and therefore possesses only one of the two important virtues of the brick that is perfect from the hygienic point of view. The permeable brick has a further virtue as it does not conduct heat and cold as much as the hard impermeable brick, and for all these reasons I venture to express the opinion that a sandy hand-made brick, besides being more artistic, is more lasting and more hygienic than any other type made.

Continuing my remarks on the physical properties of clay, I would call your attention to the fact that in the practice of brick drying and burning many technical difficulties arise and many interesting scientific principles are involved. In the use of the plastic method, a curious feature is seen in the difference of behaviour of surface clays and geological clays. The aim of manufacturers is to dry the newly made brick with the least possible injury to shape by twisting or cracking. It is found that a surface clay presents little difficulty in the early stages of drying, but is very apt to crack suddenly when about two-thirds dry. On the other hand, many geological clays are very liable to crack in the early stages, and yet give no trouble when about one-third dried. A similar difference exists in burning the different classes of clays. The surface clays do not shrink in burning unless over burned, but many geological clays shrink little in drying, and a great deal in burning. Some of these when burned behave curiously, in that you may get them up to full temperature in the kiln, and for twelve hours or so they do not contract. Then they begin to do so, and for forty-eight hours continue to shrink in a regular manner. Practice teaches the burners to measure this contraction, and when it reaches a certain amount they stop firing, because they know the zooms will prove correctly fired. With the surface clays this does not occur, but the color of the goods is influenced by the length of time the full heat is kept up.

The burning of bricks presents many

other interesting features, chiefly in relation to the production of the final color required, but I must begin at the beginning of this branch of the subject. Clay contains a great deal of water, and speaking chemically, this water is present in three distinct conditions or states. A wirecut or handmade wet brick contains "water of manufacture," which is evaporated completely in the drying process. The brick is then no longer plastic, but is hard and solid. If now it is heated up to the boiling point of water, 212 degrees F., it loses more water called hygroscopic water. The water of manufacture may be from 33 to 50 per cent of the total weight of the wet brick. The hygroscopic water is about 5 per cent. The driving off of the hygroscopic water in the kiln is called steaming. If the brick which has been steamed is taken out of the kiln it will absorb water from the air until all the 5 per cent is back again in the brick, but it will not absorb any water of manufacture.

Up to this stage the clay can be made plastic again by wetting it. On continuing to heat up the kiln till it reaches about 900 degrees F., more water again is driven off. This is the water chemically combined with the silicate of alumina. It amounts to about 10 per cent of the weight of the dry brick, and when once it is driven off the plasticity of the clay is finally lost and cannot be restored. The clay has become brick, although at that temperature it is not sufficiently changed in chemical nature to remain permanent and solid. The heat must be raised to about 1,800 degrees F., to produce a well burned red brick, and still further for other types such as firebrick, which requires about 2,250 degrees F. temperature. Having considered the action of heat in burning clay we are still confronted with a number of other features of the process of burning.

**Burning Processes.**—There are roughly speaking, five distinct processes, each with special variations according to the qualities of the goods, and with a number of different types of kilns for use. The first and oldest process is clamp burning. The process is characterized by the mixing of the fuel with the clay before moulding the bricks. The fuel is usually sifted house dust, that is the contents of house dustbins freed from their old tins, cabbage leaves and other refuse till only the cinders are left. This fuel contains about 35 per cent of coke proper. The huge stacks of bricks containing this fuel intimately mixed with the clay have two or three layers of large cinders at the bottom, which are fired and serve to ignite the mass. The bricks are stacked closely and air gets access to them so gradually that the heat is generated slowly and more or less regularly throughout. A clamp may take from six weeks to three months to burn through and requires a great deal of expert attention to get good results. The air supply is so restricted that no more reaches the bricks than suffices to burn the fuel. None, therefore, is left over for the oxidation of the iron in the clay so that a yellow color instead of red results.

The burning of common bricks, red bricks, tiles and firebricks is carried on in kilns of a great variety of types either fired with coal or gas. This I call the second process. A brick structure is built to contain the goods and

fire grates are constructed below or by the side of them on which coal is burned. The stages of the process of kiln burning are as follows: Steaming, raising the heat, soaking and cooling. The first two are the same in all types of kiln and all processes of burning. The soaking, however, is effected in two different ways. With red and most common bricks the soaking is done with a free burning fire and ample draught, so that a large volume of heated air plays on the bricks and oxidizes them thoroughly. With certain blue bricks the soaking process takes another form called smoking. An excess of coal is put on the fire and the air supply is reduced so that smoke fills the kiln.

In this, the third process of burning, we see a reproduction of what occurs in clamps. The air supply is insufficient to burn up the smoke in the kiln and the bricks are finished in an atmosphere that does not oxidize the goods but on the other hand, "reduces" the iron in them and produces a blue instead of a red color.

The fourth process is salting. This may be used for three different effects—fuming the brick and producing a silvery grey color, reducing the brick and so in another way getting the blue color, or salt-glazing the bricks or sanitary pipes. Salting is a simple operation and is done during the last few hours of full firing by throwing common salt into the fires. It becomes volatilized and the fumes pass over the goods in the kiln and form chemical compounds with the silica and alumina, which, in sufficient heat, fuse and form a more or less pronounced glaze.

The fifth burning process is that employed for high-class goods of various kinds, chiefly pottery and expensive tiles. They are placed in closed receptacles, either muffles or saggers, so that the flames and gasses of the fuel do not come in contact with them. This process is the only one that can be called baking in the ordinary sense of the word, the muffle or sagger being a true oven with a fire playing round it. It is not used in brickmaking.

One of the remarkable features of brick burning is that though much heat is expended on the process very little is actually used. It is nearly all thrown away. Raising the temperature of the bricks and driving off the hygroscopic and chemically combined water, uses heat in well-known quantities, but the process of turning clay into brick uses none. This is a physical fact hard to understand, but as I have hinted earlier in my lecture, the coal consumed in the process is considerable in quantity. For red bricks it is from 15 to 20 per cent of the weight of the burned goods in intermittent kilns. The way in which the heat produced by the coal is used is mainly in keeping the bricks at a high temperature till the necessary chemical action has taken place.

The principle of the continuous kiln is the using over again as much as practically possible of the heat wasted. Even in these the loss of heat by warm gases going up the chimney and more notably still the loss by conduction through the massive walls of the kiln is enormous and cannot economically be prevented.

**Types of Clay.**—The clays that in-

terest the brickmaker chiefly are the shales, marls and surface clays.

**Shale.**—Shales are almost always made into bricks by the semi-dry process, although the plastic process may be used. In Peterborough, where bricks are made from an oily shale, even the excavation of the shale is done with steam diggers on the largest works. The shale is brought straight from the bank to the machine, there to be ground to a granular condition. It is screened mechanically to the required fineness, mixed mechanically with a small amount of water if necessary, and then passed automatically into presses with rectangular cast-iron moulds for fashioning the brick. The pressing into brick form may be completed in one operation or the brick may be pressed a second time to improve its finish. Water in small proportion is necessary in order to obtain the cohesion of the fine particles or grains of shale. From the presses the bricks are taken straight to the kiln in which they are dried and burned in one continuous operation.

It is often stated that they are made dry and do not require drying. This is not true, but the amount of water in them is much less than in those made by plastic process, and they are sufficiently hard and strong to stack in position for burning direct from the presses. In the kiln they are dried first and burned afterwards continuously. In contrast to this, bricks made on the plastic system are too soft to be stacked in the kiln and must be dried first by one of the various means employed in the trade.

**Marls.**—They are so called because of the presence of carbonate of lime in varying quantity. Carbonate of lime or chalk has this peculiarity in connection with brickmaking, that when present in lumps or nodules it is exceedingly dangerous and destructive, unless effectively ground up or eliminated, but when in a fine state of division it is harmless. Marls rarely contain more than 5 per cent, but they require very careful selection and treatment, even when the proportion is much less. The carbonate of lime when not finely divided becomes converted in burning into quick lime, which slacks when the bricks absorb moisture from the air with the result that the face becomes pitted through the lime blowing pieces off the face. Yet clay exists containing as much as 10 per cent of carbonate of lime that may be made into sound bricks.

Marls are plastic clays and in common with gault and surface clays, when made into common bricks are treated by the wirecut system of brickmaking. The clay is dug and conveyed in wagons usually by a suitable hoist direct to the machinery. This may consist of a brickmaking machine only or preferably a train of machinery which gives a thorough preparation to the clay before it is finally pugged. This machinery may consist of all or either of three types. The grinding pan resembling a mortar mill is useful in working up a sandy non-cohesive clay to a more plastic condition than it possesses in its natural condition. The bottom of the pan is perforated in parts, and the rollers squeeze the clay through the perforations causing it to drop into the next machine.

Again the clay may instead be passed through one or more pairs of

rollers running at different speeds. These crush the clay, and any stones or lime contained in it, and at the same time tear it slightly by reason of their different speeds of running. From the pan or the rollers the clay may pass to a third type of machine, the mixer. This may be open or closed and have one or two revolving shafts. On the shafts are knives so inclined as to push the clay forward and mix it at the same time. The mixer may be about 6 feet long and horizontal in position. From the orifice at the end the clay drops into the hopper of the brick-making machine. If required, water is added to the clay either in the pan or the mixer, but never in the rollers, as it would cause the clay to slip.

The brickmaking machine usually has a small pair of rollers mounted on it through which the clay is forced into the barrel. This again is horizontal and is furnished with a single shaft, and pugging knives similar to those of the mixer. These knead and compress the clay and press in towards the mouth of the machine. At the end of the shaft a worm is placed which pushes the clay through the mouthpiece and die, and forms it into a continuous rectangular column of the correct cross section. The dimensions of the cross section correspond with the length and width of the brick allowance being made for the shrinkage in drying and burning about which I have already told you. The column of clay is now finally cut off by wires drawn transversely through it, the wires being spaced the necessary distance apart to give the correct thickness of the brick. From the cutting table the bricks are wheeled to the drying ground, shed or other apparatus in order to be thoroughly dried before being stacked in the kiln for burning.

**Hand Brickmaking.**—I now have, therefore, to give you finally some description of the older process of hand brickmaking, which holds its own in certain parts of this country, England, in spite of the great improvement of machines in the last thirty years. It is the process used in the days of the Babylonians, Egyptians and Romans, and was that used by the first brick-makers in England up to the middle of the 19th century. It is to all intents and purposes the process used for all artistic terra cotta making in which mechanical aids are almost useless. Yet, strange to say, it is looked down upon with scorn by the countries far advanced in mechanical appliances, Germany and America, while it is practiced almost exclusively in Belgium and Holland, and largely in France. The hand brickmaking process is used for making stock brick and red facings. The clay is usually prepared for making by weathering, that is, by being spread out in layers in the open air, so that air, rain and frost may in turn act upon it and loosen it after its long confinement in the natural bed. Weathering is practiced as well as what is termed resting, on other clays, and although the effects of it are apparent and the causes guessed at, no definite knowledge has been obtained as to the reason it is so efficacious. Stony clays for hand-making are also washed but those found free of stones do not usually need it. The weathered clay is pugged or ground, usually in vertical pugmills driven by horse or steam power. These mills are essen-

tially the same as the horizontal ones previously described and serve to mix the clay and incorporate the water and finally expel the mass in a condition fit for moulding.

Steel or wood moulds of the required size are wetted and rolled in fine dry sand and placed in position on the moulder's table. A "walk" of clay, as it is called, is then made by the moulder and rolled into a shape suitable for throwing into the mould. This walk is dexterously rolled in dry sand and, when ready, thrown with some force into the mould. The excess of clay is then struck off and the finished brick dropped carefully from the mould on to a pallet. The final result and effect depends on a variety of circumstances. The surfaces of the brick may be fine and uniform, or they may be wrinkled and coarse. The brick may be true and square or out of shape and deformed. These defects are due to the idiosyncracies of the moulder, who requires training carefully in the way he is wanted to go. The final color and appearance depend on the quality of the clay and sand used, the kind of kiln, the method of firing, and the final temperature and soaking; all matters requiring constant care and much technical knowledge. The drying is an operation also requiring unremitting attention, and all the various materials, operations and skill combine to yield the final product, which may or may not produce adequate returns according to the demand and the success of the master in supplying it.

The processes used in hand brickmaking are such as to afford to the clay the most perfect treatment from a physical point of view. The weathering, the slow pugging, the lengthy and complete drying, all tend to assist the clay molecules to adapt themselves to the altered conditions they encounter in their drastic change of state. At the same time, the ultimate result is not only sound physically, but it is in the highest degree artistic and durable, provided the processes of manufacture are all properly carried out. It is durable under all circumstances of environment; water, frost, sun, and fire all alike, leaving it unharmed and unchanged. That this is so, the old examples of brickwork in East Anglia and elsewhere eloquently testify.

**History.**—We all know that brick-making as an art is ancient and even prehistoric. The earliest bricks found in Egypt are said to be 12,000 years old, and we are often reminded that the children of Israel had to make bricks for Pharaoh and find their own straw. These bricks were made of Nile mud mixed with chopped straw and the clay was trodden by men, much as it was up to quite recent times in this country. The bricks were moulded and sun-dried, but not baked and would have been of little use in our climate. They were hard and served to build lasting monuments in that arid country. The well-known Step pyramid of Sakkara is built of such bricks and was cased externally with marble slabs, now removed. It is the oldest pyramid in Egypt.

It is said that the Tower of Babel was built of brick, the record being that the builders said "Go to, let us make bricks and burn them thoroughly." The walls of Babylon were built of bricks, and from the ruins the bricks have been carted away in modern days to build new cities. The burned ones were 13 inches square and

3 inches thick and the unburned ones of various sizes and they were set in bitumen. The great wall of China was built of burned and unburned bricks 2,000 years ago. It was 1,250 miles long and about 22 feet high. The walls of Athens on the side of Mount Hymettus were of brick, but the Greeks did not use them so much as the Romans, who were probably the first to burn them in kilns and improve their quality. In the first century A. D. they were of better quality than at any subsequent time, being then made about 2 feet square and 1 inch thick. Later they were made smaller and thicker, but by the end of the 4th century the art was practically lost until about the 13th century.

In England, as you well know, the Romans introduced bricks and brick-work in the 5th century, an example still remaining in Holy Trinity, Colchester, Colchester Castle, built in 1078, is largely of Roman bricks and also St. Botolph's Priory, built in 1116. The British people did not find the need of building in brick until the late 13th and early 14th century, because of the immense forests and abundance of wood, but they used clay as a filling between wooden external walls and board linings. Little Wenham Hall, built in 1260, is the earliest British building, the bricks being 9 1/2 by 2 1/2 by 2 1/2 inches, and mixed with courses of stone and flint. These and many of the bricks used in the Tudor period were probably imported from Holland. In late Tudor times terra cotta began to make its appearance, such as is found in Wolterton Manor House, East Barsham, built in the time of Henry VII. From Tudor times through the Renaissance period bricks continued to be used and after the fire of London in 1666, brick was generally used in the rebuilding of the city.

A great revival, however, occurred when mechanical manufacture became prevalent, and since that time one of the greatest booms in the use of bricks was witnessed in the revival of the Queen Anne style of architecture in the seventies and eighties. This was followed by the mushroom growth of the Fletton brick industry in the nineties, and a marvelous activity in the building trade about 1900, when bricks were in such demand that they fetched famine prices. The Transvaal War put an end to this activity, and for the last ten years such dullness has characterized the trade that I do not think more than one-third the number of bricks have been made annually.

You do not require to be told of the present vogue for the use of bricks of the Tudor type for facing buildings of all kinds. The genius of many of our great architects has found expression during the last few years in this ancient material in work that is characterized by greater variety and charm than is to be found in any previous style.

The sinking of ships and the loss of lives in the St. Lawrence river demonstrates that with all our modern improvements there are daily dangers from moving accidents by flood and field. Yet when one considers the millions of people that are daily traveling and fro over the world the small number of accidents in comparison to risks taken are very few indeed.

Plans desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$30,000. Architect, Charles J. Rousseau, 46 Kenney street, S. F. Owner's name withheld. The building will be erected on the south side of Post street, 137 1/2 feet west of Polk, covering an area of 27 1/2 feet by 120 feet. There will be a total of twenty suites of two and three rooms, besides a large amusement room, auto storage basement and roof garden. Interiors will be finished in pine throughout except the entrance hall and lobby which will be finished in blue gum with marble wainscot. Plans provide for steam heat, an automatic elevator, hot water supply and vacuum cleaning. All suites will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath rooms. Exterior of the building will be faced with tapestry brick. Plans are nearly complete and figures will be called for in about one week.

**SAN FRANCISCO**—Apartment house, 5 story and base, Class C construction, \$45,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, G. A. Steffen. The building will be erected at the northwest corner of Taylor and Sacramento streets, and has been designed to contain a number of large apartments all of which will have private bath rooms and wall beds. Interior finish will be of pine and hardwood veneer with oak floors in the principal rooms. There will be steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will be finished in pine and will have composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$25,000. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, William A. McKee. The building will be erected on the north side of Bush street east of Leavenworth, having a frontage of 25 feet and a depth of 86 feet. There will be eight suites of two and three rooms, all of which will have private baths and wall beds. Interior finish will be of pine throughout. There will be steam heat, elevator service and a hot water system. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 7 story and base, Class A construction, \$100,000 or more. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner's name withheld. The building has been designed for a high class apartment house in which each of the tenants will own an interest. There will be but six apartments in the building, the two upper floors containing but one apartment, and the other floors one apartment each. There will be

three baths to each floor. Basement will contain storage space for automobiles. Interiors will be finished to suit each tenant. There will be steam heat, passenger and service elevators, vacuum cleaning and a hot water supply. Bath rooms will be finished in tile and equipped with showers. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and segregated figures will be called for at once.

**TACOMA, WASH.**—Apartment house, 3 story and base, brick and steel, \$60,000. Architect, Bruce G. Humes, Tacoma. Owner, E. Hutchinson. The building will be erected at the corner of 13th and J streets. There will be nineteen suites of four and five rooms. Interior will be finished in pine and hardwood with hardwood floors. Plans provide for steam heat, elevator service and a hot water supply. All suites will have wall beds and private bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick. Plans are complete and the work will probably be done by Day Labor.

**LOS ANGELES, CAL.**—Apartment house, 4 story and base, Class C construction, \$42,000. Architects, Tifal Bros., 3294 South Park Avenue, L. A. Owner, Aristio McCrimmon. The building will be erected on W's 15th street, near Magnolia, and has been designed to contain a total of 81 rooms which will be arranged in two and three room suites. Interior finish will be of pine and hardwood. There will be steam heat, automatic elevator, a hot water system and vacuum cleaning. Bath rooms will be finished in tile with composition floors. All suites will have wall beds and private bath rooms. Exterior of the building will be faced with pressed brick. Plans are nearly complete.

### BATH HOUSE.

**SAN RAFAEL, MARIN CO., CAL.**—Bath house mechanical equipment. Cost not stated. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. All bids received for the mechanical equipment for the new Municipal Bath House at San Rafael have been rejected as being above the amount available for the installation. A contract for the steel tank for the baths was awarded to the Des Moines Bridge and Iron Works at \$3,290. The following is a list of the bids received for the mechanical equipment:

Kiernan & O'Brien	\$11,533.00
Victor Eng. Co.	11,325.00
J. E. O'Mara	10,750.00
American Machine Works	9,999.99
Pacific Fire Extinguisher Co.	10,283.00
Peterson-James & Co.	9,500.00
J. C. Hurley Co.	8,960.00

### BONDS.

**TULARE, Tulare Co., Cal.**—The Tulare Power Company is planning improvements and extensions with a bond issue of \$1,000,000.

**REDFELLS, Wash.**—Bonds for \$36,000 for a two-story stone addition to the present high school building were

authorized at a special election held here.

**PALO ALTO, Santa Clara Co., Cal.**—A bond issue voted here on June 25th was defeated. Election was held for the purpose of raising funds for the establishment of recreation grounds and for the purchase of a lot upon which to build an addition to the present library. This was the second election called. The vote was as follows: Recreation Park, 500 for the issue and 163 against; Library lot, 501 for and 453 against.

**KERMAN UNION HIGH SCHOOL DISTRICT, Fresno Co., Cal.**—The proposition to bond the school district for \$10,000 will be held here for the second time on July 20th. Funds will be used in the erection of a school building and equipping same.

**ENCINAL, Sutter Co., Cal.**—July 25th has been decided upon for the second bond election in this school district to raise \$5,000 to build a new school building. The first election, held June 15th, failed by three votes of the necessary two-thirds.

**PAYRAN SCHOOL DISTRICT, Sonoma Co., Cal.**—Bonds in the sum of \$3,000 were voted here and carried by a vote of 21 to 5. The bonds are to be in denominations of \$600, and are to run for a period of five years.

**NEWARK SCHOOL DISTRICT, Alameda Co., Cal.**—An election will be held here on July 21st for the purpose of voting \$25,000 in bonds to be used in the construction of a new school building, the purchasing of additional grounds for the district and the supplying of the new school building with the necessary apparatus.

**OREGON CITY, Ore.**—The returns of an election held here of a bond issue, funds to be used for the erection of a high school building, carried. Bonds in the sum of \$14,000 were voted.

**MARSHFIELD, Ore.**—The voters of the Libby School District have voted bonds amounting to \$4,000 for the erection of a school building.

**WARRENTON, Ore.**—Bids will be received by the Water Commission of this city until August 3rd for the purchase of \$150,000 municipal bonds. The bonds are to be issued in denominations of \$100 to \$1,000, to suit, and payable in twenty years at 6 per cent.

**HOOD RIVER, Ore.**—At a special meeting of the County Court here July 15th was set for the special election to vote on the \$75,000 Columbia Highway bond issue.

## BRIDGES AND DAMS.

**MADERA, MADERA CO., CAL.**—Bridges, 9, steel and reinforced concrete. Cost not stated. Engineers, Leonard & Day, Rialto Bldg., S. F., and Post & Thomas, Los Angeles, Owners, Madera County. The Supervisors of Madera County, after a continuous three-day session, adopted plans for nine new county bridges which will replace those washed out last year. Five of the new bridges will be designed by Engineers Leonard & Day, Rialto Bldg., S. F. and four by Post & Thomas, of Los Angeles. The bridges to be built will be located as follows: Two over Cottonwood Creek, one on the county road and the other on the State Highway, one on the first slough south of Berenda, second slough south of Berenda, county highway at Walter's creek, county highway at Pine Gold; Berenda slough south of Chow Chilla, Ash creek, and one other.

**KNIGHTS LANDING, COLUSA CO., CAL.**—Drainage ditch, \$800,000. Engineer's name not given. Owners, Knights Landing Drainage District. Directors of the Knights Landing Drainage District, embracing 72,000 acres in Colusa County, have voted to construct a ditch connecting the Yolo Basin By-Pass with the Colusa Basin. Four large dredges will be employed. The work has been estimated to cost \$800,000, and funds have been secured.

**SAN JOSE, SANTA CLARA CO., CAL.**—Culverts, 3, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. These three road culverts will be erected in the Fifth Road District. Plans are complete and figures are now being taken. Bids will be opened on July 20th. Plans and specifications can be secured from the County Surveyor.

**JACKSON, WYO.**—Bridge, steel and reinforced concrete. Cost not stated. Engineer, U. S. Reclamation Service, Boise, Idaho. Owners, United States Government. Plans have been completed for a steel truss bridge to be erected over the South Fork of the Snake River near Jackson. There will be three spans of 130 feet each with timber and concrete approaches. Bids are now being taken and will be opened on July 22nd. Plans can be secured from the United States Reclamation Service at Boise, Idaho.

**RICHMOND, CONTRA COSTA CO., CAL.**—Bulkhead and retaining wall, timber and concrete construction. Cost not stated. Engineers, Haviland & Tibbitts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. Plans and specifications for a portion of the bulkhead and retaining wall work for the Outer Harbor project at Richmond have been completed and approved. Bids are now being called for and will be opened on July 20th. Plans and specifications can be obtained from the engineers. An official proposal for the work appears in another column of this issue.

**CHICO, BUTTE CO., CAL.**—Bridge, steel and reinforced concrete. Cost not stated. Engineer, County Engineer M. C. Polk, Chico. Owners, City of Chico and Butte County. County Surveyor M. C. Polk of Chico has plans nearly complete for a new steel and reinforced concrete bridge to be erected over the Big Chico creek at the intersection of Main and Esplanade in Chico. Plans will be submitted to the Board of Supervisors for approval at their next meeting and bids will be called for shortly.

## Contracts Awarded.

**MARE ISLAND, CAL.**—Dike reinforcement, earth and concrete, \$29,837. Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Contractors, Thomson Bridge Co., S. F. Contract price, \$29,837.

**SAN FRANCISCO**—Pier construction, \$386,200. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$386,200. Note: A complete list of the figures opened by the State Board of Harbor Commissioners for this work will be found under the heading of San Francisco in this issue.

**SAN FRANCISCO**—Ferry slips, concrete, \$91,500. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Own-

ers, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$91,500. Note: A complete list of these figures will be found under the heading of San Francisco in this issue.

**MARTINEZ, CONTRA COSTA CO., CAL.**—Wharfage, timber construction. Cost not stated. Engineer, Engineering Department Standard Oil Company. Owners, Standard Oil Co. Contractors, Hyde-Harjes Co., S. F. Contract price not stated.

## CHURCHES.

**SEBASTOPOL, SONOMA CO., CAL.**—Church, 1 story, frame and plaster, \$1,200. Architect, J. W. Dolliver, Royal Insurance Bldg., S. F. Owners, St. Mark's Mission, Rev. Ernest Bradley. The building will be designed in the Mission style and will contain besides the auditorium a large Sunday school room. Interior finish will be of pine throughout. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**LONG BEACH, LOS ANGELES CO., CAL.**—Church, 1 story and base, frame and plaster, \$15,000. Architect, C. Ben Sholes, Long Beach. Owners, Second Presbyterian Congregation. The building has been designed in the Mission style. There will be a large auditorium and Sunday school rooms. Interior will be finished in pine with some ornamental plaster. Exterior will be covered with cement plaster on metal lath. Plans are complete and work has been started by Day Labor.

## COURT HOUSES.

**SEATTLE, WASH.**—Court house, 3 story and base, concrete, steel and stone, \$906,973. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, City of Seattle. Contractors, Puget Sound Bridge and Dredging Co., Central Bank Bldg., Seattle. Contract price, \$806,973. Note: A proposition to build two additional stories is still under consideration, and a decision of the matter is expected within a week or ten days.

**HUNTINGTON PARK, LOS ANGELES CO., CAL.**—City hall, 1 and 2 story, brick, \$14,000. Architect, George W. Eldridge, Marsh-Strong Bldg., L. A. Owners, Town of Huntington Park. The building will contain the council chamber, offices for the city heads and fire department. Interior will be finished in pine. There will be fireproof vaults. Exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

## FACTORIES & WAREHOUSES.

**OAKLAND, CAL.**—Warehouse, 1 story, frame and corrugated iron, \$10,000. Architect, none. Owners, Nevada Mineral Paint Co., 825 O'Farrell street, S. F. The building will be erected at the northeast corner of 40th and the Key Route tracks, covering a considerable ground area. Special machinery will be installed. No interior finish will be used. Exterior will be covered with corrugated iron. Plans are complete and in the hands of the owners who are now doing the work by Day Labor.

**PORTLAND, ORE.**—Stables, 2 story and base, reinforced concrete, \$50,000.

Architect, Bureau of Buildings, Portland. Owners, City of Portland. The buildings will be erected at the corner of 16th and Jefferson streets, and will cover a large ground area. Plans provide for the most modern equipment. There will be special electric work. Exterior will be faced with cement plaster. Plans are now being prepared.

**SEATTLE, WASH.**—Factory and warehouse, 9 story and base, reinforced concrete, \$850,000. Architect, George C. Minnions, People's Gas Bldg., Chicago, Ill. Owners, Sears-Roebuck Co., Chicago. A large site adjoining a building on Utah street now occupied by the owners has been secured and a class A structure covering an area of 210 by 330 feet will be erected. A portion of the building will be used for a factory and the balance for warehouse and store purposes. There will be reinforced concrete walls, floors and roof slabs. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service, a vacuum cleaning system and spiral chutes. Metal window sash and frames are specified. Exterior will be faced with cement plaster. Plans will be completed within two months and figures will be called.

**VISALIA, TULARE CO., CAL.**—Ice plant, 1 story, brick and steel, \$20,000. Architect's name not given. Owners, Visalia Manufacturing Co., S. J. Scott, Mgr., Visalia. S. J. Scott, manager of the Visalia Manufacturing Co., at Visalia, states that construction of a \$30,000 ice plant having a daily output of 20 tons is assured. Construction of the building and installation of the machinery will be started early in the fall.

**LOS ANGELES, CAL.**—Warehouse repairs, 3 story and base, brick, \$20,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Montague Estate. The building recently damaged by fire will be repaired at a cost of \$20,000. The work will require new floor joists, interior partitions, steel columns and girders, window sash and frames and Kinnear doors. Exterior will be faced with stock brick. Plans are now being prepared.

#### Contracts Awarded.

**FRESNO, FRESNO CO., CAL.**—Packing plant, 1 story and base, reinforced concrete, \$30,000. Architect, R. F. Felchlin, Fresno. Owners, Roeding Packing Co., Fresno. Contractor, R. F. Felchlin, Fresno. Contract price, \$30,000.

#### FIRE HOUSES AND JAILS.

**SAN FRANCISCO**—Jail and City Morgue lighting fixtures. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being taken for furnishing and installing lighting fixtures in the City and County Jail and in the new City Morgue. Bids will be opened by the Board of Public Works on July 8th. Plans can be secured from the City Department of Architecture.

**SOUTH PASADENA, LOS ANGELES CO., CAL.**—Fire house, 2 story and base, brick, \$10,000. Architect, Norman E. Marsh, Broadway Central Bldg., L. A. Owners, Town of South Pasadena. The building will contain the mar-

shall's office, telephone exchange and space for one piece of apparatus in the first floor. Upper floor will be arranged for a lounging room and apartments for the men. Interior finish will be of pine. There will be steam heat and modern plumbing. Exterior will be faced with enameled brick. Plans are being prepared.

#### FLATS.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$5,000. Architect, L. Traverson, 551 Union street, S. F. Owner, A. Boschetti, 330 Green street, S. F. The building will be erected on the west side of Grant avenue near Lombard, and will have a frontage of 25 feet by a depth of 51½ feet. There will be three modern flats of four and five rooms. Interiors will be finished in pine throughout. There will be open fire places and tile mantels. Bath rooms will have composition floors. Entrance will be finished in tile and terrazzo. Exterior of the building will be covered with rustic. Plans are now being prepared and the work will probably be done by Day Labor.

#### GOVERNMENT WORK AND SUPPLIES.

**Mare Island, Reinforcing Dike No. 12.** The bid of the Thomson Bridge Company, San Francisco, Cal., amounting to \$29,837, has been accepted for the reinforcement of dike No. 12 at the Mare Island navy yard.

**PEARL HARBOR, HAWAII**—Industrial buildings, 5, 1 and 2 story, frame and concrete. Cost not stated. Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Five new industrial buildings will be erected at the Naval Training Station at Pearl Harbor. Plans for this work have been completed and are now out for figures. Bids will be opened in Washington on August 15th. Plans and specifications can be secured from the Bureau of Yards and Docks. An official proposal appears in another column of this issue.

**INDUSTRIAL BUILDINGS**—5 1 and 2 story, frame and concrete. Cost not stated. Pearl Harbor, Hawaii. Engineers, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Five new industrial buildings will be erected at the Naval Training Station at Pearl Harbor. Plans for this work have been completed and are now out for figures. Bids will be opened in Washington on August 15th. Plans and specifications can be secured from the Bureau of Yards and Docks. An official proposal appears in another column of this issue.

#### HALLS & SOCIETY BLDGS.

**ASTORIA, ORE.**—Club house, 2 story and base, reinforced concrete and brick \$25,000. Architects, MacNaughton & Raymond, Title Trust Bldg., Portland. Owners, Young Men's Christian Association. The building has been designed to contain the offices of the organization, a large gymnasium, swimming tank, library, social hall, auditorium and dormitories. Interior finish will be of pine and hardwood with maple floor in the gymnasium. Plans provide for steam heat, a hot water system and vacuum cleaning. Exte-

rior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

**SAN FRANCISCO**—City Hall, 1 story and dome. Class A construction, \$1,500,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the last regular meeting of the Board of Public Works for the interior stone work show Larsen-Sampson Co. low at \$187,500, and The Mission Marble Works low at \$26,943 for the marble steps, stairs and bases. Contracts will probably be awarded these firms. A complete list of the bids received will be found under the heading of San Francisco in this issue.

#### HOSPITALS

**SAN FRANCISCO**—Hospital, 2 story and base, reinforced concrete, \$35,000. Architect, John Baur, Sheldon Bldg., S. F. Owners, San Francisco Home for Incurables. This building has been mentioned here a number of times before, and will be erected at the northeast corner of Wood and Point Lobos avenues. Plans have been revised and figures taken. Bids are now in the hands of the architect and a contract will be awarded this week.

#### HOTELS.

**SAN FRANCISCO**—Hotel alteration, 2 story, frame, \$4,000. Architect, none. Owner, Charles Katz, 1200 Dolores street, S. F. The present two-story frame store and loft building located on Mission street south of 17th will be altered so that the second floor may be occupied by a hotel. The work will include interior finish, plastering, electric work and plumbing. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**FRESNO, FRESNO CO., CAL.**—Hotel alterations, 2 story and base, brick, \$20,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, James Porteus. The present building located at the corner of Tulare and I streets will be altered into a modern store and hotel structure. There will be six stores on the first floor and in the neighborhood of 54 guest rooms and several baths on the upper floor. Work will require new plastering, painting, plumbing, plastering and electric work. Exterior will be faced with pressed brick. Plans provide for patent store fronts. Plans are now being prepared.

#### Contracts Awarded.

**ONTARIO, SAN BERNARDINO CO., CAL.**—Hotel, 2 story and base, concrete and frame, \$35,000. Architect, none. Owners, Ford Bros. Contractors, Butler Bros., Mason Bldg., L. A. Contract price, \$35,000.

#### PANAMA - PACIFIC EXPOSITION WORK.

**SAN FRANCISCO**—Scintillator pier, timber construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been revised and new figures are now being called for on the construction of a scintillator pier on the Exposition grounds. Plans and specifica-

tions can be secured from the Director of Works. Bids will be opened on July 9th. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—Exhibit building, 2 story, frame, and plaster. Cost not stated. Architect's name not given. Owners, Ocean Government, represented by General Enrique Lora del Castillo, Palace Hotel. Plans for this work have been out for figures for the past week and bids will be opened on July 7th. Construction will be carried on under the direction of the Director of Works of the Exposition Co. An award of contract was probably made this week.

EL SEGUNDO, LOS ANGELES CO., CAL.—School, 1 story and base, brick, \$12,000. Architect, E. L. Hopkins, Delta Bldg., L. A. Owners, El Segundo School District. The building has been designed to contain four rooms and an assembly hall. Interior will be finished in pine throughout. There will be modern school plumbing. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.  
SANTA ANA, ORANGE CO., CAL.—School, 1 story and base, reinforced concrete, \$35,000. Architect, J. Flood Walker, Santa Ana. Owners, La Habra School District. The building has been designed in the patio style, covering a ground area of 111 by 196 feet. There will be six class rooms, library, principal's office and teachers' room. Interior will be finished in pine with maple floors in the principal rooms. Exterior of the building will be faced with cement plaster. Plans are now being prepared.  
GLENDALE, LOS ANGELES CO., CAL.—School, 2 story and base, brick, \$40,000. Architect, C. S. Westlake, 1155 Oak street, Glendale. Owners, Town of Glendale. The architect has just been commissioned to prepare plans for the new school buildings to be erected at Glendale under the recent bond issue of \$87,000. About \$40,000 will be available for new work, the remainder of the bond issue to be used for the purchase of new sites. The plans for a four-room addition to the Third Street Intermediate School and a two-room addition to the Casa Verdugo school are practically completed and work will be started as soon as possible. Plans are also to be prepared for a six-room building to be erected in the southwest section of the city and for a four-room building in the northeast section but

will not be started until the board of trustees has selected the sites. The buildings will be of brick construction.

**TUSTIN, ORANGE CO., CAL.**—School, 2 story and base, brick and concrete, \$10,000. Architects, Elwing & Tedford, Orange County Savings & Trust Bldg., Santa Ana. Owners, Tustin School District. The building will contain ten class rooms, office, auditorium, library and manual training and domestic science departments. Interior finish will be of pine with maple floors in the class rooms. Plans provide for furnace heat. There will be modern school plumbing, program clocks and vacuum cleaning. Exterior will be faced with pressed brick. Plans are complete and bids will be opened on July 15th.

### Contracts Awarded.

**BEVERLY HILLS, LOS ANGELES CO., CAL.**—School, 1 story, reinforced concrete, \$20,000. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Beverly Hills School District. Contractors, Lepper & Laisy, Builders' Exchange, L. A. general construction, \$18,916.

**RIVERSIDE, RIVERSIDE CO., CAL.**—School, 1 and 2 story and base, hollow tile construction, \$45,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Corona School District. Contractor, George A. Daniels, 916 Herkimer avenue, Pasadena. general construction, \$56,993; Machinery and Electric Co., L. A. heating and ventilating, \$1,987; C. E. McPeak, Glendale, plumbing, \$5,190.

**GUSTINE, MERCED CO., CAL.**—School, 2 story and base, Class C construction, \$25,000. Architect, Ernest J. Kump, Fresno. Owners, Gustine School District. Contractors, Trowlitt & Shields, Fresno. Contract price, \$23,000.

### SEWERS, STREET WORK AND WATER SYSTEMS.

**SAN FRANCISCO**—Municipal asphalt plant. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Power Equipment Co. submitted the lowest figure at \$21,250 for furnishing the mechanical equipment for the Municipal Asphalt Plant, and will probably be awarded the contract. A complete list of the figures will be found under the heading of San Francisco in this issue.

**SAN FRANCISCO**—Power station, 1 story and base, Class A construction, \$60,000. Architect, Frederick H. Meyer Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. Plans are being prepared for a new switch station which will be erected in the Potrero District for the Pacific Gas and Electric Company. The building will cover a considerable ground area and will have a complete steel frame with concrete floor and brick exterior walls. Special equipment will be furnished by the company. Exterior will be faced with pressed brick. Plans are being prepared.

**SACRAMENTO, CAL.**—Sewage station discharge pipe. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids will be opened on July 9th for furnishing and erecting a discharge pipe for the new sewage pumping plant known as Station No. 2. Plans and specifications can be secured from the City Engineer.

**RED BLUFF, TEHAMA CO., CAL.**—Paving plant. Cost not stated. Engineer, none. Owners, Chico Construction Co. President Perley, of the Chico Construction Co., states that an order will be placed at once for a complete new street paving plant to replace the one recently destroyed by fire at Chico. The new plant will be constructed at Red Bluff where the company has a large paving contract about to start.

**NAVY YARD, PUGET SOUND, WASH.**—Exciter. Cost not stated. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be opened on July 25th for furnishing and installing a 10 kilowatt turbine-driven exciter in the central power plant at the Puget Sound Navy Yard. Plans can be secured from either the Bureau of Yards and Docks at Washington, D. C. or from the Commandant at the yard. An official proposal appears in another column of this issue.

**SACRAMENTO, CAL.**—Sewage pumping plant and equipment. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Ambrose & Teichert, Oschner Bldg., Sacramento, were the lowest bidders for constructing the one-story reinforced concrete building at \$19,180, and the Power Equipment Co., S. F., put in the lowest bid for furnishing the mechanical equipment at \$8,100. These firms will probably be awarded the work.

**SAUSALITO, MARIN CO., CAL.**—Sewer construction. Cost not stated. Engineer, City Engineer, Sausalito. Owners, City of Sausalito. Bids will be opened on July 13th at 3 p. m. for constructing sewers in Sections A, B, and C. Plans and specifications can be secured from the City Engineer. Separate proposals must be submitted for each section of the work together with unit prices.

**MILK RIVER IRRIGATION PROJECT, MONTE.**—Riveted steel pipe. Cost not stated. Engineers United States Reclamation Service, Boise Idaho. Owners, United States Government. Bids will be opened on July 22nd for furnishing a quantity of riveted steel pipe for the Milk River Project. Full particulars can be secured from the engineers at Boise. An official proposal appears in another column of this issue.

**BAKERSFIELD, KERN CO., CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. The Board of Trustees has instructed the City Engineer to prepare plans for a complete sanitary sewer system for East Bakersfield. Bids will be called for shortly.

**BAKERSFIELD, KERN CO., CAL.**—Sewer work. Cost not stated. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. Bids will be called for at the next meeting of the Board of Trustees for construction of sewers in Districts Nos. 21 and 22.

### Contracts Awarded.

**SANTA ROSA, SONOMA CO., CAL.**—Street paving. Cost not stated. Engineer, City Engineer, Santa Rosa. Owners, City of Santa Rosa. Contractors, City Improvement Co., 211 Third St., Santa Rosa, submitted the lowest bid at \$750,000.

**SAN RAFAEL, MARIN CO., CAL.**—Street paving. \$700,000. Engineer, City Engineer, San Rafael. Owners, City of San Rafael. Contractors, Clarke-Henry Co., Sacramento. Contract price, \$100,000.

### STORES & OFFICE BUILDINGS

**SAN FRANCISCO**—Office alterations, Class A construction, \$6,000. Architect, R. V. Cobley, 133 Grant Avenue, S. F. Owners, Pacific States Tel. and Tel. Co. This work will include plumbing and dumbing fixtures, plastering and metal lath partitions, painting and mill work. The upper floor of the company's building on Grant Avenue is to be arranged for a cafeteria for the employees. Plans are complete and work will be started at once. Part of the work will be carried on by Day Labor and part let by contract.

**OAKLAND, CAL.**—Stores, 1 story, frame, \$3,000. Architect, H. K. Lovell, South Berkeley Bank Bldg., Berkeley. Owners, Price Bros., 188 Alcatraz Avenue, Oakland. The building will be erected at the northwest corner of Oakgrove and College avenues, and will contain three modern stores. Interiors will be finished in pine throughout. Patent store fronts and plate glass windows will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

### Contracts Awarded.

**DAVIS, YOLO CO., CAL.**—Stores and offices, 2 story and base, brick, \$23,000. Architect's name not given. Owner, J. B. Anderson, Contractor, C. J. Guth, Davis. Contract price, \$23,000.

**SAN FRANCISCO**—Stores, 1 story and base, Class C construction. Cost not stated. Architect, none. Owner, Dr. J. O. Hirschfelder, Contractor, James L. McLaughlin, 241 Kearny St., S. F. Contract price not stated.

### THEATRES.

**OAKLAND, CAL.**—Theater, 1 story and base, Class C construction, \$14,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Cardinal Bros. The building will be erected at the northwest corner of 12th and Kirkham streets, and has been designed to contain a modern motion picture theatre and one store. There will be a cement floor, metal lath and plaster partitions and special electric work. Interior will be finished in pine and ornamental plaster. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**SANTA ROSA, SONOMA CO., CAL.**—Theatre and stores, 2 story and base, Class A construction, \$50,000 to \$60,000. Architect, Lewis Cowles, Santa Rosa. Owners, represented by J. M. Whittingham, Santa Rosa. The building will be erected at the corner of 4th and A streets and will cover a large ground area. Construction will be fireproof throughout with a complete steel frame, concrete and brick exterior walls and fireproof partitions. The theatre will have a seating capacity of 200 people and will contain a completely equipped stage large enough to handle the best road shows. Interior of the auditorium will be handsomely finished in pine and ornamental plaster. Besides the theatre proper the ground floor will be arranged for a number of stores. Upper floor will contain offices. Plans provide for steam heat, a modern system of ventilation and special lighting effects. Exterior will be faced with pressed brick. Construction will be undertaken at once.

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. H. J. BRODE, Vice-Pres.

## BRODE IRON WORKS

## SEALED PROPOSALS.

### NOTICE TO CONTRACTORS.

OFFICE of the Clerk of the City Council of the City of Richmond, City Hall, Richmond, Cal.

Sealed bids will be received by the Clerk of the City Council of the City of Richmond in his office in the City Hall in the City of Richmond, California, until Monday, July 20, 1914, at 8 o'clock p. m. of said day for the construction of a portion of the Timber Bulkhead and Retaining Wall of the Richmond Outer Harbor and being in the City of Richmond, County of Contra Costa, California, and all as described and shown in and upon the specifications and plans for the work now on file in the office of the City Clerk of the City of Richmond, and which, for the purpose of more definite descriptions, are made a part hereof.

All bids must be made on the proposal sheets furnished each bidder. Notice to bidders, proposal sheets, specifications and plans, etc., can be obtained at the office of the City Clerk of the City of Richmond, Contra Costa County, at the office of F. A. Haviland, of Haviland & Tibbitts, Alaska Commercial Building, San Francisco, California, on the deposit of Five Dollars (\$5.00) by the prospective bidder. All bids shall be subject to the requirements of the above. All bids which in the judgment of the City Council present unbalanced unit prices, considered in relation to their unit price will be rejected. The right is reserved by the City Council of the City of Richmond to reject any or all proposals or bids. Each bid must be accompanied by a certified check made payable to the Clerk of the City of Richmond in the sum of at least five per cent (5%) of the total amount of the bid.

A. C. FARIS,  
City Clerk.

### NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Wednesday, July 29, 1914, said bids then and there to be taken and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of superstructures for two bridges on the Trinity State Road, one bridge, 30 foot span, to be erected across the Mad River; one bridge of two 60-foot spans, to be erected over the South Fork of the Trinity River.

Bids may be submitted on either all steel or combination steel and wood superstructures. Concrete piers and flooring for these bridges will be furnished by the State Department of Engineering.

Bids must be accompanied by detail drawings and struts, sheets, snow load to be taken at 8 feet of dry snow, live load to be taken as 20-ton road roller, or traction engine.

Blueprints showing profile and further information may be obtained by application to this office.

Cash, a bidder's bond, or certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for superstructures for two bridges on the Trinity State Road, California."

Signed: W. F. McCLURE,  
State Engineer.

### PROPOSALS FOR STEEL PIPES.

STEEL PIPES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. July 22, 1914, for furnishing material and erecting riveted steel pipes for the Milk River project, Montana. For particulars address U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

### PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 19th day of August, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of a tunnel and appurtenances under Twin Peaks in the City and County of San Francisco.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within six hundred (600) calendar days from the date of the contract to be made and entered into herefor.

The amount of bond for faithful performance of contract has been fixed at \$500,000.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratis upon application to the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserve the right to reject any and all bids for order of the Board of Public Works. F. J. CUTHBERT,  
Secretary.

### PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals, indorsed "Proposals for Erecting Five Industrial Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 15, 1914, and then and there publicly opened, for erecting five industrial buildings at the United States naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named, H. R. STANFORD, chief of bureau.

### PROPOSALS FOR EXCITER.

TURBINE EXCITER—Sealed proposals indorsed "Proposals for 10-Kilowatt Turbine-Driven Exciter" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 25, 1914, and then and there publicly opened, for furnishing and installing one 10-kilowatt turbine-driven exciter in the central power plant at the navy yard, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard named, H. R. STANFORD, chief of bureau.

### NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Monday, July 20, 1914, for constructing a reinforced concrete bridge over the second crossing of the San Gregorio creek on the county road from Honda to San Gregorio in the Fifth Road District, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, June 22, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least ten per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo, as liquidated damages, in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute said file, and in case of failure to award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county, in an amount not exceeding the contract price or to enter into a written contract with said county in accordance with said plans and specifications and all bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids. JOS. H. NASH,  
County Clerk.

### NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed proposals or bids will be received by the Board of Supervisors of Santa Clara County, California, up to the hour of 10 o'clock a. m. in the City of San Jose, up to 11 o'clock a. m. of Monday, July 20, 1914, for the construction of a concrete bridge over the second crossing of the San Antonio river in said county, and located as follows: one culvert on Union avenue, north of Carlton avenue; one culvert on Los Gatos and Almaden roads; one culvert on Los Gatos and Almaden road, near Thomas' place, near summit to end in accordance with plans and specifications in Book District No. 2, of the Board of Supervisors.

Each bid must be accompanied by a certified check in the sum of ten per cent of bid amount and made upon some reliable bank in favor of Here. A Foster County Clerk as liquidated damages in case the successful bidder

falls to file a satisfactory bond as required by said Board within five days for the faithful performance of the conditions of the contract.

The Board reserves the right to reject any and all bids.

All bids must be addressed to Henry M. Ayer, Chairman of the Board of Supervisors of Santa Clara County, and indorsed "Bids for Culverts."

By order of the Board of Supervisors of Santa Clara County.  
Attest: HENRY A. PFISTER, Clerk.

#### PROPOSALS FOR BRIDGE.

**BRIDGE**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Boise, Idaho, until 2 o'clock p. m. July 22, 1914, for furnishing all material and labor for the construction of a highway bridge, consisting of three spans of steel truss spans and wooden trestle approaches, across the south fork of the Snake River, near Jackson, Wyo. For particulars address the United States Reclamation Service, Boise, Idaho, or Washington, D. C. F. H. NEWELL, director.

#### PROPOSALS FOR BOILERS.

**BOILERS**—Sealed proposals indorsed "Proposals for Boilers and Accessories" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 11, 1914, and then and there publicly opened, for furnishing and installing four 160-horsepower water-tube boilers, a fan and motor, valves, piping and all other accessories in the heating power plant, United States naval hospital, Las Animas, Colo. Plans and specifications can be obtained on application to the commanding officer, H. R. STANFORD, chief of bureau.

#### PROPOSALS FOR BUILDING.

**PURSUANT** to Resolution No. 526 N. S. passed June 23rd, 1914, the Council of the City of Oakland, will receive bids for furnishing of all materials, labor and workmanship required in connection with the construction, erection and finish of Carpentry and Millwork, Plumbing and Gas Fitting, Composition Roofing, Sheet Metal and Skylights, Glass and Glazing, Pump Proofing, Automatic Fire Extinguishing Systems, Arsonproofing, Heating, Ventilating, for the building of an Auditorium to be erected on the grounds of Peralta Park located on the southerly side of Twelfth street between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals and specifications furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for Auditorium." Specifying work bid upon addressed to the Council and deposited by the bidder, or his agent, with said Council while in session between 11 o'clock a. m. and 1 o'clock p. m. on or before the 14th day of July, 1914, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time for the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings, and specifications prepared therefor and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent of the approximate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty days after receiving notice of award.

After the award and upon the execution of the agreement, the contractor

shall at the same time execute to the City of Oakland a deliver to the Auditor bond guaranteeing to the City the faithful performance of the contract, and in amount equal to twenty per centum of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bound set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 14th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after June 25th, 1914, within a reasonable time after application, and upon a deposit of Twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect. In addition, one complete set of plans and drawings required for the work will be furnished each applicant; additional copies will, however, be furnished, provided the applicant pays the cost of reproduction. Such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications, or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any and all bids submitted.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter of the City of Oakland.

FRANK M. SMITH, City Clerk.

#### PROPOSALS FOR WHARF.

**WHARF**—Sealed proposals indorsed "Proposal for Wharf" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. July 22, 1914, and then and there publicly opened, for furnishing and erecting a wharf at the United States naval coal depot, San Diego, Cal. Estimated cost, \$3,300. Plans and specifications can be obtained on application to the commanding officer of the coal depot, H. R. STANFORD, chief of bureau.

#### NOTICE TO CONTRACTORS.

SEALED BIDS will be received at the office of the Controller, University of California, Berkeley, Cal., at or before 10 A. M., Tuesday, July 14, 1914, for the construction of the **Heard Hall tennis courts on the grounds of the University of California, Berkeley**, as per plans and specifications on file at said office. A deposit of \$5.00 will be required for each set of plans and specifications, which will be returned upon return of said plans and specifications. THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

#### NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed proposals or bids will be received by the Board of Supervisors of Santa Clara County, California, in their rooms in the Court House in the City of San Jose, in said county, up to 11 o'clock a. m. of Monday, July 20, 1914, for the construction of a steel highway bridge across a Creek between the counties of San Benito and Santa Clara at the road leading from Hollister to San Felipe, in accordance with plans and specifications of said bridge, heretofore prepared by the Surveyors of Santa Clara and San Benito counties, which are on file in the Chambers of the Board of Supervisors of Santa Clara County.

Each bid must be accompanied by a certified check in the sum of ten per cent of the amount bid, drawn upon some reliable bank in favor of the Board of Supervisors of Santa Clara County, and in case the successful bidder fails to file a satisfactory bond as re-

quired by said Board within five days for the faithful performance of the conditions of the contract.

Bids for this work will also be received up to 11 o'clock a. m. of Monday, July 20, 1914, at the office of the Board of Supervisors of San Benito county in the town of Hollister, and the contract for said work will be awarded to such bidder as may be agreed upon by the Board of Supervisors of San Benito county and the Board of Supervisors of Santa Clara county as being the lowest responsible bidder for said work.

The Board reserves the right to reject any and all bids.

All bids must be addressed to Henry M. Ayer, Chairman of the Board of Supervisors of Santa Clara county, and indorsed "Bids for Steel Highway Bridge over Pacheco Creek."

By order of the Board of Supervisors of Santa Clara county.

Attest: HENRY A. PFISTER, Clerk.  
By F. A. Schilling, Deputy Clerk.

#### PROPOSALS FOR TURBINE.

**TURBINE**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. July 14, 1914, for furnishing a variable head turbine for the Salt River Project, Arizona. For particulars address the U. S. Reclamation Service, 695 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

#### NOTICE TO BIDDERS.

**PURSUANT** to an order of the Board of Supervisors of the county of Stanislaus, State of California, made and entered on the 9th day of June, 1914, notice is hereby given that sealed bids will be received by the undersigned clerk of the said Board up to and not later than the hour of 10 a. m. of the 14th day of July, 1914, for the construction of three bridges and one culvert in the county of Stanislaus, State of California, in accordance with the plans and specifications on file in my office where the same can be inspected by intending bidders during office hours.

All bids must be accompanied by a certified check on some solvent bank of the State of California in a sum equal to ten per cent of the amount bid, conditioned that the successful bidder will execute and attach contract and furnish such bond as may be required within ten days after such award, or failing so to do will forfeit the amount of said check as liquidating damages for such failure.

Bids to be submitted on special forms, which can be obtained from the county clerk.

The Board reserves the right to reject any or all bids.

H. BENSON, Clerk of the Board of Supervisors.

#### NOTICE TO CONTRACTORS.

BIDS will be received by the Board of Supervisors, County of Kern, State of California, up to 10 a. m. of July 15th, 1914, for the construction of a pile trestle bridge across the North Fork of Kern River at Greenville, County of Kern, California. Dimensions: 200 feet long, 315 dimension 208 feet wide, 20 feet wide; also a pile trestle bridge across branch channel of same stream near the site of said bridge. Dimensions: 20 feet long, 20 feet wide. Plans and specifications at County Surveyor's Office.

Each bid to be accompanied with a certified check payable to the Chairman of the Board of Supervisors, to the amount of 10 per cent of amount of bid to insure the entering into of a contract by the successful bidder.

The Board reserves the right to reject any or all bids.

#### Additional Notice.

Tender for the bridges can be secured from De A. Brown, C. of Kernville at the following rates:

\$25 per M. at the mill on Greenhorn Mountain.

\$30 per M. delivered at the bridge site.

By order of the Board of Supervisors of the County of Kern, State of California.  
H. A. J. Smith, Chairman.

Attest: J. L. MILLER, Clerk.

**NOTICE TO CONTRACTORS.**

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Thursday, July 30, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction, erection and installation of the Elevator Work, California State Library, State Capitol Building, Sacramento, California, in accordance with plans and specifications, therefore, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of bidders is called to the annexed "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CHARLES E. BLANEY,  
NEWELL D. DARLINGTON,  
CHARLES E. STERN,  
California Highway Commission  
AUSTIN B. BLANCHARD,  
Highway Engineer,  
CHARLES C. CARLETON,  
Acting Secretary.

Dated: June 23, 1914. (S)

**NOTICE TO CONTRACTORS.**

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Monday, July 20th, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the Gymnasium, California School for Deaf and Blind, Berkeley, California, in accordance with the plans and specifications, therefore, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Gymnasium, California School for Deaf and Blind, Berkeley, California."

[SIGNED] W. F. McClure, State Engineer.

**NOTICE TO CONTRACTORS.**

**PANAMA-PACIFIC INTERNATIONAL EXPOSITION.**

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 212, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 9:00 A. M., Thursday, July 9, 1914, for Construction of the Harbor Pier in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal. The bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, California, at \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (S)

**NOTICE TO CONTRACTORS.**

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Tuesday, July 21st, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor and doing the work required for the construction and erection of a building to be known as the Cottage for Epileptics, Sonoma State House, Eureka, Cal.

ifornia, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications; the deposit to be returned immediately

on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McCLURE, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposal for Cottage for Electricians, Sonoma State Home, Eldridge, California."

[SIGNED] W. F. McCLURE,  
State Engineer. (•)

## SAN FRANCISCO.

**SCINTILLATOR PIER**—Timber construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been revised and new figures are now being called for on the construction of a scintillator pier on the Exposition grounds. Plans and specifications can be secured from the Director of Works. Bids will be opened on July 9th. An official proposal appears in another column of this issue.

**EXHIBIT BUILDING** — 2 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, Cuban Government, represented by General Enrique Loynaz del Castillo, Palace Hotel. Plans for this work have been out for figures for the past week and bids will be opened on July 7th. Construction will be carried on under the direction of the Director of Works of the Exposition Co. An award of contract will probably be made this week.

**EXHIBIT BUILDING** — 2 story, frame and plaster, \$30,000. San Francisco. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Territory of Hawaii. Bids opened in Oakland for this work show Lester H. Stock, 12 Geary street, S. F., low at \$29,500. A number of bids were also received in Honolulu, the result of which is not known in this city. An award of contract will probably be made shortly. A complete list of the bids opened will be found under the heading of San Francisco in this issue.

**COURT OF THE UNIVERSE** — 1 story, frame and plaster. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened for the construction of this building show Strehlow, Freese & Peterson low at \$53,000. They will probably be awarded the contract. A complete list of the figures will be found under the heading of San Francisco in this issue.

**APARTMENT HOUSE**—4 story and base, reinforced concrete, \$30,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on the south side of Post street, 137½ feet west of Bulk, covering an area of 27½ feet by 120 feet. There will be a total of twenty suites of two and three rooms, besides a large amusement into storage basement and roof garden. Interiors will be finished in pine throughout except the entrance hall and lobby which will be finished

in blue gum with marble wainscot. Plans provide for steam heat, an automatic elevator, hot water supply and vacuum cleaning. All suites will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath rooms. Exterior of the building will be faced with tapestry brick. Plans are nearly complete and figures will be called for in about one week.

**APARTMENT HOUSE**—5 story and base, Class C construction, \$45,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, G. A. Steffen. The building will be erected at the northwest corner of Taylor and Sacramento streets, and has been designed to contain a large number of apartments, all of which will have private bath rooms and wall beds. Interior finish will be of pine and hardwood veneer with oak floors in the principal rooms. There will be steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will be finished in pine and will have composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—4 story and base, reinforced concrete, \$25,000. San Francisco. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, William A. McKee. The building will be erected on the north side of Bush street east of Leavenworth, having a frontage of 23 feet and a depth of 86 feet. There will be eight suites of two and three rooms, all of which will have private baths and wall beds. Interior finish will be of pine throughout. There will be steam heat, elevator service and a hot water system. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

**APARTMENT HOUSE**—7 story and base, Class A construction, \$100,000 or more. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner's name withheld. The building has been designed for a high class apartment house in which each of the tenants will own an interest. There will be but six apartments in the building, the upper two floors containing but one apartment and the other floors one apartment each. There will be three baths to each floor. Basement will contain storage space for automobiles. Interiors will be finished to suit each tenant. There will be steam

heat, passenger and service elevators, vacuum cleaning and a hot water supply. Bath rooms will be finished in tile and equipped with showers. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and segregated figures will be called for at once.

**EXHIBIT BUILDING**—1 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, American-Norwegian Associations. The local organizations of the Norwegians in California have taken up the matter of erecting a suitable building to represent their country at the Panama-Pacific Exposition. C. L. Wold, a well-known San Francisco contractor, has been made chairman of the Committee on Building and Plans.

**PLATS**—3 story and base, frame, \$5,000. San Francisco. Architect, L. Traverson, 854 Union street, S. F. Owner, A. Boschetti, 530 Green street, S. F. The building will be erected on the west side of Grant avenue near Lombard and will have a frontage of 25 feet by a depth of 51½ feet. There will be three modern flats of four and five rooms. Interiors will be finished in pine throughout. There will be open fire places and tile mantels. Bath rooms will have composition floors. Entrance will be finished in tile and terrazzo. Exterior of the building will be covered with rustic. Plans are now being prepared and the work will probably be done by Day Labor.

**HOTEL ALTERATION** — 2 story, frame, \$4,000. San Francisco. Architect, none. Owner, Charles Katz, 1200 Dolores street, S. F. The present two-story frame store and loft building located on Mission street south of 17th will be altered so that the second floor may be occupied by a hotel. The work will include interior finish, plastering, electric work and plumbing. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**HOSPITAL**—2 story and base, reinforced concrete, \$55,000. San Francisco. Architect, John Baur, Sharon Bldg., S. F. Owners, San Francisco Home for Incurables. This building has been mentioned here a number of times before, and will be erected at the northeast corner of Wood and Point Lobos avenue. Plans have been revised and figures taken. Bids are now in the hands of the architect and a contract will be awarded this week.

**CITY HALL**—4 story and dome. Class A construction, \$4,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the last regular meeting of the Board of Public Works for the interior stone work show Larsen-Sampson Co. low at \$187,500 and the Mission Marble Works low at \$26,043 for the marble steps, stairs and bases. Contracts will probably be awarded these firms. A complete list of the bids received will be found under the heading of San Francisco in this issue.

**POLYTECHNIC SCHOOL, FURRING AND LATHING**—Cost not stated. San Francisco. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last regular meeting of the Board of Public Works for the metal lathing, furring and studs for the Polytechnic School

show the Holloway Expanded Metal Co. low at \$19,192. They will probably be awarded the work. A complete list of these figures appears under the heading of San Francisco in this issue.

**MUNICIPAL ASPHALT PLANT**—Cost not stated. San Francisco Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Power Equipment Co. submitted the lowest figure at \$21,250 for furnishing the mechanical equipment for the Municipal Asphalt Plant and will probably be awarded the contract. A complete list of the figures will be found under the heading of San Francisco in this issue.

**POWER STATION**—1 story and base. Class A construction, \$60,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. Plans are being prepared for a new switch station which will be erected in the Potrero District for the Pacific Gas and Electric Company. The building will cover a considerable ground area and will have a complete steel frame with concrete floor and brick exterior walls. Special equipment will be furnished by the company. Exterior will be faced with pressed brick. Plans are being prepared.

**OFFICE ALTERATIONS**—Class A construction, \$6,000. San Francisco. Architect, R. V. Cobby, 333 Grant avenue, S. F. Owners, Pacific Tel. and Tel. Co. This work will include plumbing and plumbing fixtures, plastering and metal lath partitions, painting and mill work. The upper floor of the company's building on Grant avenue is to be arranged for a cafeteria for the employees. Plans are complete and work will be started at once. Part of the work will be carried on by Day Labor and part let by contract.

**RESIDENCE**—3 story and basement, frame, \$11,000. San Francisco. Architect, Edward L. Homes, 335 Pine street, S. F. Owner, Mrs. Hillyer Brown, 1 25th avenue, S. F. The building will be erected on the north side of Sea Cliff avenue between the northerly end of 25th avenue and the Pacific Ocean, and has been designed to contain twelve rooms and three baths. Interior will be finished in redwood with red southern gum in living and dining rooms and reception hall. Exterior will be covered with plaster on metal lath. Plans provide for furnace heat and brick fireplaces. Baths will have tile wainscot and composition floors. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame and plaster, \$25,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Clarence Musto, S. F. The building will be erected on Washington street and will cover a considerable ground area. Interior will be finished in pine and hardwoods. An automatic water heater will be installed. There will be furnace heat and open fire places. Exterior of the building will be covered with cement plaster on metal lath. Baths will have tile wainscot and composition floors. Plans are being prepared and figures will be called for shortly.

**RESIDENCE**—2 story and base, frame, \$8,500. San Francisco. Architect, A. J. Laib, Russ Bldg., S. F. Owner, Benj. Wertheimer. The building will be erected on the west line of Commonwealth avenue, between Geary

and Euclid streets, and will contain ten rooms and two baths. Interior will be finished in pine with some hardwood floors. There will be furnace heat and open fire places. Baths will have the wainscot and composition floors. Exterior of the building will be faced with cement plaster on metal lath. Brick on the mantels will be specified. Plans have been prepared and figures are being taken.

**JAIL AND CITY MOBILE LIGHTING FIXTURES**—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being taken for furnishing and installing lighting fixtures in the City and County Jail and in the City Morgue. Bids will be opened by the Board of Public Works on July 8th. Plans can be secured from the City Department of Architecture.

**Contracts Awarded.**

**PIER**—Timber construction, \$386,300. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$386,300. Note: A complete list of the figures opened by the State Board of Harbor Commissioners for this work will be found under the heading of San Francisco in this issue.

**FERRY SLIPS**—Concrete, \$91,700. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$91,700. Note: A complete list of these figures will be found under the heading of San Francisco in this issue.

**STORES**—1 story and base. Class C construction. Cost not stated. San Francisco. Architect, none. Owner, Dr. J. O. Hirschfelder, Contractor, James L. McLaughlin, 244 Kearny street, S. F. Contract price not stated.

**EXHIBIT BUILDING**—1 story, frame and plaster. Cost not stated. San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owners, Republic of Bolivia, represented by Carlos Sanjines, Russ Bldg., S. F. Contractor, William Martin, 110 Jessie street, S. F. Contract price, \$22,000.

**State Harbor Board  
Awards Contracts.**

**Healy-Tibbitts Constr. Company Secure Contract For Pier No. 35 And For Two New Ferry Slips.**

Five sets of figures were opened by the State Board of Harbor Commissioners at their Thursday meeting for the construction of Pier No. 35, which is to be erected north of the Ferry Building, between Kearny and Montgomery streets. Healy-Tibbitts Constr. Company presented the low figure at \$386,300 and were awarded the contract. Suerell & Son of Oakland were awarded a contract for moving the grain shed, which now occupies the site of Pier No. 35, for \$2,443.

Bids were also opened at the same meeting for constructing Passenger Slips 9 and 10 in the south end of the Ferry Building. Healy-Tibbitts Con-

struction Co. also secured this contract on a bid of \$91,700. Following is a complete list of the bids received:

**Constructing Pier No. 35.**

Clifton Fireproofing Co.,	\$455,800
F. A. Koetetz	480,000
San Francisco Bridge Co.,	411,937
Healy-Tibbitts Constr. Co.,	386,300
Dunnivant-Houghton-Van Sant Co.,	560,000

Passenger Ferry Slips Nos. 9 and 10.	
F. A. Koetetz	\$127,500
San Francisco Bridge Co.,	102,850
Thomson Bridge Co.,	96,315
Healy-Tibbitts Constr. Co.,	91,700

The next work to be advertised will be the foundation work for the new two-story post office adjoining the Ferry Building on the south and for the foundation work for a one-story Ferry Building Annex, which will be erected on the south of the present building. Plans for both of these buildings have been prepared under the direction of Assistant State Engineer Newman. Ferry Building.

**Bids For Court Of  
Universe Building.**

**Strehlow, Freese & Peterson Low. Four Bids Only Presented For The Work. No Award.**

Bids opened by the Buildings and Grounds Committee of the Panama-Pacific Exposition Co. for the construction of the Court of the Universe, show Strehlow, Freese & Peterson low at \$52,000. Three other figures were received.

**Court of The Universe.**

F. Rolandt	\$70,150
Dunnivant-Houghton-Van Sant Company	62,386
Strehlow, Freese & Peterson	52,000
J. Monk	55,692

**Lester H. Stock Low  
On Hawaii Building.**

**Thirteen Sets of Figures Opened in Oakland and Additional Bids Opened in Honolulu.**

Thirteen sets of figures were opened C. W. Dickey's office in Oakland for the construction of the Hawaii Building at the Panama-Pacific International Exposition. Of these the bid of Lester H. Stock, San Francisco, was low at \$29,500. Bids were also opened in Honolulu, but the result of these have not been learned. Following is a list of the bids opened in Oakland:

**Hawaii Exhibit Building.**

Pringle, Dunn & Co.	\$35,447
Lange & Bergstrom	33,311
Dunnivant-Houghton-Van Sant Company	31,880
Forster Vogt Co.	31,280
Lester H. Stock	29,500
Peter Hamilton	32,000
Caldwell & Son	30,897
A. T. Spence	37,500
J. O. Kuykendall	35,016
Strehlow, Freese & Peterson	32,750
W. B. Henderson	39,375
William Mutch	37,388
Boyd, Kerr & McLean	30,000

## OAKLAND AND ALAMEDA COUNTY.

WAREHOUSE—1 story, frame and corrugated iron, \$10,000. Oakland, Cal. Architect, none. Owners, Nevada Mineral Paint Co., 835 O'Farrell street, S. F. The building will be erected at the northeast corner of 10th and the Key Route tracks, covering a considerable ground area. Special machinery will be installed. No interior finish will be used. Exterior will be covered with corrugated iron. Plans are complete and in the hands of the owners who are now doing the work by Day Labor.

RESIDENCE—2 story and base. Frame, \$3,500. Oakland, Cal. Architect, W. A. Smith, 1019 Broadway, Oakland. Owner, G. J. Downing, 1590 Sacramento street, S. F. The dwelling will be erected on Hadden Road north of Excelsior avenue, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base. Frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Harvey Partridge-Smith, Blake Bldg., Oakland. Owner, P. O. Lloyd. The dwelling will be erected in the Boyd Tract, and has been designed to contain seven rooms and bath, interior will be finished in pine and hardwood with some oak floors. There will be furnace heat and open fire places. Mantels will be of tile. There will be tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

UNGALOWS—2, 1 story and base. Frame, \$3,000 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, F. R. Burke Co., 2127 University avenue, Berkeley. These two houses will be erected in the Northbrae District and each has been designed to contain seven rooms and bath. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be large open fire places and tile or brick mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior will be covered with shingles. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

COLLEGE TENNIS COURTS—Frame construction. Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owners, Regents of the University of California. Bids will be opened on July 14th for constructing new tennis court and building at the University of Cali-

fornia. Plans and specifications can be secured from the Comptroller of the University at Berkeley. An official proposal for the work appears under another heading in this issue.

**STORES**—1 story, frame, \$3,000, Oakland, Cal. Architect, H. K. Lovell, South Berkeley Bank Bldg., Berkeley. Owners, Price Bros., 498 Alcatraz avenue, Oakland. The building will be erected at the northwest corner of Oakgrove and College avenues and will contain three modern stores. Interiors will be finished in pine throughout. Patent store fronts and plate glass windows will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**THEATRE**—1 story and base, Class C construction, \$14,000, Oakland, Cal. Architect, Clay S. Burrell, Albany Bldg., Oakland. Owners, Cardinet Bros. The building will be erected at the northwest corner of 12th and Kirkham streets, and has been designed to contain a modern motion picture theatre and one store. There will be a cement floor, metal lath and plaster

partitions and special electric work. Interior will be finished in pine and ornamental plaster. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$2,500, Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, E. J. Lloyd, 1057 Walker avenue, Oakland. The dwelling will be erected on the north side of Fairbank avenue, east of Walker, and will contain seven rooms and bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Exterior of the building will be covered with plaster. There will be furnace heat and open fire places. The mantels are specified. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$5,000, Oakland, Cal. Architect, none. Owner, John R. Hodge, 1719 16th avenue, Oakland. The building will be erected on the west line of 16th avenue, south of 19th street, and has been designed to contain eleven rooms and two baths. Interior will be

finished in pine. Brick mantels will be used. There will be furnace heat and open fire places. Exterior of the dwelling will be covered with cement plaster. Plans have been prepared and the work will be done by Day Labor. Materials are now being purchased and work will be started immediately.

**RESIDENCE**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, Mrs. G. M. Rowell. The building will be erected on the corner of Parker and Eina streets. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. Brick mantels are specified. Exterior of the building will be faced with cement plaster on metal lath. Tile wainscot and composition floor will be used in the bath. Plans are now being figured.

## SAN JOSE AND THE SANTA CLARA VALLEY

CULVERTS—2, reinforced concrete.  
 Cost not stated. San Jose, Santa Clara  
 Co., Cal. Engineer, County Surveyor,  
 San Jose. Owners, Santa Clara County.  
 These three road culverts will be  
 erected in the Fifth Road District.  
 Plans are complete and figures are now  
 being taken. Bids will be opened on  
 July 20th. Plans and specifications  
 can be secured from the County Sur-  
 veyor.

SCHOOL—2 story and base, rein-  
 forced concrete. Cost not stated. Santa  
 Cruz, Santa Cruz Co., Cal. Architect, W.  
 H. Weeks, 75 Post street, S. F. Owners,  
 Santa Cruz Union High School District.  
 Bids opened for this work show Peterson  
 & Wilson, S. F., low on the general  
 construction at approximately \$43,800;

Sengrini Bros., Santa Cruz, low on the  
 plumbing at \$1,254.50, and J. C. Hurley,  
 S. F., low on the heating and ventila-  
 ting at \$6,685. Contracts will probably  
 be awarded these firms. A complete  
 list of the figures will be found under  
 the heading of San Jose and the Santa  
 Clara Valley in this issue.

THEATRE ALTERATION—1 story,  
 brick, \$6,000. San Jose, Santa Clara  
 Co., Cal. Architect, none. Owner,  
 James Beatty, 716 South 5th street, San  
 Jose. The work will consist of the  
 complete overhauling of a one-story  
 brick building on South Market street.  
 There will be new plastering, electric  
 work, painting, interior finish and  
 plumbing. Plans are complete and the  
 work will be done by Day Labor.

RESIDENCE — 2 story and base,  
 frame. Cost not stated. Hillsborough,  
 San Mateo Co., Cal. Architects, Haves  
 & Toepke, 16 Kearny street, S. F.  
 Owner, George R. Shreve. The build-  
 ing will be erected on Santa Inez and  
 Mifford avenues, and has been designed  
 to contain a large number of rooms  
 and baths. Interior of the dwelling  
 will be finished in pine and hardwoods.  
 Hardwood floors will be used in the  
 principal rooms. There will be fur-  
 nace heat and open fire places. An au-  
 tomatic water heater will be installed.  
 Mantels will be of tile. Exterior of  
 the building will be covered with ce-  
 ment plaster on metal lath. Plans are  
 now being figured.

RESIDENCES—1 and 2 story, frame.  
 San Jose, Santa Clara Co., Cal. Archi-  
 tect, none. The following Day Labor  
 jobs are reported as about to be start-  
 ed in San Jose: C. S. Rea, San Jose, 1  
 story, frame, \$1,500; S. B. Druck, San  
 Jose, 1 story, frame, \$1,500; Mrs. E. C.  
 Ferguson, San Jose, 2 story, frame, \$2-  
 000; O. P. Sider, 1009 East Santa Clara,  
 1 story, frame, \$1,000; Alex Consola-  
 sion, 1 story, frame, \$800.

## Santa Cruz School Bids Are Opened.

Peterson & Wilson of San Francisco  
 Low on General Construction and  
 Will Get Contract.

(By Special Wire.)

SANTA CRUZ, CAL., July 2nd, 1914—  
 An exceptionally large number of  
 figures were opened by the Board of  
 Education for the construction of a  
 new two-story and basement reinforced  
 concrete school, designed by Architect  
 W. H. Weeks, San Francisco. Peterson  
 & Wilson of San Francisco sub-  
 mitted the lowest bid at approximately  
 \$43,800 on Proposition No. 2, and will  
 be awarded the contract. Sengrini  
 Bros. of Santa Cruz were low on the  
 plumbing at \$1,254.50 with Boyd, Kerr  
 & McLean next at \$1,310. The heating  
 and ventilating is between J. C. Hur-  
 ley of San Francisco with a bid of  
 \$6,788 and The Pacific Blower and  
 Heating Co. at \$6,685. Mr. Hurley's  
 bid having some special allowances  
 which will be considered by the Board.  
 Following is a complete list of the  
 figures received on Proposition No. 2,  
 which has been accepted by the Board  
 of Education:

Santa Cruz School,  
 R. O. Summers, San Jose..... \$51,872  
 Williams Bros. & Henderson, San  
 Francisco ..... 46,162  
 Boyd, Kerr & McLean, S. F..... 50,604

Schnebley, Hostrow & Ped-griff, Oakland ..... \$5,829  
 H. A. Klyce, S. F. .... 52,000  
 Sound Eng. & Const. Co., S. F. .... 45,300  
 Graham & Jensen, S. F. .... 49,522  
 Peterson & Wilson, S. F. \$43,000 plus  
 4% on all sub-contracts not awarded  
 to them, which will bring their bid to  
 approximately \$43,800.

Sengrini Bros., Santa Cruz, were low  
 on the plumbing at \$1,254.50, with  
 Boyd, Kerr & McLean next at \$1,310.

The three lowest bids for the heat-  
 ing and ventilating were as follows:  
 J. C. Hurley, \$6,788; Pacific Blower &  
 Heating Co., \$6,883, and The Scott Co.,  
 \$6,690.

## San Jose Native Sons Will Build.

Select Site and Complete Arrangements  
 For Five-story Class "A" Lodge  
 Hall on North First Street.

SAN JOSE, CAL.—Keeping in line  
 with the progress of the order the  
 Native Sons of the Golden West, the  
 San Jose parlor, have decided to erect  
 a five-story and basement Class "A"  
 store and lodge building on North  
 First street, San Jose. With the excep-  
 tion of the present building in San  
 Francisco, this building will be the  
 most modern and best furnished fraternal  
 edifice erected by the order. It will  
 be of reinforced concrete construction  
 and fireproof throughout.

According to the design submitted,  
 the lower floor is to contain stores; the  
 second floor offices for professional men  
 while the third and fourth floors will  
 be used exclusively for lodge purposes.  
 The fifth floor will consist of a spacious  
 ball room or assembly hall, which will  
 contain a large brick fireplace, stage  
 and cloak rooms. The roof will be used  
 as an open air dancing pavilion or roof  
 garden. The plans may be altered in  
 regard to the first, second and third  
 floors, as a local capitalist is endeavor-  
 ing to secure certain rights, and if the  
 proper connections are made, intends  
 to lease the lower portion of the build-  
 ing for a Class "A" theatre.

The direction of the work is in the  
 hands of the Directors of the Native  
 Sons Hall Association and under the  
 supervision of Architect Louis T. Len-  
 zen, of San Jose, who prepared plans  
 for the structure. Mr. Lenzen states  
 that the building will cost in the neigh-  
 borhood of \$100,000 and will rank sec-  
 ond among the lodge buildings erected  
 on the Pacific Coast.

Funds are now being raised for the  
 erection of the building and construc-  
 tion is expected to start at an early  
 date.

## LOS ANGELES AND SOUTH-ERN CALIFORNIA.

APARTMENT HOUSE 4 story and base, Class C construction, \$12,000, Los Angeles, Cal. Architects, Thifal Bros. 5201 South Park avenue. L. A. Owner, Aristio McCremon. The building will be erected on West 15th street near Magnolia, and has been designed to contain a total of 81 rooms, which will

be arranged in two and three room suites. Interior finish will be of pine and hardwood. There will be steam heat, automatic elevator, a hot water bath system and vacuum cleaning. Bath systems will be finished in tile with composition floors. All suites will have wall beds and private bath rooms. Exterior of the building will be faced with pressed brick. Plans are nearly complete.

CHURCH—1 story and base, frame and plaster, \$15,000, Long Beach, Los Angeles Co., Cal. Architect, C. Ben Sholes, Long Beach. Owners, Second Presbyterian Congregation. The building has been designed in the Mission style. There will be a large auditorium and Sunday school rooms. Interior will be finished in pine with some ornamental plaster. Exterior will be covered with cement plaster on metal lath. Plans are complete and work has been started by Day Labor.

WAREHOUSE REPAIRS—3 story and base, brick, \$20,000, Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Montague Estate. The building recently damaged by fire will be repaired at a cost of \$20,000. The work will require new floor joist, interior partitions, steel columns and girders, window sash and frames and Kinnear doors. Exterior will be faced with stock brick. Plans are now being prepared.

ELEVATED SYSTEM—\$500,000, Los Angeles, Cal. Engineer, Engineering Department of the Pacific Electric Railways Co., Pacific Electric Bldg., L. A. Owners, Pacific Electric Railways Co., L. A. A franchise has been granted this company to construct an elevated system from the Pacific Electric Building to San Pedro street via Maple avenue. Plans were prepared about a year ago.

RAILROAD CONSTRUCTION—\$3,000,000, San Diego, Cal. Engineer, Engineering Dept. San Diego Electric Railway Co. Owners, San Diego Electric Railway Co. The company has applied to the Railroad Commission for permission to issue \$4,484,000 worth of bonds. About \$2,000,000 will be expended in new work as follows: Addition to power plant and equipment, new car barn, terminal station at the Exposition Grounds, three bridges, \$71,000, paving \$235,574, tract construction \$288,159 and grading and ballast \$16,000.

PASSENGER STATION—1 story, reinforced concrete. Cost not stated, Los Angeles, Cal. Architect, none. Owners, Salt Lake Railway Co. J. Ross Clark, president of the Salt Lake Railway Company, has announced that a new passenger station will be erected by the company in Los Angeles at once. It will be located on the land recently acquired along the river and including the site of the present station. The cost of the building has not been fixed.

RESIDENCE—2 story and base, frame. Cost not stated, Los Angeles, Cal. Architects, Needham & Cline Brockman Bldg., L. A. Owner, Dr. C. E. Chalm. The house will be erected in Brentwood Park, and has been designed to contain fifteen rooms, four baths and sleeping porches. A garage will also be erected on the property. Interior finish will be of pine and hardwood with hardwood and inlaid floors. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in

tile and equipped with showers. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

CITY HALL—1 and 2 story, brick, \$14,000, Huntington Park, Los Angeles Co., Cal. Architect, George W. Eldridge, Marsh-Strong Bldg., L. A. Owners, Town of Huntington Park. The building will contain the council chamber, offices for the city heads and fire department. Interior will be finished in pine. There will be fireproof vaults. Exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

FIRE HOUSE—2 story and base, brick, \$70,000, South Pasadena, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Town of South Pasadena. The building will contain the marshall's office, telephone exchange and space for one piece of apparatus in the first floor. Upper floor will be arranged for a lounging room and apartments for the men. Interior finish will be of pine. There will be steam heat and modern plumbing. Exterior will be faced with enameled brick. Plans are being prepared.

SCHOOL—1 story and base, brick, \$12,000, El Segundo, Los Angeles Co., Cal. Architect, E. L. Hopkins, Delta Bldg., L. A. Owners, El Segundo School District. The building has been designed to contain four rooms and an assembly hall. Interior will be finished in pine throughout. There will be modern school plumbing. Exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SCHOOL—1 story and base, reinforced concrete, \$35,000, Santa Ana, Orange Co., Cal. Architect, J. Flood Walker, Santa Ana. Owners, La Habra School District. The building has been designed in the patio style, covering a ground area of 111 by 196 feet. There will be six class rooms, library, principal's office and teachers' room. Interior will be finished in pine with maple floors in the principal rooms. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SCHOOL—2 story and base, brick, \$40,000, Glendale, Los Angeles Co., Cal. Architect, C. S. Westlake, 1455 Oak street, Glendale. Owners, Town of Glendale. The architect has just been commissioned to prepare plans for the new school building to be erected at Glendale under the recent bond issue of \$87,000. About \$40,000 will be available for new work, the remainder of the bond issue to be used for the purchase of new sites. The plans for a four-room addition to the Third Street Intermediate school and a two-room addition to the Casa Verdugo school are practically completed and work will be started as soon as possible. Plans are also to be prepared for a six-room building to be erected in the southwest section of the city and for a four-room building in the northeast section but will not be started until the board of trustees has selected the sites. The buildings will be of brick construction.

SCHOOL—2 story and base, brick and concrete, \$40,000, Tustin, Orange Co., Cal. Architects, Elwing & Telford, Orange County Savings and Trust Bldg., Santa Ana. Owners, Tustin School District. The building will contain ten class rooms, office, auditorium,

library and manual training and domestic science departments. Interior finish will be of pine with maple floors in the class rooms. Plans provide for furnace heat. There will be modern school plumbing, program clocks and vacuum cleaning. Exterior will be faced with pressed brick. Plans are complete and bids will be opened on July 18th.

### Contracts Awarded.

**HOTEL**—2 story and base, concrete and frame, \$35,000. Ontario, San Bernardino Co., Cal. Architect, none. Owners, Ford Bros. Contractors, Butler Bros., Mason Bldg., L. A. Contract price, \$35,000.

**SCHOOL**—1 story, reinforced concrete, \$20,000. Beverly Hills, Los Angeles Co., Cal. Architect, W. J. Dodd, Marsh-Strong Bldg., L. A. Owners, Beverly Hills School District. Contractors, Lepper & Laisy, Builders' Exchange, L. A. general construction, \$18,916.

**SCHOOL**—1 and 2 story and base, hollow tile construction, \$15,000. Riverside, Riverside Co., Cal. Architects, Allison & Allison, Hibernal Bldg., L. A. Owners, Corona School District. Contractor, George A. Daniels, 916 Herkimer avenue, Pasadena, general construction, \$36,998; Machinery and Electric Co., L. A., heating and ventilating, \$4,987; C. E. McPeak, Glendale, plumbing, \$3,190.

**SCHOOL**—2 story and base. Class C construction, \$25,000. Gustine, Merced Co., Cal. Architect, Ernest J. Kump, Fresno. Owners, Gustine School District. Contractors, Trewitt & Shields, Fresno. Contract price, \$23,000.

### CON AWARD

**THEATRE ALTERATION**—Brick construction, \$20,000. Los Angeles, Cal. Architect, George Costerian, California Bldg., L. A. Owners, J. Rittigstein and C. A. DuBois. Contractors, A. F. C. Co., Henne Bldg., L. A. Contract price, \$20,000.

## PORTLAND AND OREGON.

**CLUB HOUSE**—2 story and base, reinforced concrete and brick, \$25,000. Astoria, Ore. Architects, MacNaughton & Raymond, Title Trust Bldg., Portland. Owners, Young Men's Christian Association. The building has been designed to contain the offices of the organization, a large gymnasium, swimming tank, library, social hall, auditorium and dormitories. Interior finish will be of pine and hardwood with a maple floor in the gymnasium. Plans provide for steam heat, a hot water system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken.

**RESIDENCE**—2 story and base, brick and stone, \$25,000. Portland, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owner, C. G. Murphy, Fenton Bldg., Portland. The dwelling will be erected in King's Court, and has been designed for a twelve room house with three baths. Interior finish will be of pine and hardwood with hardwood and inlaid floors in the principal rooms. Plans provide for steam heat, a hot water system and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and equipped with showers. Exterior of the building will be faced with pressed brick and cut stone. Plans are being prepared.

**SCHOOL**—1 story, hollow tile construction, \$35,000. Portland, Ore. Architect, P. A. Naramore, Supt. of School Properties, Portland. Owners, City of Portland. The building will be erected on the East side, only one unit at this time. There will be eight class rooms finished in pine with maple floors. Plans provide for steam heat, a program clock system and vacuum cleaning. Exterior will be faced with cement plaster. Plans are being prepared.

**SCHOOL**—2 story and base, brick and reinforced concrete, \$50,000. Albany, Ore. Architect, Charles H. Burggraf, Albany. Owners, City of Albany. The building has been designed to contain twelve standard sized class rooms, assembly hall, library, principal's office and domestic science and manual training departments. Interior will be finished in pine throughout. Maple floors will be used in the class rooms. There will be steam heat, a vacuum cleaning system, program clocks and modern school plumbing. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and figures will be called for in about 20 days.

**STABLES**—2 story and base, reinforced concrete, \$50,000. Portland, Ore. Architect, Bureau of Buildings, Portland. Owners, City of Portland. The building will be erected at the corner of 16th and Jefferson streets, and will cover a large ground area. Plans provide for the most modern equipment. There will be special electric work. Exterior will be faced with cement plaster. Plans are now being prepared.

## SEATTLE AND WASHINGTON.

**APARTMENT HOUSE**—3 story and base, brick and steel, \$60,000. Tacoma, Wash. Architect, Bruce G. Humes, Tacoma. Owner, E. Hutchinson. The building will be erected at the corner of 13th and J streets. There will be nineteen suites of four and five rooms. Interior will be finished in pine and hardwood with hardwood floors. Plans provide for steam heat, elevator service and a hot water supply. All suites will have wall beds and private bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick. Plans are complete and the work will probably be done by Day Labor.

**FREIGHT SHEDS AND TRACKS**—Concrete construction, \$345,000. Tacoma, Wash. Architect, Engineering Department Northern Pacific R. R. Co., Tacoma. Owners, Northern Pacific Railroad Co. Work will be started at once on the construction of a new freight yard and freight sheds at Tacoma. Construction will be fireproof throughout. Plans are in the hands of the owners and the work will be done by Day Labor. Materials are now being purchased.

**FREIGHT SHEDS**—1 story, reinforced concrete, \$100,000. Tacoma, Wash. Architects, Engineering Dept. Oregon-Washington R. & N. Co., Portland. Owners, Oregon-Washington Railroad and Navigation Co. A large building will be erected on the Tide Flats, covering an area of 80 by 350 feet. Construction will be fireproof throughout. No interior finish is specified except in the office portion of the building. Exterior will be faced

with cement plaster. Plans are complete and figures are now being taken by Chief Engineer J. R. Holman of Portland.

**EXCITER**—Cost not stated. Navy Yard, Puget Sound, Wash. Engineer, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids will be opened on July 25th for furnishing and installing a 10 kilowatt turbine-driven exciter in the central power plant at the Puget Sound Navy Yard. Plans can be secured from either the Bureau of Yards and Docks at Washington, D. C., or from the Commandant at the yard. An official proposal appears in another column of this issue.

**THEATRE**—4 story and base. Class A construction, \$1,000,000. Vancouver, B. C. Architects, Farr, MacKenzie & Day, Vancouver Bldg., Vancouver. Owners, Klay & Erlanger, New York, represented by George J. MacKenzie, Vancouver Bldg., Vancouver. The building will be erected on Robson street near the Court House. Construction will be fireproof throughout. Details of the construction have not been made public, but it is stated that working drawings are well advanced and that bids will be called at an early date. Further mention will be made of the work.

**RIVETED STEEL PIPE**—Cost not stated. Milk River Project, Mont. Engineers, United States Reclamation Service, Boise, Idaho. Owners, United States Government. Bids will be opened on July 22nd for furnishing a quantity of riveted steel pipe for the Milk River Project. Full particulars can be secured from the engineers at Boise. An official proposal appears in another column of this issue.

**BRIDGE**—Steel and reinforced concrete. Cost not stated. Jackson, Wyo. Engineer, U. S. Reclamation Service, Boise, Idaho. Owners, United States Government. Plans have been completed for a steel truss bridge to be erected over the South Fork of the Snake River near Jackson. There will be three spans of 130 feet each with timber and concrete approaches. Bids are now being taken and will be opened on July 22nd. Plans can be secured from the United States Reclamation Service at Boise, Idaho.

**FACTORY AND WAREHOUSE**—9 story and base, reinforced concrete, \$850,000. Seattle, Wash. Architect, George C. Mimmens, People's Gas Bldg., Chicago, Ill. Owners, Sears-Roebuck Co., Chicago. A large site adjoining a building on Utah street now occupied by the owners has been secured, and a class A building covering an area of 240 by 330 feet will be erected. A portion of the building will be used for a factory and the balance for warehouse and store purposes. There will be reinforced concrete walls, floors and roof slabs. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service, a vacuum cleaning system and spiral chutes. Metal window sash and frames are specified. Exterior will be faced with cement plaster. Plans will be completed within two months and figures will be called.

### Contracts awarded.

**COURT HOUSE**—3 story and base, concrete, steel and stone, \$806,974. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, City of Seattle. Contractors, Puget Sound

Bridge and Dredging Co., Central Bank Bldg., Seattle. Contract price, \$806,973. Note: A proposition to build two additional stories to this building is still under consideration and a decision of the matter is expected within a week or ten days.

## CONSTRUCTION WORK ABROAD.

### AUSTRALIA.

#### Another Big Irrigation Project.

The London Agent General for New South Wales, Sir Timothy Coghlan, states that the New South Wales Government is at present investigating an irrigation scheme for the Clarence River district, which, when completed, will back up the waters of the Clarence and Mitchell Rivers for a distance of 80 miles. The site of the proposed dam is the Gorge, about 10 miles upstream from Grafton, and about 20 miles distant from Copmanhurst. The site is considered an ideal one in every respect, being close to the junction of the two rivers, and it has precipitous hills on either side, very similar in character to Burrinjunk, New South Wales' great State irrigation enterprise on the Murrumbidgee River. To the rear of the Gorge is a huge basin, which will be transformed into an inland lake of considerable magnitude. Preliminary reports state that the project will give a supplementary water supply for Grafton, besides enabling a large area of country on both sides of the river to be irrigated. Ample water will also be available for all purposes, as the Clarence is regarded as the finest river in Australia. The scheme will cost several million dollars, but no official estimate is yet available.

### CHILE.

[Consul Alfred Winslow, Valparaiso.]  
New Office Building—Improved Fire Escapes.

Schwager & Co. are to erect a four-story and basement reinforced concrete fireproof bank and office building in this city to cost about \$150,000. It is to be up to date, with passenger elevators and forced ventilation. The architects are Frederick Sage & Co. of this city, and London, England. It is to be completed by July 1, 1915.

As a result of the destruction of a large flat building in this city, during which about 50 lives were lost, the authorities are awake to the importance of better life-saving appliances in Valparaiso, such as fire escapes, hooks and ladders, etc., which should attract American manufacturers of these articles.

### SEEING BY WIRE.

[Deputy Consul General Carl E. Loop, London, England.]

Dr. Archibald M. Low, a London consulting engineer, claims to have discovered a method by which light may be transmitted by wire. The invention is thus described: The contrivance consists of a transmitter and a receiver connected by wire. The transmitter is a screen divided into a large number of small squares—cells of selenium, the electrical resistance of which element varies according to the light that touches it. Over the screen is passed a synchronously running roller consisting of a number of pieces,

which are alternately conductors and insulators. The roller is driven by a motor of 3,000 revolutions per minute and the resulting variations of light is made up of a series of cells operated by the passage of polarized light thru thin slats of steel, and at the receiver the object before the transmitter is reproduced as a flickering image.

The process is referred to by the inventor as a "kinematographic application of common electrical principles." The system has been tested through a resistance equivalent to a distance of 4 miles, but in the opinion of Dr. Low there is no reason why it should not be equally effective over far greater distances.

It is stated that the selenium in the transmitting screen may be replaced by any diamagnetic material. The cost of the apparatus is considerable due to the fact that the conductive sections of the roller are made of platinum and that many wires are required for the transmission of the images. The invention is called the "Televisa."

## FLOW OF OIL, AND ITS USE AS FUEL IN PERU.

[Abstracted from West Coast Leader.]

A tank with a capacity of nearly 1,000,000 gallons has been ordered from the United States for the Peruvian oil fields at Zorritos, this being in addition to another large tank recently installed there. The additional storage is very badly needed because of the continual tendency of the natural springs to increase their flow, and to such a degree is this occurring that a reduction in the staff of pumping employees is contemplated, as there is no place for storage of oil and not sufficient transportation to meet the demand. The present monthly production at Zorritos is about 1,400 tons, half of which is natural flow and the other half pumped.

Orders for crude oil are plentiful owing to the fact that the diesel motor is being introduced generally over Peru in order to utilize this valuable Peruvian product, which can be used so economically, compared with any other fuel. A large brewery in Callao, a large cotton mill, and several sugar estates are introducing these motors. Next to oil the cheapest fuel is coal, all of which is imported, notwithstanding the fact that vast fields of good coal exist within 60 miles of the coast.

## THE STATES FINANCES.

Report of the State Board of Equalization.

The State of California is in excellent financial condition, according to the report of the State Board of Equalization which estimates the revenue for the coming fiscal year from corporation franchise taxes at \$12,599,000, besides which will be collected over \$1,500,000 in fees, inheritance taxes and from other sources.

As the Legislative appropriation which this must cover is only \$11,908,900, this will leave a surplus at the end of the coming year exactly over \$200,000.

There is in the State Treasury a surplus of \$2,600,000 over all demands that may be made upon it.

## Ad Valorem Tax Unnecessary.

No deficiency or ad valorem tax will be placed upon the counties of California this year for running the State Government. This announcement also was made by the State Board of Equalization.

The corporation franchise taxes will total \$13,609,663.94 without counting minor corrections which may be allowed on protests.

Will Raise \$15,109,663.94.

Added to this, \$1,500,000 is expected from fees, interest on deposits and inheritance taxes, making approximately \$15,109,663.94 available for the coming year.

The Legislature directed that \$11,908,900 be raised to run the State during the year, leaving a good margin.

## Sources of Revenue.

The principal revenues from corporations will come as follows:

Railroads .....	\$ 6,317,675.16
Light, heat and power.....	1,941,326.48
Telegraph and telephone.....	708,504.74
Express .....	107,755.74
Car Companies .....	121,614.16
Insurance .....	816,096.31
Banks .....	1,831,745.12
General franchises .....	1,561,946.00

Total taxes from corporations .....

.....\$13,609,663.94

## Increases Shown Over 1913.

Railroads .....	\$ 62,011.08
Light, heat and power.....	220,000.90
Telegraph and telephone.....	68,319.76
Insurance .....	53,392.20
Banks .....	53,426.62
General franchises .....	186,421.00

Total increases .....

.....\$ 643,577.56

## Decreases.

Express companies .....	\$ 4,990.18
Car companies .....	495.24

Total decreases .....

.....\$ 5,485.42

## WORLD'S SUPPLY OF COAL.

The production of coal in the United States is about equal to that of the United Kingdom, Germany and France combined. In 1912 it was 477,000,000 tons in the United States, 260,000,000 tons in the United Kingdom, 172,000,000 tons in Germany, 40,000,000 tons in France, 26,000,000 tons in Russia and 23,000,000 tons in Belgium. The reserves of coal in the earth in the United States are nearly equal to those of all the rest of the world combined, according to recent estimates.

## REMOVAL NOTICE.

GEORGE F. BERNARD, plumber, has moved his shop to 112 Gough St.

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

# How To Get Your Advertising Read.

### PLACING:

That is selecting the proper newspapers, magazines, or programs in which to insert your advertisement, or selecting the proper location of Bill Boards for your advertisement. Also selecting the proper parties to whom to mail your offer or to whom to distribute your printed matter. This is the first principle of getting your advertisement read, but what is more important than that of getting it read by the people with whom there is a possibility of your doing business. To advertise Ladies' goods in a man's publication, hardly ever seen by women, would bring small, if any, results.

### ATTENTION TO ADVERTISEMENT.

This is obtained if it is a newspaper, magazine or program advertisement, by catch line in the advertisement, by the border around the advertisement or by the Cut in the advertisement.

### COMMON PHRASES:

Unless very strong and calculated to compel the mind to want to read what follows them in advertising, should not be used.

### BORDERS:

Many times it is only the ad with a clear border and strong display which will be read on that particular page, as the reading of one advertisement on a page will often sufficiently tire a person as to make them desire a change and cause them to turn to the next page of the paper or magazine.

### CUTS:

Cuts if very strong will attract the attention, but they should be in harmony with the border and the rest of the display matter of your advertisement and should be in harmony with the argument and appeal of the rest of your advertisement.

### ASSOCIATION OF IDEAS:

This means to keep the thought of your reader confined upon the one subject or details pertaining to it. It would be foolish to dwell upon the comforts of the parlor-side in trying to sell an automobile. Rather will you explain the pleasure of moving along beautiful roads, visiting new localities and receiving the exhilaration of out-of-door riding.

### SUGGESTING IN ADVERTISING:

Suggestion is sometimes stronger than a clear explanation, if it is so that it cannot be misunderstood. A suggestiveness which allows of any different interpretation, no matter how slight, from what is intended, should not be used.

The above points will illustrate the methods of attracting attention to your advertisement and getting it read, after which the reasoning and selling power of your advertisement must do the work of effecting a sale, or bringing

an inquiry for further particulars, as you may have planned.

A trade paper or journal talks directly to persons interested in the trade lines, and you are assured of careful attention, if your advertisement is properly worked up.

LLOYD C. COMEGYS.

### ADVANTAGES OF BRICK PAVING.

The adaptability of brick to rural highway construction was the subject of an elaborate exhibit at the first Canadian and International Good Roads Congress, held in Montreal May 18-23.

Many Dominion cities are large users of brick for urban pavement, but the country road of brick is a comparative novelty in Canada. However, its rapid rise to favor in parts of the United States has attracted attention and visits from many Canadian highway engineers. The vicinity of Buffalo and Cuyahoga County, Ohio, which contains Cleveland, are the leading brick road localities of the world.

The success of the brick road has been largely due to its permanence under the new conditions of power traffic which have played havoc with older types of road improvements. The hardness of brick enables it to withstand the friction and wear of the rapidly running automobile. This quality so appealed to Governor Glynn, of New York State, that he recently devoted an entire message to the legislature on the advocacy of brick for all main highways in the State of New York. Cuyahoga County, Ohio, has nearly 400 miles of this type of rural road, built at an approximate cost of \$1,000 per mile for each foot in width. One effect of these roads has been such a rapid rise in rural land values in the county that their increased tax valuation has more than covered the cost of construction.

Such roads have won their way to the appreciation of auto owners and farmers alike, being equally passable in any season of the year and so drained that every rain washes them clean. Where other types of road require constant vigilance and constant expense for maintenance, a properly constructed brick pavement, according to government authorities in the States, has never yet been known to wear out.

### CONSTRUCTION WORK ABROAD.

#### Philippines.

[J. F. Boomer, Correspondent, Manila.]

#### Era of Tall Buildings.

Since the advent of concrete and steel construction in Manila there has gradually grown up a movement for taller buildings. Heretofore three stories have been the limit on buildings in Manila and the islands, and not more than four or five reached over two stories. Within the last two years five or six new structures of concrete and steel have been built with three stories and one of four. One business block four stories high, recently completed, has proved so attractive for offices that two additional stories are to be added. There is now nearing completion a business block on Calle Rosario, the Chinese district, which has six stories. This building is being constructed by a Chinese firm. Another Chinese business house has projected a four-story structure to cost \$250,000,

on Calle Nueva near the Escolta, the principal business street of the city.

The Masonic Association opened bids June 15, 1914, for the construction of a building on the Escolta, to be five stories high and to cost \$150,000.

The advent of the taller buildings is due to the belief that the reinforced concrete structure will withstand earthquakes which have rendered the buildings of ordinary masonry so dangerous. So far there have been no severe shocks in Manila to test this new form of construction.

#### New Market for Elevators, Cement, Steel, Etc.

The increased altitude of buildings noted above, in addition to the new demand for cement and steel, has opened up a new market in Manila for elevator machinery. To date there are not more than five buildings in the city equipped with modern elevators, but each new structure above two stories in height calls, in its plans for a modern elevator. The elevator machinery used so far has been brought from the United States.

#### Deepening Manila Harbor.

[Consul General George E. Anderson, Hongkong, China.]

The deepening of the harbor of Manila in the vicinity of the large modern wharves constructed several years ago is proceeding. Three dredges are at work under an appropriation made for the purpose with a view of deepening the whole of the harbor to 31 feet at low water. The funds at present available provide for deepening the harbor from the several large piers to the entrance in the breakwater, and it is expected that by the close of the current year enough funds additional will be forthcoming to finish the whole of the area inclosed within the breakwater walls, including the deepening of the Pasig River's connection to the harbor. At present the larger vessels entering the harbor, which include all the large ships on the Pacific Ocean, are prevented from entering or leaving the harbor piers at low water. The first work to be done is the deepening of the water about the piers and connecting the latter with the bay outside of the breakwater so as to permit the free management of such ships at all times.

#### Lifting Manila Levels.

Agitation is now being carried on in Manila for raising the low places of the city to a level more consistent with modern sanitation and the business and other needs of the city. Originally, much of the city was built upon land little more than a marsh. During American control of the islands considerable portions of the city have been raised by materials from various sources, and the city has been extended in directions, affording higher ground for building sites. Large reclamations have been made for harbor and other purposes in which the levels established have been much higher than the old city.

In the municipality as a whole, however, there is a superficial area of about 35,000,000 square meters of which about 6,500,000 square meters are below what has been established as a minimum satisfactory level, i. e. 1-2 meters above mean low tide. It will require about 4,551,265 cubic meters to secure this new level for the area given. It is calculated that soil for the purpose can be secured by dredging from the river and small estuaries. Retaining walls for these small creeks and bay-

ous and for some portions of the river will have to be built, and the entire enterprise will require a considerable expenditure of capital, probably something like \$300,000 gold, at a rough calculation, in addition to the cost of dredging, estimated at \$110,000 gold. Dredging is carried on to some extent at the present time as a matter of sanitary drainage and to maintain navigation in some of the larger esteros. The dredges at present in use are small in order to pass low bridges and work in small streams. The material dredged is loaded on flat-topped scows and has usually been carried out to sea, though lately some material quantities have been furnished the municipality of Manila and other owners of low-lying property for raising the level of property near at hand. The ultimate work to be done in Manila in the way of raising the level of real estate is enormous, but the work is gradually being done at a minimum cost and with immense benefit to property.

### JAPAN.

[Consul General George H. Scidmore, Yokohama.]

#### New Railway Charters.

The Japan Daily Mail of May 5, 1914 states that during April last the Imperial Railway Board granted charters to nine railway companies, which propose to lay eight railways with a combined mileage of 33 miles, the respective length and cost being as follows: Mogi Railway, 3.72, \$125,000; Ikegami Electric Railway, 6.32, \$200,000; Toso Railway, 3, \$25,000; Tanba Electric Railway, 5.50; \$100,000; Nagoya Electric Railway, 2.78, \$85,000; Tojo Railway, 1.36 \$32,000; Ihara-Kusnoka Light Railway, 3.43, \$54,000; Hakata Bay Railway, 0.72, \$17,000; Ama Electric Railway, 4, \$90,000.

#### Railway Construction Plans.

The Japan Mail of April 24 had the following:

How far the railway construction program is to be carried out during the current fiscal year is still a pending question in the Imperial Railway Board, as the board changed its chief while negotiations as to the means and ways of railway financing during the current year were still pending between the board and the finance department. If the original plan of the board is to be carried out without being modified as a result of the negotiations with the finance authorities, lines with a total mileage of 223 miles 75 chains, will be completed during the year.

The construction expenses of these lines are estimated at 1,300,000 yen (\$650,000.)

Requests for details and proposals for supplies in this connection should be addressed to the Director of the Imperial Railway Board, Tokyo, Japan.

#### STATE TO EXAMINE PILEDRIVER ENGINEERS.

The California State Civil Service Commission announces that application for employment as PILEDRIVER ENGINEERS in the service of the State will be received at the office of the Commission, State Capitol, Sacramento, on or before July 25, 1914. The State employs piledriver engineers in connection with the Board of State Harbor Commissioners in San Fran-

cisco, at a salary of \$6.00 a day.

This examination is open to all citizens of the State; 21 years of age or over on July 25, who comply with the requirements.

Application blanks and further information may be secured by applying to the State Civil Service Commission, State Capitol, Sacramento.

Applications must be properly executed and filed with the Commission on or before July 25, 1914.

#### KOA PEDESTALS AT THE EXPOSITION.

Fred Titt & Sons, the cabinetmakers and builders on Teuth street, are now engaged in making some very handsome pedestals surmounted by globes; for the Hawaiian Promotion committee, to be placed in the Hawaiian Building at the Exposition. These pedestals are made of Koa or Hawaiian Mahogany and are very beautiful indeed.

#### COAL RESOURCES OF U. S.

The total coal reserve estimated to have been present in the United States, within 3,000 feet of the surface, and not including lignite, is 3,554,253,400,000 short tons, of which we have exhausted up to the present day approximately 14,500,000,000 short tons, or less than one-half of one per cent. In 1900 the total production of coal was 269,684,027 short tons; in 1910, 501,596,378 short tons; in 1911, 496,783,308 short tons, while the estimate for this year is about 600,000,000 short tons.

It is readily seen that if these figures are correct there need be no immediate fear of the shortage of the supply, for, even with an annual consumption in the United States of one billion tons—twice the present consumption—the visible supply will last some thirty-five centuries. That the gain in annual consumption which has taken place during the last fifteen years will continue at the same rate seems highly improbable.

**BERKELEY, CAL.**—Following suggestions of Prof. O. M. Washburn, of the University of California, it is believed that the provisions of the State Tenement Law will be incorporated in the new building code which is now being formulated by a special committee in Berkeley.

John Bakewell, of Bakewell & Brown, Architects, who drew the plans for the city halls in both Berkeley and San Francisco and Professor Washburn have been invited to confer with the committee at a special meeting to be held in a few days. The code which is being formulated in Berkeley is to be offered for acceptance as a model and uniform law for cities of the bay region.

What is claimed to be the largest electric power sub-marine cable in the world is now being laid across the San Francisco bay. The length is to be four and one-half miles and will cost \$350,000.

**BLACK POINT, Marin Co., Cal.**—The State Highway Commission has endorsed the proposition for the Black Point cut-off branch of the State Highway. Surveys have been ordered for the route from Ignacio to a connection with the State Highway from Napa to Cordelia. This link is 21 miles in length and will be the coast route, extending north to Eureka to the high-

way extending to Cordelia and thence via Davis to Sacramento.

**YUBA CITY, Sutter Co., Cal.**—State Engineer Woolridge has installed a camp of engineers at Shanghai Bend and work has been started on the big jetty which is to be built at the mouth of the cut. The state employees will be in the camp about three months.

**CLEVELAND**—A Sanitarium 2000 feet in the air and anchored to the earth by a cable will be opened above Cleveland next month. No patients except those affected with heart weakness will be accepted for treatment. The sanitarium will ascend each evening and descend the following morning.

Because Henry Ford could not find hospital accommodations for a worker who had contracted pneumonia and tuberculosis, the motor car maker made an offer to the contractors of the General Hospital, now building, to take over the project. He agrees to repay all subscriptions and complete the place and make it a poor man's hospital, spending \$2,000,000 to finish it, and as much more as may be necessary to keep it running.

**MODESTO, Cal.**—Engineer R. A. Edwards of the Modesto Irrigation District, has filed a report of the cost of the work necessary to complete the improvements under the \$10,000 bond issue recently authorized. His survey provides for permanent construction throughout, including flumes, fills, canals, etc., the majority of which will be concrete work.

**WILLOWS, Glenn Co., Cal.**—The Forest Service plans to erect a sixty-foot steel tower on the summit of Sheetiron Mountain. From this tower one of the most comprehensive views of the coast range will be had. With the completion of the tower Sheetiron Mountain will be a special point of interest to mountain travelers.

#### THE HENDERSON CLAMP SYSTEM.

Nailing blocks for trim on metal channel partitions is made easy by this system. It not only makes a perfect job but is much cheaper than tying these blocks on with wire. Its speed and perfect job has been shown on practically every job of metal channel of late. The patentee and manufacturer invites those interested in building construction to see the system now in use among the great buildings now under construction in this city, viz. The Grosh Hotel, an eight-story building on Sutter street near Powell street, N. W. Sexton, Architect. The City Auditorium, Lindgren & Co., Builders. The New Cal Bldg. at New Montgomery and Jessie streets, Reed Bros., Architects, MacDonald & Kahn, Builders, and the Hobart, twenty-one story building, Market and Second streets, Willis Polk & Co., Architects and Superintendents of construction.

It will be time well spent for an architect, builder or a prospective builder to inspect this system if they have not already seen it in use.

Information given by W. D. Henderson, Patentee and Manufacturer, 915 Monadnock Building, San Francisco. Telephone Kearny 4537.

## Editorial Comment.

The Chronicle in discussing editorially the universal eight hour law puts the proposition in shape. "It is unbelievable that anybody would seek to prevent by law anyone from working as much as he desires." And then it goes on to comment on the discussion at the Commonwealth Club on the proposed amendment to the constitution.

The farmers have a legitimate objection to the universal eight hour law. Many of the products of the farm are perishable. And when the harvesting of crops depend on the weather or the market or what not it is often impossible to get labor in sufficient quantities. But the discussion of the proposition on the ground that the people who are seeking to have an universal eight hour law enacted are trying to prevent people from working will not get anybody anywhere. That is the argument that has been advanced at every reduction of the hours of labor. If people worked sixteen hours a day the Chronicle would advance the same argument if any one attempted to make a shorter day.

The universal eight hour day is to be on the ballot this fall. The farmers of the State object to such a prohibition being put into the fundamental law of the State. Their objections are well founded on account of the peculiar conditions that surrounds agricultural employments.

William Randolph Hearst is certainly the prize sore head. To read the long list of mistakes that Wilson and Bryan have made, one would think that they had stayed awake at nights to find out what they ought not to do and then had done that very thing. In reading these tirades of Hearst one is reminded of a statement made by W. J. Bryan during one of his campaigns. The question was asked what he thought of Hearst and he replied that he never discussed men, but principles. And in a discussion of principles the name of William Randolph Hearst would never be mentioned.

A great deal has been written and said about the proposed treaty with Colombia and the payment of 25 million dollars to that country which former President Roosevelt has denounced as blackmail. The following editorial published in the Sacramento Bee of July 3, expresses the opinion of that paper on the situation:

It is unfortunate that in his natural desire to justify his course as President, with regard to the Canal Zone, Roosevelt has applied the ugly term "blackmail" to the claims of Colombia pending treaty between the United

States and that Republic.

The truth is that he used the naval power of the United States to prevent the Colombian Government from landing troops to suppress a "bought-and-paid-for" revolution, by which the so-called Republic of Panama was established on Colombian territory. And long prior to that time this country by treaty had acknowledged Colombia's undisputed right to the Isthmus.

Not only is this the case, but it is also true that shortly before the insurrection at Panama our Government had offered Colombia \$10,000,000 for the Canal Zone, which sum later was paid to the spurious Republic of Panama for the desired concession.

Colombia had required \$15,000,000 from the United States, and also \$10,000,000 from the French Canal Company. But, through the trick and device of "revolution" at Panama, she got nothing from either party and was deprived of her Isthmian territory through an arbitrary and illegal order from President Roosevelt which left her powerless to hold the Isthmus by force of arms.

Now in view of the fact that Colombia at all times has offered to arbitrate her claim, and that the pending treaty, by which she is to receive \$25,000,000 as indemnity, has been promoted at Washington rather than have her claim adjudged against us by an international tribunal, it is decidedly not in good taste to accuse her of "blackmail."

Particularly unbecoming is that word in the mouth of the former President, when his boast is remembered that he "took the Canal Zone and let Congress do the talking afterward."

Roosevelt's offensive and uncalled-for fling at Colombia is not of a nature to promote good feeling for this country among the Latin-American Republics in general.

James T. Dubois, who was United States Minister to Colombia under the Taft Administration and long a devoted follower of Roosevelt, has issued a convincing statement in support of the claims of that Republic and of the pending treaty.

He regards Roosevelt's motives as above suspicion, with relation to the course pursued at the time of the Panama troubles, but yet believes Colombia was badly used and is entitled to substantial reparation.

Dubois points out that the treaty contains no "apology" to Colombia, but merely courteous expressions of regret that any disturbance of friendly relations had arisen between the two countries.

Surely, in view of the historical facts, no good American need object to this part of the convention.

# Buildings As They May Be Defined Under Law.

Consideration of What Are Buildings and Where They May Be Said To Begin and End.

Sidney Perley, Attorney, Salem, Mass.

What is a building, and when does the law begin to regard it as such, and when does its technical existence cease? These are questions that occasionally arise, and the answers are not always easy. A building is something built or constructed and is generally understood to be an edifice erected upon the ground—either directly or upon a wall or short or tall posts. It must have some connection with the soil. There is no limit to its height above the ground, and probably none to its depth below the surface. It may be a temporary shelter or a permanent abode for human beings or domestic animals, as a dwelling house, barn, stable, hall or church; or a structure for protection of chattels, as a warehouse or storehouse, or carriage house; or for manufacturing, a public building for office purposes, etc. It may be an erection that is not intended for use at all, but simply a monument of art. It may be for any purpose, of any shape, framed or unframed, and constructed of any kind of material. Whether structures are real or personal estate probably has no bearing upon the question of their existence as technical buildings.

In most cases, the answers are easy; but there are many things built that courts have not considered, and in some cases courts disagree with the special circumstances in each case. The instances in which doubt exist involve monuments, statues, fences, walls, dams, structures beneath the surface of the ground, etc. These are certainly erections, and the question as to whether they are buildings in the several phases of the application of the law to them will have to be met.

## Mechanics' Idea of a Building.

The mechanics' lien law, which applies to the erection of buildings, probably also has relation to the various kinds of constructions that have a place upon or in the earth and yet have not popularly been thought of as buildings. The matter has importance in a transfer of real estate where a deed expressly states that the premises include the land and the buildings thereon, and, for want of sufficient connection with the soil, the buildings are not technically real estate. Similar questions arise between landlord and tenant and mortgagor and mortgagee.

Not only is the main part of a structure regarded as the building, but the eels, piazzas, furnaces, machinery, etc., if they are so attached to the building that they are necessarily a part of it. Even if double windows, storm doors, screens, etc., are temporarily at a distance from the building they constitute a part of it as much as when they were actually attached to it.

## From Materials to Buildings.

Secondly, when do materials become a building? This question is more difficult to answer than even the first. Is there a particular day, hour or minute when the character of the materials changes into a building, involving new applications of law and procedure? The matter is something more than a theo-

ory, and is liable to become practical at any time.

When does the mechanics' lien law first apply, and when do materials pass under a deed which conveys the soil and the 'buildings' thereon, or when do they pass as part of the soil without being mentioned in the deed? Must the frame of a structure be actually raised before it becomes a technical building? Apparently not, according to the decisions in mechanics' lien cases, where a lien is allowed for work upon the frame or other part or parts of a building before it has left the shop. There must be some general rule, though its application in instances might seem to be stretched.

Ought the same rule, whatever it is, to apply in cases between vendor and vendee, mortgagor and mortgagee, and landlord and tenant? If so, the vendee or mortgagee might have a right to materials that were not on the premises, and their existence even was unknown to him at the time of making the contract of sale or loan. If the deed or mortgage calls for buildings that are upon the land, probably the title to materials for a building that had already been worked upon for this particular building, but nothing had been done upon the land towards its construction and the materials remained in the shop of the contractor, would not pass. Ought the lien of the mechanic in such a case to attach to the soil itself? It seems proper and just that the rule should be the same in both cases.

The moment the materials change from chattels to real estate, if that time can be discovered, ought to be the time when the mechanics' lien attaches to the soil, and the vendee can claim the articles as if they had been upon the land or attached to it in their final form, position, and condition. To constitute this change there must be an express and positive appropriation of the materials to the construction of the particular building. The character of the labor upon the materials, or uniqueness of design which has been made for the building to be erected, is certainly evidence of the connection of the materials and labor upon them with the proposed building and land. Coupled with this, of course, must be the mind of the owner who either actually or impliedly, through the medium of the architect or contractor, connects the materials and labor with the building and land. This combination of intentional and actual adaptation of materials and labor to the desired building must be an appropriation sufficient to change materials into a building, and materials subsequently appropriated under the same rule successively undergo the same change.

## When a Building Is Not a Building.

The third question is practically perhaps clearer and less likely to appear in actual practice. When does a building cease to be such, and become a simple mass of material or debris, to which the law of buildings cannot be applied?

Growth and decay are opposites, but are both more or less gradual, and so far are something alike. The law of the mechanic is not likely to be applied in cases of destruction of buildings, but in other instances it is important to determine the question definitely.

General decay or any condition of a building does not change its form and character as a building. The roof may be gone, and the boards may all go, but it is a building still. Its frame may be taken down and piled upon the ground or carried to another lot of land, but the materials still technically constitute a building.

Again, intention comes to the fore and must be considered. When the materials technically become a building, appropriation was the factor that governed the decision. So, at the end of the technical life of a building, restoration to its former condition as materials is the factor in deciding the termination of such an existence. That is, the decision, and action because of that decision, to no longer treat the materials as a part of the particular building, terminate their character as a part of the building; and thereafter they are what they were before the appropriation,—merely chattels.

This intention must be accompanied with some overt act, probably, evidencing the intention; or, at least, there must be no accompanying or subsequent act that is inconsistent with such determination.

Of course in both such appropriation and such restoration at the beginning and end of the technical existence of a building, the owner of the soil and materials and those acting authoritatively for him must be the person or persons who make such decision.

From Case and Comment, May, 1914.

## PRACTICAL IDEAS FOR PRACTICAL ARCHITECTS.

Value of Maximum Results at a Minimum Cost as Compared with Architectural Creations.

J. E. Tourtellotte.\*

Common sense is the current coin in life, and unless a work of art or architecture can stand the test of this touchstone it is questionable to my mind if it has a right to existence. In ancient times a thousand men would work for several generations to construct a building to honor the name of some individual or family, or to the honor of some nation or ruler's god. That was possible where one man had control over the lives of thousands of other men. It is not possible today under modern conditions, and looking at it from an economic standpoint few thoughtful men would consider it to be right to sink the production of a large per cent of a community's efforts for a hundred years, or any length of time, to the honor of any one.

A person who is a member of any profession is very liable to get a narrow view and to think that the whole

world should pivot on his particular line of work. Instead of practicing his profession that he may serve the community in which he lives for the benefit of the common good, he is very apt to talk in a bombastic way about educating the public up to his ideals, so as to get the public in an attitude of mind where they will serve him instead of being served by him.

I think it is as much of an honor for an architect to take a little money and by using ingenuity in devising and scheming out methods of getting maximum results at a minimum cost, and by the use of judgment to select inexpensive yet durable materials to enter into the construction of a building, as it is for another man to take a million dollars from a commonwealth and construct a creditable architectural monument, and is not capable of doing the former. The latter man in his high and mighty condescending way rather is inclined to look down upon his more humble brothers, considering them of mediocre ability compared to himself, in that they have never had an opportunity to show what they could do, and if our high and mighty friend has the misfortune to have a client call upon him who desires to get one hundred cents' value for every dollar he puts into a building he rather feels inclined to be insulted and talks to his fellow architect of the mean and penurious state of mind in which our modern business man grovels. I consider a man who can do the first kind of work deserving of much greater credit than the one who doesn't.

I have at times been afflicted with this disease myself, but have always striven to overcome it, as I consider it one of the most dangerous states of mind and attitude which the individual or the profession at large can get into, concerning the public, whom they are expected to serve in an architectural capacity.

There is an old saying which runs something like this, that the man who can make two blades of grass grow where only one grew before is of much greater value to a community than a whole race of politicians combined.

I would be one of the last to cry out in the interests of inferior work, but I do believe in the eternal fitness of things, and I am ever attempting to be broad-minded enough to see a building project, or any other kind of a project, from all points of view, and if my financial client sees nothing but the profit and loss side of the project, I am at least somewhat in sympathy with him and can work sympathetically and harmoniously with him in developing his ideas and in guiding him in a manner so that I can inject some of my ideals into the architectural composition which we are attempting to create in brick and stone.

I think there is nothing which the public resents so great an extent in the architectural profession as this attitude of an architect towards them. They go around to an architect and desire something which is reasonable in cost, and sometimes perhaps they are unreasonably expecting a great deal more than they can get for a certain amount of money, but in a great many cases they are not at fault, and we, as their architectural advisors, after we have worked up their scheme, see where we could better it by adding this here and the other thing there and

putting on touches over in the other place and have suggested these various things to them, until they have reached the point where they think for themselves. It would spoil the building should they leave any of them off, and as a result at the day of the letting the building runs from 25 to 50 per cent in cost above the amount they desired to expend, as a result there is something doing. They claim that we told them that they could add these things at no extra cost, and we claim that when we suggested these things to them they agreed to them and desired them. By our suggestion we have awakened within them a desire for that which they are unable to pay for, and as a result, unless they can get that building which we have, unintentionally perhaps, worked them up to, they will never be satisfied.

As in most cases the client when he confided in us gave us the limit of the amount which he would put into his building, the amount being in a great many cases the maximum amount of money which he could raise, or which he is satisfied at least to raise, and as a result he either gives up the project or cuts down the building to what it should have been in the first place, and is forever dissatisfied with the building and the architect who designed it. He goes out in the community in which he lives, telling his neighbors and friends to beware of the architect, as an individual and as a professional man, as he is a deceit and a snare. The architect has lost a great deal of good business and to a certain extent has lost the confidence of the public in him, more perhaps due to his lack of tact and judgment in seeing and appreciating the eternal fitness of things and governing himself accordingly than all other things combined.

In the interests of the great profession of which we are representatives, and in the interests of the common good—the great public whom we are here to serve—let us attempt to correct this thing by cutting down the building and getting the ideals of our clients thinned down to about the size of his purse before we start to make his drawings or put his plans and specifications at least, out to bidders for their proposals.

I have known artists who, with a few cheap tools and with a dearth of materials, yet produced a beautiful work of art, a work with more merit than by other artists who were unlimited as to tools and materials. I have known girls who were young, healthy and of an artistic temperament take \$7.50, and go to the country store and make a few purchases of inexpensive materials, and by the use of skill and gumption, produce an outfit which, with themselves as a part of it, surpass in beauty other young ladies who expended \$750.00 and had a fashionable dressmaker to assist them, and yet when done and they became a part of said outfit they did not rank as high with the former ones. Of course, I do not expect you or I can equal the young ladies who were their own dressmakers, but at least we can best serve our clients by approximating them.

\*Architect, Rothchild Building, Portland, Oregon.

## COMING ENGINEERING CONGRESS.

**International Gathering at the Panama-American Exposition Congress in 1915 Will Be a Noteworthy Event.**

The International Engineering Congress, which is to convene at the Panama-Pacific International Exposition in San Francisco, and hold its sessions from September 20 to 25, 1915, inclusive, is the third similar international congress that has assembled in this country, the two previous ones having been held at the Chicago and St. Louis expositions. It is to be held under the auspices of the following five national engineering societies: American Society of Civil Engineers, American Institute of Mining Engineers, American Society of Mechanical Engineers, American Institute of Electrical Engineers, and Society of Naval Architects and Marine Engineers.

Colonel George W. Goethals, Chairman and Chief Engineer of the Isthmian Canal Commission, will be the Honorary President of the Congress, and is expected to be present and preside at the first general meeting. Engineers of prominence throughout the world, whose names will be announced later, will serve as Vice-Presidents. Both the general sessions and those of the various sections will be held in the great auditorium erected at the Civic Center in San Francisco.

Papers by eminent engineers of the world will be read and discussed, and it is expected that in this Congress, as in all others of the Exposition, attention will be confined exclusively to the progress of the science during the past decade and to its present status in all countries. The papers and proceedings will be published in volumes—probably ten in number, exclusive of a smaller volume containing the indexes, digests and general proceedings—of about 500 pages each. The volumes will contain papers as follows:

- Volume 1—Panama Canal.
- Volume 2—Waterways and Irrigation.
- Volume 3—Municipal Engineering, including water supply, sanitary engineering, roads and pavements.
- Volume 4—Railways and Railway Engineering.
- Volume 5—Materials of Engineering Construction.
- Volume 6—Mechanical Engineering.
- Volume 7—Principles of contact between electrical engineering and various other branches of engineering work, presumably interlapping with Volume 6.
- Volume 8—Mining Engineering and Metallurgy.
- Volume 9—Naval Architecture and Marine Engineering.
- Volume 10—Military Engineering and miscellaneous topics, including engineering education, aeronautics and other special features.

The completeness and method with which each one of these volumes will deal with its own particular topic probably can be best indicated by a concrete example. Take, as illustration, Volume 6, dealing with mechanical engineering. Its sub-topics will be divided into twenty-six sections, as follows:

- (1) Recent progress and present status of foundry practice, and casting metals.
- (2) Recent progress and present status of the art of forging.
- (3) equipment, processes, and methods for

the boiler-shop; (4) machine-shop equipment, methods and processes; (5) automatics; (6) special processes for shaping and forming metals; (7) high temperature flames in metal-working; (8) industrial management; (9) safety engineering; (10) industrial museums as an educational factor; (11) the steam-engine of the year 1915; (12) the steam-turbine of the year 1915; (13) the internal-combustion engine of the year 1915; (14) motors of the Diesel type; (15) the Humphreys gas pump; (16) the steam boiler of the year 1915; (17) refrigeration; (18) pneumatics; (19) lubrication and lubricants; (20) water wheels of pressure type; (21) water wheels of impulse type; (22) hydraulic power developments and use; (23) power-plant design; (24) motor vehicles, passenger type; (25) motor vehicles, utility type; (26) motor tractors.

In connection with this Congress, as in others as far as possible, it has been so arranged that other Congresses of allied interests shall immediately precede or follow it, thus dovetailing with its work, so to speak. For example, two weeks preceding the International Engineering Congress is the meeting of the International Technical Commission, which has established international units in electrical matters; immediately preceding the sessions of the engineers is the International Electrical Congress, under authorization of the International Electrotechnical Commission and under the direct auspices of the American Institute of Electrical Engineers; while the week following the Engineers' Congress will be devoted to the International Gas Congress.

The various topics will be treated, in general or sectional sessions, by eminent engineers from all over the world, the number of representatives from each country being in some degree decided by the condition of the matter discussed in the various countries. In naval architecture, for instance, there will be ten treatises by Americans, ten by Englishmen, seven by Germans, three by Frenchmen, etc.

Of deepest interest to non-technical mankind, undoubtedly will be the extensive considerations given to the Panama Canal, and the volume which will deal with that subject. It is expected that there will be one or more papers dealing with the economical aspects of the Canal and its influence on trade routes; and, indeed, the subject will be very fully discussed.

In the volume on the Panama Canal to be issued, the introductory chapter and the article on Dry Excavation for the Panama Canal will be written by Colonel Goethals, the chief engineer in charge of the immense work, and each one of the twenty other articles will be written by a man prominent in the great enterprise, as the following list of topics and the names of those who deal with them will demonstrate: "Dredging in the Panama Canal," W. G. Comber.

"Terminal Works, Drydocks and Wharves of the Panama Canal," H. H. Rousseau.

"Coaling Plants and Floating Cranes of the Panama Canal," F. H. Cooke.

"Meteorology and Hydrology of the Panama Canal," P. I. Wilson.

"Design of Locks, Dams and Regulating Works of the Panama Canal," Col. H. P. Hodges.

"Method of Construction of the Locks, Dams and Regulating Works in

the Pacific Division of the Panama Canal," S. B. Williamson.

"Design of the Lock Walls and Valves for the Panama Canal," L. D. Cornish.

"Design of the Spillways on the Panama Canal," E. C. Sherman.

"Gates of the Panama Canal Locks," Henry Goldmark.

"Electrical and Mechanical Installations of the Panama Canal," Edward Schildhauser.

"Emergency Dams above Locks of Panama Canal," T. B. Monnich.

"Municipal Engineering and Domestic Water Supply in the Canal Zone," George M. Wells.

"Reconstruction of the Panama Railroad," Lieutenant Frederick Mears.

"Aids to Navigation of the Panama Canal," W. F. Beyer.

"Geology of the Panama Canal Zone," D. P. McDonald.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$10,000. Architect, J. R. Miller, Lick Bldg., S. F. Owner, Harriet Jolliffe, 1840 Broadway. The building will be erected on the west side of Hyde street south of California, having a frontage of 25 feet and a depth of 66½ feet. There will be six suites of two and three rooms. Interior finish will be of pine with some elm panels and oak floors. All apartments will have wall beds and private bath rooms. Plans provide for a hot water system and portable vacuum cleaners. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who is now letting sub-contracts.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame and concrete, \$14,000. Architect, Charles J. Rousseau, 44 Kearny street, S. F. Owner, J. Eric Johanson. The building will be erected on the east side of Franklin street north of Sacramento, covering an area of 30 by 87 feet. There will be six suites of five rooms each. Interior will be finished in pine throughout except the entrance and social hall, which will be finished in blue gum with oak floors. There will be steam heat, a hot water system and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base. Class C construction. Cost not stated. Architect, Grace Jewett, 604 Montgomery street, S. F. Owner, Mrs. Bradbury. The building will be erected at the northwest corner of Polk and California streets, and has been designed for seven stores on the first floor besides the entrance to the apartment house. Upper floors will contain two and three room suites with private baths. Interior finish will be of pine throughout. There will be an automatic elevator, steam heat and a hot water system.

"The Working Force of the Panama Canal," Captain R. E. Wood.

"Purchase of Supplies for the Panama Canal," F. C. Boggs.

The widespread interest that is being taken in this Congress is indicated by the fact that membership subscriptions already have been received from forty-six foreign countries, totaling about thirty per cent of the entire number, and they come from the most unexpected places. For instance, nine subscriptions have been received from the Dutch East Indies.

A membership subscription costs five dollars. It entitles its holder to all the privileges of the International Engineering Congress, the index volume and any other one volume that may be selected by the subscriber. It may be obtained by sending the five dollars to International Engineering Congress, 1915, Foxcroft Building, San Francisco, California, U. S. A.

Patent store fronts are specified. Exterior of the building will be faced with pressed brick. All bath rooms will be finished in tile with composition floors. Plans are being prepared.

**PORTLAND, ORE**—Apartment house, 3 story and base, brick, \$35,000. Architect, C. A. Duke, Failing Bldg., Portland. Owner, H. Meter, 311 16th street, Portland. The building will be erected on Third street near Market and will cover an area of 74 by 96 feet. There will be four stores on the first floor and a total of 37 suites of two and three rooms on the upper floors. Interiors will be finished in pine throughout. There will be steam heat and a hot water supply. All suites will have private bath rooms and wall beds. Bath rooms will be finished in tile wainscot with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

**OAKLAND, CAL.**—Apartment house addition, frame construction, \$4,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, Mr. Uglad. The work will consist of rearranging the interior for apartments of two and three rooms, installing modern plumbing and electric work, plastering, painting and mill work. Wall beds are specified. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are now being taken.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$5,000. Architect, none. Owner, A. J. Yerrick, Blake Bldg., Oakland. The building will be erected at the southwest corner of College avenue and Clifton, and has been designed to contain a store and fourteen rooms arranged in two-room suites. Interior will be finished in pine throughout. All suites will have wall beds and private bath rooms. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

## Contracts Awarded.

**LOS ANGELES, CAL.**—Apartment house, 4 story and base, brick. Cost not stated. Architect, none. Owner,

Mrs. George J. Ley, Contractors, E. H. MacGibbon Co., Los Angeles Investment Bldg., L. A. Contract price not stated.

## BATH HOUSES.

SEATTLE, WASH.—Natorium, 3 story and base, reinforced concrete, \$100,000. Architect, J. Merrill Brown, Northern Bank Bldg., Seattle. Owner, Erwin Baruch, 1621 1/2 Summit avenue. The building will be erected at the corner of Western and Virginia avenues, covering an area of 100 by 130 feet, and will be similar in design to the Lurline Baths in San Francisco. There will be a balcony, 6 by 100 feet long, one side of the building. The main tank will be 85 by 102 feet. A special filtration system will be installed, together with steam heat, laundry machinery and hot water system. Exterior will be faced with cement plaster. Plans are now being prepared.

SANTA BARBARA, SANTA BARBARA, CO., CAL.—Bath house, 2 story and base, brick and reinforced concrete, \$50,000. Architect, H. Alban Reeves, Chamber of Commerce Bldg., Santa Barbara. Owners, Southern California Edison Co. The building will cover an area of 200 by 80 feet, and will be of either brick or reinforced concrete and will contain the offices of the Santa Barbara Electric Road, refreshment rooms, plunge, dressing rooms and mechanical department and laundry. Interior will be finished in pine with cement floor. There will be steam heat and a water heating apparatus. Exterior will be faced with either cement plaster or pressed brick. Plans are complete and figures are being taken for either reinforced concrete or brick construction.

## BONDS.

STOCKTON, San Joaquin Co., Cal.—By a vote of 1,093 to 103 the proposition to bond the city for \$266,400 for street improvements was defeated. One-third of the registered vote went to the polls. Only one half of the voters being registered for the election. It required a two-thirds vote to have carried the election.

SACRAMENTO, Cal.—A conference will be held in this city on July 16th at the Sacramento Chamber of Commerce between citizens interested in the several State bond issues to be voted in the November election. Among the issues to be voted upon is one for \$3,000,000 for the extension of the State Capitol. There is also included an issue of \$700,000 for the State Fair improvements.

DIXIEBA, Tulare Co., Cal.—For the second time the bond issue for an additional grammar school site and building has failed. The vote was 148 in favor of the issue and 236 against.

SAN DIEGO, San Diego Co., Cal.—A resolution requesting the Board of Supervisors to bond the county for \$1,000,000 for the purpose of building bridges and constructing roads throughout the county, was unanimously passed at the convention of 75 delegates on July 6th.

RICHMOND, Contra Costa Co., Cal.—Petitions for the securing of signatures to put an initiative on the ballot in November to provide a \$1,000,000 bond issue for establishing hospitals, sanitariums and dispensaries for the

prevention of tuberculosis are now being circulated under the direction of the State Board of Health and the Tubercular Board of this body. The idea was inaugurated at the meeting of the State Board of Health in Santa Barbara on June 15th.

GOLDFIELD, Nev.—The bond election to provide \$25,000 for work on roads of Esmeralda County carried by over two to one.

SAN YSIDRO, San Diego Co., Cal.—An election held here for the purpose of raising bonds for the erection of a school building was defeated. There were 67 in favor of the issue and 67 opposed. It is said that the matter will be laid before the voters again when allowed by law.

OROVILLE, Butte Co., Cal.—No bids have been received here for the Bonito school district bonds in the amount of \$6,000. The funds are to be used in the construction of a school building. Four elections were necessary to vote the bonds, three of them being defeated. Bonds bear 6 per cent interest, but as yet no bidders have appeared to purchase them.

BERKELEY, Alameda Co., Cal.—Petitions are now being circulated by the Alumni of the University of California to provide for a \$1,500,000 bond issue for new buildings. Classes are now being held in attics and storerooms as there is no accommodation for the number of students now attending the University.

If the bonds carry a Chemistry building will be erected, an addition will be made to the University Library, and several other changes will be undertaken. At the present time there is but five permanent buildings on the University campus.

RICHMOND, Contra Costa Co., Cal.—The bond firm of E. H. Rollins & Son of San Francisco has purchased the \$75,000 school bonds of Richmond. With the sale of the bonds the school board of this city hope to commence the preparations of plans and specifications for the erection of the new buildings at an early date.

PETALUMA, Sonoma Co., Cal.—Bonds amounting to \$110,000 were sold to N. W. Halsey & Co. for \$110,508. There were a number of bidders.

PORTLAND, Ore.—An ordinance has been passed by the City Council for the sale of two blocks of improvement bonds. The larger issue will be for \$166,000 and the smaller for \$451. As usual, bidders will be allowed to bid on any portion or in all blocks of from \$50 to \$500.

SEATTLE, WASH.—Bonds for the construction of bridges over the Lake Washington canal and one over the East Waterway carried. The two issues carried provide for a \$179,500 bridge at 15th avenue N. W. and a \$350,000 bridge at Fremont street. Preliminary plans for all except the East Waterway bridge have been completed by the City Engineer's Department.

SILVERTON, Ore.—The proposition of voting bonds in the sum of \$12,000 for a school site and the erection of a school building was defeated here.

SANDY, Ore.—Bonds amounting to \$14,000 have been voted for the erection of a new school building.

LIVE OAK SCHOOL DISTRICT, Sutter Co., Cal.—The Trustees of Enechal have called the next bond election for July 27th, at which time the proposition of bonding the school district for \$5,000, funds to be used in the erection

of a school house. At a recent election the bonds failed to carry.

TURLOCK, Stanislaus Co., Cal.—At the meeting of the City Council held on July 6th an ordinance was introduced calling an election on September 1st, at which time there will be submitted to the voters the proposition of incurring a bonded indebtedness of \$16,000 for the purchase and parking of Block No. 6 in this city. This action was taken in pursuance of the recent order of the Railroad Commission for a new Southern Pacific depot in Turlock provided this property is acquired and maintained as a public park by the city. The property in question adjoins the depot site on the east.

MADERA, Madera Co., Cal.—The council of this city has decided to call a bond election early in September for the purpose of providing better fire improvements. The plan is to vote sufficient bonds to provide for extending the present water system, also sewer system, for a new city hall and for a bridge across the Fresno River at D street, and for new fire apparatus. It is estimated that the proposed improvements will cost in the neighborhood of \$100,000. The City Attorney has been instructed to draw up the necessary resolution declaring intention.

SAN FRANCISCO, Cal.—The State Railroad Commission has made a supplemental order authorizing the Fresno Interurban Railway Company to issue 600 shares of stock and \$120,000 of bonds. The authority is conditioned upon the railroad company securing a franchise through the town of Clovis, Fresno County, before July 20th.

PALO ALTO, Santa Clara Co., Cal.—The City Treasurer of this city has been authorized to sell the \$36,000 bond issue known as the "Palo Alto City Bonds of 1912" at not less than par. The issue bears 5 per cent. When the bonds were first offered for sale, no bids were received. The completion of the new municipal building and other city utilities has necessitated the sale of these bonds.

DENVER, Colo.—The State Supreme Court has held that the Denver city bonds for driving a tunnel through the continental divide, to be used by the Denver and Salt Lake Railroad were unconstitutional on the ground that it would lend public credit to a private enterprise.

At a special election last February the issuance of \$3,000,000 city bonds to drive the tunnel was authorized, the railroad to contribute \$1,500,000. In an agreement between the city and the road, the latter was to meet the interest payments on the bonds and provide for their redemption. The agreement gave the city the right to use the tunnel.

FRESNO, Fresno Co., Cal.—W. W. Phillips, president of the Chamber of Commerce is urging public support for the proposed bond issue of \$2,000,000, the money to be devoted to the construction of 230 miles of lateral highways in Fresno County.

The petition for the bond issue is now in the hands of the Supervisors of the county and action is expected soon. The movement is similar to those already underway in Kern, San Joaquin, Tulare, Kings and other counties. All of the laterals are to connect with the main highway of the State.

**Municipal Bond Issues.**

Municipal bond issues throughout the United States during the month of June, including State and county flotations, reached a total of \$36,121,500, against \$55,233,866 the previous month and \$62,874,342 in June of last year. This brings the half year's total up to \$312,547,266, as compared with \$238,234,133 for the first six months of 1913.

Among the features of last month's bond sales were the following: Little River Drainage District, Missouri, \$1,750,000; State of California, \$3,000,000; San Francisco, \$1,750,000; Cleveland, \$1,500,000; Milwaukee, \$1,450,000; Buffalo, \$1,190,000; State of Rhode Island, \$617,000. A temporary loan of \$1,000,000, negotiated by the city of Boston, and an issue of \$2,581,000 temporary tax levy certificates by St. Paul are not included in the above total.

**BRIDGES AND DAMS.**

**YUBA CITY, SUTTER CO., CAL.**—Bridge, reinforced concrete, \$60,000. Engineer, Erle L. Cope, Yuba City. Owners, Sutter County. The Supervisors of Sutter County at their last meeting voted to extend the date of opening bids for constructing the big reinforced concrete trestle until July 20th, and all bids were returned without being opened. The trestle will replace the old Long Bridge over Butte Slough, and will be 1,900 feet long, estimated to cost \$60,000. Four sets of bids were received. These were from D. B. Farquharson, S. F.; Dunnivant-Houghton-Van Sant Co., S. F.; M. Fisher, S. F.; and Ross Construction Co., Sacramento.

**WHEATLAND, PLACER CO., CAL.**—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor, Auburn. Owners, Placer County. Placer County has at last gone on record as willing to bear the cost of constructing the bridge over the Bear River at Wheatland, and construction will be started as soon as plans and specifications can be secured. This work has been delaying the completion of the State Highway between Marysville and Sacramento. Plans are being prepared.

**SAN RAFAEL, MARIN CO., CAL.**—San Rafael. Cost not stated. Engineer, County Surveyor, San Rafael. Owners, Marin County. At the last meeting of the Board of Supervisors plans for a bridge at San Geronimo, near the Roy property, were approved and bids ordered advertised. The matter of building about 1,000 feet of road through the Smith ranch to Point Reyes Station was also considered, but put over until the next meeting of the Board. This has been estimated to cost \$2,500 to \$3,000.

**RICHMOND, CONTRA COSTA CO., CAL.**—Harbor work, channel dredging, \$4,000. Engineer, City Engineer Posey. Richmond. Owners, City of Richmond. Plans prepared by City Engineer Posey for dredging a 100-foot channel in the inner harbor were adopted at the last meeting of the City Council. Bids will be called for at once. This contract will include dredging about 70,000 cubic yards of material, and will cost in the neighborhood of \$6,000.

**MARYSVILLE, YUBA CO., CAL.**—Bridge, steel and reinforced concrete. Cost not stated. Engineer, City Engineer Trow, Marysville. Owners, City of Marysville. The City Council will

probably advertise for bids for the approaches for the new D street bridge, commencing on July 13th. City Engineer Trow has received plans back from the Highway Commission with approval, and work will be started at once.

**WOODLAND, YOLO CO., CAL.**—Cement. Cost not stated. Engineer, County Surveyor, Woodland. Owners, Yolo County. The Board of Supervisors will call for bids at once for furnishing the county with from 2,000 to 10,000 barrels of cement, which will be used in the construction of new bridges throughout the county.

**Contracts Awarded.**

**CLACKMAN, ORE.**—Bridges, 2, steel and concrete, \$21,247. Engineer, County Surveyor, Oregon City. Owners, Clackman County. Contractor, A. C. V. Berry, Selling Bldg., Portland. Contract price, \$21,247.

**CHURCHES.**

**SAN FRANCISCO**—Church, 1 story and base, frame and plaster, \$35,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Emanu El Evangelical Association. The building will be erected at the southwest corner of Capp and 19th streets, and will cover an area of 65 feet square. The design is in the Romanesque style and exterior will be covered with cement plaster on metal lath. Interior has been arranged for a large auditorium, Sunday school rooms, parlor, choir loft and pastor's study. Interior will be finished in oak and ornamental plaster. A central heating plant will be installed. Working drawings are being prepared and will be ready for figures in about three weeks.

**FACTORIES & WAREHOUSES.**

**OAKLAND, CAL.**—Factory boiler house, 1 story, corrugated iron, \$7,500. Architect, none. Owners, Pacific Gas and Electric Co. 13th and Clay streets, Oakland. The building will be erected at the corner of 1st and Market streets. Exterior will be covered with corrugated iron. A cement floor will be used. The cost does not include the installation of the boilers. Plans are complete and work will be done by Day Labor.

**SEATTLE, WASH.**—Cold storage addition, reinforced concrete, \$60,000. Engineer, Chief Engineer Paul P. Whitcomb, Seattle. Owners, City of Seattle. Working drawings are being prepared for an addition to the city's cold storage plant on the East Waterway. Construction will be of reinforced concrete. The estimated cost does not include machinery to be installed. Exterior of the building will be faced with cement plaster. Plans will be ready for figures about August 1st.

**FIRE HOUSES AND JAILS.**

**SAN FRANCISCO**—City jail and morgue lighting fixtures. Cost not stated. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened for furnishing and installing the lighting fixtures in the City Jail and Morgue show Roberts Mfg. Co. low at \$1,476. They will be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

**RED BLUFF, TEHAMA CO., CAL.**—Jail, 2 story and base, brick and steel, \$15,000. Architect, A. R. Herold, Forum Bldg., Sacramento. Owners, Tehama County. Bids opened by the Board of Supervisors of Tehama County for the construction of the new two-story brick and concrete jail building designed by Architect R. A. Herold of Sacramento show R. W. Moller of San Francisco low on the general construction at \$22,885, and the Stewart Iron Works of Cincinnati low for the cell work at \$21,160. Awards will be made this week. Following are the bids for the general construction:  
R. W. Moller, San Francisco, \$22,885.00  
O'Connor Bros., Red Bluff, 34,680.00  
Keating & Hite, S. F., 24,975.00

**GOVERNMENT WORK AND SUPPLIES.****Greely, Colo., Construction.**

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., June 30 for the construction, complete, of the U. S. post office at Greely, Colo.:

Bid 1, J. H. Wiese, Omaha, Neb.  
2, R. J. Wellon, Greely, Colo.  
3, Eugene Schuler, Pasadena, Cal.  
4, Dieter & Wenzel Construction Co., Wichita, Kans.  
5, George Hinchliff Co., 1408 Security Building, Chicago, Ill.

6, F. H. Cowell, Denver, Colo.  
Proposal No. 1 (using limestone for all exterior stonework except where granite is required)—Bid 1, \$96,266; 2, \$125,330; 3, \$99,000; 4, \$97,983; 5, \$102,200; 6, \$106,447.

Proposal No. 2 (using sandstone for all exterior stonework, except where granite is required)—Bid 2, \$146,715; 3, \$108,000; 4, \$97,983; 6, \$115,305.

Proposal No. 3 (using white Colorado marble for all exterior stonework except where granite is required)—Bid 1, \$127,480; 2, \$166,290; 3, \$135,000; 4, \$131,000; 5, \$127,200; 6, \$136,135.

Proposal No. 4 (using white marble other than Colorado Marble for all exterior marble, except where granite is required)—Bid 1, \$117,760; 4, \$118,360; 5, \$126,000.

For alternate 1 (substituting marble for all Caen stone plaster in connection with the entrance lobbies and vestibule, as specified), add—Bid 1, \$1,250; 2, \$2,300; 3, \$5,100; 4, \$1,842; 5, \$1,700; 6, \$2,012.

For alternate 2 (substituting Keene's cement for hard plaster on walls of all finished rooms throughout the building, as specified), add—Bid 1, \$700; 2, \$600; 3, \$935; 4, \$528; 5, \$350; 6, \$1,200.

For alternate 3 (for painting all plaster walls of finished rooms throughout the building and finished ceilings in distemper, as specified), add—Bid 1, \$1,800; 2, \$1,650; 3, \$1,750; 4, \$1,975; 5, \$200; 6, \$412.

For alternate 4 (substituting ornamental cast or extruded for all drawn bronze, as specified), add—Bid 1, \$6,700; 3, \$6,700; 5, \$5,000.

Amount included for lighting fixtures—Bid 1, \$800; 2, \$1,050; 4, \$770; 6, \$860.

**San Francisco, Steel Steamer.**

The following bids were received by the depot quartermaster, San Francisco, Cal., under office circular of June 5, for one single screw steel steamer for harbor service:

Bid 1, United Engineering Works, San Francisco, Cal.

2. Union Iron Works, San Francisco, Cal.

3. Seattle Construction and Dry Dock Co., Seattle, Wash.

4. Navy Yard, Puget Sound, Wash. (estimate only.)

5. Navy Yard, Mare Island, Cal. (estimate only.)

Item 1. Complete vessel with turbo generating set, per specification—Bid 1, \$129,000; 2, \$135,500; 3, \$129,500; 4, \$143,260; 5, \$141,400.

2. Complete vessel with reciprocating generating set—Bid 1, \$128,600; 2, \$135,745; 3, \$129,300; 4, \$143,610; 5, \$141,255.

3. For work required under paragraph 164 of the specification—Bid 1, \$1,300; 2, \$3,500; 3, \$2,400; 4, \$1,050; 5, \$1,180.

## —HALLS & SOCIETY BLDGS—

SAN FRANCISCO—Civic Center Plaza grading. Cost not stated. Architect, City Dept. of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for the grading of the Plaza in the Civic Center site show T. W. McClenahan Co. low at \$51,560. They will probably be awarded the contract. A complete list of the figures received will be found under the heading of San Francisco in this issue.

## HOSPITALS

DECOTA, ALAMEDA CO., CAL.—Dormitory, 2 story and base, brick and concrete. Cost not stated. Architect, James H. Humphreys, 612 Wells-Fargo Bldg., S. F. Owners, California Masonic Home. The building will be erected on the grounds of the institution, and has been designed to contain two large dormitories, dining hall and kitchen. Interior finish will be of pine throughout. There will be steam heat, oil burning plant, vacuum cleaning and hot water system. Exterior will be faced with pressed brick and cement plaster. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Hospital refrigerating plant. Cost not stated. Engineer, City Dept. of Engineering. Temporary City Hall, S. F. Owners, City and County of San Francisco. A bill ordering the construction of a refrigerating plant at the Isolation Hospital has been passed to print by the Board of Supervisors. Plans will be prepared by the City Department of Engineering and bids will be called for by the Board of Public Works.

SAN FRANCISCO—Pathological ward, 2 story and base. Class A construction, \$75,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, City and County of San Francisco. The building will adjoin the main group of the new City and County Hospital on Potrero street, between 21st and 23rd streets, and will cover a ground area of 90 by 160 feet. There will be a complete steel frame, concrete floors and fireproof interior partitions. Interior finish will be of pine and hardwoods. Steam heat will be supplied from the central power station. Considerable special equipment will be installed. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for by the Board of Public Works. Further mention will be made of the work.

NAPA, NAPA CO., CAL.—Silos and feed room, state hospital, concrete construction. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids opened on July 8th for this work show Harvey A. Klyce of San Francisco low at \$3,537. He will be awarded the work. A complete list of the figures received will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

## HOTELS.

SEATTLE, WASH.—Hotel, 10 story and base, reinforced concrete. Cost not stated. Architect, J. L. McCauley, New York Block, Seattle. Owners, Rainier Heat and Power Co. The building will be erected at the corner of Jackson and Maynard streets, covering an area of 105 by 120 feet. Construction will be fireproof throughout, with reinforced concrete floors, walls and roof slabs. Two propositions are being considered, one for a six-story building containing 255 rooms, and the other for a ten-story structure of 455 rooms with 150 baths. Interior finish will be of pine and hardwood. There will be two elevators, steam heat, hot and cold running water, vacuum cleaning and metal window sash and frames. All bath rooms will be finished in tile. Entrance will have marble and tile wainscot. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete and figures are now being taken from selected contractors only.

## LIBRARIES.

WOODLAND, YOLO CO., CAL.—Library, 1 story and base, reinforced concrete. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Town of Woodland. The building will be in the nature of an addition to the present library and will be designed in the classic style. Construction will be of reinforced concrete throughout. Interior will be finished in pine with some hardwood. There will be two large reading rooms and a stack room. Plans provide for steam heat. Exterior of the building will be faced with cement plaster on metal lath. Plans are now being prepared.

## PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Exhibit building, 1 and 2 story frame and plaster, \$50,000. Architect, George J. Oakeshott, Lackman Bldg., S. F. Owners, Australia. Bids open for this work show William A. Newsom of San Francisco low at \$49,756. Twelve sets of figures were opened. Bids have been forwarded to Australia for consideration. A complete list of the bids appears under the heading of San Francisco in this issue.

SAN FRANCISCO—Camp of 49, frame construction, \$100,000. Architect, Capt. Lewis, 609 Nevada Bank Bldg., S. F. Owners, California 49 Camp Co. There will be a total of ten buildings in the group, all of log construction and representing a typical mining camp of the day of 49, with its saloons, general store, gambling hall, Chinese laundry, blacksmith shop, post office and other typical buildings.

The work is now being done by Day Labor under the direction of Capt. Lewis.

SAN FRANCISCO—Exhibit group, frame construction. Cost not stated. Architect, Placentini, Rome, Italy. Owners, Italian Government. Designs prepared for Italy's display at the Panama-Pacific Exposition by Sig. Placentini show a group of small buildings typical of a small Italian town, and will contain many of the most characteristic industries of the natives. Various Italian styles of architecture will be used. Plans will shortly arrive in this city for figures.

SAN FRANCISCO—Exhibit building, 1 and 2 story, frame and plaster, \$60,000. Architect's name not given. Owners, Cuban Government. Fourteen sets of figures were opened for the construction of the exhibit building to be erected by the Cuban Government at the Panama-Pacific International Exposition. H. C. Warwick was low at \$60,900, and will be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—Dairy, Poultry and Congress buildings, frame and plaster. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed and are now out for figures for constructing the dairy, poultry and congress buildings and for a feed barn and corrals for the live stock exhibit. Bids will be opened on July 20th. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—Mill exhibit booth. Cost not stated. Architect, Edward G. Garden, Phelan Bldg., S. F. Owners, Sperry Flour Co. Figures are now being taken for a large exhibit to be erected by the Sperry Flour Co. in block 10 of the Food Products Palace at the Panama-Pacific International Exposition. The space is 62 feet 9 inches by 117 feet 3 inches, and will contain a complete mill plant, bake shop, grain testing laboratories, ten booths and special space to be devoted to the demonstration of the best methods of preparing cereals. The work will cost in the neighborhood of \$25,000 exclusive of the mill machinery.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster, cost not stated. Architect's name not given. Owners, State of New York. An official proposal is published in another column of this issue calling for figures for completing the partly completed New York State Exhibit building on the Exposition grounds. Bids are to be opened on July 15th at the building. Plans and specifications can be secured from the office of the New York State Panama-Pacific Commission at the New York State Building on the Exposition grounds.

## Contracts Awarded.

SAN FRANCISCO—State exhibit building, 1 and 2 story, frame and plaster. Cost not stated. Architect's name not given. Owners, State of Kansas. Official word has been received from the Kansas Panama-Pacific Commission to the effect that all bids from San Francisco contractors have been rejected and that the contract has been awarded to a Topeka man on the percentage basis. The name of the contractor is not given.

**SAN FRANCISCO**—Irish village group of 1 story frame and plaster, \$150,000. Architect, Benj. G. McElougall, Sheldon Bldg., S. F. Owners, Irish Village Co., represented by Michael O'Sullivan, Contractors, Larsen-Sampson Co., Crocker Bldg., S. F. Contract price, \$150,000.

**SAN FRANCISCO**—State exhibit building, 1 story, frame and plaster. Cost not stated. Architect's name not given. Owners, State of Utah, Contractors, Northwest Construction Co., Mills Bldg., S. F. Contract price not stated.

## POST OFFICES.

**SAN FRANCISCO**—Post office, 1 and 2 story. Class A construction. Cost not stated. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Working drawings for a new building to house the United States post office at the Ferry are now being completed. The building will adjoin the Ferry Building on the south. Bids will shortly be called for on the pile foundation and grading. Interior will be finished in pine and hardwood. There will be special mail racks and holders, steam heat and modern plumbing. Exterior of the building will be faced with cut stone. Bids will be called for in about two weeks.

**FRESNO, FRESNO CO., CAL.**—Post office repairs and painting. Cost not stated. Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids are now being taken by the Postmaster at Fresno for repairs and painting. Full particulars can be secured from the Postmaster.

**MEDFORD, ORE.**—Post office, 2 story and base, brick and stone, \$80,000. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed for the new Federal building to be erected at Medford. Construction will be fireproof except the upper floor. Interior finish will be of pine and hardwood. Plans provide for steam heat, vacuum cleaning system and hot water supply. Marble and tile will be used in the corridors. A general contract, including heating, ventilating, plumbing and lighting fixtures will be let. Exterior of the building will be faced with pressed brick, stone and ornamental terra cotta. Bids will be opened on August 27th. Plans can be secured from either the Supervising Architect or from the custodian of the site.

## Contracts Awarded.

**CHICO, BUTTE CO., CAL.**—Post office, 2 story and base, brick and concrete, \$76,980. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, B. J. Duffy, 2673 17th street, S. F. Contract price, \$76,980.

## RAILROAD CONST. STATIONS AND EQUIPMENT.

**SAN FRANCISCO**—Car barn grading. Cost not stated. Architect, City Dept. of Architecture, Temporary City Hall, S. F. Owners, City and Count of San Francisco. Bids opened by the Board of Public Works for grading the site of the new Municipal Car Barns show Daniel O'Day low at \$34,550. He will

be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

## RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, brick or reinforced concrete, \$15,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Clarence Musto. The dwelling will be erected on property recently purchased by Mrs. Musto at Vallejo and Divisadero streets, and will cover a large area. Plans provide for a building with twenty rooms and several baths with a basement garage. Interior of the dwelling will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Contractors, Trewhitt & Shields, Fresno. Contract price, \$18,800. Note: This does not include opera chairs and stage equipment.

#### SEALED PROPOSALS.

##### NOTICE TO BIDDERS.

NOTICE is hereby given that sealed proposals will be received by the Board of Supervisors of Sutter County, California, at the rooms of said Board, in the Court House, in Yuba City, Sutter County, California, up to and not later than 2 o'clock p. m. on Monday, the 20th day of July, 1914, for furnishing all labor and materials for, and the constructing of a reinforced concrete bridge with approaches, across the overflow channel of the State of that said Sutter County, at the site of that bridge commonly called "Long Bridge." Said bridge and approaches to be constructed and completed in strict accordance with the plans, drawings and specifications prepared by Eric I. Cope, Civil Engineer, and adopted by said Board on June 2nd, 1914, and on file in the office of the County Clerk of Sutter County, reference to which is hereby made for full details and description of said work and materials, the amount of bond that the contractor shall furnish for the faithful performance of the contract is the full amount of the contract price. Work must be commenced within ten days from the receipt of notice from the Clerk of said Board, of acceptance of bid, and completed on or before December 1st, 1914. Payments shall be made in two installments, as follows: Two-thirds of the contract price, December 15th, 1914, and the other one-third May 1st, 1915. A penalty of Twenty-five (\$25) Dollars per day shall be paid by the contractor for each and every day the contract remains unperformed, after the expiration of the time named in the foregoing. Proposals offered shall be accompanied by a check certified by a responsible

bank, payable to the order of the Clerk of the Board of Supervisors of Sutter County, for an amount not less than ten (10) per centum of the aggregate of the proposal, and no proposal will be considered unless accompanied by such check. Proposals shall be in the form set forth in said specifications.

Prospective bidders shall deposit the sum of \$5 when plans are taken away, which sum shall be forfeited unless such plans are returned within one week.

The Board of Supervisors of Sutter County reserves the right to reject any and all bids.

By order of the Board of Supervisors of the County of Sutter, State of California. D. D. GREEN.

#### PROPOSALS FOR PAINTING.

**PAINTING AND REPAIRS**—U. S. Post Office, Fresno, Cal. Custodian's office.—Sealed proposals will be received at this office until — m., —, 1914, and then opened for repairs and painting of the building in accordance with drawings and specifications, copies of which may be obtained upon application. —, Custodian.

#### PROPOSALS FOR WOOD STAVE PIPE.

**WOOD STAVE PIPE**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, 519 Commonwealth Building, Denver, Colo., until 2 o'clock p. m. All bids must be made on the proposal sheets furnished each bidder. Notice to bidders, proposal sheets, specifications and plans, etc., can be obtained at the office of the City Clerk of the City of Richmond, California, or at the office of P. A. Haviland, of Haviland & Tibbets, Alaska Commercial Building, San Francisco, California, on the deposit of Five Dollars and the unit prices considered in relation to their unit price will be rejected. The right is reserved by the City Council of the City of Richmond to reject any or all proposals or bids. Each bid must be accompanied by a certified check made payable to the Clerk of the City of Richmond in the sum of at least five per cent (5%) of the total amount of the bid.

A. C. FAPIS,  
City Clerk.**NOTICE TO CONTRACTORS.**

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, on and including **12 o'clock, noon, Wednesday, July 29, 1914**, said bids will then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for

the construction and erection of superstructures for two bridges on the Trinity State Road, one bridge, 90 foot span, to be erected across the Mud River, on bridge of two 60-foot spans, to be erected over the South Fork of the Trinity River.

Bids may be submitted on either all steel or combination steel and wood superstructures.

Concrete piers and flooring for these bridges will be furnished by the State Department of Engineering.

Bids must be accompanied by detail drawings and strain sheets, snow load to be taken at 8 feet of dry snow, live load to be taken as 20-ton road roller, or traction engine.

Blueprints showing profile and further information may be obtained by application to this office.

Cash, a bidder's bond, or certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for superstructures for two bridges on the Trinity State Road, California."

Signed: W. F. MCCLURE,

State Engineer.

**PROPOSALS.**

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at the office of the Board of Public Works, to which reference is made, at **2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 19th day of August, 1914**, for doing the following work, including the furnishing of the necessary labor and materials thereon, to wit:

The construction of a tunnel and appurtenances under Twin Peaks in the City and County of San Francisco.

Progressive payments will be made and must be commenced within fifteen (15) calendar days and completed within six hundred (600) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance of contract has been fixed at \$500,000.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the City of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Clerk of the Board of Public Works.

The Board of Public Works reserves the right to reject any and all bids by order of the Board of Public Works.

F. J. CHURCHILL,

Secretary.

**NOTICE TO BRIDGE BUILDERS.**

NOTICE is hereby given that sealed proposals on bids will be received by the Board of Supervisors of the County of Santa Clara, California, in their rooms in the Court House in the City of San Jose, on and including **11 o'clock a. m. of Monday, July 20, 1914**, for the construction of three culverts in Road District No. 3 in said county, and located as follows: one culvert on Union avenue, north of Corbett avenue, culvert on Los Gatos and Almaden road, near Rices place, one culvert on Los Gatos and Almaden road, near Thomas place, pursuant to and in accordance with plans and specifications on file in the chambers of the Board of Supervisors.

Each bid must be accompanied by a

certified check in the sum of ten per cent of the amount bid, drawn upon some reliable bank in favor of Henry A. Pfeister, County Clerk, as liquidated damages in case the contractor fails to file a satisfactory bond as required by said Board within five days from the faithful performance of the conditions of the contract.

The Board reserves the right to reject any and all bids.

All bids must be addressed to Henry A. Pfeister, County Clerk of the Board of Supervisors of Santa Clara County, and indorsed "Bids for Culverts."

By order of the Board of Supervisors of Santa Clara County.

Attest: HENRY A. PFEISTER, Clerk.

**PROPOSALS FOR STEEL PIPES.**

STEEL PIPES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until **2 o'clock p. m. of July 22, 1914**, for furnishing material and erecting riveted steel pipes for the Milk River project, Montana. For particulars, address C. S. Reckers, Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

**PROPOSALS WANTED FOR FURNITURE AND EQUIPMENT FOR NEW CITY MOIRIE AND COHONER'S OFFICE.**

SEALED proposals for furniture and equipment required will be opened in open session of the Board of Supervisors on **July 27, 1914, at 3 p. m.** Proposals furnished on application.

L. S. LUNIGAN, Clerk.

**PROPOSALS FOR BUILDING.**

BUILDING—Sealed proposals indorsed "Proposals for Erecting Five Industrial Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. August 15, 1914**, and then publicly opened, for erecting five industrial buildings at the United States naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named, H. R. STANFORD, chief of bureau.

**PROPOSALS FOR EXCITER.**

TURBINE EXCITER—Sealed proposals indorsed "Proposals for 40-Kilowatt Turbine-Driven Exciter" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. July 25, 1914**, and then there publicly opened, for furnishing and installing one 40-Kilowatt turbine-driven exciter in the central power plant at the navy yard, Puget Sound, Wash. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named, H. R. STANFORD, chief of bureau.

**NOTICE TO BRIDGE BUILDERS.**

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of **10 o'clock a. m. on Monday, July 20, 1914**, for the construction of a reinforced concrete bridge over the second crossing of the San Gregorio Creek on the county road from La Honda to San Gregorio in the Fifth Road District, per plan and specifications on file in the County Surveyor and adopted by the Board of Supervisors on Monday, June 22, 1914, which said plans and specifications are on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank, in a sum equal to at least ten per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo, in liquidated damages, in case the party to whom the contract is awarded and shall fail, neglect or refuse to execute and file, within ten days after the

award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county, in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH,  
County Clerk.

#### PROPOSALS FOR BRIDGE.

**BRIDGE**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Boise, Idaho, until **12 o'clock p. m. July 22, 1914**, for furnishing all material and labor for the construction of a highway bridge, consisting of three 150-foot steel truss spans and wooden trestle approaches, across the south fork of the Snake River, near Jackson, Wyo. For particulars address the United States Reclamation Service, Boise, Idaho, or Washington, D. C. F. H. NEWELL, director.

#### PROPOSALS FOR WHARF.

**WHARF**—Sealed proposals, indorsed "Proposals for Wharf," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. July 22, 1914**, and then and there publicly opened, for a timber and pile wharf at the United States naval coal depot, San Diego, Cal. Estimated cost, \$3,300. Plans and specifications can be obtained on application at the bureau or the commanding officer of the coal depot. H. R. STANFORD, chief of bureau.

#### NOTICE TO BRIDGE BUILDERS.

**NOTICE** is hereby given that sealed proposals or bids will be received by the Board of Supervisors of Santa Clara County, California, in their rooms in the Court House, in the City of San Jose, in said county, up to **11 o'clock a. m. of Monday, July 20, 1914**, for the construction of a steel highway bridge over Pacheco Creek between the counties of San Benito and Santa Clara at the road leading from Hollister to San Felipe, in accordance with plans and specifications for said work as jointly prepared by the Surveyors of Santa Clara and San Benito counties, which are on file in the chambers of the Board of Supervisors of Santa Clara county.

Each bid must be accompanied by a certified check in the sum of ten per cent of the amount bid, drawn upon some reliable bank in favor of Henry A. Pfister, County Clerk, as liquidated damages in case the successful bidder fails to file a satisfactory bond as required by said Board within five days for the faithful performance of the conditions of the contract.

Bids for this work will also be received up to **12 o'clock a. m. of Monday, July 20, 1914**, at the office of the Board of Supervisors of San Benito county in the town of Hollister, and the contract will be awarded to the bidder awarded to such bidders as may be agreed upon by the Board of Supervisors of San Benito county and the Board of Supervisors of Santa Clara county as being the lowest responsible bidder for said work.

The Board reserves the right to reject any and all bids.

All bids must be addressed to Henry M. Ayer, Chairman of the Board of Supervisors of Santa Clara county, and indorsed "Bids for Steel Highway Bridge over Pacheco Creek."

By order of the Board of Supervisors of Santa Clara county.

Attest: HENRY A. PFISTER, Clerk.

By F. A. Schilling, Deputy Clerk.

#### NOTICE TO CONTRACTORS.

**BIDS** will be received by the Board of Supervisors, county of Kern, State of California, up to **10 a. m. of July 15th, 1914** for the construction of a pile trestle bridge across the North Fork of Kern River at Kernville, on County

Road No. 215, dimension 208 feet long, 20 feet wide; also a pile trestle bridge across branch channel of same stream near above bridge site. Dimensions 32 feet long, 20 feet wide. Plans and specifications at County Surveyor's office.

Each bid to be accompanied with a certified check payable to the Chairman of the Board of Supervisors of the amount of 10 per cent of amount of bid to insure the entering into of a contract by the successful bidder.

The Board reserves the right to reject any or all bids.

#### Additional Notice.

Lumber for the bridges can be secured from the A. Brown Co., of Kernville at the mill on Greenhorn Mountain.

\$30 per M. delivered at the bridge site.

By order of the Board of Supervisors of the County of Kern, State of California.

H. A. JASTRO, Chairman.

Attest: I. L. MILLER, Clerk.

#### NOTICE TO CONTRACTORS.

**SEALED BIDS** will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock, noon, Thursday, July 23, 1914**, said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction, erection and installation of the Elevator Work, California State Library, State Capitol Building, Sacramento, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, and must be submitted on forms prepared and furnished by the State Department of Engineering. Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Elevator Work, California State Library, State Capitol Building, Sacramento, California."

[SIGNED] W. F. McCLURE,  
State Engineer.

#### PROPOSALS FOR BUILDING.

**BUILDING, ETC.**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at **3 p. m. July 20, 1914**, for the construc-

tion, complete (including mechanical equipment, interior lighting fixtures and approaches), of the United States post office at Bozeman, Mont. Two-story and basement building, ground area 4,900 square feet, partially fire-proof construction, stone and brick facing and composition roof. Drawings and specifications may be obtained from the custodian of site at Bozeman, Mont., or at this office, in the discretion of the supervising architect, O. WEN-DEROTH, supervising architect.

#### NOTICE TO CONTRACTORS.

#### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

**SEALED PROPOSALS** will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at **9:00 A. M., Tuesday, July 21, 1914**, for **Painting Steel Wood Work and Masulas of Interior of Horticulture Building**, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the

sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$10.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Ten Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,  
Chairman. (\*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

### SAN FRANCISCO.

**EXHIBIT BUILDING**—1 and 2 story, frame and plaster, \$50,000, San Francisco. Architect, George J. Oakeshott, Lackman Bldg., S. F. Owners, Australia. Bids opened for this work show William A. Newsom of San Francisco low at \$49,756. Twelve sets of figures were opened. Bids have been forwarded to Australia for consideration. A complete list of the bids appear under the heading of San Francisco in this issue.

**CAMP OF 49**—Frame construction, \$100,000, San Francisco. Architect, Capt. Lewis, 609 Nevada Bank Bldg., S. F. Owners, California 49 Camp Co. There will be a total of ten buildings in the group, all of log construction, and representing a typical mining camp of the Days of 49, with its saloons, general store, gambling hall, Chinese laundry, blacksmith shop, post office and other typical buildings. The work is now being done by Day Labor under the direction of Capt. Lewis.

**EXHIBIT GROUP**—Frame construction. Cost not stated, San Francisco. Architect, Piacentini, Rome, Italy. Owners, Italian Government. Designs prepared for Italy's display at the Panama-Pacific Exposition by Sig. Piacentini show a group of small buildings typical of a small Italian town, and will contain many of the most characteristic industries of the natives. Various Italian styles of architecture will be used. Plans will shortly arrive in this city for figures.

**APARTMENT HOUSE**—3 story and base, frame, \$10,000, San Francisco. Architect, J. R. Miller, Lick Bldg., S. F. Owner, Harriet Jolliffe, 1840 Broadway. The building will be erected on the west side of Hyde street south of California, having a frontage of 25 feet and a depth of 66½ feet. There will be six suites of two and three rooms. Interior finish will be of pine with some elm panels and oak floors. All apartments will have wall beds and private bath rooms. Plans provide for a hot water system and portable vac-

uum cleaners. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and in the hands of the owner who is now letting subcontracts.

**APARTMENT HOUSE**—3 story and base, frame and concrete, \$14,000, San Francisco. Architect, Charles J. Rouseau, 46 Kearny street, S. F. Owner, J. Eric Johanson. The building will be erected on the east side of Franklin street north of Sacramento, covering an area of 30 by 87 feet. There will be six suites of five rooms each. Interior will be finished in pine throughout except the entrance and social hall, which will be finished in blue gum with oak floors. There will be steam heat, a hot water system and vacuum cleaning. Bath rooms will have the wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

**APARTMENT HOUSE AND STORES**—4 story and base, Class C construction. Cost not stated, San Francisco. Architect, Grace Jewett, 604 Montgomery street, S. F. Owner, Mrs. Bradbury. The building will be erected at the northwest corner of Polk and California streets, and has been designed for seven stories on the first floor besides the entrance to the apartment house. Upper floors will contain two and three room suites with private baths. Interior finish will be of pine throughout. There will be an automatic elevator, steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. All bath rooms will be finished in tile with composition floors. Plans are being prepared.

**HOSPITAL REFRIGERATING PLANT**—Cost not stated, San Francisco. Engineer, City Dept. of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. A bill ordering the construction of a refrigerating plant at the isolation Hospital has been passed to print by the Board of Supervisors. Plans

will be prepared by the City Department of Engineering and bids will be called for by the Board of Public Works.

**CIVIC CENTER PLAZA GRADING**—Cost not stated. San Francisco. Architect, City Dept. of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for grading the Plaza in the Civic Center site show T. W. McClenahan Co. low at \$51,860. They will probably be awarded the contract. A complete list of the figures received will be found under the heading of San Francisco in this issue.

**CITY JAIL AND MORGUE LIGHTING FIXTURES**—Cost not stated. San Francisco. Architect, City Dept. of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened for furnishing and installing lighting fixtures in the City Jail and Morgue show Roberts Mfg. Co. low at \$1,476. They will be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

**POST OFFICE**—1 and 2 story. Class A construction. Cost not stated. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Working drawings for a new building to house the United States post office at the Ferry are now being completed. The building will adjoin the Ferry building on the south. Bids will shortly be called for on the pile foundation and grading. Interior will be finished in pine and hardwood. There will be special mail racks and holders, steam heat and modern plumbing. Exterior of the building will be faced with cut stone. Bids will be called for in about two weeks.

**CAR BARN GRADING**—Cost not stated. San Francisco. Architect, City Dept. of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for grading the site of the new Municipal Car Barns show Daniel O'Day low at \$34,850. He will be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

**RESIDENCE**—2 story and base, brick or reinforced concrete, \$45,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Clarence Musto. The dwelling will be erected on property recently purchased by Mrs. Musto at Vallejo and Divisadero streets, and will cover a large area. Plans provide for a building with twenty rooms and several baths with a basement garage. Interior of the dwelling will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be steam heat and open fireplaces. Tile and marble mantels will be used. Exterior will be covered with cement plaster or pressed brick. Baths will have tile wainscot and composition floors. An automatic water heater will be installed. Only preliminary plans have been prepared.

**RESIDENCES**—2, 1½ story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, W. Barnes, 635 17th avenue, S. F. These dwellings will be erected on the west side of 19th avenue, south of Anza street, and will contain five rooms and baths. Interior

will be finished in pine with some hardwood. Exteriors of the buildings will be covered with cement plaster on metal lath. Baths will have tile wainscot and composition floors. Brick or tile mantels will be used. An automatic water heater will be installed. There will be furnace heat and open fireplaces. Work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$4,000. San Francisco. Architect, Walter Voddien, 1615 Cole street, S. F. Owners, Thos. Voddien & Son. The dwelling will be erected on 18th avenue south of Lake street, and has been designed to contain seven rooms with bath. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Baths will have tile wainscot and composition floors. An automatic water heater will be installed. Tile mantels are specified. Materials are now being purchased and work will be done by Day Labor.

**RESIDENCE**—1 story and base, frame, \$3,000. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos avenue. Owners, Urban Realty Improvement Company. The building will be erected on Urbano Drive near Victoria street. Interior of the dwelling will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Baths will have tile wainscot and composition floors. Tile mantels will be used. Exterior of the building will be covered with shingles. Work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$5,000. San Francisco. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thos. Scoble. The dwelling will be erected on the east line of Jordan avenue south of Euclid, and has been designed to contain seven rooms with two baths. Interior will be finished in pine and redwood. An automatic water heater will be installed. Baths will have tile wainscot and composition floors. Brick or tile mantels will be used. Hardwood floors will be used in the principal rooms. Materials are now being purchased and the work will be done by Day Labor.

**DAIRY, POULTRY AND CONGRESS BUILDINGS**—Frame and plaster. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed and are now out for figures for constructing the dairy, poultry and congress buildings and for a feed barn and corrals for the live stock exhibit. Bids will be opened on July 20th. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

**MILL EXHIBIT BOOTH**—Cost not stated. San Francisco. Architect, Edward G. Garden, Phelan Bldg., S. F. Owners, Sperry Flour Co. Figures are now being taken for a large exhibit to be erected by the Sperry Flour Co. in block 10 of the Food Products Palace at the Panama-Pacific International Exposition. The space is 62 feet 8 inches by 117 feet 2 inches, and will contain a complete mill plant, bake shop, grain testing laboratories, ten booths and special space to be devoted

to the demonstration of the best methods of preparing cereals. The work will cost in the neighborhood of \$25,000 exclusive of the mill machinery.

**CHURCH**—1 story and base, frame and plaster, \$35,000. San Francisco. Architects, Patch & Knoll, Hearst Bldg., S. F. Owners, Emma El Evangelical Association. The building will be erected at the southwest corner of Capp and 19th streets, and will cover an area of 65 feet square. The design is in the Romanesque style and exterior will be covered with cement plaster on metal lath. Interior has been arranged for a large auditorium, Sunday school rooms, parlor, choir loft and pastor's study. Interior will be finished in oak and ornamental plaster. A central heating plant will be installed. Working drawings are being prepared and will be ready for figures in about three weeks.

**PATHOLOGICAL WARD**—2 story and base. Class A construction, \$75,000. San Francisco. Architects, Rigbetti & Headman, Phelan Bldg., S. F. Owners, City and County of San Francisco. The building will adjoin the main group of the new City and County Hospital on Potrero street between 21st and 23rd streets, and will cover a ground area of 90 by 160 feet. There will be a complete steel frame, concrete floors and fireproof interior partitions. Interior finish will be of pine and hardwoods. Steam heat will be supplied from the central power station. Considerable special equipment will be installed. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for by the Board of Public Works. Further mention will be made of the work.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a five-room house with bath, and will be erected on 16th avenue, north of California street. Interior finish will be of pine throughout. Some oak floors will be used. There will be an open fire place and tile mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Costello & Peerick, 93 College avenue, S. F. The dwelling has been designed for a five-room house with bath, and will be erected on 17th avenue north of Clement. Interior will be finished in pine with some elm panels and hardwood floors. There will be an open fire place and tile mantel. Bath room will have tile floor and wainscot. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, M. F. Nolan, 228 Noe street, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on 22nd avenue, north of Clement street. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Bath room will have tile wainscot and com-

position floor. An automatic water heater will be installed. Exterior of the house will be covered with rustic, cement plaster on metal lath and a klinker brick base. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

**ROAD CONSTRUCTION**—Cost not stated. San Francisco, Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for constructing a road into the Hetch Hetchy Dam site show the Utah Construction Co. low at \$151,499.50. They will probably be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

**STAVE PIPE**—Cost not stated. Belle Fourche Project, South Dakota. Engineer, United States Reclamation Service, Denver, Colo. Owners, United States Government. Bids will be opened on July 20th for furnishing the Reclamation Service with a quantity of wood stave pipe as follows: Approximately 1,750 feet of 60-inch, 8,560 feet of 32-inch and 2,406 feet of 24-inch. Full particulars can be secured from the Reclamation Service, Denver.

**STORE ALTERATION**—1 story, brick. Cost not stated. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owners, Crocker Estate Co. The building adjoining the Crocker Bank Bldg. on the north side of Market street west of Montgomery will be altered for a candy store. New interior finish, store fixtures and plastering, electric work and plumbing will also be used. Plans are complete and figures are now being taken.

**STATE EXHIBIT BUILDING**—2 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, State of New York. An official proposal is published in another column of this issue calling for figures for completing the partly completed New York State Exhibit building on the Exposition Grounds. Bids are to be opened on July 17th at the building. Plans and specifications can be secured from the office of the New York State Panama-Pacific Commission at the New York State Building on the Exposition Grounds.

### Contracts Awarded.

**STATE EXHIBIT BUILDING**—1 and 2 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, State of Kansas. Official word has been received from the Kansas Panama-Pacific Commission to the effect that all bids from San Francisco contractors have been rejected and that the contract has been awarded to a Topeka man on the percentage basis. The name of the contractor is not given.

**IRISH VILLAGE GROUP**—1 story frame and plaster, \$150,000. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Irish Village Co., represented by Michael O'Sullivan. Contractors, Larsen-Sampson Co., Crocker Bldg., S. F. Contract price, \$150,000.

**STATE EXHIBIT BUILDING**—1 story, frame and plaster. Cost not stated. San Francisco. Architect's name not given. Owners, State of Utah. Contractors, Northwest Con. Co., Mills Bldg., S. F. Contract price not stated.

## SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

**BRIDGE**—Reinforced concrete, \$60,000. Yuba City, Sutter Co., Cal. Engineer, Erie L. Cope, Yuba City. Owners, Sutter County. The Supervisors of Sutter County at their last meeting voted to extend the date of opening bids for constructing the big reinforced concrete trestle until July 20th, and all bids were returned without being opened. The trestle will replace the old Long Bridge over Butte Slough and will be 1,900 feet long, estimated to cost \$60,000. Four sets of bids were received. These were from D. B. Farquharson, S. F.; Dunnivant-Houghton, Van Sant Co., S. F.; M. Fisher, S. F.; and Ross Construction Co., Sacramento.

**BRIDGE**—Steel and concrete. Cost not stated. Wheatland, Placer Co., Cal. Engineer, County Surveyor, Auburn. Owners, Placer County. Placer County has at last gone on record as willing to bear the cost of constructing the bridge over the Bear River at Wheatland, and construction will be started as soon as plans and specifications can be secured. This work has been delaying the completion of the State Highway between Marysville and Sacramento. Plans are being prepared.

**SCHOOL**—2 story and base, frame and plaster, \$22,000. Folsom, Sacramento Co., Cal. Architects, Campbell & Sells, 1005 K street, Sacramento. Owners, Folsom School District. The building has been designed to contain four class rooms and an assembly hall. Interior will be finished in pine throughout. There will be maple floors in the class rooms. Composition blackboards will be used. A central heating system, probably warm air, will be installed. Exterior of the building will be covered with cement plaster on

metal lath. Plans are nearly complete and figures will be called for shortly.

**HIGHWAY WORK**—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on August 10th for constructing state highways in the following counties: Mendocino, 2.75 miles; Humboldt, 12.8 miles; Santa Clara, 1.9; Santa Clara, 6.8 miles; Contra Costa, 3.6 miles; Humboldt, 5 miles; Santa Barbara, 9.3 miles; Orange, 9.4 miles and Imperial, 6 miles. Plans and complete information can be secured from the State Highway Commission.

**POWER LINE CONSTRUCTION**—Cost not stated. Westville, Placer Co., Cal. Engineer's name not given. Owner, E. B. Quigley, Westville. E. B. Quigley of Westville, Placer Co., Cal., is building a power line from the Black Canyon Mine in Westville to Alta, a distance of 15 miles.

**JAIL**—2 story and base, brick and steel, \$45,000. Red Bluff, Tehama Co., Cal. Architect, A. R. Herold, Forum Bldg., Sacramento. Owners, Tehama County. Bids opened by the Board of Supervisors of Tehama County for the construction of the new two-story brick and concrete jail building, designed by Architect R. A. Herold of Sacramento, show R. W. Moller of San Francisco low on the general construction at \$22,885, and the Stewart Iron Works of Cincinnati yow for the cell work at \$21,160. Awards will be made this week. Following are the bids for the general construction:

R. W. Moller, San Francisco, \$22,885.00

O'Connor Bros., Red Bluff, 24,680.00

Keating & Hite, S. F., 24,975.00

**BRIDGE**—Steel and reinforced concrete. Cost not stated. Marysville,

Yuba Co., Cal. Engineer, City Engineer Trow, Marysville. Owners, City of Marysville. The City Council will

probably advertise for bids for the

approaches for the new D street bridge,

commencing on July 13th. City Engineer

Trow has received plans back from

the Highway Commission with

approval, and work will be started at

once.

**CEMENT**—Cost not stated. Wood-

land, Yolo Co., Cal. Engineer, County

Surveyor, Woodland. Owners, Yolo

County. The Board of Supervisors will

call for bids at once for furnishing the

county with from 3,000 to 10,000 barrels

of cement, which will be used in the

construction of new bridges

throughout the county.

**LIBRARY**—1 story and base, reinforced

concrete. Woodland, Yolo Co.,

Cal. Architect, W. H. Weeks, 75 Post

street, S. F. Owners, Town of Wood-

land. The building will be in the nature

of an addition to the present library,

and will be designed in the

classic style. Construction will be of

reinforced concrete throughout. Interior

will be finished in pine with

some hardwood. There will be two

large reading rooms and a stark room.

Plans provide for steam heat. Exterior

of the building will be faced with

cement plaster on metal lath. Plans

are now being prepared.

**SCHOOL**—2 story and base, brick

and reinforced concrete, \$75,000.

Auburn, Placer Co., Cal. Architect, W. H.

Weeks, 75 Post street, S. F. Owners,

Auburn Union High School District.

This building has been mentioned here

several times before. There will be

twelve class rooms, a large assembly

hall and domestic science and manual

The Panels that are  
as good as they are  
famous.

## White Brothers

5th and Brannan Streets

San Francisco

### Wybro Panels are "Service Panels"

No other panel on the market can compare with WYBRO in point of service and durability. No other panel stands the test of time as well as the WYBRO.

Whenever you want service panels ask for WYBRO—they cost no higher than others of inferior quality.

training department. Interior will be finished in pine with hardwood floors. There will be steam heat and program clocks. Exterior of the building will be faced with either red pressed brick or cement plaster. Plans are complete and figures will be called for as soon as the bids can be sold. water works machinery.

**THEATRE ALTERATION**—1 story, brick and frame, \$15,000. Visalia, Tulare Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owner, W. R. Saulting, Visalia. The old Armory will be altered and an addition constructed. The work will include new interior partitions, heating, plumbing, painting and plaster work. A complete stage equipment will be installed. Plans are now being prepared and figures will be called for shortly. Further mention will be made of the work.

#### Contracts Awarded.

**HIGHWAY WORK**—Cost not stated. California. Engineer, California Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Contracts for four pieces of State Highway were let as follows: Yolo, to M. Blumenkranz, Stockton, \$53,988.60; Santa Cruz, to Occidental Con. Co., Los Angeles, \$54,761.50; San Luis Obispo, to Rogers Bros., Los Angeles, \$86,986, and Ventura, to L. G. Garnsey, Los Angeles, \$96,121.25. Bids were rejected for work in Kern County and San Diego County and will either be readvertised or done by Day Labor. No action has as yet been taken on the work in Tehama or Shasta Counties, bids for which were opened at the same time.

**POST OFFICE**—2 story and base, brick and concrete, \$76,980. Chico, Butte Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, B. J. Duffy, 2673 17th street, San Francisco. Contract price, \$76,980.

## Highway Commission Opens Eight Bids.

Work in Eight Counties Attract But Little Attention. Several Contracts Will Be Re-figured.

Bids were opened at the last regular meeting of the State Highway Commission in Sacramento for constructing highways in the following counties: Yolo, Tehama, Santa Cruz, San Diego, Shasta, San Luis Obispo, Kern and Ventura. A complete list of the bids received together with the amount

of the engineer's estimate and a list of the materials furnished by the State for this work follow:

**YOLO CO. DIV. NO. 3, ROUTE 7, SEC. A.**  
M. Blumenkranz, Stockton, \$53,988.60

Engineer's Estimate, \$55,284.69

Materials furnished by the State:— pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and course aggregate. Total, \$48,014.76.

**TEHAMA CO. DIV. 2, ROUTE 3, SEC. A.**  
George Vogelgsang, Tehama, \$59,759.92

Engineer's Estimate, \$59,927.42

Materials furnished by State:—Portland cement, reinforcing steel, corrugated iron pipe, pipe railing, sand and course aggregate. Total, \$53,427.80.

**SANTA CRUZ CO. DIV. 4, ROUTE 5, SEC. A.**

J. A. Marshall, Berkeley, \$116,948.60  
James H. Smith, S. F., \$56,948.60  
Occidental Con. Co., L. A., \$4,761.50

Engineer's Estimate, \$57,791.52

Materials furnished by State:—Portland cement, reinforcing steel, corrugated iron pipe, pipe railing. Total, \$6,204.64.

**SAN DIEGO CO. DIV. 7, ROUTE 12, SEC. B.**

C. L. Hyde Con Co, San Diego, \$12,059.50  
Engineer's Estimate, \$10,674.35

Materials furnished by State:—Portland cement, reinforcing steel, corrugated pipe, and pipe railing. Total, \$5,696.70.

**SHASTA CO. DIV. 2, ROUTE 3, SECS. B AND C.**

Carnahan & Mulford, S. F., \$165,477.50  
Palmer & McBryde, S. F., \$166,216.40

Engineer's Estimate, \$170,326.03

Materials furnished by State:—Pipe railing, reinforcing steel, corrugated iron pipe and Portland cement. Total, \$14,841.85.

**SAN LUIS OBISPO CO. DIV. 5, ROUTE 2, SEC. E.**

Rogers Bros. Co., Los Angeles, \$86,986  
Engineer's Estimate, \$91,550.35

Materials furnished by State:—pipe railing, reinforcing steel, corrugated iron pipe, Portland cement, sand and course aggregate. Total, \$77,540.90.

**KERN CO. DIV. 6, ROUTE 4, SEC. B.**  
Lynn S. Atkinson, Los Angeles, \$182,641

Engineer's Estimate, \$132,787.05

Materials furnished by State:—Portland cement, reinforcing steel, corrugated iron pipe, and pipe railing. Total, \$55,397.25.

**VENTURA CO. DIV. 7, ROUTE 2 SEC. B**  
Leigh G. Garnsey, L. A., \$96,121.25

C. H. Hudson, L. A., \$9,190.75  
Rogers Bros. Co., L. A., \$9,704.05

Engineer's Estimate, \$101,296.83

Materials furnished by State:—Portland cement, reinforcing steel, corrugated iron pipe and pipe railing. Total, \$46,479.60.

## LOS ANGELES AND SOUTH- ERN CALIFORNIA.

SCHOOL—1 story and base, brick,  
\$12,000. Banning, Riverside Co., Cal.  
Architect, C. H. Russell, Union League  
Bldg., L. A. Owners, Banning School  
District. The building will contain  
three class rooms. Interior will be  
finished in pine with maple floors.  
There will be warm air heat. Black-  
boards will be of composition. Ex-  
terior will be faced with pressed brick.  
Plans are complete and figures are be-  
ing taken.

BATH HOUSE—2 story and base,  
brick and reinforced concrete, \$50,000.  
Santa Barbara, Santa Barbara Co., Cal.  
Architect, H. Alban Reeves, Chamber  
of Commerce Bldg., Santa Barbara.  
Owners, Southern California Edison  
Co. The building will cover an area  
of 200 by 80 feet, and will be of either  
brick or reinforced concrete, and will  
contain the offices of the Santa Bar-  
bara Electric Road, refreshment rooms,  
plunge, dressing rooms and mechanical  
department and laundry. Interior will  
be finished in pine with cement floor.  
There will be steam heat and a water  
heating apparatus. Exterior will be  
faced with either cement plaster or  
pressed brick. Plans are complete and  
figures are being taken for either re-  
inforced concrete or brick construc-  
tion.

SCHOOLS—2, 1 story and base,  
brick, \$25,000 and \$40,000. Pasadena,  
Los Angeles Co., Cal. Architects,  
Marston & Van Pelt, Chamber of Com-  
merce Bldg., Pasadena. Owners, City  
of Pasadena. Bids will be taken sepa-  
rately on the general contract,  
plumbing, and heating and ventilating.  
The Altadena school will be part one  
and two stories, and will contain an  
auditorium, class rooms, domestic sci-  
ence and manual training departments.  
Construction will be of brick with

plaster exterior, pressed brick trim.  
The Lamanda Park building will be a  
one-story structure and will contain  
eight class rooms, library, teachers'  
rooms, domestic science and manual  
training departments. It will be of  
brick construction. Plans are complete  
and figures are being taken. N. G.  
Folker, Chamber of Commerce Bldg.,  
Pasadena is Clerk of the Board of Ed-  
ucation.

## Contracts Awarded.

SCHOOLS—2, 1 story and base, frame  
and plaster, \$20,000. Santa Maria,  
Santa Barbara Co., Cal. Architect, none.  
Owners, Santa Maria School District.  
Contractors, G. M. Doane & Sons, Santa  
Maria. Contract price, \$20,000.

APARTMENT HOUSE—1 story and  
base, brick. Cost not stated. Los An-  
geles, Cal. Architect, none. Owner,  
Mrs. George J. Ley. Contractors, E. H.  
MacGibbon Co., Los Angeles. Invest-  
ment Bldg., L. A. Contract price not  
stated.

RESIDENCE—2 story and base,  
brick, \$26,270. Los Angeles, Cal. Ar-  
chitect, B. Cooper Corbett, Union Oil  
Bldg., L. A. Owner, Thomas O'Neill  
Contractor, Los Angeles Planing Mill  
Co. Contract price, \$26,270.

DENTAL COLLEGE—3 story and  
base. Class C construction, \$40,989.  
Los Angeles, Cal. Architect, none.  
Owners, Southern College of Dentistry.  
Contractors, Huntsberger-Reed Co.,  
Van Nuys Bldg., L. A. Contract price,  
\$40,989.

## PORTLAND AND OREGON.

POST OFFICE—2 story and base,  
brick and stone, \$80,000. Medford, Ore.  
Architect, Supervising Architect Oscar  
Wendworth, Washington, D. C. Owners,  
United States Government. Plans have  
been completed for the new Federal  
building to be erected at Medford. Con-  
struction will be fireproof, except the  
upper floor. Interior finish will be of  
pine and hardwood. Plans provide for  
steam heat, vacuum cleaning system  
and hot water supply. Marble and tile  
will be used in the corridors. A gen-  
eral contract, including heating, venti-  
lating, plumbing and lighting fixtures,  
will be let. Exterior of the building  
will be faced with pressed brick, stone  
and ornamental terra cotta. Bids will  
be opened on August 27th. Plans can  
be secured from either the Supervising  
Architect or from the custodian of the  
site.

APARTMENT HOUSE—3 story and  
base, brick, \$33,000. Portland, Ore. Ar-  
chitect, C. A. Duke, Failing Bldg., Port-  
land. Owner, H. Meter, 311 16th street,  
Portland. The building will be erected  
on Third street near Market, and will  
cover an area of 71 by 96 feet. There  
will be four stores on the first floor  
and a total of 37 suites of two and  
three rooms on the upper floors. In-  
teriors will be finished in pine through-  
out. There will be steam heat and a  
hot water supply. All suites will have  
private bath rooms and wall beds.  
Bath rooms will be finished in tile  
wainscot with composition floors. Ex-  
terior of the building will be faced  
with pressed brick. Plans are com-  
plete and figures are now being taken.

## Contracts awarded.

BRIDGES—2, steel and concrete,  
\$21,247. Clackamas, Ore. Engineer,  
County Surveyor, Oregon City. Own-  
ers, Clackamas County. Contractor, A.  
C. V. Berry, Selling Bldg., Portland.  
Contract price, \$21,247.

purposes have been estimated as follows: Crucibles, 5 per cent; stove polish, 15 per cent; foundry facings, 10 per cent; lead pencils, 5 per cent; paint, 5 per cent; lubricants, 5 per cent; all other uses, 5 per cent.

The shortcomings of the United States in the production of natural graphite are in part atoned for by the large amount of graphite produced in the electric furnaces at Niagara Falls. From its commercial inception in 1897 the industry of manufacturing graphite has grown rapidly until in 1913 the output was valued at nearly a million dollars (\$973,597). The various grades of manufactured graphite are adapted to practically all the uses to which graphite has been applied except crucible-making.

A report by Edson S. Bastin on the production of graphite in 1913, just issued by the United States Geological Survey, describes the properties, uses, and origin of graphite, records the production and imports in 1913, and describes the mode of occurrence at most localities where it has been quarried in the United States and at foreign localities which contribute to our domestic consumption. This report may be obtained free by addressing the Director, Geological Survey, Washington, D. C.

#### 1913 A RECORD YEAR IN TIMBER PRESERVATION.

The most notable progress yet recorded in the chemical treatment of timber to prevent decay was made in 1913, according to a report recently issued by the American wood preservers' association in co-operation with the forest service of the department of agriculture.

The report states that 93 wood-preserving plants in 1913 consumed over 108 million gallons of creosote oil, 26 million pounds of dry zinc chloride, and nearly 4 million gallons of other liquid preservatives. With these the plants treated over 153 million cubic feet of timber, or about 20 per cent more than in 1912. The output from additional plants unrecorded would increase the totals given.

Impregnation of wood with oils and chemicals to increase its resistance to decay and insect attack, the report goes on to say, is an industry which has become important in the United States only in recent years. In Great Britain and most of the European countries practically every wooden cross-tie and telephone or telegraph pole receives preservative treatment. In the United States less than 30 per cent of the 134 million cross-ties annually consumed are treated, and the proper treatment of an annual consumption of 4 million poles may be said to have scarcely commenced.

Real progress in the United States dates from 1832, when the Kyanizing process, using bichlorides of mercury, was developed. In 1827 two other processes were introduced, the Burnett process using zinc chloride, and the Bethel process using coal tar creosote. These last processes are very largely in use today.

The idea of timber preservation at first made very slow growth in this country, on account of the large supply of cheap and durable timbers and the general disregard shown toward

economy in the use of natural resources. In 1885 there were only three pressure plants in the United States; and in 1895 only 15. Since then, however, the industry has grown rapidly; in 1913 there were 117 plants.

#### ANNUAL CONSUMPTION OF WOOD BY THE WOOD MANUFACTURING INDUSTRIES.

Statistics have been compiled by the Forest Service which show for the first time precisely how the lumber produced in this country is utilized. About 45 billion feet of lumber of all kinds is the annual production in the United States; of this nearly 25 billion feet, board measure, are further manufactured, the other portion remaining for rough construction lumber and for similar purposes. This is exclusive of material which reaches its final use in the form of fuel, railroad ties, posts, poles, pulpwood, cooperage, wood distillates, and the barks and extracts demanded by the tanning industry.

The work of collecting and compiling the figures extended over a considerable period and was carried out state by state; but as one full year was made the basis of statistics in each state, the total is a fair average of the use of lumber in further manufacture in the whole country. Between 50 and 60 per cent of the lumber produced is subjected to further manufacture. In preparing the figures in this way, however, it should be remembered that considerable material reaches shops and factories in the form of logs, bolts, and billets without having passed through sawmills; and while this material is included in these statistics this fact should be remembered in comparing the statistics with those of lumber production.

Nearly or quite 100 different woods are used in this country under their own names, while an unknown number, find their way to shops and factories without being identified or separately listed, except under general names. In quantity the softwoods, the needle-leaf or coniferous trees, are most important, but there are a greater number of species among the hardwoods, or broadleaf trees. Yellow pine comes first with more than 8 billion feet, followed by white pine with 3 billion, and Douglas fir with a little more than 2 billion. It should be understood, however, that the term "yellow pine" includes several species the three most important of which are longleaf, shortleaf and loblolly. Oak, including all species, has nearly 2 billion feet and is the most important hardwood. Maple comes next.

Dogwood comes about halfway down the list with more than 7 million board feet, and of those species mentioned Turkish boxwood comes last with less than 20 thousand feet, followed by many others too insignificant to list but making a total of all kinds of more than a million feet. Of the native species, laurel, holly and yucca fall very near the foot of the list in relative quantities used.

Fifty-five principal industries use wood as raw material. Their relative importance is hard to indicate, because quantity alone is not in all cases a criterion of value of an industry to the community in which it is situated, nor to the country as a whole.

More than one-half of the total con-

Cor. Market & Kearny, Kearny 3884

sumption consists of planing-mill products, the largest items of which are flooring, siding, ceiling, and finishing. The next industry, in point of quantity of wood used, is the manufacture of boxes and crates. Nearly four times as much wood is demanded by makers of boxes and crates as by the builders of steam and electric cars, which come next, and five-fold the amount that goes into furniture, which in turn leads vehicle manufacture. Vehicles demand surprisingly large supplies of wood, and much of it must be of a high class in order to meet requirements for frames, gears, and bodies.

Chairs, listed separately from furniture, come after novelties and supplies for dairymen, poultry keepers, and apiarists and just before handles, and musical instruments. About midway down the list come pumps and wood pipes. Among the products important enough to list separately are canes and umbrella sticks, brooms, firearms, artificial limbs, and tobacco pipes.

The apportionment of wood among the various industries, grades from planing-mill products, which take most, down to aeroplanes and dry kilns, at the bottom of the list

#### GREAT SULPHUR PRODUCTION.

The amount of sulphur produced in the United States in 1913 according to the United States Geological Survey, was 311,590 long tons, valued at \$5,479,849, the greatest output in the history of the industry. This output was 8118 long tons greater than that of 1912 and showed an increase in value of \$223,427. In 1913 three states produced sulphur, namely, Louisiana, Texas and Wyoming. The United States is rapidly gaining on Sicily, which at the present time is the leading sulphur producing country in the world and whose output for the year ending July 31, 1913, was 346,213 long tons.

#### NATIONAL FOREST TIMBER SOLD TO MATCH COMPANY.

Bids were opened in the office of the District Forester at San Francisco last week for the sale of approximately 14,000,000 feet of timber, chiefly sugar pine, on the Plumas National Forest near Sterling City, California. The sale was awarded to the Diamond Match Company of Chileo.

Logging will commence immediately and will be conducted in connection with the cutting of adjacent timber owned by the Company. The contract runs until November 30, 1915.

### How To Efficiently Prepare Copy For The Printer.

#### THE DUMMY:

Is a duplication of the size of the card, folder, circular or other thing you wish to have printed. It may be of any grade or style of paper, as long as it originally contains no printing or other matter and is of the size of the thing that you wish. If you wish a card printed 2 inches x 4 inches, a sheet of paper cut to size 2 inches x 4 inches will constitute the dummy. If it be a four-page folder, 6 inches x 9 inches, then a sheet of paper folded together and cut to size of pages 6 inches x 9 inches and showing four sides of pages will constitute the dummy.

On the dummy you may then block off by making dotted or wavy lines the space about the size of the type that you wish used for the heading, the place and about the size of the space that you wish for the principal matter to occupy, the place and size of any cut to be printed therein and the size and position of the name and address of the firm. These various blockings may be lettered A, B, C, etc., and then written out in good size on separate slips of paper under the corresponding letters A, B, C, etc. From the dummy the printer can at once tell the exact size of the thing that you wish printed. From the blockings consisting of dotted lines or lines ruled around the space to be occupied, he can tell how much room he will have for the particular matter, cut, heading or name you wish printed therein and can use the proper size and style of type accordingly. By having the actual matter to be inserted, written on separate sheets, it may be written very large and plain and thus avoid mistakes being made in the words or spelling while at the same time the printer can tell from the Dummy the size of type he will have to use to get all of said matter on that particular slip, into the space you have designated on your Dummy.

#### BORDER:

If you desire the matter contained on your card, folder, etc., surrounded or enclosed by ruled lines or border design, it should be specified under the head of border, and where possible it is best to paste a sample of the size of rule or style of border that you wish, onto your sheet or dummy.

#### TYPE:

In ordinary printing, the printer will usually use his best judgment in giving you a type suitable for your matter. In small offices this is governed largely by the faces of type that he has in his office. If you desire a particular kind of type for particular parts of your ad, cut out sample lines of the various styles from some paper or magazine and paste it at the side of the sheet opposite to the matter that you wish in that particular style of type. If you

have your own cuts you should allow the same space in your dummy as the block takes on which the cut is mounted.

#### STOCK:

Unless you are well acquainted with the technical names of stock, attach a piece of the kind of cardboard or paper that you desire, to your order to the printer.

#### BINDERY WORK:

That is sewing or stapling together the pages of a folder; gluing or stapling together sheets in pads, or books; perforating sheets so that they will tear off; or putting covers on printed matter in the form of books, should generally be discussed with your advertising manager or printer, unless your experience in this technical line is broad enough to assure you that what you order will be done exactly as you wish.

### BUSINESS OUTLOOK GOOD.

Mr. Isidor Jacobs, who has just returned from a trip of several months' duration to the Eastern cities of the United States and to Europe, reported the result of his observations at the Luncheon of the League for Home Rule in Taxation on Wednesday, June 24th.

The presiding officer, Mrs. Grace Blackwell Calkin, Secretary of the Democratic State Central Committee, and newly appointed Receiver of Public Moneys' before introducing Mr. Jacobs, spoke briefly on the work of the League, laying stress particularly on the non-partisan character of the amendment and of the weekly Luncheons.

Mr. Jacobs said in part:

"Political conditions seem to reflect on business both in the United States and in Europe.

In Germany they have just recovered from one of the worst periods of business depression ever known in their history. One of the causes of this was the tax levy by the Government of a special emergency tax not on income, but on the principal. This tax was levied last year and realized over four billion marks or above a billion dollars in our money.

In France, owing to frequent changes in the Government, business is at present somewhat depressed, and not nearly as good as a year ago.

Holland and Belgium are much more prosperous than last year and are recovering rapidly from last year's financial stringency.

England, Scotland, Ireland and Wales, I found, are entering upon the greatest era of prosperity ever known in those countries. A superficial investigation into the cause of this develops the fact that the present Government policies and the consequent radical changes in taxation and in their land laws, have resulted in curbing land monopoly and displacing it by individual enterprise and industry.

Another important factor is that the purchasing power of the people is greater now than ever before in the history of Great Britain. This was largely brought about by the settlement of labor controversies of many years' standing, which has resulted in increased wages in nearly all lines of industry. The consequent prosperity of the masses of the people is now felt by increased trade in all directions.

In this country, while there is a temporary business depression, it is

apparent that it is an abnormally forced condition, brought about largely for political purposes, and to force action on the part of the Administration. Confronted as the country is by record-breaking crops in all directions, coincident with the inauguration of the new currency legislation, it can safely be predicted that the United States is about to enter upon a period of great prosperity, and that before the end of the year, the so-called depression will have passed, and then we may look for a permanent era of great industrial, commercial and agricultural development."

### CALIFORNIA LEADS IN CONCRETE WORK LAID.

California laid almost three times as much concrete for streets and roads during 1913 as any other State in the Union, the high proportion being mostly due to the concrete road work of the State Highway Commission.

There were 1,766,000 square yards of concrete laid in California during the last year out of a total of 8,093,360 square yards laid in all the other states in the Union. Ohio stands next to California with 655,650 square yards.

### BRITISH COLUMBIA.

[Consul General R. E. Mansfield, Vancouver, Canada.]

An important matter to Vancouver is the discovery on Texada Island, 50 miles from the city, of an inexhaustible ledge of mottled granite. Some of the stone was quarried experimentally and the polished slabs used in the new Victoria theatre. A \$150,000 company has leased the ledge from the Government, and will develop the quarry, building a gravity tram line to the water edge, whence the stone can be transported cheaply to Vancouver for dressing. During the past five years over \$3,000,000 worth of marble has been imported into Vancouver for interior work on new buildings. In the future most of the stone for such work will be quarried in British Columbia.

### HALF-INCH FLOORING INSTEAD OF THIRTEEN-SIXTEENTHS.

The latest thing in Hardwood flooring in  $\frac{1}{2}$  inch stock.

Experience has proven that flooring  $\frac{1}{2}$  inch thick wears as long as flooring  $\frac{13}{16}$  inches thick. The lip on the  $\frac{1}{2}$  inch flooring is practically as thick as on the heavier stock. The saving in thickness is very considerable, and also there is a great saving in width as the  $\frac{1}{2}$  inch stock is 2 inch face, measured as  $2\frac{1}{2}$  inches, as against  $2\frac{1}{4}$  inches measured as 3 inch on the thicker stock.

Flooring in the new thickness is expected to become standard as it has all the necessary qualities of the heavier material and brings down the cost.

SACRAMENTO, Cal.—The Highway Commission has decided to order the immediate construction of the new line for the Lincoln Highway from Lake Tahoe via Sacramento and the Yolo Basin to Sausalito, thus reducing the distance to San Francisco by thirty miles. It is proposed that a new trunk line run directly from Sacramento to Napa and from there follow the shore of San Pablo Bay to Sausalito where it will connect with the coast line north of Eureka.

## CRIME COST.

Perhaps one of the minor evils of crime, and yet an evil, is the great cost to the public of systems of punishment. Not only must we maintain police departments for defense and apprehension, and courts for examinations and trials, and prisons for discipline and punishment. These things might be accepted as the established lens of crime on society. We have to bear them, or admit that society has no recourse against the vicious or the predatory. But the very system of protecting society against crime imposes every year an increasing burden of expense that seems disproportionate to the return. A good example is in the cost to the state of handling the case of a young girl who passed a bad check in Los Angeles to get money to visit her sick sister in Chicago. Her offense was detected only after she had reached Chicago. She was arrested and ordered extradited. In order to bring her back, a policeman was sent from Los Angeles to Chicago; but found on reaching there that the girl's sister was on her death bed, and permission to extradite was withheld while the accused girl nursed the invalid. In the meantime the policeman from Los Angeles lived at Chicago, keeping a watch on the prisoner. Finally the sister died, and the girl offender was returned to Los Angeles, only to be paroled on good behavior.

The cost of policing against crime, like the cost of war, may seem too enormous to be endured, but at least it is better than what we might have instead. It is much better to groan under a burden of taxation than to have anarchy such as that in Mexico for the last three years, unless the anarchy is a prelude to better government and better order than ever.

But certainly common sense must dictate that money saving devices shall be applied to our policing and penal systems, as well as to our constructive and administrative branches of government. We cannot go as far as to figure that each criminal shall be handled at so much a head, or that we must figure out a cost system of so much per crime. But among the sorts of government experts to be developed will be men who can devise a minimum cost treatment of crime, both for the protection of the state as present and for the gradual reduction of crime, if possible, in the future.—Fresno Republican.

Three bills, constituting what is known as the President's trust program, have passed the house and have been referred to committees in the Senate. These bills are the Covington Traue Commission Bill, the Clayton Omnibus Trust Bill and the Rayburn Bill for supervising the issue of railroad securities.

The Trade Commission Bill provides for an interstate trade commission, somewhat like the Interstate Commerce Commission. It is to be composed of three members with a salary of \$10,000 a year. All corporations having a capital of a million dollars or more must file reports with this commission, and certain smaller corporations may be required to file such reports. The commission is expected to investigate cases

of violation of the Anti-Trust Law, and to supervise the carrying out of court decrees in trust cases.

The Clayton Bill is supplementary to the Sherman Act. It prohibits combinations that lessen competition, exclusive contracts, price discrimination, railroad pools that are not approved by the Interstate Commerce Commission, holding companies and interlocking directorates. Under amendments adopted by the House peaceful picketing and boycotting are legalized, labor unions are exempted from the operation of the act and the use of injunctions in labor disputes is greatly restricted.

Under the Rayburn Bill the Interstate Commerce Commission is granted virtually the same powers of regulating the issuing of securities by railroads that the state public utility commissions have over public service corporations.

These measures are in the main the embodiment of the President's anti-trust program. They have been made necessary by the usurpation of the political power of the country by the special interests.

The old game of creating a business depression is being worked over again. Such newspapers as the Chronicle is howling about the impracticability of theorists and the same methods are employed to prevent effective reform. But the time is past when such things can prevent action and the majority of people have in a measure shaken off the bigotry of partisan politics to such an extent that they can exercise some independent judgment.

The President has been most severely criticised for his Mexican policy and repeal of the Canal Tolls Exemption Act. These were not party measures at all. But the people who are thus criticising him so vehemently are his political enemies which leads one to believe that the criticism is anything more than party politics.

When an operation is necessary to remove a tumor it usually makes the patient sick. The present program looks to the readjustment of more equitable relations in the industrial and financial world. The accomplishment of it will strip special privilege of most of its power. The natural result of such readjustment is to disturb business relations which will assume their natural relations in the course of time.

## INITIATIVES.

There has been some disposition among farmers and others who are opposed to the universal eight hour law which has been placed upon the ballot by initiative to hold the Progressive administration responsible for the law. A moment's consideration of the nature of the initiative will show the injustice of this attribution of responsibility. The very purpose of the initiative is to enable any considerable group of voters to submit to the people directly a law which the legislature has refused to pass. Therefore, in the very nature of things, an initiative measure on the ballot is never an administration measure, and is usually an anti-administration measure. The measure was introduced into the legislature by the only Socialist member of that legislature and was defeated in the legislature. Therefore, right or wrong, the Progressive legislature is on record as

against this measure. Being defeated in the legislature, the Socialists then exercised their right of appealing from the legislature to the people, and circulated petitions to place the measure on the ballot by initiative. This law, then, is not a Progressive, but a Socialist measure, proposed by Socialists, defeated once by Progressives and now submitted to the whole people by the Socialists, for their judgment.

In general, it may be assumed that any referendum or initiative is an anti-administration measure. When the government of the state is controlled by special interests, the initiative and referendum are the weapons of the people to appeal from these special interests. But when the government of the state represents the people, then the initiative and referendum become the refuge of the special interests, to appeal from the action of the people's representatives in the legislature. It is therefore an important rule to remember that the way to support the legislature on an initiative is to vote "no," and on a referendum is to vote "yes."

The legislature, for instance, passed a blue sky law and the organized bunco steers of the state procured a referendum against it. This submits the law to the people, to vote whether they will pass that law, and the way to sustain the legislature is obviously to vote "yes," and therefore pass once more the law which the legislature has already once passed. But the legislature refused to pass the universal eight-hour law, and those who disagreed with the legislature thereupon submitted that law by initiative and to the people. The way to sustain the legislature in this case is to vote "no," and thereby to defeat once more the law which the legislature had already once before defeated.

This does not mean, of course, that voters are not to exercise individual judgment on measures. On any measure on which any voter has a personal opinion, he should vote that opinion, regardless of the action or opinion already expressed by the legislature. But on any measure on which the voter has not a positive opinion, but with respect to which he has an attitude of general confidence or lack of confidence in the legislature, he may express that confidence or the reverse very simply by voting "yes" on the referendum and "no" on the initiatives if he has confidence in the legislature, or by reversing that course, and voting "no" on the referendums and "yes" on the initiatives, if he lacks confidence in the legislature.—Fresno Republican.

## KOA IS RESTAURANT FIXTURES.

Our old friend, Sam Levi, of the S. Levi Fixture Shop, has recently installed some very beautiful attractive and rococo fixtures in the confectionery and restaurant of Mr. Ruffieux of 211 Powell Street.

The wood is Koa or Hawaiian Mahogany, and the variegated figure of this beautiful wood, makes a most exquisite piece of workmanship.

Mr. Levi is to be congratulated on his selection of veneers and solid Koa for this job, as well as for his skill in designing the fixtures and executing the work.

The Koa lumber was furnished by White Brothers.

## Editorial Comment.

Building operations for the month of June in San Francisco amounted to \$2,799,617 as against a total of \$2,830,396 for the same month last year. This total was made up in the following manner: Brick and concrete, \$1,075,048; frame construction, \$597,069; alterations, \$150,598; Panama-Pacific Exposition work, \$643,317; City buildings, \$16,289; Municipal railway, \$188,581.

Apartment houses within the fire limits and permanent buildings made up the major part of the total figures. And generally the record is about equal to last year.

Comparing the reports from the different parts of the country the record shows a gradual increase for the year. Reports from about 70 cities throughout the country show an aggregate gain of about 4 per cent. Particulars are to be found in the following table:

City	June, 1914.	June, 1913.

## ADVERTISING.

Nearly five thousand men met in Toronto a few days ago to consider the principles of advertising. The fact that there are so many specialists in a business is an indication of the importance it has assumed in recent years. With its growth in importance has come the introduction of higher standards.

It was observed in the convention that there was immediate response to every ethical appeal. The high grade men who now are in general charge of the advertising business realize that, as one of them put it, not only is honesty the best policy; it is the only policy. They know that a permanently successful business can be conducted only on the basis of honest service. These ideas were embodied in a declaration of principle by general advertisers which included these points:

To claim no more, but, if anything, a little less, in our advertising than we can deliver.

To refrain from statements in our advertising which, through actual misrepresentation, through ambiguity, or through incompleteness, are likely to be misleading to the public or unjust to competitors.

To use every possible means, not only in our own individual advertising, but by association and co-operation, to increase the public's confidence in advertising statements.

To refrain from attacking competitors in our advertising.

Such a policy is merely common sense applied to advertising. But it is fine to have it so strikingly advertised as it was at the great Toronto convention.

## Some Notes On The Use Of Terra Cotta In Buildings.

*Its Value In Artistic Architecture and Its Merits as a Material of Construction.*

The following interesting paper, dealing with the manufacture, utility and beauty of terra cotta as a building material, was read by H. L. Fitzsimmons at a recent meeting of the Prince Albert Builders' Exchange:

In Europe there are numerous examples of architectural terra cotta, which have been exposed to the weather for three or four centuries, and still in good condition, while examples of stonework, subjected to the same conditions, are more or less worn and decayed. There is at the Louvre, in Paris, at the present time, some glazed terra cotta, said to have been made by the Assyrians in the sixth century before the birth of Christ. In other museums there are some vases and other ancient terra cotta from Egypt and Greece, as well as some famous examples of work made in the Middle Ages, some of which are as perfect as if recently made. All these ancient terra cotta tell the story of durability and proclaim terra cotta to be a material worthy of the genius of those artists of antiquity who wrought so beautifully in this medium.

### Composition and Manufacture.

Terra cotta is composed of practically the same material as bricks and its characteristics, as far as the material is concerned, are the same. It requires, however, for its successful production a much better quality of clay than is generally used for bricks, while the process of manufacture is entirely different.

The first consideration in the manufacture of terra cotta is the selection of the material. No one locality gives all the clay required for first class material, and each shade and tint of terra cotta requires the mingling of certain clays from different localities to regulate the color. The colors vary from light cream to dark red.

A partial vitrification of the body is desirable, but a clay that is too fusible causes warping in the kiln. To overcome this tendency, one, at least, of the component clays should be highly refractory, and to further insure straightness from 20 to 25 per cent of ground burned clay called "grog" or "chamotte," should be added. The clay, after being mined, is sometimes seasoned, after which any one of several methods is employed to thoroughly grind and mix the clay with "grog" and water. Usually it is finally tempered in a pug-mill before being sent to the pressing room.

If several pieces of terra cotta of the same size and shape are required a full size model of plaster and clay is first made and from this a plaster mold is taken. In the making of these models the highest grade of skilled labor is required. When the models are dry they are sent to the pressing department. Here the plastic clay is pressed into the molds by hand and when partially dry, the work is turned out on the floor. It is then ready for the carver and modeller, if it is decorative work that requires the use of their tools; or for the clay finisher if it only

requires undercutting or some special work to make it fit in with other construction.

The work is carefully dried on the drying floor and is ready to receive the surface treatment. This is done by spraying on the surface of it, by means of compressed air and an atomizer, a thin "slip" or liquid mixture, which, when burned, gives the ware a surface that is vitrified or full-glazed, as the case may be. This operation also gives the terra cotta greater evenness in tone and its exact shade of color. The body colors used are comparatively few, while the surface colors are almost without limit. It is next put into the kilns, where it remains 7 or 15 days, according to the size of the kiln, before it is ready for use. The kilns used are the down-draught, beehive shaped ones, and an inside lining or "muffle" prevent the flames from coming in contact with the terra cotta. In this drying and burning process all the water in the clay is expelled, and in consequence a shrinkage in the size of the pieces takes place. This shrinkage is about one inch to the foot, for which allowance is made by the draughtsman who prepares the drawings for the moldmaker. The pieces are then carefully inspected, fitted and numbered in accordance with setting drawing prepared for that purpose. The fitting operation consists of placing the various pieces in the relative positions which they would have in the building for which they are intended, and then, with a chisel, the joints are trimmed where necessary, so that all the pieces will fit accurately together. By the use of the rubbing beds the joints are rubbed to an absolutely straight line in the same manner that stonework is rubbed. The rubbing of the joints is of great advantage in ashlar work, as it insures absolute alignment of the joints.

The numbering operation consists of numbering each piece with a number for identification. A corresponding number is placed on the setting drawings. The work is then shipped to the building.

If only one or two pieces of terra cotta are to be made, or if no repetition is intended, no moulds are used, the clay being modelled by hand, with the use of templates, into the required shape. Single pieces of modelling are worked on ashlar and plain blocks. The finished product thus bears directly the impress of the modelling artist. It can be studied, improved or modified, and, when entirely satisfactory, burned. On this account terra cotta possesses, for highly decorative work, an advantage over all other building materials. It has this advantage even where repetition is intended and moulds are made, because the ornamental portions of the models are made of clay, which under all circumstances, is the best material that can be used for modelling purposes. When possible the architect examines the model in person and the alterations are then made under his eye.

Sometimes photographs are made and sent for his inspection and approval. If the ornament is of sufficient importance to make it desirable to bear the direct touch of the modelling artist he can retouch each piece after it is turned out of the mold.

Terra cotta is usually made in blocks from 24 to 30 inches long, from 6 to 12 inches deep and of a height determined by the character of the work. To save material and prevent warping, the blocks are formed of an outer shell, connected and braced by partitions about 1 1/4 inches thick. The partitions should be so arranged so that the spaces do not exceed 6 inches, and should have numerous holes in them to form clinches for the mortar and brickwork used for filling.

### The Surface of Terra Cotta.

The body of all good terra cotta is very much the same, but there are several ways of treating the surface, resulting in products which may be classified as follows: Standard terra cotta, vitreous surface terra cotta, mat-glazed terra cotta, full-glazed terra cotta and polychrome terra cotta. Standard terra cotta has no surface given it, which affects its porosity, a drop of water placed upon it being soon absorbed; it will absorb, also, a great amount of dirt from the atmosphere, and will become very much darker from continual exposure. On some buildings this weathering down is not objectionable; in fact it sometimes lends a charm, producing an antique appearance, which is often very desirable from an artistic point of view. Some one has said that "time is the greatest artist," and, therefore, when it is desired to produce an aged effect, standard terra cotta should be used. It is, consequently, a good material to use for rustic work in connection with country houses, college buildings, gateways, and center styles of churches. This class of material is made in any color desired.

Vitreous surface terra cotta has a very thin spray of the surface which vitrifies in the burning process, forming a thin glaze which sheds water. This terra cotta will not absorb much dirt from the atmosphere, as the rain of each storm washes it off. It therefore practically retains its original color. This class of material is made in any color desired and is used more than any other kind at the present time, as it seems to satisfy the greatest number of requirements.

In western cities where soft coal is used, and where, consequently, most buildings are cleaned frequently, any material of a non-porous nature is very desirable, and it has been found that glazed terra cotta ranks with the most superior materials in this respect. On this account white glazed terra cotta is used to a great extent in these cities. The luster of the glaze is deemed for artistic reasons, the glare of the sunlight on full glazed terra cotta being very severe. This is now done in the process of burning, as it has been found that sand blasting the material neutralizes the purpose of the

glaze. This method has, therefore, long been abandoned by the leading manufacturers. There are many examples of buildings constructed of this material in the west and the most notable example in the east is the Plaza Hotel, New York.

For light courts, loggias to office buildings, theatres, interiors of railway stations, train sheds and power houses the full glazed terra cotta is preferable, as it helps illumination and gives a more brilliant effect.

The full glazed terra cotta and mat-glazed terra cotta are made in any color required, and when various colors are used on the same buildings, the material is termed polychrome. The various colors may be applied to the same piece if desired, or each separate color may be kept on a separate piece. If the design will permit

#### Color of Terra Cotta.

Within the past twenty years a great impetus has been given to the production of special colors in architectural clay products. In 1885 fully four-fifths of the terra cotta produced in the United States was red. Now there is less of red used than of almost any other color. Buffs and greys of several shades, white and cream-white are now the prevailing colors. By the use of ceramic colors almost any required tone may be produced, and the effect obtained by using glazed terra cotta of various colors in combination, such as blue, yellow, white, purple, brown, old gold green or red is often very beautiful. If any particular shade of color not included in the manufacturer's standard samples is desired, the architect should consult with the manufacturer, who will then experiment until the required color is not only produced, but guaranteed to be permanent and free from all tendency to crack. It is generally agreed that there is a great field for the polychrome terra cotta, especially for theatres, restaurants, and buildings of a similar nature, for interiors, loggias, fountains and department stores.

Although the art of using colored terra cotta is very ancient, having been in practice before the Christian era, it is, to some extent, an undeveloped field in this country and offers alluring possibilities in architectural design and construction. It can be used in a very modest and sparing way as well as very profusely; and either in soft tints or in brilliant colors, as the taste of the architect may dictate. Where a rich decorative treatment is required, as in the interiors of public buildings, like our great stations, hotels and theatres, polychrome terra cotta can be employed most effectively and economically. In variety and beauty of tones, terra cotta has now reached a very high standard of excellence, and may be used by the architect to express the highest type of his art. The almost unlimited possibilities presented by the judicious application of colored glazes for exteriors as well as for interiors, has awakened an unusual interest in the use of polychrome terra cotta, a building material with superior qualities of resistance against the deteriorating effects of time and of the action of fire and frost.

Terra cotta is not imitation stone and should not be used as such. It is a material having peculiar qualities which give a distinctive character, and therefore, to be successfully used,

it should be employed in such a way that it will appear as an imitation of, or as a cheap substitute for, some more expensive material. This may be brought about in several ways. There may be used certain forms and certain styles or ornament more characteristic of terra cotta than of any other material.

One architect has evolved a certain style that he has applied to many buildings, and which is not suitable to any material other than terra cotta. This may be said of both the form and ornamentation of his buildings. The architects of the Flatiron building and of the Wanamaker building, in New York, have successfully used this material for its own sake and not as an imitation. Another firm of architects have used profusely modelled terra cotta to produce highly ornamental effects not so easily obtainable in other materials, and their recent use of colored terra cotta is typical of this material alone. In the West Street building, New York, the architect has made a design distinctly expressive of the material used. This is noticeable in the ornamentation, in the form of cornices and molding, in the coloring and even in the plain shaft of the building. In the Brooklyn Academy of Music the architects have accomplished this result by the use of color.

In regard to the use of terra cotta, it has been said that it is by the use of polychrome terra cotta that the material has its best opportunity for expressing its individual character. It was so in antiquity, in the Middle Ages, and is so at the present time, because polychrome terra cotta is a material complete in itself, and used for its own sake. It cannot by any means be considered an imitation of, nor a substitute for, something better.

#### Durability of Terra Cotta.

The principal value of terra cotta lies in its durability. When made of the right materials and properly burned it is impervious to water, or nearly so. When glazed, it is absolutely impervious, and hence not subject to the disintegrating action of

THREE JULY 16 HOYT frost, which is a powerful agent in the destruction of stone. It does not "vegetate," as is the case with many stones. The ordinary acid gases contained in the atmosphere of cities have no effect upon it, and the dust which gathers on the moldings is washed away by every rainfall. Underburned terra cotta does not possess these qualities to so high a degree, as it is more or less absorbent. Another great advantage possessed by terra cotta is its resistance to heat, which makes it a most desirable material for the trimmings and ornamental work in the walls of fireproof buildings. Although terra cotta has been used in this country for but a comparatively short time, it has thus far proved very satisfactory, and the characteristics above indicated would point to its ranking, in common with the better qualities of brick, with the most desirable of building materials.

#### Inspection and Methods of Setting.

A sharp metallic, bell-like ring and a clean, close fracture are good proofs of compactness and strength. Perfection of form is in the highest degree essential, and can result only from a homogeneous material and a thorough and experienced knowledge of firing.

No spalled, chipped or warped pieces of terra cotta should be accepted, and the pieces should be so hard that they will resist the scratching with the point of a knife. The blocks should be of uniform color also, and all mouldings should come together perfectly at the joints. Terra cotta with a vitreous surface and mat-glazed terra cotta should be so non-absorbent that water will lie in drops on its surface without being quickly absorbed. Full glazed terra cotta should be so non-absorbent that ink will not penetrate the surface, and may be entirely washed away with water.

Terra cotta should always be set in either natural cement or Portland cement, mixed with sand, and in about the same way as stone is set. As soon as set, the outside of the joints should be raked out to a depth of three-quarters of an inch to allow for pointing and to prevent chipping. The terra cotta should be built up in advance of the backing, one course at a time, and all voids, except those projecting beyond the face of the wall, should be filled with grout or mortar, into which bricks should be forced to make the work as solid as possible. All blocks not solidly built into the walls should be anchored with galvanized iron clamps, the same as for stonework, and, as a rule, all projecting members over 6 inches in height should be anchored in this way. After the walls are up the joints should be pointed with Portland cement colored with a mineral pigment to correspond with the color of the terra cotta. The pointing is done in the same way as in stone work, except that the horizontal joints in all sills and washes of belt courses and cornices, unless covered with a roll, should be raked out about two inches deep, caulked with oakum for about one inch and then filled with an elastic cement.

#### Disadvantages and Cost of Terra Cotta.

One of the principal objections to the use of terra cotta is the time required to obtain it, especially when the building is some distance from the factory. About six weeks are required for the production of terra cotta of the ordinary kind, and the architect should see that all the drawings for the terra cotta work are completed and delivered to the maker at as early a stage in the work as possible, so that he may have ample time to produce it. This will obviate any delay if the architect's drawings and instructions are clear, distinct and complete, as it takes longer to obtain the steel construction work than it does to make the terra cotta. Most of the delay in obtaining terra cotta is really due to the fact that prompt and careful attention is not always given to the preparation of the terra cotta drawings and instructions. Small pieces of terra cotta may sometimes be obtained within two weeks from the receipt of the order, when the molds are already on hand. It is always more expensive, however, to attempt to turn out work in such short order, and inexpedient on account of the risks in forcing the drying.

Terra cotta is generally less expensive than stone, and ornamental work costs in stone about three times as much as it does in terra cotta. Being lighter in weight, the freight charges are less. In large buildings the use of terra cotta reduces the cost of the steel construction, because when it is used on the exterior the steel may be

about one-third smaller and lighter, thereby reducing the cost proportionately. This saving is an important item in large structures. The cost of erecting terra cotta is less than that of erecting stone, two stories of an all terra cotta exterior being sometimes put in place in the same time that it takes to set one story of stone. The advantage in point of cost in favor of terra cotta is greatly increased if there be a large proportion of molded work, and especially if the moldings are enriched. The use of terra cotta for trimmings, and especially for heavy cornices, in place of stone, often reduces the cost of the walls and foundations, as the weight of the terra cotta will be much less than that of stone, and the walls and foundations may be made lighter in consequence.

#### Weight and Strength and Tests.

The weight of terra cotta in solid blocks averages 122 pounds per cubic foot. When made in hollow blocks  $1\frac{1}{2}$  inches thick, the weight varies

from 65 to 85 pounds per cubic foot, the smaller pieces weighing the most. For pieces 12 by 18 inches or larger on the face, 70 pounds per cubic foot should be a fair average. The crushing strength of terra cotta blocks in 2-inch cubes varies from 5,000 to 7,000 pounds per square inch. Hollow blocks of terra cotta, one foot high, unfilled, have sustained 186 tons per square foot. From these and other tests it would place the safe working strength of terra cotta blocks in the wall at 5 tons per square foot when unfilled, and at 10 tons per square foot when filled solid with brickwork or concrete. If it is desired to test the strength of special pieces, two or three small pieces should be broken from the blocks and ground to 1-inch cubes, and then tested in a machine. Should the average results fall much below 6,000 pounds the material should be rejected.

From Western Canada Contractor.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$60,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, M. S. Shaw. The building will be erected on the south side of O'Farrell street east of Van Ness avenue, having a frontage of 52 feet and a depth of 120 feet. There will be a total of 40 suites of two and three rooms. Interior will be finished in pine with elm panels and hardwood floors. Plans provide for steam heat, elevator service, a hot water system and hardwood floors. Wall beds are specified. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$35,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Fred H. Green. The building will be erected on the south side of O'Farrell street west of Hyde, covering an area of 40 by 60 feet. There will be 23 suites of two and three rooms with private baths. Interior finish will be of pine with hardwood floors and elm panels. There will be steam heat, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with Medusa cement and Monterey sand. Plans are complete and subfigures are now being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$16,000. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owner, John McConaughy. The building will be erected on the north side of Army street east of Mission, and has been designed to contain 12 suites of three and four rooms. It will have a frontage of 58 feet and a depth of 61 $\frac{1}{2}$  feet. Interior will be finished in pine and redwood. All suites will have wall beds and private bath rooms. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile

wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures have been taken. A contract will be awarded in a day or two.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame and brick, \$21,500. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, James Reiter. The building will be erected at the northwest corner of Fulton and Franklin streets, covering an area of 55 by 62 feet. There will be a total of 18 suites of two and three rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine with some elm panels and oak floors. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick veneer. Plans are complete and figures are now being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$30,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Louis Lee. The building will be erected on the south side of Geary street between Polk and Larkin streets, having a frontage of 27 $\frac{1}{2}$  feet and a depth of 120 feet. Plans show twelve suites of four rooms each. Interiors will be finished in pine and elm with some hardwood floors. There will be steam heat, elevator service, a hot water supply and vacuum cleaning system. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and composition floors. Marble and tile wainscot will be used in the entrance lobby. Exterior of the building will be faced with tapestry brick. Plans are now being prepared and when complete the work will be done by Day Labor.

**OAKLAND, CAL.**—Apartment house, 2 story and base, frame, \$7,500. Architect, none. Owner, H. H. McDonald, 278 38th street, Oakland. The building has been designed to contain sixteen rooms arranged in four-room suites and will be erected on Terrace

street north of Ridgeway. Interior finish will be of pine with some elm or blue gum panels and oak floors. There will be an open fire place in each living room. Mantels will be of tile. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Apartment house, 3 story and base, brick, \$54,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected in Central Oakland and will contain a large number of two and three room suites with wall beds and private baths. Interior will be finished in pine and hardwood veneer with hardwood floors in the principal rooms. There will be steam heat, hot water supply and vacuum cleaning system. Bath rooms will be finished in tile with composition floors. Entrance and lobby will have marble wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**OAKLAND, CAL.**—Apartment house, 3 story and base, frame and brick, \$29,000. Architect, William Wilde, Albany Bldg., Oakland. Owner, R. Pozzi. The building will be erected at the corner of 23rd and Harrison Boulevard, and has been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. All bath rooms will have tile wainscot and composition floors. Exterior will be faced with pressed brick and cement plaster. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 4 story and base, Class C construction, \$60,000. Architect, G. A. Applegarth, Call Bldg., S. F. Owner, D. Clinton. The building will be erected at the southwest corner of Stockton and California streets, and will cover a considerable ground area. There will be a number of two and three room suites with wall beds and private bath rooms. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior will be finished in pine with hardwood veneer and oak floors. Bath rooms will be finished in tile with composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick and terra cotta. Plans are nearly complete.

**PORTLAND, ORE.**—Apartment house, 4 story and base, brick and steel, \$85,000. Architects, Camp & Dupuy, 26 East Alder street, Portland. Owner, C. W. Pallett. The building will be erected at the northwest corner of 18th and East streets, covering an area of 100 by 150 feet. There will be a large number of three and four room suites arranged around an open court, 45 by 90 feet. Interior finish will be of pine with hardwood veneer and floors. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with pressed brick. All apartments will have wall beds and private bath rooms.

The wainscot and composition floors will be used in the bath rooms. Plans are complete and figures are being taken.

**SEATTLE, WASH.**—Apartment house, 5 story and base, brick and steel, \$70,000. Architect, W. P. White, Transportation Bldg., Seattle. Owners, Seneca Investment Co. The building will be erected at the corner of 8th avenue and Seneca street, covering an area of 60 by 116 feet. There will be a total of 50 apartments of two and three rooms. All suites will have wall beds and private bath rooms. Interior will be finished in pine and hardwood veneer with oak floors in the living rooms. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile with composition floors. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base, reinforced concrete, \$35,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, John Kincannon. The building will be erected on the south side of Bush street between Polk and Van Ness avenue, covering an area of 27½ by 120 feet. There will be twenty apartments of two and three rooms. Interior will be finished in pine and hardwood veneer. Plans provide for steam heat, elevator service and a hot water supply. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile with composition floors. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with tapestry brick. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 5 story and base, brick and steel, \$50,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, J. Forrest Wyman, 1959 Hayes street, S. F. The building will be erected on the west side of Taylor street 100 feet south of Sutter. The building will contain a number of two and three room suites with private baths and wall beds. Interior will be finished in pine with some hardwood floors and panels. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with brick. Plans are complete and in the hands of the owner who will let segregated contracts.

#### Contracts awarded.

**SAN FRANCISCO**—Apartment house, 6 story and base, brick and steel, \$120,000. Architect, J. R. Miller, Lick Bldg., S. F. Owners, Traders Realty Co., tractor, G. P. W. Jensen, 320 Market street, S. F., general construction. Contract price, \$120,000. Note: Sub-figures are now being taken on all parts of this work.

#### BANKS.

**FRESNO, FRESNO CO., CAL.**—Bank and Trust building, 1 story and base, Class A construction, \$100,000. Architect, George William Kelham, Sharon Bldg., San Francisco. Owners, represented by S. N. Griffith, Fresno. The building will be erected on J street near Mariposa, and will cover an area of 50 by 100 feet. The design will be in the classic style and construction

will be fireproof throughout. A complete steel frame, reinforced walls, floors and roof slabs will be used. Interior will be finished in metal trim, marble and hardwood. There will be steam heat, special fireproof vaults and ornamental bronze and plaster. Exterior of the building will be faced with granite and marble. Plans are now being prepared.

#### BONDS.

**TIRLOCK, Stanislaus Co., Cal.**—At a meeting of the Tirlock City Council an ordinance was introduced calling an election for September 1st, at which time there will be submitted to the voters the proposition of bonding the city for \$16,000 for the purpose of purchasing and parking Block No. 6. This action was taken in pursuance of the recent order of the State Railroad Commission for the new Southern Pacific Depot to be erected here provided the city would purchase the property and maintain it as a public park.

**COLUSA, Colusa Co., Cal.**—Sealed bids will be received by the Board of Supervisors until August 4th for the sale of \$125,000 State Highway bonds. Bids must be accompanied by a cash deposit or certified check payable to the Clerk of the Board of Supervisors, amounting to 5 per cent of the amount bid. W. J. King is the Clerk of the Board.

**DINUBA, Tulare Co., Cal.**—The movement to secure an amendment to the state through an initiative petition, to place on the ballot at the November election, for the purpose of providing for the purchase of irrigation district bonds by the state through the issuance of state bonds, has been called in. The movement was abandoned at the meeting of the committee from the Irrigation District Association of Modesto.

**AUBURN, Placer Co., Cal.**—Terrance Marshal & Company of San Francisco has purchased the school bonds of the Auburn and Roseville School Districts. The Auburn bonds, amounting to \$47,000, brought a premium of \$101, and the Roseville bonds, amounting to \$45,000, brought a premium of \$1.

**NEWARK, Alameda Co., Cal.**—An election was held in the Newark School District on July 21st for the purpose of voting bonds in the sum of \$25,000 for the purpose of raising funds for the erection of a school building, the purchasing of additional grounds and supplying the necessary equipment for the same.

**HANFORD, Kings Co., Cal.**—A bond issue for \$675,000 is expected to be submitted to the voters of this city at an early date. No particular time has been set. The funds will be used in the construction of highways and roads.

**MONROE SCHOOL DISTRICT, Sonoma Co., Cal.**—An election will be held here on July 30th for the purpose of voting bonds in the sum of \$3,900, the money to be used in the erection of a school building, for improving the school grounds and the supplying of same with the necessary apparatus.

**PINER SCHOOL DISTRICT, Sonoma Co., Cal.**—July 25th is the date set for the voting of bonds amounting to \$1,500, funds to be used in the altering of a school building.

**NAPA, Napa Co., Cal.**—Despite the fact that some of the bids from seven bond houses offered cash premiums to handle \$25,000 worth of bonds voted

here last December for the construction of a bridge on East First street, the City Trustees have voted to reject them all. The building of the bridge now remains a conjecture. No reason for the rejection of the bids has been made public, as yet, the decision having been arrived at a secret session of the Board.

**HENDERSON SCHOOL DISTRICT, San Joaquin Co., Cal.**—Sealed bids will be received here by the County Clerk until August 4th, for the purchase of bonds in the sum of \$4,500. No bond will be sold less than par value and accrued interest. Eugene D. Graham is the Clerk of the County.

**SACRAMENTO, Cal.**—Bids are now being received in this city for the sale of bonds in the following amounts: Levee, \$163,999; water mains, \$1,310,500; sewer and drainage, \$831,400; Hall of Justice, \$208,000; electrical distribution system, \$104,000.

**MONTAGUE, Siskiyou Co., Cal.**—School bonds amounting to \$12,000 were voted on here Monday, July 13th, and carried by a large majority. There were 104 votes cast in favor of the issue and only 19 against. As a result of the vote a new school building will be erected on the site where the old building now stands. A few weeks ago a bond election was held here for the same purpose, except that the bonds amounted to \$15,000, but was defeated.

**RED BLUFF, Glenn Co., Cal.**—S. W. Murdock of this city has purchased the Cherokee School District bonds through the Board of Supervisors of this county. The bonds are for \$7,000. Murdock paid \$101 premium and accrued interest.

**PASADENA, Los Angeles Co., Cal.**—The members of the City Commission have agreed to call a bond election for the purpose of bettering the fire protection in this city. An election will, no doubt, be called sometime in August. Propositions to be included in the issue will be a cast iron pipe system through the business district and for the erection of a fire house.

#### SIX JULY HOYT

**LOS ANGELES, Los Angeles Co., Cal.**—The Board of Supervisors of Los Angeles County will receive bids until July 27th for the purchase of bonds amounting to \$50,000 for the erection of a school building in the Morningside School District. Bonds will be fifty in number of \$1,000 each, and will pay 3½ per cent interest per annum. H. J. Le Lande is the County Clerk.

**ONTARIO, San Bernardino Co., Cal.** A committee has been appointed by the Mayor from the City Council of Upland, has reported, recommending that a mass meeting be called at an early date to consider the bond issue of \$10,000 for the purpose of providing funds for the erection of a new city hall, street maintenance and the purchase of fire apparatus.

#### BRIDGES AND DAMS.

**RICHMOND, CONTRA COSTA CO., CAL.**—Harbor dredging. Cost not stated. Engineer, City Engineer Posey, Richmond. Owners, City of Richmond. Bids opened for this work show the Western Reclamation Co. low at \$4,975 and the Cutting Interests second at \$6,000. An award of contract has not been made.

**SACRAMENTO, CAL.**—Wharf, timber construction, \$2,500. Engineer, Engineering Dept. Associated Oil Co.,

Sharon Bldg. S. F. Owner. Associated Oil Co. Plans are complete and the work has been started by Day Labor on the construction of timber wharf on the westerly side of S street in the P. A. Miller tract. Details can be secured from the owners.

## CHURCHES.

HOME OF PEACE CEMETERY, SAN MATEO CO., CAL.—Mausoleum, 1 story, concrete and granite. Cost not stated. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, J. J. Mack. The mausoleum has been designed in the classic style, and will be circular in shape with a number of large granite columns hand carved. Interior will be arranged for eight receptacles. Exterior of the building will be covered with cement plaster on metal lath with a pressed brick veneer base. Plans are complete and the work will be done by Day Labor.

## GOVERNMENT WORK AND SUPPLIES.

### Reclamation Work.

The Secretary of the Interior has authorized the Reclamation Service to execute contract with the Winston Bros., of Minneapolis, Minn., for earth work on the main canal of the Grand Valley Irrigation Project, Colorado. The work involving 30 miles of canal, requiring 1,900,000 cubic yards of excavation. The contract price is \$387,483.25.

### Huntley Project, Drains.

The Secretary of the Interior has authorized the Reclamation Service to reject all bids opened on April 27 for the construction of tile drains in connection with the Huntley irrigation project, Mont. The prices quoted by the various bidders were believed to be excessive, and in the meantime informal proposals were received from local contractors for parts of the work. Schedules 2 and 3 have been completed by the government forces at about two-thirds of the estimated cost and the secretary has therefore authorized the engineers to readvertise for bids on schedules 1 and 4.

### Astoria, Ore., Hydraulic Lift.

The contract for installing a hydraulic freight lift, pumping plant, etc., in the U. S. custom house, Astoria, Ore., has been awarded to the Otis Elevator Co., Washington, D. C., at \$5,072; less \$1,023 for the construction changes included; time to complete October 1, 1914.

### Fort Worden, Building.

The following awards have been made by the quartermaster general for constructing building at Fort Worden, Wash.: Four brick sets officers' quarters, Eckman & Mawatt, Seattle, Wash., construction, \$22,965; plumbing, \$2,474; heating, \$2,000; wiring and fixtures, \$806. Two frame double sets N. C. O. quarters, Carlson & Son, Seattle, Wash., construction, \$8,686; heating, \$480; wiring and fixtures, \$760. Horby & White, Port Townsend, Wash., plumbing, \$985. Crane Co. fixtures are to be used in both buildings.

### Vandalla South Canal.

The Secretary of the Interior has authorized the Reclamation Service to accept the following proposals for excavation and construction in connection with the Vandalla south canal, Milk River irrigation project, Mont.:

Schedule 1 to Tebbs, Taggart, Judges & Kulp, of Glasgow, Mont., involving 135,000 cubic yards of excavation, contract price \$19,408.40.

Schedule 2 to Threist Bros. & Jolley, of Lovell, Wyo., involving about 10,200 cubic yards of excavation, the placing of 18,000 pounds reinforcing steel, also erecting structural steel and metal flumes, laying vitrified pipe, corrugated iron, the furnishing of 135,000 feet B. M. of lumber for bridges and turnouts, driving piles, etc. The contract price is \$12,850.75.

No award will be made under this authorization until assurances are received that there is no outstanding interest by lease or otherwise for certain state lands on which part of the work is to be done that will prevent the United States from entering into possession of right of way and prosecuting work thereon.

### Letterman Hospital, Refrigeration.

The Cyclops Iron Works of San Francisco, Cal., has the contract at \$1,080 for installing refrigerating machinery at the Letterman General Hospital, San Francisco.

### Letterman Hospital, Oil System.

The contract for extending the oil heating system at the general hospital, San Francisco, Cal., has been awarded to Johnson & Co., at \$1,484.

### Pueblo, Colo., Repairs, Etc.

The contract for miscellaneous repairs, etc., at the U. S. post office, Pueblo, Colo., has been awarded to Raymond C. Whitlock, Pueblo, Colo., at \$740; time, September 16, 1914.

### Structural Gate.

The United States Reclamation Service is asking for proposals for furnishing structural steel and cast-iron sluice and regulator gates, gate frames, gate stands and accessories for projects in the northern division. Bids will be opened after 2 o'clock p. m. August 4, 1914, at the office of the Reclamation Service, Great Falls, Mont.

### San Francisco, Cal., Interior Decoration.

The contract for interior decoration and painting at the P. S. custom house, San Francisco, Cal., has been awarded to A. Lincoln Co., 627 Madison avenue, New York City, at \$10,000.

### Canal Requisitions.

The following requisitions for supplies for the Panama Canal have been received by the general purchasing officer at Washington. Bids will be called for in the ordinary course within the next few days:

- 5,000 sheets cardboard.
- 1,000 rms onionskin.
- 1,400 ft multi-conductor train cable.
- 50 angle bars.
- 4 multi-stage centrifugal pumps.
- 6 15-in diam cast-iron suction pipes.
- 2 12-in do.
- 12 cast-iron nipples.
- 2 cast-iron reducers.
- 2 reducing ellis.
- 3 venturi meters.
- 2,500 ft galvanized pipe conduit.
- 12 conduit bushings.
- 26 lock nuts.
- 36 brass check valves.
- 200 ft bar copper.
- 4,500 ft 3-conductor No. 8 rubber-insulated lead-covered cable.
- 16 fuse panels.
- 6 insulators.
- 2 roof bushings.

7,000 gals carbolic acid  
135,000 lbs' resin.  
21,200 lbs caustic soda.

### Earthwork.

The following bids were received at the U. S. Reclamation Service, Grand Junction, Colo., for earthwork on 20 miles of main canal, Grand Valley project, Colo.:

- Bid 1. Winston Bros., Minneapolis, Minn.
  - 2. Wood, Bancroft & Doty, Omaha, Neb.
  - 3. Reynolds-Ely Construction Co., Springfield, Utah.
  - 4. Utah Construction Co., Ogden, Utah.
  - 5. Fred M. Crane, Omaha, Neb.
  - 6. Kenefick-Hoffman & Quigley, Kansas City, Mo.
  - 7. Maurice A. Wogan, Denver, Colo.
  - 8. McArthur Bros. Co., New York City.
  - 9. Charles Withite & Co., Boise, Idaho.
  - 10. Lamereaux Bros. Co., Omaha, Neb.
  - 11. J. Fred Roberts Construction Co., Denver, Colo.
  - 12. W. M. Gibson, Grand Junction, Colo.
  - 13. Mendehall, Straw & Bird Construction Co., Springfield, Utah.
  - 14. Summison & Smart, Springfield, Utah.
  - 15. Kipatrick Bros., Beatrice, Neb.
  - 16. The Orman Construction Co., Pueblo, Colo.
  - 17. Harvey H. Nickerson, Douglas, Wyo.
  - 18. Thorn & Witting, Springfield, Utah.
  - 19. John Mulligan, Los Angeles, Cal.
- Schedule No. 1—Bid 1, \$15,455.25; 2, \$11,029; 3, \$11,666; 4, \$12,853.75; 5, \$11,111.50; 6, \$12,168.75; 7, \$12,516.75; 8, \$14,953; 9, \$13,874.50.

### Denver, Colo., Mechanical Equipment.

The contract for the installation of mechanical equipment in the U. S. public building at Denver, Colo., has been awarded to the Chris Irving Plumbing and Heating Co., Denver, Colo., at \$107,934.

### St. Mary's Canal.

The Secretary of the Interior has authorized the Reclamation Service to execute contract with Condon & Williams of So. Omaha, Neb., for construction work on the St. Mary Canal, St. Mary storage unit, Milk River irrigation project, Mont. The contract price is \$159,489.40.

## —HALLS & SOCIETY BLDGS—

**OAKLAND, CAL.**—Municipal auditorium, 2 story and base. Class A construction, \$1,000,000. Architect, J. J. Donovan and Walter Mathews, Oakland. Owners, City of Oakland. The Oakland Municipal Auditorium Advisory Board has recommended that bids be called for at once for the following work in connection with the completion of the Municipal Auditorium: Painting, finish hardware, elevator equipment, plastering and lathing, curtain hoists and seats. An official proposal will be published shortly.

Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Baths will have the wainscot and composition floors. Materials are now being purchased and the work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$20,000. Architect, none. Owner, Thomas Hamill, 25th avenue, S. E. The dwelling will be erected on Vallejo street between Webster and Fillmore streets, and will cover a considerable ground area. There will be in the neighborhood of fourteen rooms, several baths and a private garage on the rear of the lot. Interior will be finished in pine. There will be inlaid and hardwood floors. Baths will be finished in tile and equipped with showers. A central heating system, either steam or hot water with oil burning plant, will be installed. Exterior of the building will be covered with plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, concrete, \$10,000. Architect, Chas. J. Rousseau, 16 Kearny street, S. E. Owner, Mathew Little. The building will be erected on Green street west of Divisadero, and will contain eight rooms with baths, and will cover an area of 27 by 137½ feet. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Baths will be finished in tile. There will be furnace heat and open fire places. Exterior of the building will be finished in cement plaster. The mantels are specified. Plans are now being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, Fred Quirio, 13 Garden avenue, S. E. The dwelling will be erected on 30th avenue south of Clement street, and has been designed to contain seven rooms with bath. Interior will be finished in pine. An automatic water heater will be installed. Bath will have tile wainscot and composition floors. There will be furnace heat and open fire places. Exterior of the building will be covered with cement plaster on metal lath. Plans have been completed and the work will be done by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residences, 2 story and base, frame, \$2,500 and \$5,000 respectively. Architect, none. Owner, J. Nelson, 30 Presidio Terrace, S. E. These two houses will be erected at the corner of Carl and Hillway streets. The \$2,500 house will contain five rooms and the \$5,000 dwelling seven rooms. Interiors will be finished in pine and hardwood with hardwood floors in the living, dining and reception rooms. The more expensive house will have furnace heat. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Exterior of the houses will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$8,500. Architect, Arthur J. Laib, Russ Bldg., S. E. Owner, Benj. Wertheimer. The dwelling

will be erected on Commonwealth avenue between Geary and Euclid, and has been designed to contain seven rooms, two baths and a sleeping porch. Interior will be finished in pine throughout with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Baths will be of tile or brick. There will be tile wainscot. An automatic water heater will be installed. The floor of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, Thomas Hamill, 25th avenue, S. E. The dwelling has been designed for a seven-room house and will be erected on 29th avenue south of Anza street. Interior finish will be of pine with some elm paneling and hardwood floors. There will be open fire places and tile mantels. Baths will be finished in tile and equipped with showers. A central heating system, either steam or hot water with oil burning plant, will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, cost not stated. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mrs. I. Olsen. The dwelling has been designed for a seven-room house and will be erected on Santa Ray avenue. Interior will be finished in pine and hardwood veneer with hardwood floors in the living room, dining room and reception room. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures will be called for shortly.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, cost not stated. Architect, John Hudson, 700 Broadway, N. E. The dwelling will be erected on Lake Street, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, cost not stated. Architect, James W. Plachek, 1400 Telegraph avenue, Berkeley. Owner, Mrs. Hunter. The dwelling has been designed for a seven-room house and will be erected on Woodley street. Interior will be finished in pine and hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**LAND, CAL.**—Residence, 2 story and base, frame, cost not stated. Architect, John Hudson, 700 Broadway, N. E. The dwelling will be erected on Lake Street, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$1,500. Architect, none. Owners, Hanning & Stewart, 1000 Broadway, Oakland. #### Contracts Awarded.

**SEATTLE, WASH.**—Residence, 2 story and base, brick, \$20,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, Albert Rhodes. Contractor, Harvey Allen, 1420 John street, Seattle. Contract price, \$20,000.

#### SCHOOLS.

**KENTFIELD, MARIN CO., CAL.**—School, 1 story and base, frame and plaster, \$12,000. Architect, Edwin Schaefer, Plaza Bldg., Oakland. Owners, Kentfield School District. The building will be designed in the Mission style and will contain four class rooms. Interior will be finished in pine throughout with some oak floors. Plans provide for a warm air system of heating. Modern school plumbing will be installed. Exterior of the building will be covered with cement plaster on metal lath. Working drawings are now being prepared.

**RICHMOND, CONTRA COSTA CO., CAL.**—School, 2 story and base, brick or reinforced concrete, \$52,000. Architects, Stone & Wright, 24 So. California street, Stockton. Owners, City of Richmond. These architects have just been commissioned to prepare plans for the new school building which will be erected at the corner of 23rd and Main streets. Plans will be drawn for a twelve-room school with a large auditorium. There will be steam heat, oil burning plant, vacuum cleaning and program clocks. Interior will be finished in pine with maple floors. Exterior will be faced with either pressed brick or cement plaster. Further mention will be made of the work as plans progress.

**PITTSBURG, CONTRA COSTA CO., CAL.**—School, 2 story and base, brick and concrete, \$52,000. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Pittsburg Union High School District. Bids opened on July 15th for this work show L. G. Burgen & Son of San Francisco low on the general construction at \$67,480, and Seibert Co. low on the heating and ventilating at \$8,524. All bids were in excess of the amount available and will be rejected. Plans will be revised and new figures called for shortly.

**VAN NUYS, LOS ANGELES CO., CAL.**—School, 2 story and base, hollow tile construction, \$125,000. Architects, Allison & Allison, Hibbelman Bldg., L. A. Owners, Van Nuys School District. The building will cover an area of 214 by 40 feet and has been arranged with a central building and two wings. The

central portion will contain an auditorium and gymnasium. Wings will be arranged for six class rooms, principal's office, teachers' rooms, lecture room, department of domestic science and manual training and agriculture. Auditorium with gallery will seat 300 people. Plans provide for steam heat, modern school plumbing and program clocks. Interior will be finished in pine with maple floors in the class rooms. There will be reinforced concrete stairways and corridors. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

**EUGENE, ORE.**—School, 3 story and base, brick, \$100,000. Architects, Hunzicker & Preusse, 1. O. O. F. Bldg., Eugene. Owners, Eugene High School District. The building will contain ten class rooms, domestic science and manual training departments, teachers' rooms, principal's office and a large auditorium. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat and modern school plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 29th. Plans and specifications can be secured from the architects.

#### SEWERS, STREET WORK AND WATER SYSTEMS.

**SAN FRANCISCO**—Furnishing street cleaning machinery. Cost not stated. Engineer, none. Owners, City and County of San Francisco. Bids will be opened by the Board of Supervisors on July 27th for furnishing the city with 1 5-ton road roller, 1 pick-up street cleaning machine, 4 machine brooms and 3 can route wagons. Full particulars can be secured from the Clerk of the Board of Supervisors, Temporary City Hall. An official proposal appears in another column of this issue.

**SAN FRANCISCO**—Furnishing lumber. Cost not stated. Architect, none. Owners, City and County of San Francisco. Bids will be opened on July 27th by the Board of Supervisors for furnishing the city with lumber for the fiscal year year ending June 30th, 1915. Full particulars can be secured from the Clerk of the Board of Public Works, Temporary City Hall. An official proposal appears in another column of this issue.

#### STORES.

**SAN FRANCISCO**—Stores, 1 story, frame, \$3,000. Architects, Ribbetti & Headman, Phelan Bldg., S. F. Owner, Paul Barbieri, 1100 Jones street, S. F. The building will be erected at the southwest corner of Geary and 20th avenue, covering an area of 70 by 55 feet. There will be pine interior finish and patent store fronts. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKLAND, CAL.**—Offices, 3 story and base, brick and steel. Cost not stated. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, San Francisco & Oakland Terminal Railroad. Construction of the frame of this building is now underway. The architects are now taking figures for finish carpentry, electric work, mill work, marble and tile work, lathing and plastering.

#### THEATRES.

**SAN FRANCISCO**—Theatre balcony, reinforced concrete, \$7,000. Architect, Matthew O'Brien, Foxcroft Bldg., S. F. Owners, Empress Theatre Co. Plans for a large balcony to be installed in the theatre are complete. Construction will be of reinforced concrete. Plans are in the hands of the owners and bids will be taken at once. Sid Grauman, 965 Market street will give further information.

**SAN FRANCISCO**—Motion picture theatre, 1 story, frame and plaster, \$10,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name not given. The building will be erected on Devisadero street. Interior will be finished in pine and ornamental plaster. There will be a modern ventilating system and special electric work. Exterior will be covered with cement plaster on metal lath. Plans are complete and a contract will be awarded at once.

**BERKELEY, ALAMEDA CO., CAL.**—Motion picture theatre, 1 story. Class C construction, \$12,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, J. A. Elston and George Clark. The building will be erected at the corner of Durant Way and Telegraph avenue. Interior will be finished in pine with considerable ornamental plaster. A special system of ventilating will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

**PASADENA, LOS ANGELES CO., CAL.**—Theatre and stores, 1 story and base, reinforced concrete, \$80,000. Architect, Reginald D. Johnson, Staats Bldg., Pasadena. Owners, Pasadena Theatre Co. The building will be erected just west of the Casa Grande Hotel near Colorado avenue. There will be a number of stores besides the theatre. Construction will be fireproof with reinforced concrete walls and floors. Fireproof interior partitions will be used. Interior of the building will be finished in pine with ornamental plaster in the theatre. Steam heat and a modern system of ventilating will be installed. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

ed, for a timber bridge, work at the United States bridge depot, San Diego, Cal. Plans, cost, \$3,300. Plans and specifications obtained on application at the depot or the commanding officer's office. H. R. STANFORD, Engineer.

#### NOTICE TO CONTRACTORS.

THUS, July 22, 1914, the Board of Supervisors of the County of Kern, State of California, will receive, at 10 a. m. of July 22nd, 1914, proposals for the construction of a pile trestle bridge over the North Fork of Kern River, between the County Road No. 24 and the Kern River, 20 feet wide, and 100 feet long, a cross stream of some stream bed, and a cross stream of some stream bed, 20 feet wide, and 100 feet long. Plans and specifications at the Surveyor's Office.

Each bid to be received with a certified check for the sum of \$100, to be paid to the Board of Supervisors, to the amount of the percentage of bid to insure the completion of a contract by the contractor.

The Board reserves the right to reject any or all bids.

#### Additional Notice.

Lumber for the bridge to be secured from the A. Brown Co. of Kernville at the following prices:

\$23 per M. at a cross stream bridge, Mountain.

\$20 per M. at a cross stream bridge, State.

By order of the Board of Supervisors of the County of Kern, State of California. H. A. JASPER, Chairman.

Attest: J. L. MILLER, Clerk.

#### NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Thursday, July 23, 1914. Bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the Laundry, Southern California State Hospital, Patton, California, in accordance with plans and specifications thereof, copies of which may be obtained immediately on the State Department of Engineering, Sacramento, California.

Such bids will be received for the entire work, and must be submitted in forms prepared and furnished by the State Department of Engineering. Each bidder's bond, or a certified check in the sum of ten per centum of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition. The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposal for Laundry Building, Southern California State Hospital, Patton, California."

mediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

### OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and  
base, frame \$7,500. Oakland, Cal. Ar-  
chitect, none. Owner, H. H. McDonald.  
278 28th street, Oakland. The building  
has been designed to contain sixteen  
rooms arranged in four-room suites,  
and will be erected on Terrace street  
north of Rokeway. Interior will be  
of pine with some elm or blue gum  
panels and oak floors. There will be  
an open fire place in each living room.

Mantels will be of tile. All suites will  
have wall beds and private bath rooms.  
Tile wainscot and composition floors  
will be used in the bath rooms. Exter-  
ior of the building will be covered  
with cement plaster on metal lath.  
Plans are complete and in the hands of  
the owner, who will do the work by  
Day Labor. Materials are now being  
purchased.

APARTMENT HOUSE—2 story and  
base, brick, \$4,000. Oakland, Cal. Ar-  
chitect, Charles W. McCall. Central  
Bank Bldg. Oakland. Owner's name  
withheld. The building will be erected  
in Central Oakland and will contain  
a large number of two and three room  
suites with wall beds and private baths.  
Interior will be finished in pine and  
hardwood veneer with hardwood floors  
in the principal rooms. There will be  
steam heat, hot water supply and vac-  
uum cleaning system. Bath rooms will  
be finished in tile with composition  
floors. Entrance and lobby will have  
marble wainscot. Exterior of the build-  
ing will be faced with pressed brick.  
Plans are now being prepared.

APARTMENT HOUSE—3 story and  
base, frame and brick, \$20,000. Oak-

land, Cal. Architect, William White,  
Albany Bldg., Oakland. Owner, R.  
Pozzi. The building will be erected at  
the corner of 23rd and Harrison Boul-  
evard, and has been designed to con-  
tain a number of two and three room  
suites with private baths and wall  
beds. Interior finish will be of pine  
with some elm panels and hardwood  
floors. There will be steam heat and  
a hot water system. All bath rooms  
will have tile wainscot and composi-  
tion floors. Exterior will be faced with  
pressed brick and cement plaster.  
Plans are now being prepared.

MUNICIPAL AUDITORIUM—2 story  
and base. Class A construction, \$1,000-  
000. Oakland, Cal. Architects, J. J.  
Donovan and Walter Mathews, Oak-  
land. Owners, City of Oakland. The  
Oakland Municipal Auditorium Advi-  
sory Board has recommended that bids  
be called for at once for the following  
work in connection with the comple-  
tion of the Municipal Auditorium:  
Painting, finish hardware, elevator  
equipment, plastering and lathing, cur-  
tain hoists and seats. An official pro-  
posal will be published shortly.

AUDITORIUM WORK—Class A con-  
struction, \$1,000,000. Oakland, Cal. Ar-  
chitects, J. J. Donovan and Walter  
Mathews, Oakland. Owners, City of  
Oakland. Bids were opened on July  
15th by the City Council for the car-  
pentry and mill work, heating and ven-  
tilating, roofing, plumbing and gas  
fitting, automatic sprinklers, damp-  
proofing, architectural iron work, sheet  
metal work and skylights and for the  
glass and glazing. A large number of  
bids were received which will be found  
under the heading of Oakland and Ala-  
meda County in this issue.

RESIDENCE—2 story and base,  
frame, \$6,000. Berkeley, Alameda Co.,  
Cal. Architect, James W. Plachek,  
Acheson Bldg., Berkeley. Owner, Fred  
Mueller. The dwelling will be erected  
in Northeast Berkeley, and has been  
designed to contain eight rooms, bath  
and sleeping porch. A one-story gar-  
age will be erected on the rear of the  
lot. Interior of the dwelling will be  
finished in pine with some hardwood  
veneer and oak floors. Plans provide  
for furnace heat and open fire places.  
Mantels will be of tile. Bath room  
room will be finished in tile and will  
have a composition floor. An auto-  
matic water heater will be installed.  
Exterior of the dwelling will be cov-  
ered with cement plaster on metal lath.  
Plans are now being prepared.

RESIDENCE—2 story and base,  
frame. Cost not stated. Berkeley, Ala-  
meda Co., Cal. Architect, Olin S. Grove,  
2911 Telegraph avenue, Berkeley. Own-  
er, Mrs. L. Olsen. The dwelling has  
been designed for a seven-room house,  
and will be erected on Santa Ray ave-  
nue. Interior will be finished in pine  
and hardwood veneer with hardwood  
floors in the living room, dining room  
and reception hall. There will be fur-  
nace heat and open fire places. Man-  
tels will be of tile. Tile wainscot will  
be used in the bath room and kitchen.  
Exterior of the dwelling will be cov-  
ered with cement plaster on metal  
lath. Plans are nearly complete and  
figures will be called for shortly.

RESIDENCE—2 story and base,  
frame. Cost not stated. Oakland, Cal.  
Architect, John Hudson Thomas, First  
National Bank Bldg., Berkeley. Own-  
er, H. E. Crosby. The dwelling will be  
erected on Lake Shore avenue, and has  
been designed for an eight-room house  
with bath and sleeping porch. Inter-

rior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and furnace heat. Mantels will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE** — 2 story and base, frame, \$1,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mrs. Hunter. The dwelling will be erected on Woolsey street east of Dana, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine with hardwood veneer and hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE** — 2 story and base, frame. Cost not stated. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. E. Jackson. The dwelling will be erected in the Crocker Highlands Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine, white enamel and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**MAUSEOLEUM** — 1 story granite. Cost not stated. Fruitvale, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owners, Estate of P. Calou. The mausoleum has been designed in the classic style and will contain eight receptacles. There will be modern plumbing and electric work. Interior will be finished in marble. There will be ornamental bronze and art glass. Exterior will be faced with marble and granite. Plans will be ready for figures in a few days.

**RESIDENCE** — 2 story and base, frame, \$1,500. Oakland, Cal. Architect, none. Owners, Banning & Stewart 5215 Broadway, Oakland. The dwelling will be erected on Belgrave Place near Napa street, and has been designed for a nine-room house with bath. Interior finish will be of pine throughout. There will be some hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**RESIDENCE** — 2 story and base, frame, \$1,250. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. L. Eschbacher. The dwelling has been designed for a seven-room house with bath and will be erected on Fairbanks

avenue. Interior will be finished in pine and hardwood with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile. There will be tile wainscot and composition floor in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**OFFICES** — 3 story and base, brick and steel. Cost not stated. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, San Francisco & Oakland Terminal Railroad. Construction of the frame of this building is now underway. The architects are now taking figures for finish carpentry, electric work, mill work, marble and tile work, lathing and plastering.

**MOTION PICTURE THEATRE** — 1 story. Class C construction, \$12,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Oakland. Owners, J. A. Elston and George Clark. The building will be erected at the corner of Durant Way and Telegraph avenue. Interior will be finished in pine with considerable ornamental plaster. A special system of ventilating will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

## Oakland Auditorium Bids Are Opened.

Bids Received For Work on Ten Departments and are Referred to City Attorney's Office.

A large number of bids were opened Wednesday by the Oakland City Council for construction on the Municipal Auditorium. Included in this work were the carpentry and mill work, heating and ventilating, roofing, plumbing and gas fitting, automatic sprinklers, dampproofing, iron work, sheet metal work and skylights and the glass and glazing. All bids were referred to the City Attorney, the Public Works Commissioners and Auditorium Advisory Committee.

Following is a complete list of all figures submitted:

### Carpentry and Mill Work.

Foster-Vort Co.	\$33,850
P. G. MacIntyre	37,700
W. D. Henderson	37,400
R. W. Littlefield	39,795
Christenson Bros.	40,700

### Heating and Ventilating.

Bay Engineering Co.	\$29,450
Peterson-James Co.	28,280
Robert Dalziel Jr., Co.	27,100
J. C. Hurley Co.	26,616
Pacific Fire Ext. Co.	28,852
Seibert Co.	25,489
Victor Engineering Co.	24,195
Scott Company	28,790
F. T. Walsh Co.	28,700

### Roofing.

National Roofing Co.	\$1,190
Bay Cities Roofing Co.	1,117
Paradine Paint Co.	1,146
Butler Roofing Co.	1,940
J. W. Bender Roofing & Pav-	
ing Co.	1,581

### Plumbing and Gas Fitting.

Robert Dalziel Jr., Co.	\$19,427
Carl T. Doell	17,937

Frederick W. Snook	18,984
Scott Company	18,980
<b>Automatic Sprinklers.</b>	
Pacific Fire Ext. Co.	\$1,380
Scott Company	1,358
<b>Damp Proofing</b>	
National Roofing Co.	\$1,399
Paradine Paint Co.	1,792

### Architectural Iron Work.

Rudger-Merle	\$31,740 (a) deduct
\$1,750; (b) deduct \$2,250.	
California Artistic Metal & Wire Co.	\$30,600 (a) deduct, \$2,900; (b) deduct, \$1,425.

C. J. Hilliard Co.	\$12,200 (a) deduct, \$2,000; (b) deduct, \$2,700.
--------------------	--

### Sheet Metal Work and Skylights.

Yager Sheet Metal & Plumbing Co.	\$20,887 (a) add, \$9,100; (b) add, \$7,300; (c) \$ —
----------------------------------	---

### MARIN, CONTRA COSTA AND SONOMA COUNTIES.

**SCHOOL**—1 story and base, frame and plaster, \$12,000. Kentfield, Marin Co., Cal. Architect, Edwin Schaefer, Plaza Bldg., Oakland. Owners, Kentfield School District. The building will be designed in the Mission style and will contain four class rooms. Interior will be finished in pine throughout with some oak floors. Plans provide for a warm air system of heating. Modern school plumbing will be installed. Exterior of the building will be covered with cement plaster on metal lath. Working drawings are now being prepared.

**SCHOOL**—2 story and base, brick or reinforced concrete, \$52,000. Richmond, Contra Costa Co., Cal. Architects, Stone & Wright, 24 So. California street, Stockton. Owners, City of Richmond. These architects have just been commissioned to prepare plans for the new school building which will be erected at the corner of 23rd and Main streets. Plans will be drawn for a twelve-room school with a large auditorium. There will be steam heat, oil burning plant, vacuum cleaning and program clocks. Interior will be finished in pine with maple floors. Exterior will be faced with either pressed brick or cement plaster. Further mention will be made of the work as plans progress.

**SCHOOL**—2 story and base, brick and concrete, \$52,000. Pittsburg, Contra Costa Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Pittsburg Union High School District. Bids opened on July 15th for this work show L. G. Burgen & Son of San Francisco low on the general construction at \$67,450, and Siebert Co. low on the heating and ventilating at \$8,524. All bids were in excess of the amount available and will be rejected. Plans will be revised and new figures called for shortly.

#### Contracts Awarded.

**HARBOR DREDGING** Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer Posey, Richmond. Owners, City of Richmond. Bids opened for this work show the Western Reclamation Co. low at \$4,975, and the Cutting Estate interests second at \$6,000. An award of contract has not been made.

### Pittsburg School Bids Are Opened.

Four Bidders on General Construction  
And Same Number For Heating.  
Will Be Re-advertised.

**PITTSBURG**, Contra Costa Co., Cal. —Only four sets of figures were received by the Board of Education on July 15th for the general construction of the new two-story brick school building, designed by Architect A. W. Cornelius. Four sets of figures were also received for the heating and ventilating. All bids were in excess of the amount available and plans will probably be revised and new figures called. Exterior of the building will be faced with granite and marble. Plans are now being prepared.

FLAT—2 story and base, brick, \$5,000. Fresno, Fresno Co., Cal. Architect W. F. Bowman, Fresno. Owner, C. J. Krieger. The building will be erected at the corner of Tuolumne and F streets, covering an area of 40 by 60 feet. There will be a store on the first floor and one modern six room flat on the upper floor. Interior will be finished in pine. There will be an open fire place in the living room. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

## BUILDING CONTRACTS.

### FRESNO COUNTY.

BLOCK 132, Fresno. All work for one-story brick shop for school purposes.  
Owner.....Fresno City School Dist., Fresno.  
Architect...Coates & Traver, Fresno.  
Contractor...E. P. Smith & N E. James, Fresno.

Filed July 10, '14. Dated July 7, '14.  
Brick work up to trusses, plates on right wing.....\$2000  
Same on left wing.....1800  
Ready for roof.....3000

Cement floor finished..... 1000  
Ready for paint..... 1000  
When completed..... 6365  
Usual 35 days..... 5725

TOTAL COST, \$22,890

Bond, none. Limit, 65 working days.  
Forfeit \$20 per day. Plans and specifications filed.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**RESIDENCE**—1 and 2 story, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan. Van Nuys Bldg., L. A. Owner, J. Benton Van Nuys. The dwelling will be erected in Windsor Square, and will contain in the neighborhood of 20 rooms, 5 baths and sleeping porches. A two-story garage will also be erected on the property. Interior finish will be of pine and hardwoods. There will be a central heating system and vacuum cleaning. Exterior of both the house and garage will be covered with cement plaster. Plans are now being prepared.

**WAREHOUSE**—5 story and base. Class A construction, \$60,000. Los Angeles, Cal. Architect, George F. Costerisan and J. F. Kavanagh, California Bldg., L. A. Owners, Dixon Art Glass Co. The building will be erected at the northeast corner of Griffith avenue and 31st street, covering an area of 50 by 140 feet. Construction will be fireproof throughout with reinforced concrete walls and floors, metal window sash and frames and fireproof interior partitions. Interior finish will be of pine throughout. There will be elevator service, hot water system and hardwood finish in the office. Exterior of the building will be faced with cement plaster. Plans are complete and work will be done by Day Labor and subcontract.

**FREIGHT SHED**—1 story and base, reinforced concrete, \$18,000. Los Angeles, Cal. Engineer, Chief Engineer G. W. Harris, Kerschoff Bldg., L. A. Owners, Santa Fe Railroad Co. The building will be erected on Santa Fe avenue near the present passenger station and will cover a ground area of 500 by 60 feet. Construction will be fireproof throughout. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**SCHOOL**—2 story and base, hollow tile construction, \$125,000. Van Nuys, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Van Nuys School District. The building will cover an area of 214 by 40 feet and has been arranged with a central building and two wings. The central portion will contain an auditorium and gymnasium. Wings will be arranged for six class rooms, principal's office, teachers' rooms, lecture room, departments of domestic science and manual training and agriculture. Auditorium with gallery will seat 900 people. Plans provide for steam heat, modern school plumbing and program clocks. Interior will be finished in pine with maple floors in the class rooms. There will be reinforced concrete stairways and corridors. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

**THEATRE AND STORES**—1 story and base, reinforced concrete, \$80,000. Pasadena, Los Angeles Co., Cal. Architect, Ronald D. Johnson. \$22,890

Bldg., Pasadena. Owners, Pasadena Theatre Co. The building will be erected just west of the Casa Grande Hotel near Colorado avenue. There will be a number of stores besides the theatre. Construction will be fireproof with reinforced concrete walls and floors. Fireproof interior partitions will be used. Interior of the building will be finished in pine with ornamental plaster in the theatre. Steam heat and a modern system of ventilating will be installed. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

### Contracts Awarded.

**HOTEL**—3 story and base, frame and plaster, \$200,000. Pasadena, Los Angeles Co., Cal. Architect, Myron Hunt, Hibernia Bldg., L. A. Owners, Maryland Hotel Co. Contractor, John L. Connor, 435 West 31st street, L. A. Contract price, \$200,000.

## PORTLAND AND OREGON.

**APARTMENT HOUSE**—4 story and base, brick and steel, \$85,000. Portland, Ore. Architects, Camp & Dupuy, 26 East Alder street, Portland. Owner, C. W. Pallett. The building will be erected at the northwest corner of 15th and East streets, covering an area of 100 by 150 feet. There will be a large number of three and four room suites arranged around an open court, 45 by 90 feet. Interior finish will be of pine with hardwood veneer and floors. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with pressed brick. All apartments will have wall beds and private bath rooms. The wainscot and composition floors will be used in the bath rooms. Plans are complete and figures are being taken.

**HOTEL**—2 story and base, brick, \$20,000. Salem, Ore. Architect, Fred A. Legg, Salem. Owner, George F. Rogers. The building will cover an area of 75 by 166 feet and has been designed for stores on the first floor besides the hotel office, lobby and dining room. There will be in the neighborhood of 60 guest rooms on the second floor. Interior finish will be of pine and hardwood. Plans provide for steam heat and a hot water system. Bath rooms will have the wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**LODGE HALL**—3 story and base, brick and steel, \$80,000. La Grande, Ore. Architects, Houghtaling & Congab, Henry Bldg., Portland. Owners, La Grande Elks' Hall Association. The building will be erected on a corner lot covering an area of 60 by 100 feet. There will be a number of stores on the first floor and lodge rooms, offices and banquet rooms above. Interior will be finished in pine and hardwood. There will be steam heat, elevator service and a large swimming tank. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**SCHOOL**—2 story and base, brick, \$100,000. Eugene, Ore. Architects, Hamzicker & Prouse, 100 O. P. Bldg., Eugene. Owners, Eugene High School District. The building will contain ten class rooms, domestic science and manual training departments, teachers' rooms, principal's office and a large

auditorium. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat and modern school plumbing. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on July 29th. Plans and specifications can be secured from the architects.

### Contracts Awarded.

**WAREHOUSE**—2 story and base, brick, \$17,000. Portland, Ore. Architects, Emil Schaacht & Son, Commonwealth Bldg., Portland. Owner, C. Henry Lable, Contractors, Brayton Engineering Co., Pittcock Bldg., Portland. Contract price, \$17,000.

**HOTEL**—2 story and base, reinforced concrete, \$20,000. Portland, Ore. Architects, Whitehouse & Foulboux, Wilcox Bldg., Portland. Owners, A. and C. Feldenheimer, Contractors, Palmer & Ellison, Henry Bldg., Portland. Contract price, \$20,000.

## SEATTLE AND WASHINGTON.

**APARTMENT HOUSE**—5 story and base, brick and steel, \$70,000. Seattle, Wash. Architect, W. P. White, Transportation Bldg., Seattle. Owners, Seneca Investment Co. The building will be erected at the corner of 8th avenue and Seneca street, covering an area of 60 by 116 feet. There will be a total of 50 apartments of two and three rooms. All suites will have wall beds and private bath rooms. Interior will be finished in pine and hardwood veneer with oak floors in the living rooms. Plan provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will be finished in tile with composition floors. Marble and tile wainscot will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**COURT HOUSE**—2 story and base, brick and reinforced concrete, \$75,000. Port Angeles, Wash. Architect, Francis W. Grant, Melhorn Bldg., Seattle. Owners, Clallam County. The building will cover an area of 70 by 100 feet, and has been designed to contain the county jail as well as the various county offices, court rooms and supervisors' chambers. Interior will be finished in pine with some hardwood. There will be steam heat, a clock system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and separate bids are now being taken for the general construction, heating and ventilating, plumbing, electric work, jail work and clock system. Bids will be opened on August 1st.

### Contracts Awarded.

**APARTMENT HOUSE**—2 story and base, brick, \$10,000. Olympia, Wash. Architect, W. P. White, Transportation Bldg., Seattle. Owners, Capitol City Apartment Co. Contractor, R. M. Fouts, 7th and Pike streets, Seattle. Note: This contract has been taken on a percentage basis.

**RESIDENCE**—2 story and base, brick, \$20,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, Albert Rhodes, Contractor, Harvey Allen, 1420 John street, Seattle. Contract price, \$20,000.

**HOSPITAL**—1 story and base, Class A construction, \$200,000. Tacoma, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Own-

ers, Tacoma General Hospital. Contractor, J. E. Bennett, 760 Commerce street, Tacoma. Contract price, \$200,000.

POST OFFICE—3 story and base, brick and steel, \$86,827. Vancouver, B. C. Architect's name not given. Owners, Canadian Government. Contractors, Whiteside & Williamson, Vancouver, B. C. Contract price, \$86,827.

RAILROAD STATION—1 and 2 story and base, brick, \$10,000. Walla Walla, Wash. Engineer, Engineering Dept. Northern Pacific R. R. Co. Owners, Northern Pacific Railway Co. Contractor, M. J. Hurson, Globe Bldg., Seattle. Contract price, \$10,000.

# UNITED STATES CIVIL SERVICE EXAMINATION.

## HEATING AND VENTILATING ENGINEER (MALE).

August 5, 6, 1914.

The United States Civil Service Commission announces an open competitive examination for heating and ventilating engineer, for men only, on August 5 and 6, 1914. From the register of eligibles resulting from this examination certification will be made to fill a vacancy in this position at \$1,500 a year in the United States Military Academy, West Point, N. Y., and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The appointee should be thoroughly familiar with direct and indirect heating of large buildings; the thermograde and thermostat systems of regulation; the operation of motor-driven fans; steam fitting; regulation of reducing valves, steam traps, etc.

Competitors will be examined in the following subjects, which will have the relative weights indicated:

	Weights.
1. Practical questions in heating and ventilating (involving a competent knowledge of mathematics and plumbing, and of heating and ventilation of buildings, both theoretical and practical).....	35
2. Drawing and design (involving ability to design and draw plans, etc., for the heating and ventilating plants of modern public buildings).....	35
3. Training and experience.....	30

Total.....100

Eight years' experience in the design, installation, or operation of heating and ventilating plants is a prerequisite for consideration for this position. A technical education in engineering will be considered equivalent to not more than four years of these eight.

Persons who meet the requirements and desire this examination should at once apply for application Form 1312, stating the title of the examination for which the form is desired, to the United States Civil Service Board at San Francisco.

Issued June 25, 1914.

There has been an initiative petition circulated among the voters to prevent the placing on the ballot the proposition to vote on a prohibition amendment sooner than eight years after a vote has once been taken. It is pro-

mulgated by the Royal Arch, a body composed of the wholesale liquor dealers of the State. Its object is to prevent the agitation of the question every year and prevent the expenses of these elections after the matter has been settled either one way or the other. But the method undertaken works against itself. It would defeat its own object and nullify the initiative provision itself. As an instance of the view taken by many people the following editorial from the Fresno Republican is an example:

### FOOLISH PROPOSAL.

The California Grape Protective Association, formed primarily for the purpose of opposing the proposed state wide prohibition amendment, has sent out a circular repudiating the proposed Royal Arch amendment designed to prevent all voting on the wet and dry question for eight years. The Royal Arch amendment provides that if state wide prohibition should be defeated there are to be no more liquor elections held in California for eight years, and moreover, the vote on the amendment is to determine the wet or dry status of every local option unit in the state.

The Grape Protective Association accepts the principle of local option, now that it is an established fact, although it was not ever thus. It makes the further point, too, that the Royal Arch amendment confuses two distinctly different principles, and does so to the jeopardy of its own interests. Under the Royal Arch amendment, it would be necessary for every town and supervisorial district that did not want saloons for eight years to vote for state wide prohibition. Quick to see that point, the Grape Protective Association shows the political sagacity to oppose and repudiate the latest move of the Royal Arch. It is a curious thing that for asinine politics for many years the Royal Arch has shown a wonderful facility.

As a matter of good politics, the Grape Protective Association has taken the right course, and if the Grape Association has become a real and sincere convert to the doctrine of local option, so much the better. The real objection to the Royal Arch proposal, however, is a political objection. It is an attempt to defeat the very purpose of the initiative. That device of government is designed to permit the people to have a direct voice in government, but it is seriously proposed that the people use their power to deprive themselves of their power.

The whole thing is fundamentally ridiculous. In a popular government all power resides in the people. The people can limit the power of their presidents, governors and legislatures. They can adopt as rigid constitutions as they please and vouchsafe as little power as they feel in the mood. In fact, something like this was done in the present constitution of California, when under the sand-lot agitation, the people were in no mood to trust their chosen representatives of government but for the people by a constitutional enactment to solemnly deprive themselves of power is the acme of folly, especially as the people inherently possessing full governmental power could as readily undo their own tying at any time they felt so disposed.

The Referee, a paper devoted to the sporting interests and pugilistic en-

terprises of this city has a comment on Abraham Ruef and asserts that he is a power even in prison and that in the coming election the Governor will lose a great many votes because of his attitude in the matter. It also asserts that the newspapers favor the pardon of Ruef and that Older's support of Johnson is half-hearted in consequence and that had Johnson's statement come earlier in the campaign that Older would have broken with him.

This may be true. For it seems that the whole attitude of Older in the matter is taken up with the idea of freeing Ruef. And if he is sane there is certainly no reasonable explanation for his attitude if he is an honest man.

If Ruef was to be pardoned tomorrow this whole movement in favor of the injured criminal would collapse. All this sloppy sentiment over the injured criminal, all this imbecile drivel about the wrongs of society would subside in a moment and the poor friendless criminal could rot in oblivion so far as Older and the slob sisters are concerned.

As to newspapers in San Francisco, we certainly have a prize bunch. There is M. H. De Young, and William Randolph Hearst and Fremont Older. And Governor Johnson has to depend upon these for publicity so far as the reading public of San Francisco is concerned. There is one good thing, however, he can talk and the people go to hear him, and when he speaks it is always like his statement in the Ruef case—there is never anything left to say. And if all the people would go to hear him there would be few, if any, fair minded men left to support the old guard who seek to divert the people from the principles of free government.

Of course the criminal element and the underworld will vote against Johnson and in favor of Ruef. Did not the Chronicle and the Examiner aid and abet the element that dogged Francis J. Heney and the graft prosecution? And did not that same attitude result in the attempted assassination of Heney and the dynamiting of Gallagher's home in Oakland? And now the Bulletin is in the attitude of trying to override the equal protection of the laws.

Governor Johnson certainly has to depend upon the good sense and independent thinking of the common people of San Francisco. In the state the really representative newspapers are with him. The Sacramento Bee and the Fresno Republican, the really ably edited newspapers that have a reputation throughout the country, are his most zealous supporters. And confronting an election where he comes before the people on a record of achievement such as no man ever had before, he is confronted with the situation that he is appealing to them on principle alone and asking them to lay aside political and personal prejudice. It is time for the yeomanry of the state to rally to his support for the attack is being made not in the open, not on the great reforms that have been effected, not on the commissions that the old guard would abolish, but on the hundred and one little personal things that do not concern the vital principles of government.

The report of registration frauds in Alameda county ring up a situation

that is to be regretted, especially on the part of the Progressive party. For all the old guard have been waiting for four years for such a thing to happen and in all human probability it would happen in the course of time. For the practical politician aligns himself with any party where he sees probable success and the hope of gain for himself. So in any new movement or in any reform there are those who are in it for their own ends and they carry with them the methods of the politician in any field. Of course the old guard will claim that these men were appointed to do dirty work. That is the condition that they know. But it is up to the people to judge the Johnson administration by what it has accomplished, to judge the leaders by the manner in which they have met responsibilities and then determined whether or not these men have acted fairly and honestly with the people.

The report is that the Eastern holding company of the United Railroads had no knowledge of the investment of Calhoun in the Solano Irrigated Farms project. And it is the natural thing to believe that had the real estate scheme gone through and the speculation have materialized it would have been Mr. Calhoun that would have realized the profits and not the stockholders of the United Railroads.

If there is any difference between this kind of an act and the banker who uses the funds of the bank to speculate or play the races we fail to see it. Yet Calhoun is the man who has long been held up to the public of San Francisco as possessing such marvelous ability in financial matters that it amounted to genius. If this work stamps a man as a genius there are many embezzlers now serving time who should have the same kind of a rating.

The reports in papers state that the minority stockholders in the New Haven Railroad will sue the directors for 206 million dollars. This to recover money wherein one of the best paying railroads in the United States was wrecked. And this condition was brought about by Morgan and the great financiers whom the champions of special privileges would have us believe possess all the wisdom of the world and should guide the financial destiny of the nation.

Relative to the action now pending by the government to compel a dissolution of the corporation the Fresno Republican has this to say:

"The situation has demanded and is demanding a solution of the difficulties of corporative management too large to be left to the petty jealousies of partisan politics. A large majority of the members of Congress of all parties have shown themselves ready to support the administration in a vigorous course that would compel trust managers, handling not their own money, but the money of tens of thousands of investors, to deal in an honest and conservative fashion with the funds committed to their judgment. President Wilson himself has started out with a view to going at least half way toward national supervision.

But both the President and Congress have seemed, during the last month, to be wavering in the face of the talk of big business that big business must be left undisturbed to work out not only its own fortunes but the fortune

of all the people of the country without any supervision whatever. Big business has bullied little business into the notion that people would cease to eat and wear and build homes if the nation forbid the Morgans and Mellens to use their own arbitrary will in the reinvestment of the millions they get from banks, insurance companies and other avenues for gathering up popular savings.

The revelations, therefore, of the Interstate Commerce Commission, in their timeliness, are a thousand times more important than would be any trial and conviction, later on, through the Department of Justice, of any particular director of the New Haven company."

Several immense dams are being constructed throughout the state that will impound vast volumes of water, in some cases under tremendous pressure. Some of these dams are being constructed of concrete and some of earth. In any case ample provision should be made for the inspection in the course of construction as well as for examination during the period of maintenance. For all of these dams are at high altitudes in the mountains. The valleys below are endangered by the storage of the water above if the dams should ever break. And the havoc that has been wrought in other places indicates the danger latent in the storage of water at such places. The most recent happening of this occurred in Utah.

On the night of May 25th, the Hatchtown Reservoir, on the Sevier River, Utah, 22 1/2 miles south of Salt Lake City, failed. According to "Engineering News," the leakage was noted by the watchman at the downstream toe of the dam, near the end of the outlet culvert. This developed into several small streams; and, later, large sections of the lower face began to slip off and wash away. At 7:30 in the evening, from 100 to 140 feet of the dam went out, releasing over 500,000 cubic feet of water, which had a depth at the point of failure of 53 feet. The immediate cause of the break was leakage along the outer surface of the outlet culvert. The dam has a maximum height of 60 feet deep, and a length along the crest of 750 feet. The dam was built of earth.

The Great Western dam at Big Meadows on the north fork of the Feather river is being constructed of earth. It will impound an immense volume of water. The fall in the river below is steep there being white water for about 40 miles. The rich and populous valley below demands that there be no faulty construction or maintenance of the dam. And the time to determine the safety is in the course of construction.

#### ARTIFICIAL RUBBER PROPOSED AS A BY-PRODUCT OF STEEL MAKING.

It appears that at a recent meeting of the Iron and Steel Institute, in London, the president, in a paper on by-products in steel manufacture, discussed utilizing the gases of blast furnaces for sundry purposes, including the synthetic production of India rubber from coke oven gases, and stated that efforts were being made to obtain from coke oven gases the hydrocarbons, the derivatives of which were found in

India rubber, and that experiments already made fore-shadowed manufacture of artificial rubber.

#### STATE OF CALIFORNIA.

DEPARTMENT OF ENGINEERING,  
CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

**Until 11 o'clock A. M., August 10, 1914.**  
Mendocino County from 2 1/2 miles north of Hopland to Ukiah, 11.3 miles in length, to be graded and a portion paved with Portland cement concrete.

Humboldt County from Miranda to Dyerville (1-Hum-1-C), about 13.8 miles in length, to be graded.

Santa Clara County from Santa Clara to San Jose (IV-S-2-A), about 1.3 miles in length, to be built of Portland cement concrete with asphaltic wearing surface.

Santa Clara County from the northerly county boundary to San Jose (IV-S, Cl-3-A), about 6.5 miles in length, to be built of Portland cement concrete.

**Until 2 o'clock P. M., August 10, 1914.**  
Humboldt County from Shively to Jordan Creek (1-Hum-1-D), about 3.7 miles in length, to be graded.

Alameda County from Greenville to Livermore (IV-Ala-5-A), about 5.0 miles in length, to be built of Portland cement concrete.

Santa Barbara County from El Capitán Creek to Alcatraz (V-S, E-2-F), about 9.3 miles in length, to be graded.

Orange County from Galivan to Irvine (VII-Or-2-B), about 9.4 miles in length, to be built of Portland cement concrete.

Imperial County from Myers Creek to Coyote Wells (VII-imp-12-A), about 6.0 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office, and they may be sent at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Williams, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to reject the bid deemed for the best interests of the State.

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

## The Advertising Value Of A Trade Journal.

By Lloyd C. Comegys.

Advertising fails or is successful, in proportion as to how it is planned or used. It is not sufficient that a doctor take a knife and make a clean cut incision into a patient, but he must know what kind of an incision to make, whether long and shallow or short and deep and also in what part of the body to do the cutting.

Now an advertisement may be well displayed and well printed with good position in a paper and still apparently fail to bring results. The reason being that no thought was first given as to the detail result desired and as to whether the proposed advertisement was the correct method of attaining that result.

Eliminating the Publicity end of Advertising, it being too advanced a branch of the work for the general public to try and handle, and considering only the TRADE NAME part and DIRECT SELLING part of Advertising, we find:

That for the purpose of acquainting regularly and most surely, a large number of serious minded people with the name and quality of your goods and the name and location of your firm that the Trade Journal or paper is one of the best of mediums. And it is right here where this disappointment in a great deal of advertisement comes in, because advertisements that are purely Trade Name advertisements are expected to bring in the returns of Direct Selling advertising.

Never figure on Trade Name advertising alone, but always in connection with a further campaign or effort of advertising or salesmanship along Direct Selling lines.

Trade Name advertising is an important part, but it is only a part of an advertising campaign.

Your little ad coming into an office with every issue is the cheapest and best of ways of reminding people of your existence and your goods.

In Direct Selling campaigns, if the particular Trade Journal or paper covers the field or part of the field you wish covered, it can be made to bring you very great results.

Read your Trade Journals and papers and study carefully how you can use their valuable advertising space for your own advantage and profit.

### A NEW FIRM.

A new firm of manufacturers of Composition Flooring and Marmorite has just been formed with offices and factory at 39 Tehama street, between 1st and 2nd streets, San Francisco, that bids fair to make good in every particular because the members of the firm are both practical men.

Mr. Van Koolbergen was for many years in charge of the great plant of "Magnesiet Exploitatie My," formerly J. J. Van Koolbergen of Rotterdam, Holland. This European firm is well known to the trade throughout the world and also locally.

Mr. P. Crothers has been for years a practical contractor in this vicinity and needs no introduction.

The new firm goes into business with a thorough knowledge of the requirements and chemical composition of Magnesite or Composition Flooring, which qualification is especially important in this particular line of work.

In addition to Composition Flooring, the new firm will make a specialty of Marmorite, a new substitute for marble and tiling. Marmorite is made in different shades, highly polished and is not affected by chemicals or weather conditions.

The samples shown to a representative of the "Builder" promise a great future for this article. It must be seen to be appreciated.

## Rolph, Mills & Co To Handle Conveying Machinery.

Will Represent the Alvey Manufacturing Company With a Complete Line on This Coast in the Future.

The Alvey Manufacturing Company of St. Louis, Mo., manufacturers of all kinds of conveying machinery, has actively entered this market by securing the firm of Rolph, Mills & Co., Rialto Building, as their Pacific Coast agents.

Rolph, Mills & Co., which is composed of Thomas Rolph and H. B. Mills, is a well known and established firm of manufacturers' agents, having offices in San Francisco, Seattle and Los Angeles, handling some of the best accounts on the Coast, among which are Messrs. Joseph T. Ryerson & Son, of Chicago, the Sloss-Sheffield Steel & Iron Company, Birmingham, the Pennsylvania Wire Glass Company, Philadelphia, The Hawaii Hardwood Co. Ltd., of Pahoa, T. H., and the American Perfectite Company, Philadelphia.

In connection with the Alvey Manufacturing Company's agency, they have secured the co-operation of William E. Spink, an engineer who makes a specialty of planning and installing conveying machinery lay-outs for the economical handling of all kinds of products and freight. Rolph, Mills & Company, therefore, are in a position to quote manufacturers' prices direct or prices on the equipment installed. They are also in a position to give expert service and advice in regard to all freight handling problems.

Among the many kinds of equipment handled by this firm are included straight and spiral chutes, gravity and spiral conveyors, movable platforms, belt conveyors, automatic lifts and overhead trolleys, as well as special equipment for breweries, creameries, canneries, etc.

This firm's responsibility and experience insures the best and most efficient service for any one intrusting business to them.

## Increased Tensile Strength of Cement.

Laboratory Test Shows Increase of Nearly Sixty Per Cent With Use of Federal Steel Cement Hardener.

All users of Portland cement will be interested in the following report of a test showing the increased tensile strength in mortar by the addition of Federal Steel Cement Hardener.

This material is composed largely of steel granules of various sizes which, beside lending their natural hardness to the mortar and acting as a minute reinforcing, also slightly expands owing to a small degree of oxidation, and makes the mortar tough and close-grained with a decidedly metallic character. The test was as follows:

Briquets were made from a mortar composed of 100 parts Portland cement and 200 parts sand.

At the end of seven days, these briquets showed a tensile strength of 262 pounds. At the end of twenty-eight days, they showed a tensile strength of 342 pounds.

Simultaneously, briquets were made from a mortar composed of 5 parts Federal Steel Cement Hardener, 100 parts Portland cement, 200 parts sand.

At the end of seven days, these briquets showed a tensile strength of 407 pounds, and at the end of twenty-eight days, a tensile strength of 546 pounds. This shows an increase of 55 per cent and 59 per cent respectively for the two periods.

The above test was made in the laboratories of Messrs. Cowell & Murray, of Cleveland, Ohio. E. A. Bullis & Co., Merchants National Bank Bldg., San Francisco, are the local representatives of the Federal Steel Cement Hardener and will gladly supply interested parties with additional information.

### A CONCRETE BUOY.

Reinforced concrete, during the past few years, has been invading many fields which hitherto have been considered as belonging exclusively to iron and steel. One of the interesting illustrations of this fact is the construction of a concrete buoy at Kingston, Jamaica. It is stated that the cost is only about fifty per cent of the cost of a similar buoy made of steel. To prevent the mooring chain from injuring the bottom of the buoy, the latter is made concave. The manhole cover was grouted into its place after the buoy was afloat. Leakage is handled by means of a small pump-hole provided for that purpose.

### VITALITY OF WOODEN BRIDGES.

Bridges built of timber, and particularly those of the Howe truss type, have shown a remarkable longevity, especially where they are covered in from the weather. A case in point is a bridge over Little River, near Springfield, Mass., which was recently torn down. It was built in 1835 and was only recently removed for reconstruction because of decay in some of the woodwork.

## Up and Down the Coast.

**BURLINGAME, San Mateo Co., Cal.**—The Railroad Commission has ordered the Southern Pacific Company to increase its freight handling facilities at this point. To fill the order the Southern Pacific has purchased a block of land at the junction of the S. P. right of way and Peninsula avenue, and will at once begin the construction of modern freight sleds and the necessary spur tracks.

The Associated Oil Company has also purchased property here and will soon commence the construction of a new plant from which will be distributed oil throughout the entire peninsula district.

**ALAMEDA, Alameda Co., Cal.**—Despite the protests of residents and property owners, the City Council has decided to improve High street at the north end leading to the High street bridge. The improvements will call for the laying of asphalt and for the raising of the grade near the approach to the bridge.

**SUSANVILLE, Lassen Co., Cal.**—The City jail here has been found to be unfit for human habitation. A movement has been started to secure the erection of a new building.

**OLIOVILLE, Butte Co., Cal.**—The Great Western Power Co. has a crew of men at work on its project in Big Meadows. The head-dam across the Feather River is to be raised 10 feet. The dam is now 65 feet high. This addition to the dam is needed because of the new units being added to the power plant at Big Bend, just above Oroville on the Feather River.

**NORTH SACRAMENTO, Cal.**—The two school sites selected by the North Sacramento School Trustees were almost unanimously endorsed at the citizens' meeting held last Monday evening.

As a result of the meeting the trustees announced that they would advertise for bids on the \$15,000 school building to be erected at the junction of the Marysville Road and the Auburn Boulevard and for the \$5,000 school building to be erected on Arcade Creek, near the Marysville Road. The bids will be opened in fifteen days and as soon as the contracts are awarded construction will be started.

**MARYSVILLE, Yuba Co., Cal.**—Supervisor T. F. Whipple of Butte County was laid before the Board of Supervisors of Yuba County the proposition of building a new bridge over the south fork of Honcut Creek. Whipple states that the old bridge is subject to a heavy and continuous traffic which makes it unsafe. The Yuba County Board have agreed to hold a joint meeting with the Butte Supervisors to discuss the matter with the engineers.

**GLENN ELLEN, Sonoma Co., Cal.**—The Grand Order of Druids has purchased a large piece of ground here and are contemplating the erection of a home for their aged members. While no architect has been selected, it is thought that construction will be started at an early date.

**RICHMOND, Contra Costa Co., Cal.**—City Engineer Chapman has been instructed to prepare plans and specifications for the improvements of 16th street with a concrete base and a bit uthle wearing surface.

**YUBA CITY, Sutter Co., Cal.**—July 20th is the date set for a meeting to

discuss matters relating to the bonding of the county for bridges and roads.

**CHICO, Butte Co., Cal.**—Plans and specifications for the new bridge to span Big Chico Creek at the intersection of Main street and the Esplanade, have been completed by the County Surveyor. The plans call for a concrete structure to be reinforced with steel. Bids will be called for at an early date.

Plans for a concrete bridge across the slough at the Parrott Grant lane, to be 260 feet long and a 50 foot bridge across Crouch slough have also been completed.

**VALLEJO, Solano Co., Cal.**—Information has been received here that the Southern Pacific Company will soon start the construction of a large passenger station and freight depot to be erected at the foot of Marin street. In addition to the depot a slip is to be constructed to accommodate large ferry boats.

**WOODLAND, Yolo Co., Cal.**—The Supervisors have ordered County Surveyor Ashley to rebuild the bridge which was torn out during the time of the high water in Yolo Basin, to allow a dredger to pass through, the expense of the reconstruction to be paid by the districts.

**DIXSMITH, Siskiyou Co., Cal.**—The Dunsmuir Bottling Works here, owned by Lee Hamilton, was destroyed by fire. The loss is estimated at \$10,000 part of which is covered by insurance. **DIXSMITH, Siskiyou Co., Cal.**—Bids for the construction of the proposed new Shasta Springs-McCloud cut-off road will be received by the County Clerk at Yreka until Tuesday, August 4th. The county intends to construct the cut-off road to connect McCloud with the State Highway, giving a shorter and better road.

**NEVADA CITY, Nevada Co., Cal.**—The Elks Lodge of this city has decided to rebuild their home which was recently destroyed by fire. A special meeting will be held for the purpose of selecting an architect and for the adjustment of the insurance.

**WOODLAND PRAIRIE SCHOOL DISTRICT, Yolo Co., Cal.**—Sealed proposals will be received by the Board of Trustees until July 15th for the erection of a public school house. Plans and specifications may be obtained from the Superintendent of Schools, Courthouse at Woodland. A certified check made payable to the Superintendent of Schools for an amount not less than 10 per cent of the aggregate of the proposal must accompany each bid.

**WATSONVILLE, Santa Cruz Co., Cal.**—The Trustees of the Watsonville School District will receive bids until July 15th for furnishing of fifty tons of coal to be delivered to the various school houses in this city. Bids will be opened in the High School Building at 5 P. M.

**REDDING, Shasta Co., Cal.**—Plans and specifications for a new street bridge across Pit River at MacArthur have been approved by the Supervisors. The span will be 200 feet. Bids are now being called for and will close September 10th.

**IGNACIO, Marin Co., Cal.**—The California Fruit Cannery Association has a large amount of construction under way here. Dredging and ditching amounting to \$8,000 has already been accomplished with more work in view.

**FRESNO, Fresno Co., Cal.**—The cost of reclamation work in the newly

formed Stinson-Burrell district will reach \$210,000, according to a report filed with the Board of Supervisors by Engineer I. Teilmann. The work will include the construction of two levees 800 feet apart following the main channel of the sloughs.

**TAFT, Kern Co., Cal.**—The Producers Transportation Company of this city are now making extensive preparations to reinforce its culverts along its line from Junction to San Luis Obispo. More than 200 tons of cement will be used in the work. It is planned to have the work completed before the fall rains.

### BUREAU OF MINES.

New Publications, (List 30,—July, 1914)

#### BULLETIN.

Bulletin 73. Brass-furnace practice in the United States, by H. W. Gillett. 1914. 208 pp., 2 pls., 23 figs.

#### TECHNICAL PAPERS.

Technical Paper 45. Waste of oil and gas in the Mid-Continent fields, by R. S. Blatchley. 1914. 57 pp., 2 pls., 15 figs.

Technical Paper 70. Methods of recovering oil in California, by Ralph Arnold and V. R. Garfias. 1914. 57 pp., 7 figs.

Technical Paper 73. Quarry accidents in the United States during 1912, compiled by A. H. Fay. 1914. 45 pp.

Technical Paper 75. Permissible electric lamps for miners, by H. H. Clark. 1914. 21 pp., 3 figs.

**NOTE.**—Only a limited supply of these publications is available for free distribution, and applicants are asked to co-operate in insuring an equitable distribution by selecting publications that are of especial interest. Requests for all papers can not be granted without satisfactory reason. Publications should be ordered by number and title. Applications should be addressed to the Director of the Bureau of Mines, Washington, D. C.

## HORIZONTAL ELEVATORS ARE TO BE LATEST.

**DULUTH, (Minn.), July 17.**—That the skyscrapers of the near future will contain many new features is the prediction of C. A. Patterson, Secretary of the National Association of Building Owners and Managers, in addressing that body here.

"Innovations," said Patterson, "is the middle name of the modern skyscraper. It will be a very short time when big office buildings will have elevators running not only up and down from the street to the top of the building but running horizontally on different floors. Furthermore, patrons will pay fares to ride on these elevators and get transfers from the vertical lifts to the horizontal, just as we get them on the street cars now.

"They will pipe pure air from the country right into the big city buildings, just as they pipe pure water, and bungalows built on top of tall buildings will house the owners in summer. A building permit for such a bungalow already has been taken out in Chicago."

## Editorial Comment.

The disclosures in the investigation of the books of the United Railroads are reported to be that Calhoun took more than 5 million dollars from the treasury. This coupled with the fact that most of the books covering the period of the graft prosecution have been destroyed indicates what was done with the money of the people who owned the stock and securities and the income derived from the operation of the property.

Certainly this was a great bunch to be "held up" by a corrupt Board of Supervisors! Certainly this was a corporation to look after the welfare of the people. And the Chronicle and the people who have so long championed the private ownership of the street railroads must feel elated at the disclosures.

When one remembers the great messages that Patrick Calhoun used to send out addressed to the "People of San Francisco"—in the light of the facts disclosed it looks like the "People of San Francisco" were imbeciles to stand for such colossal effrontery.

This kind of work by the Railroad Commission is what is determining all the old line bunch to bond together in the get-the-Johnson league. He has done and is doing effective work. And when one ceases to talk and really does something then the pack of wolves immediately jump on his back.

In commenting on the recent developments in the United Railroads tangle and of Patrick Calhoun's part in particular, the Sacramento Bee prints the following in its editorial:

That Patrick Calhoun is one of the greatest rascals ever known in California is a necessary conclusion from the facts unearthed by the Railroad Commission in its investigation of the affairs of the United Railroads.

Were it not for the admissions of officers and directors of the corporation it would seem beyond belief that Calhoun was allowed to draw large amounts from its funds as he pleased, without even pretense of vouchers. And these diversions, which in reality were downright thefts, were by his orders carried on the books as "cash on hand."

They were no more "cash on hand" than the thefts of a bank cashier or teller are "cash on hand."

Calhoun stands revealed as much a thief and scoundrel as is any ordinary employe who embezzles money confided to his care, no matter how much he may intend to restore it "if all goes well."

In fact, many an embezzler in San Quentin or Folsom is less of a thief than Calhoun, who lacked even the

poor excuse of poverty and misfortune.

The declaration by the Auditor for the Railroad Commission, that at the time of the last annual report of the United Railroads there was an actual but not reported deficit of \$1,880,471, of which \$3,906,909 cannot be accounted for, is startling in its significance, even to persons accustomed to reading of unscrupulous juggling with the funds of great corporations.

Just how much of that enormous shortage went into the pockets of Calhoun remains to be found out. But it is practically admitted by Thornwell Mulhally, who was Calhoun's assistant, that more than \$1,000,000 in cash was drawn from the company's treasury by that greedy robber between 1911 and 1913.

That was all prior to Calhoun's final big grab of \$1,096,000 last year, which he afterwards said he had invested in the Solano Irrigated Farms project.

But now President Lillenthal says that to the best of his knowledge only \$300,000 of that \$1,096,000 had been invested in the Solano enterprise, and he does not know what became of the remainder.

Yet not long ago Calhoun had the brazen hardihood to assert, in a written statement, that he had invested the whole sum of \$1,096,000 in the Solano project to expand the transportation business of the United Railroads.

Although he never pretended the money was invested in the name of that corporation, yet the declaration that it was for the company's benefit added lying and hypocrisy to his crimes of theft and breach of trust.

Calhoun, speedily should be indicted, and put in jail to await trial for his colossal embezzlements. He richly deserves a long term in the penitentiary.

The common thief, burglar and highway robber are respectable compared with a rich man at the head of a street-railroad corporation who deliberately, systematically and continuously plunders the stockholders and increases the burdens of the public.

In this instance the defendant is the wife of a former Premier, of some claims to beauty, and a clever pleader in her own defense. She is making cunning bids for sympathy at every opportunity. And as under such circumstances it is seldom that a conviction is had, there is a fair prospect that she either will be acquitted or found guilty of a minor offense.

It looks like a plain case of deliberate murder; mitigated, however, by the atrocious behavior of the disreputable editor who provoked the homicide—if charges be true as to his conduct and intentions.

## A Concise History Of The Development Of Electricity.

Discovery, Evolution and Application to the Needs of Industry.

The following address was delivered before a recent meeting of the Winnipeg Builders' Exchange by J. H. Schumacher, secretary-treasurer of Schumacher-Gray Co., Ltd., contracting electrical engineers:

So rapidly have the applications of electricity to the wants of industry followed one another during the last thirty-five years that it may seem as though the whole science had been practically developed during that time, and yet the real foundation work, made the almost innumerable electrical contrivances of today possible, was mainly laid before that period.

Although the science has been placed on a mathematical basis, and results figured very readily, the definition of electricity has yet to be given, and many philosophers are still devoting their lives to finding the correct definition.

Electricity was manifest to primitive man in its most powerful and uncontrollable form—that is, lightning. He did not understand the exact cause and nature of lightning, and in Greek mythology it was taught that the god Jupiter was expressing his wrath at the wrong-doing of the people when he hurled his thunderbolts from his throne on Mount Olympus. In the year 600 B. C. Thales, the father of Greek philosophy, discovered that amber, when rubbed, attracted light bodies, and he believed that amber had a soul. Nothing further was discovered for the next 2,200 years, until Dr. Gilbert, an English scientist, discovered that certain other materials, when rubbed like amber, had the property of attracting light bodies like a magnet. The Greek word for amber is "Elektron," and it is from this that Dr. Gilbert derived the word "Electricity." This was in the year 1600.

Sir Isaac Newton, in 1700, discovered that it was possible to create sparks several inches long by rubbing a ball of sulphur between the hands. In 1749 Benjamin Franklin, at a picnic, made the first practical use of electricity by killing a turkey with electricity and roasting it in a fire kindled by an electric spark. In 1752 he established the identity of the electric spark and lightning by drawing electricity from a cloud by means of a kite. He was the discoverer of the lightning rod as a protection of buildings against the lightning. He also advanced the theory that electricity was fluid.

### Galvanic Action Accidentally Discovered.

Such was the state of the knowledge of electricity about the year 1800. Near this time Galvani, an Italian professor of anatomy, wished to tempt the appetite of his wife by making her some soup of frogs. He had skinned the frog and hung it on a copper hook, so that in dangling in the wind it hit an iron rail a short distance below. He noticed that every time the legs made a contact with the rail the dead frog's legs would twitch, and in later experiments produced the twitching by touching the nerve of the limb with a rod of zinc and the

muscle with a rod of copper in contact with the zinc rod. Galvani thought he had discovered the principle of life, and built up on these experiments a theory that now seems absurd. When he died little did he think of the renown that his frogs would win by leading to the principles that were responsible for our electric battery cell of today.

Alexandra Volta, an Italian professor of physics, heard the story of the frogs and continued the experiment, which proved that the electricity was not in the animal, but was generated by the contact of two dissimilar metals and the moisture of the flesh. He then produced the famous volta pile, which consisted of placing a series of bits of copper and zinc alternately one above the other, but each separated by a piece of cloth wet with dilute acid. Since the day of Volta the voltaic cell and galvanic battery have been greatly improved, yet they remain essentially the same in principle, and therefore science gives of Volta the credit of having made the force in nature serviceable to man, and honored him by calling the electrical unit of force or pressure, the volt.

Professor Oersted of Copenhagen discovered, in the year 1820, that wire carrying an electric current acted upon the needle of a compass, thus showing the relation between magnetism and electricity. Oersted's discovery set a French philosopher named Ampere to work along the same lines, and he established certain laws of electromagnetic induction in mathematical form. Several years later Michael Faraday, an English scientist, discovered electro-magnetic rotation and developed the electromagnet. This was about 1820, and with these principles established, the telegraph, telephone, electric motor, dynamo, together with the transmission of power, follow step by step in rapid order.

### Invention of the Electric Motor.

The germ of the electric motor is found in the inventions of Joseph Henry, an American, who was one of the most prolific inventors of the world, although he was little known to the public. In 1829 Jacobi, a German, made probably the first application of the electric motor, when he propelled a boat on the River Neva with a one horse-power motor. About the middle of the century Jacobi found that by placing two dynamo electric machines in one circuit, one as a generator and the other as a motor, it was possible to transmit mechanical power of electricity.

The first machine of sufficient capacity to operate an electric lamp was in Brussels, but strange to say, this machine was built with the absurd object of using it to decompose water and employ the resulting gases to produce light.

### The Advent of Electric Light.

Electric light was first thrown on the sea from the South Foreland light-house in England on December 8, 1858.

The arc lamp was made known by Sir Humphry Davy at the beginning

of the century, but little was done in using this type of lighting because of the inability to get enough current to operate it, until after the dynamo was a commercial success. Since that time the arc lamp has been greatly developed by using different materials for the carbon, and up to the present time is about the most efficient form of lighting, but has the objection of being too intense for interior lighting, and is really only adaptable to street lighting.

It was not until about 1880 that Edison really constructed an incandescent lamp that was of any commercial value. His original lamp had a platinum filament, which he afterwards changed to carbon, and the lamp has practically remained in this form until the present day. About ten years ago the tantalum and tungsten lamps were placed on the market. They were three times as efficient as the old carbon lamp. In the present year great improvement has been made in the tungsten lamp by filling the bulb with nitrogen gas instead of the vacuum. This change has increased the efficiency over 100 per cent. Only about 10 percent of the available amount of energy in electric lighting is given out in light, and the remainder in heat.

Scientists are now working on what they call the cold light, similar to that of the firefly, which will give a more efficient light. Many other types of lamps are in use, but only used for special purposes, such as the Cooper Hewitt lamp, in photography.

It was about 1850 that induction coils were commercially built, and the common electric door bell was developed about this time. From this developed the alternating current transformer, and C. F. Varley, of London, took out patents, but it was not until 1879 that J. B. Fuller, of New York, was first to recognize the value of the transformer.

In 1885, transformers were first used in London in the manner of operation as we use them here in Winnipeg for reducing the voltage from 2,200 volts to 101 volts for lighting.

Since 1885, transformers have increased in size, efficiency and operating voltage. Transformers of 5,000 kilowatt capacity and 98 per cent efficiency are common. Many transmission lines are operating above 110,000 volts.

In 1882 Nikola Tesla, an American inventor, exhibited before the Royal Institution of London the alternating current motor, all motors previous to that time having been of the direct current type. By means of Tesla's apparatus, a force of 77 horse-power was transmitted 110 miles from the falls of the Neokar to Frankfort-on-the-Main. Just a few months previous to this, however, power was transmitted 13 miles from the falls of the Willamette River in Oregon to Portland, in a larger amount than that of the Neokar experiments. These experiments naturally attracted engineers to the possibilities of the utilization of the world's greatest waterfall at Niag-

ara, where there is a possible maximum of 7,000,000 horse-power.

It was in 1877 that Siemens, the great German inventor, prophesied that in a few years the great waterfalls like that of Niagara would be utilized to generate electricity, and to transmit by its means electric light and power to the surrounding industrial stations. It seemed like a wild dream then, but before twenty years had passed it had been realized, and today the power of Niagara is turning machinery, running street cars and lighting the streets in the cities of Buffalo, Toronto and many other cities of Ontario and New York. The generators are of 5,000 horse-power each, the largest up to that time having been 2,100 horse-power at the Chicago World's Fair. The Niagara Falls Power Company's plant was completed in March, 1895, but power was not used in Buffalo until November, 1896.

#### Long Distance Power Transmission.

In May, 1896, it was demonstrated that power may be transmitted from Niagara Falls to New York city, when current of 1-30 horse-power was transmitted over the Western Union Telegraph Company's wires to run a working model of the Niagara Falls Water Company's plant at the New York Electrical Exposition. This was the longest distance that power was ever transmitted. Long distance power transmission is not confined to Niagara Falls, as in California power is transmitted over 241 miles at 150,000 volts. Up to the present time voltages higher than this have not been commercially attempted, as the difficulty is in the insulation of the transmission lines, and insulating materials have not quite kept pace with the increase of line voltages. The Keokuk (Iowa) power development on the Mississippi River is the largest at the present time, and was just put into operation less than a year ago.

In the province of Manitoba there is over three million available horse-power, but up to the present time only 50,000 horse-power has been developed, and is practically all used in Winnipeg and vicinity.

The power drives in factories and industrial plants have undergone great transformations due to the developments of waterfalls. Electric motor drives have caused an enormous saving of power over that required when steam or water power is used direct to keep a multitude of pulleys and belts and shafting in operation. It was found in the Waltham watch factory, and also in the Baldwin locomotive works, that 75 per cent of the engine power was absorbed by the gears and shafting without a single machine on duty. The use of electric drive has made a great change in the building construction of factories, as such buildings are now built with thinner walls and floor slabs, and a great amount of vibration of the machinery is eliminated. Most belts and shafting are done away with, and there are now more light and sanitary factories than ever before. It is said that in the cities of New York and Chicago as many people travel vertically as horizontally, and the favorite method of propelling elevators is by electricity. It seems almost incredible, when considering the extent of the elevator industry, that the first use of electric power on a freight elevator was in New York in 1882.

#### History of Telegraphy.

We can look back with interest into another branch of the business—the telegraph. The telegraph was the dream of many scientists in many countries, and it is the popular impression on the American continent that it is exclusively an American invention, and almost exclusively the product of Samuel F. B. Morse, but this impression is erroneous.

It was in 1832, shortly after Oersted's discovery, that Schilling, a Russian, devised a system of telegraphy, using thirty-six needles that were deflected by currents in the wires. In 1839 the first telegraph for public use in the world was opened in England. It was 20 miles long, and of the *Stigle* needle type. The wires were suspended in goose quills on posts. Commercial business was taken, but evidently the income of the line was derived from the exhibition of its working. Although admission was only a shilling, and children half price, it was not well patronized, until its fame was spread abroad by the capture of a murderer through its aid. The murderer after committing the crime took a train, but was surprised at being arrested on his arrival at his destination, as his description had been telegraphed. The early telegraph systems were rather impractical, and the credit for the electromagnetic telegraph, which is the basis of the one used today, belongs to Samuel Morse. The story of his financial difficulties is interesting, and also of how his friends laughed at his so-called useless toy. He received a little financial backing from Alfred Vail, and in 1838 filed a caveat in Washington, and took his instrument to Washington and exhibited the telegraph on a ten-mile circuit before President Van Buren. He then appealed to Congress for \$30,000 to build a 50-mile line, but was turned down. For two years he wandered about Europe and then returned, and in 1841 went again to Washington and set up his instruments and appealed to Congress for aid, and the appropriation was passed on the last night of the session. He then began the line from Washington to Baltimore. The first ten miles of line was laid in pipe, but they found that the line would not work, so the entire line was run overhead on poles. It was in May, 1844, that he sent the first message. He then invented the Morse code of telegraphy, and the signs were sent by setting the signals on a cylinder and turning it at uniform speed, and the messages were received on a strip of paper run by clockwork. The reason for this was that the impression was that an operator could not make a good enough distinction between dots and dashes. The use of the telegraph then began to be a commercial proposition and used for transmitting news. Lines were built all over the United States and Europe. In time it became necessary to build more lines, or find some means of transmitting more messages over the same wires. This led to the invention of the duplex system in 1852 by Stearns of Boston, which allows two messages—one each way—to be transmitted simultaneously. A few years later Edison and Stearns devised the quadruple system in which four messages—two each way—could be transmitted simultaneously over the same wire. This is the system now used mostly by the telegraph companies.

In 1850 a cable was laid across the English Channel, but the cable broke after transmitting a few signals. In 1851 a new cable was laid. A cable was also laid across the Hudson River between New York and Jersey City, using gutta-percha as an insulation.

For communication between Europe and America, the Atlantic ocean seemed an insurmountable barrier, but Cyrus W. Field organized a company in 1851 for this purpose, and after twelve years of disappointing failures they succeeded in their object. Five cables lay at the bottom of the Atlantic ocean from Field's attempts before communication was accomplished in 1866, and represented millions of dollars. Since that time cables have girdled the globe and now any part of the world is within a few minutes' communication of any other civilized part.

Great as the telegraph is, still greater is the telephone, when you consider that it is a daily occurrence for people to talk from New York to San Francisco and understand one another as easily as we do over the telephone in our own city.

It was in 1860 that Philip Rees, a German school teacher, discovered the principle of the telephone. In 1876 Alexander Graham Bell and Elisha Gray almost simultaneously invented successful speaking telephones. After a great amount of litigation in the courts, Bell apparently established his right to the invention, and has reaped the profit. The greatest use of the telephone is on the American continent, and it is not so extensively used in Europe. In Europe methods of business were established before the telephone came into use, and it has been hard to find use for the telephone. Consequently the service is very poor. In America, however, it is just the reverse, as business has adapted itself to the telephone, and there are now more telephones in the United States than in all the rest of the world.

#### Wireless Telegraphy.

A more recent development in communication is that of the wireless telegraph. As early as 1838 certain effects were noticed in experiments, and it was observed that messages could be transmitted without wires within the same room. In December, 1842, Professor Henry, of Princeton University, sent a wireless telegram across a canal 80 feet wide. Sir William Preece arranged a system in 1882 between the English coast and the Isle of Wight to transmit messages without wires.

Hertz, in 1886, made some complete experiments in the study of electric waves, the result of which gave a tremendous impetus to the development of wireless telegraphy. Sir Oliver Lodge made some greater discoveries in this line in 1889, and other investigators made certain improvements along the proper lines until 1896, when Marconi, an Italian, worked with Sir William Preece, and they together developed a feasible commercial proposition. In August, 1907, Marconi organized a \$5,000,000 company and tried out his proposition in his own country at Rome.

The Canadian Government invited Marconi to try his experiments in this country, and gave him all possible assistance. He erected a station at Glace Bay, and in December, 1902, sent his first radiograms across the Atlantic to the Kings of England and Italy.

On January 16, 1903, a complete radiogram was sent by President Roosevelt to the King. Dr. Lee de Forest has also invented a system which transmits more rapidly than the Marconi system, and is used extensively in the United States. Communication has been established between Manhattan Beach, New York, and Colon, Panama, a distance of 2,170 miles. A still greater distance has been covered from Arlington Heights at Washington to Eiffel Tower in Paris. Most of the modern ocean-going vessels have their own wireless systems, and since the Titanic disaster all vessels in the English and American merchant marine have been compelled to install wireless systems.

#### Electric Traction.

One thing it would be well to touch upon is the question of rapid transit in cities by means of electric railways. It has caused cities to grow much faster than before, as it now places people in the suburbs within easy reach of their offices. It has given the real estate man a chance to raise the value of property in the outlying districts, as they no longer talk of so many miles away, but so many minutes from certain points in the city. We can now call our country friends our neighbors on account of the short time that is between us.

Electric railways were in the toy stage until Siemens and Halske built a short line of 1-3 of a mile in 1879 at the Berlin Exposition. The locomotive drew three cars, having a capacity of twenty people, and attained a speed of eight miles per hour. The current was supplied with a third central rail, the running rails were used as a return.

In 1879-80 Mr. Sprague, of the United States navy, was ordered on duty at the Crystal Palace Electrical Exposition in London, and there used the overhead trolley. In the United States

Charles J. Van Depoele, a Belgian by birth, constructed an experimental line in Chicago in 1883, and a year later installed a line at the Toronto Exposition. The cars in their present form were first used in 1885 in South Bend, Ind., and Minneapolis, Minn., where they replaced steam locomotives that ran as street cars. You will understand that the electric railway has made rapid developments since that time, and is still only adaptable for the more thickly settled communities.

In the operation of the equipment of the Panama canal, nearly everything is operated by electricity, because it is the most efficient and quickest method of handling the locks and towing the vessels through the canal.

Electro metallurgy, the process of depositing pure metals, has a large field in copper, silver, gold and aluminum industries. The electric furnace has brought about great developments in the mining industry, as the electric arc is the hottest flame known. The greatest use of the electric furnace is in Germany and Sweden, the latter giving the world the purest iron.

Electricity has found its way into all branches of industry and science, and surgeons are using it to a great extent in their work. It has found its way into the home, and I just noticed recently that 103 electric ranges were installed during the past week in Winnipeg. In the city of Winnipeg over 2,500 electric ranges are in use, and no other city in the world approaches these figures in the cooking line. No doubt inside of five years many houses will be heated by electricity. Winnipeg affords the best opportunities on the American continent today for future development, and the low rates that prevail here will make it one of the foremost cities in the world.

the building will be faced with pressed brick. Plans are being prepared.

**ASTORIA, ORE.**—Apartment house, 3 story and base, frame, \$25,000. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owners, F. A. Merrill et al. The building will cover an area of 60 by 85 feet and will be arranged for a number of two and three room suites. Interiors will be finished in pine throughout. Plans provide for steam heat, an automatic elevator and hot water system. Bath rooms will have tile wainscot and composition floors. Wall beds will be used in all suites. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for at once.

**LOS ANGELES, CAL.**—Apartment house, 2 and 3 story and base, brick, \$50,000. Architect, Edward C. Taylor, Consolidated Realty Bldg., L. A. Owners, Southern California Brick Co. The building will be erected at the corner of Stephenson and Soto streets, covering an area of 157 by 85 feet. There will be a total of 100 rooms, divided into two and three room suites. Interior will be finished in pine and hardwood. Plans provide for steam heat and a hot water system. All suites will have wall beds and private bath rooms. Entrance will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are nearly complete and the work will be done by Day Labor.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, brick. Cost not stated. Architect, L. J. Jones, Central Bank Bldg., L. A. Owner, Mrs. Allie Tompkins. The building will be erected on 6th street near Burlingame and has been designed to contain 32 rooms which will be arranged in two and three room suites. All apartments will have wall beds and private bath room. Interior finish will be of pine with some elm panels. There will be steam heat, automatic elevator and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans have been revised and new figures will be called for shortly.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, L. J. Jones, Central Bldg., L. A. Owner, Isadora Cohn. Contractor, George A. Ward, Grant Bldg., L. A. Contract price not stated.

#### BATH HOUSES.

**SAN RAFAEL, MARIN CO., CAL.**—Bath house equipment. Cost not stated. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. Bids are being called for on revised plans for the mechanical equipment for the Municipal Bath House at San Rafael. The work will consist of water heating system, steam heat, power generating equipment, laundry equipment and engine. Plans and specifications can be had from the architect.

#### BONDS.

**YUBA CITY, SETTER CO., CAL.**—Bonds in the sum of \$500,000 will be voted in this county at the general

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

#### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on Mission street between 6th and 7th streets. There will be a number of two and three room suites with private baths and wall beds. Interior will be finished in pine and elm panels. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of California street east of Leavenworth and has been designed to contain a number of four room suites. Interiors will be finished in pine with some hardwood floors and wainscot. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. All suites will have wall beds. Exterior of the build-

ing will be covered with cement plaster on metal lath. Marble and tile will be used in the entrance. Plans are now being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house addition, 2 story and base, frame, \$10,000. Architect, A. Howard Peterson, Blake Bldg., Oakland. Owner, Fletcher Ames. This work will consist of remodeling a hotel and store building into a modern apartment house. There will be new interior finish, painting, plastering, plumbing and electric work. Wall beds will be used. Some exterior alterations will also be made. Plans are complete and figures are now being taken.

**RICHMOND, CONTRA COSTA CO., CAL.**—Apartment house, 2 story and base. Cost not stated. Architect, James T. Nabrett, Richmond. Owners, Cray, Brown & Heinzen. The building will be erected on Macdonald avenue, and has been designed for stores on the first floor and a number of two-room suites above. The building will have a frontage of 50 feet. Interior will be finished in pine throughout. There will be wall beds and hot water system. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of

election in November. This has been decided by the Supervisors who will take the matter up for definite discussion on September 14th. The money will be used in the construction of roads and new bridges throughout the county. Providing the issue carries a portion of the money will be expended in the construction of a road between Yuba City and a point south of Nicolaus, which would join with a new road now being constructed by Sacramento County out of the capital city. A bridge would also be constructed over the river at Nicolaus for the purpose of dispensing with the ferry.

**DINUBA, TULARE CO., CAL.**—The Trustees of the Kingsburg joint union high school have purchased a site for a new high school building consisting of ten acres. A bond election will be held in the near future for the voting of bonds to erect a new school building.

**RED BLUFF, TEHAMA CO., CAL.**—The Supervisors here have adopted resolutions to purchase sufficient state highway bonds to build the state highway from the Butte county line north through Los Molinos to Red Bluff, the county to build all the bridges. The amount necessary to construct this strip is estimated to cost \$195,000 and the supervisors are prepared to buy the bonds to this extent. Definite action has been urged by T. H. Ramsey, chairman of committee appointed by the Board to interview the State Highway Commission recently. The Supervisors of Tehama county have also decided to call a bond election to provide for approximately \$200,000 for bridges throughout the district, mostly along the proposed state highway from the Glenn County line to the Shasta County line. Should the issue carry the following bridges will be constructed—Sand Slough bridge, \$125,000; from Butte County line to Los Molinos, \$9,500; from Glenn County line to Shasta County, \$31,500. There are a few other bridges for which the county surveyor has prepared plans and specifications; these also will be constructed.

**SACRAMENTO, CAL.**—The Board of Supervisors have decided to call a bond election for \$2,425,000 for improved highways in Sacramento County to be constructed under the report presented by the Sacramento County Highway Commission.

**SHANDON SCHOOL DISTRICT, SAN LUIS OBISPO CO., CAL.**—The Commercial Bank of San Luis Obispo has purchased the bonds of the Shandon School District amounting to \$4,005. The money will be used in the construction of a school building.

**MUNROE SCHOOL DISTRICT, SONOMA CO., CAL.**—A special bond election will be held here on July 30th for the purpose of voting bonds in the sum of \$3,900, the money to be used in the construction of a school building.

**CURTIS CREEK SCHOOL DISTRICT, TUOLUMNE CO., CAL.**—A bond election will be held here on August 10th to vote bonds in the sum of \$75,000. The bonds are in the denomination of \$750 each, bearing 6 per cent per annum. Should the issue carry the money will be used in the building and furnishing of a school building and the preparing of the grounds.

**SEBASTOPOL SCHOOL DISTRICT, SONOMA CO., CAL.**—By a vote of 114 to 53 the proposition to bond this district to the amount of \$20,000 carried. There were only two votes over the re-

quired number. The funds will be expended in the buying of additional grounds and the construction of a new high school.

**DOWNEY, LOS ANGELES CO., CAL.**—A bond election will be held in the Dallatin School District on August 10th for the purpose of voting bonds in the sum of \$10,000 for the erection of a school building and the purchasing of the necessary apparatus for same.

**LOS ANGELES, CAL.**—The Railroad Commission has rendered decision, authorizing Davies Warehouse Company of Los Angeles to issue \$250,000 face value of bonds to be sold at not less than 90 and bearing 6 per cent interest. Proceeds of the sale of the bonds will be used to erect two five-story fireproof warehouses at East 2nd and Central Avenues, in Los Angeles.

**REDLANDS, SAN BERNARDINO CO., CAL.**—The Holton Power Company of Redlands has asked authority to issue \$200,000 par value gold bonds. Funds will be used in the making of additions and extensions to the present electrical plant.

**NEHALEM, ORE.**—The election for the issuance of \$12,500 in bonds for the purchase of the local water system, the construction of a reservoir and for the building of an electric light plant by the municipality carried here by a large majority.

**HOOD RIVER COUNTY, ORE.**—Bonds amounting to \$75,000 were voted here and carried. The proceeds of the sale will be used for the completion of the Columbia Highway units. Plans for the improvement will be prepared under the supervision of Major H. E. Bowby, state highway engineer.

**RICHMOND, CONTRA COSTA CO., CAL.**—At a special election held here on July 22nd a proposed issue of \$2,500,000 in bonds to provide for a municipal water system serving Richmond, Stege, Rust, San Pablo and Grant from Teland's Landing on the Sacramento River was defeated. The vote was 1616 in favor of the issue and 921 against, which gave 74 ballots less than the necessary two-thirds majority. About 55 per cent of the total registered vote, 4600, turned out. Water Commissioner R. H. Curry stated that he and his fellow workers were not discouraged and would attempt again to have the communities authorize the bonds.

**DALY CITY, SAN MATEO CO., CAL.**—The Railroad Commission has rendered a decision on the application of the Crocker Estate Company for an appraisement of its water system in Daly City. This city has recently voted \$100,000 bonds for the construction of a water system and the Commission was asked to place a value on the Crocker property. The Commission's engineer found the value to be \$30,816.

**MODESTO IRRIGATION DISTRICT, STANISLAUS CO., CAL.**—The State Railroad Commission has declared, after a thorough investigation into the resources, finances, and the future of the Modesto Irrigation District, that it is wealthy enough to stand a further indebtedness of \$610,000 to carry on proposed improvements. The company is taking water from the Tuolumne River, and obtains two feet of water on the land the year round if necessary. The water right is assessed by the commission at \$1,225,000, while the value of contiguous land is \$15,291,000.

## BRIDGES AND DAMS.

**SAN FRANCISCO**—Ferry slips, timber pile construction. Cost not stated. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans and specifications have been approved for the construction of two new ferry slips at the south end of the Union Ferry Building. Bids are now being called for and will be opened by the State Board of Harbor Commissioners on August 13th. Plans and specifications can be secured from the Harbor Commissioners.

**WATERFORD, STANISLAUS CO., CAL.**—Road Bridge, reinforced concrete and steel. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans are complete and have been approved for the construction of a reinforced concrete and steel road bridge to be erected near Waterford. Bids are now being taken and will be opened on August 10th. Plans and specifications can be secured from the engineer.

**WALNUT CREEK, CONTRA COSTA CO., CAL.**—Bridge, reinforced concrete construction. Cost not stated. Engineer, County Surveyor Elam C. Brown, Martinez. Owners, Contra Costa County. The bridge will cost between \$7,500, and \$8,000, and will be erected near Walnut Creek. Plans are complete and have received the approval of the Board of Supervisors. Bids are now being taken and will be opened on August 3rd. Plans and specifications can be secured from the County Surveyor at Martinez.

**BUTTE CO., CAL.**—Bridges, 2, reinforced concrete and steel. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans have been approved for the construction of two new county bridges. One bridge will be erected across Big Chico Creek and will be 50 feet long and 45 feet wide. The other structure will be erected about 5 miles west of Durham and will be 260 feet long. Bids are now being taken for both of these structures and will be opened on August 7th. Plans and specifications can be secured from the engineer.

**COLUSA CO., CAL.**—Bridges, 12, reinforced concrete. Cost not stated. Engineer, County Surveyor, Colusa. Owners, Colusa County. Plans have been completed and are now out for figures for 12 small bridges and culverts to be erected in the various road districts of Colusa County. Separate figures will be taken for each bridge or culvert. Bids will be opened on August 4th. Plans and specifications can be secured from the County Surveyor.

**MENDOCINO CO., CAL.**—Bridges, 3, wood construction. Cost not stated. Engineer, County Surveyor, Ukiah. Owners, Mendocino County. Plans are complete and figures are now being taken for the construction of three wood road bridges in Mendocino County. Bids will be opened on August 4th. Plans and specifications can be secured from the engineer.

**SEATTLE, WASH.**—Canal machinery and valves. Cost not stated. Engineer, Major J. B. Cavanaugh, Burke Bldg., Seattle. Owners, United States Government. Plans are complete and bids are now being called for furnishing and installing machinery and valves for the Lake Washington Canal. Bids will be opened on August 10th. Plans and

specifications can be secured from the engineer in charge, Burke Bldg., Seattle. An official proposal appears in another column of this issue.

### Contracts Awarded.

**YUBA CITY, SUTTER CO., CAL.**—Bridge, reinforced concrete, \$68,800. Engineer, County Surveyor, Yuba City, Owners, Sutter County, Contractors, Blake Bros., Oakland. Contract price, \$68,800.

### CHURCHES.

**BERKELEY, ALAMEDA CO., CAL.**—Church, 2 story and base, Class C construction, \$39,000. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley, Owners, First Baptist Church of Berkeley. The building will be erected at the corner of Dana and Haste streets and has been designed after the department scheme. There will be a main auditorium 75 by 80 feet, Sunday school rooms 30 feet high, social rooms and pastor's study. Interior will be finished in pine with ornamental plaster in the auditorium and Sunday school rooms. Plans provide for a central heating system. Art glass will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

### COURT HOUSES.

**SACRAMENTO, CAL.**—Court house yard work. Cost not stated. Architect, A. R. Herold, Forum Bldg., Sacramento. Owners, Sacramento County. Plans are complete and figures are being taken for improvements to the Court House grounds. The work will include paving and landscape gardening. Bids are now being taken and will be opened on August 5th.

### FACTORIES & WAREHOUSES.

**SAN FRANCISCO**—Storage shed, 1 story, frame and corrugated iron. Cost not stated. Architect, none. Owners, Meese & Gottfried, S. F. The building will be erected at the northwest corner of 19th and Harrison streets. No interior finish will be installed. Exterior of the building will be covered with corrugated iron. Plans are in the hands of the owners and the work will be done by Day Labor.

**FRESNO, FRESNO CO., CAL.**—Grain elevator, frame and concrete, \$15,000. Engineer, Leland S. Rosner, Merchants' Exchange Bldg., S. F. Owners, Sperry Flour Co. The building will cover a considerable ground area and will be practically fireproof. The estimated cost does not include special machinery which will be installed. Exterior of the elevator will be covered with cement plaster. Plans have been prepared and work will be started at once.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Sheds, 1 story, steel and frame. Cost not stated. Engineer, W. B. Thomas, Yosemite Bldg., Stockton. Owners, City of Stockton. Plans have been completed and figures are now being taken for the construction of 150 feet of steel frame sheds along the Stockton water front. No interior finish will be used. Exterior of the sheds will be covered with corrugated iron. Plans can be secured from the engineer.

**BAKERSFIELD, KERN CO., CAL.**—Bakery, 2 story and base, brick, \$30,000. Architect's name not given. Owners, T. J. Cornish Co. The building will

cover an area of 80 by 100 feet and will be of fireproof construction. The latest and most approved sanitary equipment and machinery will be installed. Interior finish will be of pine. Considerable tile wainscot will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

### FIRE HOUSES AND JAILS.

**WOODLAND, YOLO CO., CAL.**—Jail, 2 story and base, reinforced concrete, \$10,000. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Yolo County. The Supervisors recently secured a site for the new building at the northeast corner of Court and 3rd streets. Construction will be fireproof throughout. The present jail building has been condemned as unfit and construction will be rushed. The building will contain separate wards for male and female prisoners, office of the Sheriff and a large guard room. Interior finish will be of pine. There will be steam heat and a modern system of ventilation and a hot water supply. Special jail equipment will be installed. Exterior of the building will be faced with cement plaster.

### FLATS.

**SAN FRANCISCO**—Flats and store, 3 story and base, frame, \$7,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Frank Giarritta. The building will be erected on Scott street near Chestnut, and has been designed to contain one store on the first floor and two flats of five rooms each on the upper floor. Interior will be finished in pine with some oak floors. There will be open fire places and tile mantels. Entrance steps will be of terrazzo. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,900. Architect, none. Owner, A. Harrington, 10 Judah street. The building will be erected on the east side of 5th avenue south of Irving street, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**PIEDMONT, ALAMEDA CO., CAL.**—Flats, 2 story and base, frame, \$5,000. Architect, James H. L'Hommiedieu, Syndicate Bldg., Oakland. Owner, Mrs. Dann. The building will be erected on Piedmont avenue, and has been designed to contain two five-room flats with baths. Interiors will be finished in pine with some hardwood floors and veneer panels. There will be large open fire places and tile mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SACRAMENTO, CAL.**—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, E. Gravel, 3915 J street Sacramento. The building will be erected at 3017 J street, and has been

designed to contain two flats of five rooms each. Interiors will be finished in pine with some oak floors. Each living room will have a large open fire place. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, brick veneer, \$10,000. Architects, J. E. Kraft & Son, Phelan Bldg., S. F. Owner, Charles J. Gallatin. The building will be erected on Lake street near 16th avenue, and has been designed to contain two modern flats of five and six rooms. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with a veneered pressed brick. Plans are complete and figures are being taken.

### GARAGES.

**SACRAMENTO, CAL.**—Garage, 1 story, concrete block construction, \$2,500. Architect, none. Owner, H. C. Muddox. The building has been designed for a private garage and will be erected on 30th street. Interior will be finished in pine. There will be a cement floor. Exterior of the building will be faced with cement plaster. Plans are complete and work will be done by Day Labor.

### GOVERNMENT WORK AND SUPPLIES.

#### Okanogan, Head Gates.

The following bids were received at the office of the U. S. Reclamation Service, Los Angeles, Cal., under advertisement No 306 for furnishing head gates for the Okanogan project, Washington:

Item 1, 1 36-in circular head gate; 2 1 40-in circular head gate; 3, 1 16-in circular head gate.

The C. D. Buchart Co., Denver, Colo., item 1, \$62; 2, \$110; 3, \$28; deliveries Denver, 8 to 14 days.

Bayton Beater Holst Co., Dayton, O., item 1, \$98; 2, \$140; 3, \$44; deliveries Dayton, Ohio, 20 days.

Hinnian Hydraulic Mfg. Co., Denver, Colo., item 1, \$118; 2, \$130; 3, \$35.50; delivery Denver, 25 days.

Coffin Valve Co., Neponset, Mass., item 1, \$160; 2, \$280; 3, \$25.50; delivery Neponset, Mass., item 1, 30 days; 2, 15 days; 3, 2 days.

Caldwell-Wileox Co., Newburgh, N. Y., item 1, \$126; 2, \$199; 3, \$52; delivery, Newburgh, N. Y., 6 days.

Chapman Valve Co., Boston, Mass., item 1, \$165; 2, \$255; 3, \$70; delivery Indian Orchard, Mass., 60 days.

Roe-Stevens Mfg. Co., Detroit, Mich., item 1, \$140; 2, \$225; 3, \$40; delivery Detroit, 30 days.

F. Morgan Smith Co., York, Pa., item 1, \$150; 2, \$240; 3, \$69; delivery York, Pa., item 1, 30 days; 2, 45 days; 3, 30 days.

#### Reclamation Service, Cable.

Abstract of proposals No. 305, triple-conductor cable, Boise Project, Idaho, United States Reclamation Service, opened at Los Angeles, Cal.:

Standard Underground Cable Co., Los Angeles, Cal., \$169.20, Pittsburgh, Pa., 45 days; reels \$20.

U. S. Steel Products Co., Los Angeles, Cal., \$591, Worcester, Mass., 32 days; reels \$13.

#### Idaho Falls, Idaho, Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Idaho Falls, Idaho:

Bid 1, R. E. Campbell, Salt Lake City, Utah.

2, Dieter & Wenzel Construction Co., Wichita, Kans.

3, Palmberg & Mattson, Astoria, Oreg.

4, J. H. Wiese, City National Bank Building, Omaha, Neb.

5, Fisher & Aiken, Idaho Falls, Idaho.

6, Sound Construction and Engineering Co., Seattle, Wash.

7, Welch Bros. & Hannaman, Oakland, Cal.

Using limestone for all stonework, except where granite and marble are required—Bid 1, \$84,452; 2, \$91,000; 3, \$91,450; 4, \$89,765; 5, \$82,019; 7, \$94,716.

Using sandstone for all stonework except where granite and marble are required—Bid 1, \$84,452; 2, \$96,000; 5, \$96,000; 6, \$81,049.

Using (state name of stone and location of quarry) stone for all stonework, except where granite and marble are required—Bid 3, \$93,450; 6, \$80,549.

For alternate No. 1, substituting plate glass for all sheet glass and pressed-pattern glass, except in basement, as specified, add—Bid 1, \$390; 2, \$200; 3, \$600; 4, \$500; 5, \$800; 6, \$800; 7, \$200.

For alternate No. 2, substituting cement-finished concrete for macadam for the driveway, as specified, add—Bid 1, \$195; 2, \$651; 3, \$1,200; 4, \$350; 5, \$200; 6, \$150; 7, 250.

Plans and specifications can be secured from the Secretary of the Board of Education, Modesto.

**OAKDALE, STANISLAUS CO., CAL.**—Gymnasium and service building, 2½ story, brick, \$13,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Oakdale High School District. The building has been designed to contain a gymnasium, service department and auditorium, and will be erected on the High School grounds. Interior finish will be of pine. There will be steam heat and special gymnasium equipment. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

**FRENCH CAMP, SAN JOAQUIN CO., CAL.**—School addition, 1 story, frame, \$5,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, French Camp School District. The work will be in the nature of an addition of two class rooms to the present school. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**TRACY, SAN JOAQUIN CO., CAL.**—School, 1 story and base, frame, \$3,000. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owners, Tracy District School Trustees. The building will contain two class rooms. Interior will be finished in pine. There will be composition blackboards. Exterior of the building will be covered with rustic. Plans are now being prepared.

**BAKERSFIELD, KERN CO., CAL.**—School, 2 story and base, brick and concrete. Cost not stated. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Bids will be opened on September 8th for a two-story class room and auditorium building at the High School. Separate bids will be taken for the general contracting and plumbing. Details of the work have not been received but can be obtained from the architect.

**SONOMA SONOMA CO., CAL.**—School, 1 story and base, brick. Cost not stated.

Architect, A. C. Lutgens, 525 Market street, S. F. Owners, Sonoma School District. The building will contain six class rooms, domestic science and manual training departments and assembly room. Interior will be finished in pine with maple floors in the class rooms. A central heating system will be installed. Exterior will be faced with pressed brick. Bids were opened on July 28th. A complete report of the figures received will be issued next week.

**KENTFIELD, MARIN CO., CAL.**—School, 1 story and base, frame, \$12,500. Architect, Erwin Schaefer, Plaza Bldg., Oakland. Owners, Kentfield School District. The building has been designed to contain four rooms and an assembly hall. Interior will be finished in pine throughout with maple floors in the class rooms. Blackboards will be of composition. No heat will be installed. Exterior of the building will be covered with cement plaster on metal lath. Working drawings are being prepared and figures will be called for about August 5th. Further mention will be made of the work at that time.

**BERKELEY, ALAMEDA CO., CAL.**—School gymnasium building, 2 story and base, brick. Cost not stated. Architect, State Architect George B. McLaughlin, Sacramento. Owners, State of California. Bids were opened by the State Board of Control on July 29th for the construction of this building and show Frank Gallagher of San Francisco low at \$29,900. A complete list of the bids will be found under the heading of Oakland and Alameda County in this issue.

**LA JOLLA, SAN DIEGO CO., CAL.**—Pier at school, concrete construction. Cost not stated. Architect's name not given. Owners, Regents of the University of California. Bids were opened by the Regents of the University of California for the construction of a pier and other work in connection with the development of the Biological Research Institute at La Jolla. A complete list of all bids together with the alternate propositions will be found under the heading of Los Angeles and Southern California in this issue.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—School, 1 story and base, brick and hollow tile, \$10,000. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Redondo Beach School District. The building will contain ten class rooms, manual training and domestic science departments and an auditorium seating 400 people. Interior will be finished in pine with maple floors in the class rooms. A central heating system, storage rooms, etc., will be located in the basement. Plans provide for modern school plumbing and electric work. Exterior of the building will be faced with puffed brick and cement plaster. Plans are now being prepared.

**SALEM, ORE.**—School administration building, 2 story and base, reinforced concrete and brick, \$100,000. Architect, W. C. Knighton, Salem, Owners, State of Oregon. The building will form a part of the group of the State University buildings. Construction will be fireproof. Other details of construction have not been given out. Exterior will be faced with pressed brick and terra cotta. Plans will be ready for figures about the first week in August.

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**BRODE IRON WORKS**

Established 1886—Incorporated 1913

Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Office &amp; Works: 31-37 Hawthorne St., bet. Howard &amp; Folsom Sts., San Francisco, Cal.

**SEWERS, STREET WORK AND WATER SYSTEMS.**

**SAN FRANCISCO**—Power station, 1 story, Class A construction, \$28,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. The building will form an addition to the company's present station at the north-east corner of 23rd and Georgia streets. Construction will be fireproof throughout with a complete steel frame and reinforced concrete walls and floors. Interior partitions will be of hollow tile. There will be special electrical work and machinery. Exterior of the building will be faced with pressed brick. Plans are complete and figures have been received and are now under advisement in the architect's office.

Plans and specifications can be secured from the Custodian of the building at San Francisco or from the Supervising Architect at Washington. An official proposal appears in another column of this issue.

**HOSPITAL**—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The building will be known as the Potrero Emergency hospital and will be erected at the corner of 20th and Kentucky streets. Construction will be fireproof with interior partitions of metal lath and plaster. Interior finish will be of pine with considerable tile specified. There will be a central heating system. Modern hospital plumbing and equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids will be opened by the Board of Public Works on August 5th.

**CITY HALL INTERIOR STONE WORK**—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on July 29th for the interior stone work for the new City Hall. The work has been out for figures before. Plans and specifications can be secured from the Board of Public Works.

**POWER STATION**—1 story. Class A construction, \$45,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. The building will form an addition to the company's present station at the northeast corner of 23rd and Georgia streets. Construction will be fireproof throughout with a complete steel frame and brick and reinforced concrete walls and floors. Interior partitions will be of hollow tile. There will be special electrical work and machinery. Exterior of the building will be faced with pressed brick. Plans are complete and figures have been received and are now under advisement in the architect's office.

**CANAL WORK**—Cost not stated. Salt River Irrigation Project, Ariz. Engineers, United States Reclamation Service, Phoenix, Ariz. Owners, United States Government. Bids will be received on August 17th by the U. S. Reclamation Service at Washington, D. C., for constructing the Cave Creek Cut-off. The work involves approximately 131,000 cubic yards of excavation and 300 cubic yards of concrete work.

**STATE EXHIBIT BUILDING**—2 story and base, frame and plaster. Cost not stated. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, State of Michigan. The building will house the state exhibits and besides will contain a large assembly hall and auditorium. Interior will be finished in pine throughout. Exterior will be covered with cement plaster. Plans are nearly complete and figures will be called for shortly.

**FLATS**—2 story and base, brick veneer, \$10,000. San Francisco. Architects, J. E. Kraft & Son, Phelan Bldg., S. F. Owner, Charles J. Gallatin. The building will be erected on Lake street near 16th avenue and has been designed to contain two modern flats of five and six rooms. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with a veneered pressed brick. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame, \$3,500. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner's name withheld. The building will be erected on J street near 12th avenue and has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine with some elm panels and hardwood floors. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, E. J. Spence, 557 25th avenue, S. F. Owners, Spence and Peerick, 557 25th avenue. The dwelling will be erected on the east side of 19th avenue north of Balboa street, and has been designed to contain six rooms and bath. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Bath room

and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—1 story and base, frame, \$4,000. San Francisco, Architect, M. J. Welsh, 22nd and Howard streets, S. F. Owner, Mr. Vannoy. The dwelling has been designed to contain seven rooms and bath and will be erected in the Potrero District. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot and an automatic water heater will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

**RESIDENCES**—4, 2 story and base, frame, \$8,000 each. San Francisco, Architect, none. Owner, M. A. Little, 1347 4th avenue, S. F. These houses will be erected on property recently purchased by Mr. Little on Divisadero street near Green street. Each house will be designed to contain eight rooms, three baths and sleeping porch. Interiors will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will be finished in tile and will have composition floors. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are being prepared and when complete the owner will do the work by Day Labor. Construction has been started on the first dwelling.

**TRIPLEX RESIDENCE**—3 story and base, frame, \$12,000. San Francisco, Architect, Charles P. Whittlessey, 555 Clayton street, S. F. Owner, Emily M. Mulligan. The dwelling will be erected on the north side of Vallejo street west of Laguna, and has been designed to contain three dwellings of six and seven rooms. Interiors will be finished in pine and hardwood veneer. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be a central heating system and open fire places. Mantels will be of tile or brick. All bath rooms will have tile wainscot and composition floors and will be equipped with showers. Exterior will be covered with cement plaster on metal lath and rustic. Plans are complete, figures in and a contract will be awarded shortly.

**RESIDENCE**—2 story and base, frame, \$3,500. South San Francisco, San Mateo Co., Cal. Architect, Pay R. Spangler, Menadnock Bldg., S. F. Owner, W. H. Coffinberry. The dwelling will be erected on a large terrace lot, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**STORES AND LOFTS**—2 story and base. Class A construction, \$20,000. San Francisco, Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mrs. Hulda Floodberg. The building will be erected on the west side of Powell street between Sutter and Bush, having a frontage of 20 feet and a depth of 92 feet. There will be a complete steel frame, designed to carry additional stories. The first floor will contain one store. Upper floor will be designed for a loft or lodge room. There will be steam heat, metal window frames and sash and metal lath and plaster interior partitions. Finish will be of pine. Patent store fronts are specified. Exterior of the building will be faced with pressed brick and terra cotta. Plans are ready for figures.

**SALOON**—1 story, frame. Cost not stated. San Francisco, Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. McClure. The building will be erected at the corner of Main and Bryant streets. Interior will be finished in pine with tile floor. Special bar fixtures will be installed. Exterior will be covered with shiplap. Plans are complete and figures are being taken.

**STORE AND OFFICE ADDITION**—2 story. Class A construction. Cost not stated. San Francisco, Architect, L. B. Dutton, Chronicle Bldg., S. F. Owners, Balfour-Guthrie Co. A two-story addition to the present building of the Balfour-Guthrie Co. will be erected. The structure on California is a classic building with a steel frame and granite exterior walls. The new portion will be fitted up for offices of the company and will be finished in hardwood. Steam heat will be used. Plans are now being prepared.

**THEATRE**—1 story and base. Class A construction. Cost not stated. San Francisco, Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner's name withheld. ### OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE ADDITION—2 story and base, frame, \$10,000, Berkeley, Alameda Co., Cal. Architect, A. Howard Peterson, Blake Bldg., Oakland, Owner, Fletcher Ames. This work will consist of remodeling a hotel and store building into a modern apartment house. There will be new interior finish, painting, plastering, plumbing and electric work. Wall beds will be used. Some exterior alterations will also be made. Plans are complete and figures are now being taken.

APARTMENT HOUSE—2 story and base. Cost not stated. Richmond, Contra Costa Co., Cal. Architect, James T. Norbett, Richmond. Owners, Cray, Browne & Heinzen. The building will be erected on MacDonald avenue and has been designed for stores on the first floor and a number of two-room suites above. The building will have a frontage of 50 feet. Interior will be finished in pine throughout. There will be wall beds and a hot water system. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

CHURCH—2 story and base, class c construction, \$50,000, Berkeley, Alameda Co., Cal. Architect, Eugene K. Martin, 2192 Shattuck avenue, Berkeley. Owners, First Baptist Church of Berkeley. The building will be erected at the corner of Dana and Haste streets and has been designed after the department scheme. There will be a main auditorium 75 by 80 feet, Sunday school rooms 50 feet high, social rooms and pastor's study. Interior will be finished in pine with ornamental plaster in the auditorium and Sunday school rooms. Plans provide for a central heating system. Art glass will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FLATS—2 story and base, class c construction, \$50,000, Alameda Co., Cal. Architect, James H. L'Honnig, 1834 Broadway Bldg., Oakland, Owner, M. Dunn. The building will be erected on Piedmont avenue and has been designed to contain two five-room flats

with baths. Interiors will be finished in pine with some hardwood floors & veneer panels. There will be large open fire places and tile mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

MUNICIPAL AUDITORIUM WORK. Cost not stated. Oakland, Cal. Architects, J. J. Donovan and Walter Matthews, Oakland. Owners, City of Oakland. ### SAN JOSE & SANTA CLARA CLARA VALLEY.

**HIGHWAY CONSTRUCTION**—Cost  
 of stated. San Mateo Co., Cal. Engi-  
 neer, County Surveyor, Redwood City.  
 Owners, San Mateo County. Bids will  
 be received on August 3rd by the Board  
 of Supervisors for constructing ap-  
 proximately 1.581 miles of highway  
 known as a portion of Route 6, Divi-  
 sions 1 and 2, San Mateo County High-  
 ways. Plans can be secured from the  
 county Clerk or County Surveyor at  
 Redwood City.

**HOSPITAL COTTAGES**—1 story,  
 frame and reinforced concrete. \$25,000.  
 Agnews, Santa Clara Co., Cal. Archi-  
 tect, State Architect George B. McDou-  
 all, Sacramento. Owners, State of  
 California. Plans are now being pre-  
 pared for several cottages to be erect-  
 ed at the Agnews State Hospital, which  
 will replace the temporary buildings  
 erected just after the earthquake. Con-  
 struction will be similar to that of the  
 cottages recently erected at several  
 other of the State Hospitals. Plans  
 are now being prepared and further  
 mention will be made of the work  
 when bids are called.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

ROAD BRIDGE—Reinforced concrete and steel. Cost not stated. Waterford, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans are complete and have been approved for the construction of a reinforced concrete and steel road bridge to be erected near Waterford. Bids are now being taken and will be opened on August 10th. Plans and specifications can be secured from the engineer.

GRAIN ELEVATOR—Frame and concrete, \$15,000. Fresno, Fresno Co., Cal. Engineer, Leland S. Rosner, Merchants' Exchange Bldg., S. P. Owners, Sperry Flour Co. The building will cover a considerable ground area and will be practically fireproof. The estimated cost does not include special machinery which will be installed. Exterior of the elevator will be covered with cement plaster. Plans have been prepared and work will be started at once.

LIBRARY—1 story and base, reinforced concrete, \$7,000. Clovis, Fresno Co., Cal. Architects, Glass & Butner, Rowell Bldg., Fresno. Owners, Town of Clovis. Competitive plans of Glass and Butner have been accepted for the new library building. There will be two reading rooms, librarian's office and stack rooms. Interior finish will be of pine with maple floors. There will be a central heating system. Metal book stacks will be specified. Exterior of the building will be faced with cement plaster. Working drawings are now being prepared. Further mention will be made of the work when figures are called.

BAKERY—2 story and base, brick, \$30,000. Bakersfield, Kern Co., Cal. Cal. Architect's name not given. Owners, T. J. Cornish Co. The building will cover an area of 80 by 100 feet and will be of fireproof construction. The latest and most approved sanitary equipment and machinery will be installed. Interior finish will be of pine.

Considerable tile wainscot will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SCHOOL ADDITIONS AND REPAIRS—Cost not stated. Modesto, Stanislaus Co., Cal. Architect, none. Owners, City of Modesto. Bids will be opened on July 30th for two small temporary school buildings, an addition to the manual training room at the High School and a small building at the Sixth street grounds. Plans and specifications can be secured from the Secretary of the Board of Education, Modesto.

GYMNASIUM AND SERVICE BUILDING—2 1/2 story, brick, \$12,000. Oakdale, Stanislaus Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Oakdale High School District. The building has been designed to contain a gymnasium, service department and auditorium, and will be erected on the High School grounds. Interior finish will be of pine. There will be steam heat and special gymnasium equipment. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SCHOOL—2 story and base, brick and concrete. Cost not stated. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Bids will be opened on September 8th for a two-story class room and auditorium building at the High School. Separate bids will be taken for the general construction and for the heating, ventilating and plumbing. Details of the work have not been received but can be obtained from the architect.

HOTEL—2 story and base, brick, \$18,000. Turlock, Stanislaus Co., Cal. Architect, L. K. Kondrajan, Fresno. Owner, A. Toprahanian. The building will be erected at the corner of Main and Broadway and will contain four stores on the first floor. Upper floor will be arranged for 30 guest rooms and several baths. Interior finish will be of pine throughout. Patent store fronts are specified. There will be a hot water system. Bath rooms will have tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES—1 story and base, brick. Cost not stated. Fresno, Fresno Co., Cal. Architect, none. Owner, Frank H. Ball, 914 J street, Fresno. The building will be erected at the corner of Kern and J streets, covering an area of 50 by 150 feet. There will be eight modern stores. Interiors will be finished in pine throughout. Some hardwood will be used in the display windows. Patent store fronts are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken by the owner.

THEATRE—2 or 3 story and base. Class A construction, \$75,000. Fresno, Fresno Co., Cal. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner, Alexander Pantages. Mr. Pantages has secured a site in the heart of the business section and will erect a fireproof theatre building with offices on the upper floor. Details of construction have not been settled. Further mention of the work will be made shortly.

San Francisco

**HOTEL ALTERATION**—2 story and base, brick, \$12,500. Stockton, San Joaquin Co., Cal. Architect, none. Owner, J. C. Craine, 27 South El Dorado street, Stockton. The present building will be remodeled into an up-to-date rooming house. The first floor will contain stores besides the hotel entrance. There will be new painting, plastering, electric work and carpentry. A steam heating system and hot water supply will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be carried on by Day Labor.

**HOTEL**—4 story and base, brick and steel, \$50,000. Lodi, San Joaquin Co., Cal. Architect, E. B. Brown, Yosemite Bldg., Stockton. Owners, Lodi Hotel Co. The building will be erected on a corner site and will contain stores and the hotel dining room and lobby on the first floor. Upper floors will be arranged for in the neighborhood of 100 guest rooms and a number of public and private baths. Interior finish will be of pine with some hardwood veneer and ornamental plaster. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile with composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. A contract for the structural steel has been awarded the Italston Iron Works, S. F., for \$5,000, and figures will be taken at once for the balance of the work.

**GARAGE**—1 story, concrete block construction, \$2,500. Sacramento, Cal. Architect, none. Owner, H. C. Muddox. The building has been designed for a private garage and will be erected on 20th street. Interior will be finished in pine. There will be a cement floor. Exterior of the building will be faced with cement plaster. Plans are complete and work will be done by Day Labor.

**BRIDGES**—12 reinforced concrete. Cost not stated. Colusa Co., Cal. Engineer, County Surveyor, Colusa. Owners, Colusa County. Plans have been completed and are now out for figures for 12 small bridges and culverts to be erected in the various road districts of Colusa County. Separate figures will be taken for each bridge or culvert. Bids will be opened on August 1th. Plans and specifications can be secured from the County Surveyor.

**LIBRARY**—1 story and base, reinforced concrete, \$10,000. Corning, Tehama Co., Cal. Architect, Clarence L. Stiles, 2116 Parker street, Berkeley. Owners, Town of Corning. The building has been designed in the classic style and will contain two reading rooms, office for the librarian and

stack room. A central heating system will be installed. Interior of the building will be finished in pine with some maple floors. Metal book stacks will be used. Exterior of the building will be faced with cement plaster. Working drawings are complete and figures are now being taken. Bids will be opened on August 13th. An official proposal appears in another column of this issue.

**HIGHWAY CONSTRUCTION**—Cost not stated. Staasta Springs, Siskiyou Co., Cal. Engineer, County Surveyor, Yreka. Owners, Siskiyou County. Bids will be opened on August 4th for constructing the county road known as the Staasta Springs-McCloud Cut-off. Plans and complete information can be secured from the County Surveyor or County Clerk.

**RESIDENCE**—2 story and base, frame, \$3,000. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owner's name withheld. The dwelling will be erected in Cherokee Lane, and has been designed for a six-room house with bath. Interior will be finished in pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with rustic. Plans are complete and figures are being taken.

**BUNGALOW**—1 story, frame, \$2,000. Sacramento, Cal. Architect, none. Owner, D. Lamorne, 4219 Stanford avenue, Sacramento. The dwelling will be erected in the Wright & Kimbrough Tract, and has been designed for a six-room house. Interior will be finished in pine throughout. There will be open fire place and tile mantel. Exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor.

**SCHOOL ADDITION**—1 story, frame, \$5,000. French Camp, San Joaquin Co., Cal. Architect, Ralph P. Morrill, Odd Fellows Bldg., Stockton. Owners, French Camp School District. The work will be in the nature of an addition of two class rooms to the present school. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**SCHOOL**—1 story and base, frame, \$5,000. Tracy, San Joaquin Co., Cal. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owners, Tracy District School Trustees. The building will contain two class rooms. Interior will be finished in pine. There will be

composition blackboards. Exterior of the building will be covered with rustic. Plans are now being prepared.

**THEATRE**—2 or 3 story and base. Class A construction, \$75,000 to \$100,000. Stockton, San Joaquin Co., Cal. Architect, E. Marcus Pretica, Empire Bldg., Seattle. Owner, Alexander Pantages. Mr. Pantages has announced the selection of a site in the business district and states that he will start the construction of a modern theatre building within a few months. Details of the building and the exact location have not been made public. Further mention will be made of the work as the plans progress.

**JAIL**—2 story and base, reinforced concrete, \$10,000. Woodland, Yolo Co., Cal. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Yolo County. The Supervisors recently secured a site for the new building at the northeast corner of Court and 3rd streets. Construction will be fireproof throughout. The present jail building has been condemned as unfit and construction will be rushed. The building will contain separate wards for male and female prisoners, office of the Sheriff and a large guard room. Interior finish will be of pine. There will be steam heat and a modern system of ventilation and a hot water supply. Special jail equipment will be installed. Exterior of the building will be faced with cement plaster.

**BUNGALOW**—1 story and base, hollow tile, \$4,500. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owner, V. Grey. The house will contain six rooms and bath. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be faced with cement plaster. Plans are complete and work will be done by Day Labor.

**BUNGALOW**—1 story and base, frame, \$3,350. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Yosemite Bldg., Stockton. Owner's name withheld. The dwelling has been designed to contain seven rooms and bath. Interior will be finished in pine with some hardwood floors and hardwood veneer. There will be furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**HOSPITAL, LAUNDRY BUILDING**—1 story, brick and concrete, \$18,000. Patton, San Bernardino Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids opened on July 22nd for the construction of a laundry building at the Southern State Hospital at Patton show Mulder & Harsh of Los Angeles low at \$17,339. They will be awarded the work. A complete list of these figures will be found under the heading of Los Angeles and Southern California in this issue.

**APARTMENT HOUSE**—2 and 3 story and base, brick, \$50,000. Los Angeles, Cal. Architect, Edward C. Taylor, Consolidated Realty Bldg., L. A. Owners, Southern California Brick Co. The building will be erected at the corner of Stephenson and Soto streets, covering an area of 157 by 85 feet. There will be a total of 100 rooms, divided into two and three room suites. Interiors will be finished in pine and hardwood. Plans provide for steam heat, and a hot water system. All suites will have wall beds and private bath rooms. Entrance will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are nearly complete and the work will be done by Day Labor.

**APARTMENT HOUSE**—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, L. L. Jones, Central Bank Bldg., L. A. Owner, Mrs. Alice Tompkins. The building will be erected on 6th street near Burlingame and has been designed to contain 52 rooms, which will be arranged in two and three room suites. All apartments will have wall beds and private bath room. Interior finish will be of pine with some elm panels. There will be steam heat, automatic elevator and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans have been revised and new figures will be called for shortly.

**HOTEL**—5 story and base, Class B construction, \$100,000. Los Angeles, Cal. Architect, Arthur Lindley, Hollingworth Bldg., L. A. Owner's name withheld. The building will be erected on Gladys avenue near 14th street, and will cover an area of 100 by 100 feet. There will be a complete steel frame and brick exterior walls. There will be a total of 150 guest rooms with about 25 per cent baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

**HOTEL**—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Robert G. Seiler. The building will be erected on South San Pedro street, covering an area of 12 by 122 feet. There will be two stories on the first floor besides the hotel office. Upper floors will contain a total of 50 guest rooms and several public baths. Interior finish will be of pine throughout.

out. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are now complete and figures are being taken.

**PIER AT SCHOOL**—Concrete construction. Cost not stated. La Jolla, San Diego Co., Cal. Architect's name not given. Owners, Regents of the University of California. Bids were opened by the Regents of the University of California for construction of a pier and other work in connection with the development of the Biological Research Institute at La Jolla. A complete list of all bids, together with the alternate propositions, will be found under the heading of Los Angeles and Southern California in this issue.

**SCHOOL**—1 story and base, brick and hollow tile, \$10,000. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Redondo Beach School District. The building will contain ten class rooms, manual training and domestic science departments and an auditorium seating 100 people. Interior will be finished in pine with maple floors in the class rooms. A central heating system, storage rooms, etc., will be located in the basement. Plans provide for modern school plumbing and electric work. Exterior of the building will be faced with ruffled brick and cement plaster. Plans are now being prepared.

### Contracts Awarded.

**APARTMENT HOUSE**—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, L. L. Jones, Central Bldg., L. A. Owner, Isadora Cohn. Contractor, George A. Ward, Grant Bldg., L. A. Contract price not stated.

**OFFICE BUILDING**—12 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Commercial Pipeproof Bldg. Co. Contractors, F. G. Enstrom Co., 5th and Sexton streets, L. A. General construction. Cost not stated.

## Bids For Biological Institute For U. of C

Regents Open Figures For New Pier And Other Work at Institute at La Jolla, San Diego Co.

Bids were opened by the Regents of the University of California at Berkeley for the construction of a reinforced concrete pier at the Scripps Institute for Biological Research at La Jolla, San Diego County. Following is a complete list of the bids:

Item 1. Pier with mounded reinforced concrete piles.  
Alternative. Pier with steel piles, surrounded with concrete shell.  
Item 2. Pumping equipment, piping, etc. complete.  
Item 3. Concrete storage reservoir.  
Item 4. Sea wall complete.  
Item 5. Grading back of sea wall.  
**METREKREUT BRIDGE & CONSTR CO**  
171 Pacific Electric Bldg., Los Angeles

Certified check .....	\$ 1,000

PORTLAND AND OREGON.

APARTMENT HOUSE—3 story and  
base, frame, \$25,000. Astoria, Ore. Ar-  
chitects, Houghtaling & Dougan, Henry  
Bldg. Portland. Owners, F. A. Merrill  
& al. The building will cover an area  
of 60 by 85 feet, and will be arranged  
for a number of two and three room  
apartments. Interiors will be finished in  
tile throughout. Plans provide for  
steam heat, an automatic elevator and  
hot water system. Bath rooms will  
have tile wainscot and composition  
doors. Wall beds will be used in all  
bedrooms. Exterior of the building will  
be covered with cement plaster on  
metal lath. Plans are nearly complete  
and figures will be called for at once.  
SCHOOL ADMINISTRATION BUILD-  
ING—2 story and base, reinforced con-  
crete and brick, \$100,000. Salem, Ore.  
Architect, W. C. Knighton, Salem.  
Owners, State of Oregon. The building  
will form a part of the group of the  
State University buildings. Construc-  
tion will be fireproof. Other details  
of construction have not been given  
yet. Exterior will be faced with  
pressed brick and terra cotta. Plans  
will be ready for figures about the first  
week in August.

SEATTLE AND WASHINGTON.

CANAL MACHINERY AND VALVES  
not stated. Seattle, Wash. Engr-  
gineer, Major J. B. Cavanaugh, Burke  
Bldg., Seattle. Owners, United States  
Government. Plans are complete and  
bids are now being called for furnish-  
ing and installing machinery and  
valves for the Lake Washington Canal.  
Plans will be opened on August 10th.  
Plans and specifications can be secured  
from the engineer in charge, Burke  
Bldg., Seattle. An official proposal  
will be in another column of this issue.

Contracts Awarded.  
RESIDENCE — 2 story and base,  
reinforced concrete. Cost not stated.  
Title, Wash. Architects, Rebb &  
Child, Denny Bldg., Seattle. Owner, J.  
Blodell. Contractors, Johnson Bros.,  
5 Thackeray Place, Seattle. Contract  
cost not stated.

The House of Representatives has  
passed the bill to appropriate \$500,000  
for the Exposition. So far the exposition  
seems to have moved along with  
more than the ordinary degree of suc-  
cess. Aside from the fact that most  
of the contractors have had more or  
less difficulty with the management the  
buildings have progressed rapidly and  
now the whole grounds are beginning  
to assume form and shape. The Ex-  
position will be ready, and it will be  
ready on time.

The report of the Savings Banks  
show that there is more than 200  
million dollars on deposit in such  
banks in San Francisco. This shows  
that the working people and the mid-  
dle classes are enjoying a fair degree  
of prosperity. The fruit crop in Cali-  
fornia is good, there is every indica-  
tion that other crops will be abundant.  
Good prices prevail in the main. The  
people complaining is big business and  
the results from the governmental re-  
forms that have loosened the clutches  
that has given it unfair advantages  
heretofore.

The money that has been controlled  
by big business in these unfair chan-  
nels is now inactive. The howl is  
going up that the reforms are injuring  
business. The only injury that is be-  
ing done is that through necessary re-  
adjustment of conditions. The country  
is prosperous, there are good crops gen-  
erally, good prices prevail and there  
is plenty of money in the banks. The  
facts testify to the correctness of the  
President's statement that the business  
depression is purely psychological.

The practice inaugurated a few years  
ago by the Superintendent of Docu-  
ments, at Washington, of issuing  
separate classified price lists of the  
publications offered for sale by his  
office has been continued and developed,  
until upward of fifty of these useful bi-  
bliographies are now available. Most  
of them have been issued in numerous  
editions, and thus kept up-to-date.  
Selecting a few of these lists at ran-  
dom, we find that they deal with such  
varied subjects as "Food and Diet,"  
"Fishes," "Indians," "Geography and  
Explorations," "Plant Life," "Mines and  
Mining," "Alaska," etc. Each pamphlet  
contains the titles of hundreds of  
government publications, grouped  
under appropriate sub-headings, which  
are arranged alphabetically.

So far as the Get-the-Johnson  
League is concerned things seem to be  
going on according to schedule. Thurs-  
day Johnson had broken with ex-  
President Roosevelt; Friday the Su-  
preme Court had discovered fraud in  
the petitions circulated on behalf of  
State Senator Powers. And we may  
confidently expect the Otis-Spreckels-  
De Young contingent to publish some-  
thing of a similar nature from now  
on throughout the campaign.

Some months ago Governor Johnson  
announced that a large fund had been  
raised to produce this sort of news for  
publication; that a man had been hired  
and placed at Sacramento for that  
purpose, and gave his name. And the  
fact now is proven by the publications  
that are being made. And when the  
facts are finally known about the  
registration in Alameda County it will  
probably develop that it was all a con-  
cocted scheme.

These are the tricks of the politician

from time immemorial. Whenever  
any one is corrupted it is through his  
self interest. Crimes are not com-  
mitted for the public good. In the  
very nature they wrong the public.  
And the self seeking politician forever  
plays on the fears, the prejudice, and  
the self interest of the individual to  
place him in control and then he loots  
the public treasury.

When Otis and De Young and Spreck-  
els and every other politician that  
was responsible for the reign of graft  
united, when everyone identified with  
the policies and the principles that  
permits Calhoun to steal 5 million dol-  
lars from a public service corporation  
and then applauds him as a foremost  
citizen; when every one that holds up  
J. P. Morgan as the greatest patriot  
of his country when the facts show  
that he wrecked railroads and despoiled  
honest people of their property;  
when all these combine to beat John-  
son and the principles on which he  
stands, it is pretty clearly shown on  
whose side the people themselves  
should stand.

James Hogue, the train bandit, was  
promptly convicted by the jury in his  
case. Which was the only thing that  
could be done. For he shot a man,  
traveling peacefully with his family.  
The bulletin would have had him go  
scot free, because he was out of a job  
and had a wife and family. In other  
words any body out of a job is at  
liberty to take the life of the defence-  
less and law abiding citizen because  
society has wronged him. Such doc-  
trines preached and promulgated are  
more anarchistic in their nature than  
those of the most avowed anarchists.  
There is no protection of life or prop-  
erty in such preaching, no attempt to  
indicate how organized society could  
exist under the conditions. Its only  
result could be anarchism and a reign  
of terror.

In the passing of Victoriano Huerta,  
the American administration has seen  
the fulfillment of its most persistently  
uttered wish. Whether the adminis-  
tration has done much itself toward  
this result, or whether the watchful  
waiting has merely accompanied the  
natural forces that have finally  
brought about the end of this dictator  
— of this, perhaps, history, alone can  
form a clear judgment, and in history  
we are not so much interested. It  
appears on the surface that Huerta has  
been chased out of the Presidency by  
Carranza and the combined Con-  
stitutionalist forces, who have acted  
pretty much independently of all out-  
side interests.

The course of conduct outlined by  
the administration will call for prob-  
ably many weary months or more of  
watchful waiting yet. Carranza has  
persistently refused to permit himself  
to be put in the position either of  
treating with Huerta or of being sus-  
pected of being a "friend of the United  
States." Among a large class of Mex-  
icans this would effectually kill his  
popularity, so he must pursue his  
course of conquering a way into the  
capital, rather than having it passed to  
him on a platter by his would-be  
friend of the Rio Grande. But if Car-  
ranza forces his way into the capital  
now, the American administration  
must refuse him recognition until he  
or some one else is regularly elected  
President of Mexico, and when that

will be no one has the courage to predict.

An ominous forecast of what is to come was foretold in the capture of a Constitutional garrison at Palomas by enemies of the Carranza movement. With the Constitutionalists in power at Mexico City, if the next uprising is not led by Villa, it may be by Maytorena or some other insurgent leader to rise from the obscurity that produced these men. The forces of discontent in Mexico are not single and therefore are not to be satisfied by the success of a single man or group of men. We will have to watch and wait, probably for several years to come before a man will rise in Mexico forceful enough to crush all opposition that he cannot attract to himself.

The agency that must be credited to the American administration in the downfall of Huerta is the cutting down of credit. The warfare of the last three years has consumed most of the chattel wealth of the republic, but its great natural wealth still remained and was mortgageable. Left alone, Huerta and his theoretically legal congress might have discounted the future of the fields and mines and pastures of Mexico for generations in order to borrow enough money to shoot a few more peons. European financial gamblers stood ready to advance more coin at an enormous rate of interest. It was the stand of the United States in virtually cutting off Huerta's credit that reduced him to the necessity of drawing upon the hoards of his own capital. When all that he could obtain by forced loans had gone and with it the little reminder of his popularity, he had to quit.—Fresno Republican.

There is not so much sneering as there was a while ago over the Wilson policy of "watchful waiting."

Looks as if "the Schoolmaster" may come out ahead regarding Mexico, doesn't it?

And if peace and order shall be brought about in that country without war with the United States it will deserve to rank as a great achievement for the Administration at Washington.

Nothing succeeds like success.—Sacramento Bee.

#### GIBRALTAR'S SEARCHLIGHT BATTERY.

For ships to pass around Gibraltar, England's and the world's greatest fortress, without being observed even at night is a practical impossibility, owing to the great battery of searchlights arranged along the bottom of the rocks. A ship running either in or out runs into one of the fixed beams of light and is revealed. A moving beam of light then follows her until the lookout officers are satisfied as to her intentions.—Exchange.

#### SENSATIONAL TRIAL IN PARIS FOR MURDER.

The trial of Madame Caillaux in Paris, for the murder of Editor Calmette of Le Figaro is affording a serial story of interest throughout the world.

The daily installments are full of sensations, for a French trial is a

very different affair from the comparatively dull procedure in English or American Courts.

The French method is highly theatrical. The judge questions the accused, and the lawyers on both sides are permitted to interpose and make eloquent speeches, or to read elegant extracts from novels that may be made to seem relevant to something said or done.

#### SIX BIDS PROVE SAME IN FIGURES, WORDS AND PUNCTUATION.

WOODLAND, (Yolo Co.), July 21.—When bids for the furnishing of cement to Yolo County for the next year were opened at a meeting of the Supervisors, it was found that all were for the same figure and were even identical in wording and punctuation.

The six firms which quoted a figure were the Portland Cement Company, Standard Portland Cement Company, Diamond Match Company of Dunnigan, Diamond Match Company of Woodland, Cowell Line & Cement Company of San Francisco and the Sacramento River Supply Company of Knights Landing.

All bids were rejected by the Board, as the common figure was the same as in force when buying in the open market at a carload of 160 barrels.

#### HIDGING THE HUDSON.

Efforts to put life into the scheme for an interstate bridge between New York and New Jersey meet with little public encouragement. The first and chief difficulty is to demonstrate the need of a structure of which the preliminary estimates place the cost at \$52,000,000. Obviously, there are too many ways in which that huge sum of money could be put to better uses.

If the bridge were located at Fifty-seventh Street, it would serve only a limited class of traffic, principally devoted to the ends of pleasure. For that reason alone, it would be primarily a minor convenience, not a necessity. The crowded paths of commerce lie farther south, in the vicinity of the North River ferries. If the ferry service is inadequate, the better way would be to augment it by building one or more tunnels where the demands of business justify it.

Engineers estimate the cost of a tunnel at \$11,000,000, about one-fifth the cost of the projected interstate bridge. In maintenance and repairs it would be relatively far cheaper.

From a practical standpoint, the interstate bridge, as planned by its promoters, would be a costly and spectacular luxury, appealing far more to the eye than to the pocket of New York.—New York World.

DINURA, Tulare Co., Cal. A movement has been started here for the formation of a stock company for the purpose of erecting a new theatre. C. H. Douglass, manager of the Elite Theatre of this city, has submitted the proposition. The proposition has been favored by local capitalists and already several thousand dollars has been subscribed. Douglass plans the erection of a Class "A" theatre to be

#### STATE OF CALIFORNIA.

DEPARTMENT OF ENGINEERING  
CALIFORNIA HIGHWAY COMMISSION

#### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which times they will be publicly opened and read, for construction in accordance with the specifications therefor, to which specifications reference is made, portions of State highway as follows:

Until 11 o'clock A. M., August 10, 1914, Mendocino County from 2 1/2 miles north of Hopland to Ukiah—Men-1-B about 11.1 miles in length, to be graded and a portion paved with Portland cement concrete.

Humboldt County from Miranda to Dyerville (D-Hum-1-C), about 13 miles in length, to be graded.

Santa Clara County from Santa Clara to San Jose (IV-S-Cl-2-A), about 12 miles in length, to be built of Portland cement concrete with asphaltic wearing surface.

Santa Clara County from the northern county boundary to San Jose (IV-S-Cl-3-A), about 6.8 miles in length, to be built of Portland cement concrete. Contra Costa County from San Pablo Creek to Pinole (IV-C-C-11-A), about 3.6 miles in length, to be graded.

Until 2 o'clock P. M., August 10, 1914, Humboldt County from Shively to Jordan Creek (D-Hum-1-D), about 3 miles in length, to be graded.

Alameda County from Greenville to Livermore (IV-Ala-5-A), about 5 miles in length, to be built of Portland cement concrete.

Santa Barbara County from E. Captain Creek to Alcatraz (V-S-B-2-F), about 9.3 miles in length, to be graded. Orange County from Galtway to Irvine (VII-Or-2-B), about 9.4 miles in length, to be built of Portland cement concrete.

Imperial County from Myers Creek to Coyote Wells (VII-Imp-12-A), about 6.0 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Willits, Dunnsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding quantities of work to be done.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

### Why Some Advertising Does Not Seem To Pay.

By Lloyd C. Comegys.

Advertising does pay. That has been proven conclusively. The accumulating of large fortunes almost entirely through the use of advertising is the convincing evidence. The many detailed records of its use, its cost and its returns, show how it has been used to advantage. Therefore it is not necessary to establish the fact that advertising has been made to pay many, many hundreds of times. It can be made to pay. Why it has not been made to pay more often is the point we are interested in.

The main defects of advertising campaigns seem to be:

First—That the proposition to be advertised is not fully and scientifically analyzed and charted.

Second—That no competent advice is brought to bear as to what can and should be done in the way of advertising.

Third—There is no definite and scheduled plan of the results expected and there is no records kept of what is being accomplished.

Fourth—There is no method and records for following up the percentage of results and finding out why they have not come up to the scheduled plan.

Under the first point it would seem almost unnecessary to say that the proposition to be advertised should be carefully analyzed and charted from an advertising and selling standpoint. But right here at the very foundation of a proper advertising structure, lies most of the troubles of the campaigns or expenditures that do not seem to pay.

Second—And when parties say that they are competent to do their own advertising, without having spent time in training for the work, it shows the ignorance of not even knowing they are ignorant on that particular subject. Whether to use Publicity methods in your advertising campaign and how much and in what manner; how much Trade Name advertising to do and in what manner; and how much Direct Selling advertising to do and in what manner, are questions that must be thoroughly understood, answered and the answers carefully charted. Without knowledge and training in advertising it is simply impossible for a person to answer these questions properly.

Third—Definite plans should be made and the standards of the results expected should be carefully established and charted.

Fourth—And lastly, but most important is the work of following up the percentage of returns and the seek-

ing and finding and correcting of the causes of insufficient returns.

Securing competent advice regarding your advertising work and expenditures is the most profitable investment you can make.

To sum up why some advertising does not seem to pay, is, in plain words, because the advertiser does not know what he is doing. He does not know in detail what he can and expects to accomplish, nor how straight he is traveling along the road toward that accomplishment, nor why he is not accomplishing all of the expected detailed results.

The advertising fails because of:

Lack of a proper knowing of what can be accomplished.

Lack of a proper knowing of what to do.

Lack of a proper knowing of what is being accomplished.

Lack of a proper knowing of what is being done wrongly.

### CONSTRUCTION WORK ABROAD.

#### AUSTRALIA.

[Consul Wm. C. Magelsen, Melbourne.]

#### Progress of Electrical Works.

Preparatory work in connection with electrification of Melbourne suburban railways is proceeding satisfactorily. About 600 tons of steel work is arriving for erection of the engine house at the new power station at Newport. Over 800 men are employed on the power station works, and temporary office and store buildings have been erected and the branch railway connection with Spotswood completed.

When the power station is in working order it will deliver electrical energy as a three-phase current at a periodicity of 25 cycles per second and at 20,000 volts pressure, providing power for not only traction purposes but also for working machinery at the Newport railway shops and lighting stations. Fourteen substations are to be built at various points within the suburban area for conversion of current to 1,500 volts for transmission to the trains, and a commencement is to be made with these shortly at Newmarket, Middle Brighton, and Glenroy. (Press extracts from General John P. Bray, Sydney.)

#### Bridge Manufacture by the Government

The railway bridges to be placed over the Hastings, Macleay, and Wilson Rivers are to be manufactured at the Newcastle Government workshops.

The Minister of Public Works recently called for tenders for twenty 20-ton weighbridges. The lowest tender received was of \$730 for each, to be imported. The Railway Department has now offered to manufacture these at \$618 each, and the minister has accepted the offer. The Works Department will thus make a total saving of \$2,248 and in addition will give employment to local labor.

#### Rolling Stock—The Burrinjuck Dam Irrigation

A thousand railway trucks and more than 100 engines are at present being built in the State of New South Wales. About 50 engines are being constructed as rapidly as possible in England.

The construction of the Burrinjuck Dam has so advanced that the impounded Murrumbidgee waters are at the level at which they would have been in flood time. The huge wall

which is to rise 210 feet high, is now within 10 feet of that at its highest point. The water storage will be 33,630 million cubic feet. It is stated that the conditions as regards water supply, soil, and climate are such when the whole of the irrigated lands are settled there will be an addition of 50,000 people to the population of the district.

#### PANAMA.

[Consul General Alban G. Snyder, Panama City.]

#### Work in the Department of Public Work of Panama.

The following report on the work done or planned in the technical section of the Ministry of Public Works of Panama during 1913 is taken from data furnished to this consulate by Dr. Ramon F. Acevedo, Minister of Public Works of the Republic of Panama:

The work of the technical section includes designing and construction of all Government public work. In 1913, in addition to the supervision of work actually under construction, studies were made so that it is thought that much more work will be finished this year than in 1912.

#### Projected Work.

Bids for constructing lighthouses on the Pacific coast between Panama and Pedregal will soon be asked for.

A statement of projected work for which plans are now being prepared by the Government is as follows: In the city of Panama a normal school for girls, a correctional school, a reinforced concrete building for stores and renting to families, a wharf for fishermen, a large hospital to replace the old Santo Tomas Hospital, the alteration and repair of the old Administration Building purchased from the Isthmian Commission, and which is to be used for a central post office and other Government offices, a plaza in front of the Presidential residence, light for Las Bovedas (sea wall), and graded schools in other parts of the Republic, and a modern hospital in Bocas del Toro.

#### URGES CORPORATE BONDS.

#### Los Angeles Trade Paper Tells Advantages of Contract Bonds of Surety Companies.

A strong argument for corporate surety bonds was presented in a recent issue of the "Builder and Contractor" of Los Angeles, a weekly journal of architectural, engineering and construction news. Discussing contract bonds the paper said:

#### Should Demand Surety Company Bond.

In order to insure himself from loss in the construction of his home the builder must insist on the successful bidder for the contract giving a bond. Moreover, he should demand that the bond be furnished by a responsible surety company; and unless the bidder can thus qualify, the contract should be awarded to a contractor who can furnish such bond. If the contractor offers him a bond signed by personal sureties he should decline it. A personal bond makes no provision for the obligation and as no loss is anticipated, he may, therefore, with this kind of security, find himself without the supposed protection when he actually needs it. If personal sureties are able and do pay claims under their bonds,

it often means their financial ruin, while corporate sureties remove the burden from the individual. It is no unfavorable reflection upon a contractor to be placed under bond, as it is a plain business proposition. In fact, a surety bond is the highest form of recommendation for the contractor and the best security for the owner.

#### Companies Investigate Contractors

Surety companies are required by law to provide for their bonds and are rigidly investigated by the insurance department of every state wherein they operate. The surety company undertakes to do more than guarantee the completion of the building, the investigation which they make of a contractor before executing a bond is very rigid and thorough. Naturally when a contractor is able to secure a healthy profit in every one, the mere satisfaction of getting more business is apt to lead him to over-estimate his ability to overcome such obstacles as labor disputes, delays, breakdowns, etc. If the acceptance of too many jobs has compelled the contractor to stretch his credit to the breaking point, a few hold-ups even on one piece of work may be enough to cause him to fail on all. The surety companies inquire into his financial condition, the amount of work which he has under way, the kind of work that he is qualified to do through past experience, and do not voluntarily assume a prospective loss. —From "Underwriters' Report."

#### CLOCK CHIME TELLS TIME.

A public clock which can be heard, possessions. It is in the tower of St. Mary Abbotts Church, Kensington, and is the only public clock in that immediate neighborhood.

It chimes the quarters and the hours, but commits itself no further. It has no dial, no hands, no outward and visible sign of any kind to show that it is a clock.

This eccentricity, it is explained, is the result of two causes, one esthetic, the other financial. When the tower was built in 1874, a clock was suggested as an afterthought, but the architect protested that it would mean the addition of 15 feet to the tower, and the ruin of its cherished proportions. A second point was that the church, having but slender funds, could not afford a clock with a dial. A compromise was arrived at by installing the works of a chiming clock in the belfry, without dial or hands.

The markings on a graduated measuring glass, invented in Germany are made along a zigzag line instead of a vertical one and, having wider spaces between, are said to be read more accurately.

#### BRANCH OFFICE OPENED.

The Kinnear Manufacturing Co., of Columbus, Ohio Manufacturers of the well known Kinnear Steel Rolling doors and shutters, have opened a branch office in San Francisco in the Rialto Building and have appointed Mr. W. W. Thurston, formerly of the Lilley & Thurston Co., then district manager.

Last year the Kinnear Mfg. Co. supplied the doors for the four new piers on the San Francisco water front under the supervision of the Board of Harbor Commissioners, as well as

numerous of its installations throughout the State.

The name "Kinnear" is now a household word in the building community.

#### "SATISFACTION."

It was passing onward through the street,

It looked strong and stiff and neat.

A looker-on said to his friend,

What on earth is that stuff Ben.

But Ben, he hardly turned his head,

And quik-ly to his friend he said.

#### STEELCRETE

The lather grabbed it off the dray.

For well he knew he earned his pay.

Two thousand yards a day for him.

With hammer, nails and lots of vim.

And in his glee he'd broadly smile,

As he murmured to himself the while.

#### STEELCRETE

The plasterer looked the job o'er well.

He didn't say damn, and he didn't say

hell,

But began to figure on a pad.

And when he looked up his face was

glad.

I'll make five hundred more than I

thought.

Gosh, I am certainly glad I bought

#### STEELCRETE

The Architect was hard to please.

He was full of idiosyncrasies.

He looked to left, he looked to right,

To find a fault with all his might.

But everything was "out of sight,"

And at last he exclaimed in his delight,

#### STEELCRETE

The owner. Well my tale is done—

He took his check book thereupon,

He wrote a check—for all was due.

And signed it with a flourish too,

And to himself did softly muse,

It's a cinch when I build again, I'll use

#### STEELCRETE

#### BUILDING CONSTRUCTION SINCE THE FIRE.

Building activities from May, 1906, to June 30th, 1914, as taken from the records of the Bureau of Building Inspection of the Board of Public Works, show the following:

Class	No. of Bldgs.	Amount.
Class "A"	171	\$3,286,154
Class "B"	199	14,679,186
Class "C"	2729	81,069,318
Frames	25161	95,639,125
Alterations	22963	18,101,626
Exposition Bldgs.	41	8,798,700
Public Bldgs.	8	4,277,663
Total	51,295	\$255,251,772

#### Up and Down the Coast.

CHICO, Butte Co., Cal.—Work is about to commence on the State Highway north of this city to the Tehama boundary. Betts & Co., of San Jose, have been awarded the sub-contract for the concrete work by P. L. Burr, who holds the contract for the construction. The Betts Co. are now placing stakes and sinking wells to supply water for the mixing of the concrete. Burr also holds the contract for the re-construction of the surface of the Esplanade, immediately north of the city limits.

GALT, Sacramento Co., Cal. The question of whether Galt shall be in-

corporated or whether a sewer district will be formed to secure the installation of a modern sewer system was discussed here by the various committees last Saturday evening. Another meeting will be held in the near future to discuss the plan.

ALTURAS, Modoc Co., Cal.—In addition to presenting to Congress a petition for a \$25,000 post office and Forestry building, the Town Trustees are now taking steps for a Carnegie Library to be erected here facing the new Court House, now under construction. Steps are now being taken for the purchase of the lot which is 70 by 100 feet in size.

AGNEW ASYLUM, Santa Clara Co., Cal.—At a conference held recently, the Board of Managers of the Agnew State Hospital and the State Board of Control have agreed on the expenditure of \$35,000 in new structures. These buildings will replace the old barracks erected following the earthquake of 1906, when the State Hospital was destroyed. Members of the Hospital at the conference were: Dr. F. H. Bangs, H. Wilson, Erw. White, D. McPherson and T. S. Montgomery.

RICHMOND, Contra Costa Co., Cal.—Forces of men and machinery are now making enlargements to the local refinery and the tankage capacity of the Standard Oil Company's plant here. Work of extending of the company's wharves at Point Orient on the Richmond waterfront to 1,000 feet is progressing rapidly. A large new area is

PETALUMA, Sonoma Co., Cal.—Work has been started here on the large wharf to be constructed by Camm & Hedges on their property south of Bridge street. The wharf will be 350 feet long and will be built above the high water mark. When completed this wharf will be the largest in this city.

CHICO, Butte Co., Cal.—The foundation of the new Butte creek bridge near Durham, which has been under course of construction for the past month, is now about completed. The steel girders and concrete work is now under way. Some difficulty has been encountered in the work owing to the hard rock formation of the creek bed. The work will be completed in about three weeks.

SACRAMENTO, Cal.—Secretary H. C. Magnin of the Sacramento County Highway Commission, has submitted to the Board of Supervisors the most extensive road plans ever undertaken in this county, calling for the construction of 277.55 miles of permanent road and 64 bridges, at a total cost of \$2,425,000. The report urged a bond election to raise money to build these roads. Every mile of the proposed roads has been inspected by the members of the board recently, together with members of the State Highway Commission.

RICHMOND, Contra Costa Co., Cal.—The Board of Supervisors have authorized Supervisor Warren H. McBryde to secure plans and specifications from County Surveyor Elam C. Brown for three bridges which A. F. Loeder, division engineer of the California Highway Commission, has notified them will be required in the first section of the State Highway which will be constructed here at an early date. Bids will be taken for the erection when the plans are approved by the Highway Commission.

## Editorial Comment.

The California Highway Bulletin, published quarterly by the State Highway Commission, and chronicling the progress made by that commission, is one of the most interesting publications which we receive. The Highway Commission is charged with the expenditure of \$18,000,000, a large portion of which has but recently been made available and the Highway Bulletin tells how this is being done, of the progress made, and gives methods of construction and a wealth of details not obtainable elsewhere. It is good reading and is for free distribution.

A report published by the United States Department of Agriculture in the state of Virginia shows better than anything else the vast importance of good roads to all concerned. Read this report and support the California Highway Commission whenever the opportunity presents itself.

That an improved road will increase vastly the productiveness of the area through which it runs has now been satisfactorily demonstrated by studies conducted by the United States Department of Agriculture in Virginia. Conditions in Spotsylvania county were investigated with particular care and the results have proved surprising. In 1909 the county voted \$100,000 to improve 40 miles of roads. Two years after the completion of this work the railroad took away in 12 months from Fredericksburg, the county seat, 71,000 tons of agricultural and forest products hauled over the highways to that town. Before the improvement of the roads this total was only 49,000 tons annually; in other words the quantity of the county's produce had risen more than 45 per cent. Still more interesting, however, is the increase shown in the quantity of the dairy products. In 1909 these amounted to 114,815 pounds. In 1911 to 273,928 pounds, an increase of practically 140 per cent in two years. In the same time shipments of wheat had increased 59 per cent, tobacco 31 per cent, and lumber and other forest products 48 per cent.

In addition to this increase in quantity the cost of hauling each ton of produce was materially reduced. In other words the farmers not only produce more produce more cheaply, for the cost of transportation to market is of course an important factor in the cost of production. From this point of view it is estimated that the \$100,000 spent in improving the roads in Spotsylvania county saved the farmers of that county \$11,000 a year.

In the past two years the traffic studies of the Federal experts show that approximately an average of 65,000 tons of outgoing products were

hauled over the improved roads in the county, an average distance of 8 miles, or a total of 520,000 "ton-miles." Before the roads were improved it was estimated that the average cost of hauling was 20 cents a "ton-mile;" after the improvement this fell to 12 cents a "ton-mile," or a saving of 8 cents. A saving of 8 cents per mile on 520,000 "ton-miles" is \$41,000 a year. The county's investment of \$100,000, in other words, returns a dividend of 40 per cent annually.

Because this saving, in cases of this character, does not take the form of cash put directly into the farmers' pocket, there is a widespread tendency to believe that it is fictitious profit, while as a matter of fact it is just as real a source of profit as the increase in the price of wheat.

In Dinwiddie County, Virginia, for example, where peanuts are one of the staple crops, the average load for two mules on a main road was about 1,000 pounds before the road was improved. After its improvement the average load was found to be 2,000 pounds and the time consumed in hauling the larger load to market was much reduced. In other words, one man with a wagon and two mules could do more than twice as much work with the improved road than with an unimproved road. This is the explanation of the extraordinary rise in the total output of agricultural products in a county with a good road system.

Last winter in a speech at New York City Chief Justice Clark of the Supreme Court of North Carolina said:

"It has been said that a contented people have no annals. The present unrest among the people, not only in this country, but the world around, strange as it may seem to some, is one of the best signs of the times. When people at large are content, they are either ignorant of better conditions or hopeless of attaining them. A 'divine discontent' is the basis of civilization, and of all progress in bettering the condition of humanity."

There is a definition of the optimist as being "one who does not care what happens so long as it does not happen to him." That type of hopeful person paradoxically takes the gloomy view of views that do not agree with his own.

There is a general disposition in professional optimists to think that social and mental unrest is a very bad thing. The point of view is refreshing that considers such unrest as a very good thing.

And there is this to be said about the unrest that those who are active attain something in the end if their efforts are well-directed. The "man with the hoe," the brother of the ox, is incapable of advancement. But the man who strives for betterment will in the end accomplish something if there is intelligent direction.

## Administering The State Highway Trust.

How the California Highway Commission Determines the Routes, Organizes Its Field and Office Forces, and Manages the State's Business.

The State Highway Act, in language that a layman cannot misunderstand, makes it mandatory to build one main interior trunk line running lengthwise of the State, and another trunk line along or near the coast, and to connect them by laterals with all county seats not touched by one or the other of these trunk roads.

Thus was the state highway system definitely determined by direct vote of the people and made obligatory beyond the power of any court or legislative body to change.

It is a highway system which compels the building of about 1,800 miles of trunk roads and about 900 miles of laterals.

From the very beginning, it was apparent that the eighteen millions provided by the State Highway Act was woefully inadequate to satisfy the demands of the people.

Recently certain large road building contractors went into the public prints with a protest addressed to the Governor, charging that the Highway Commission was building the roads in an inferior manner.

At the hearing which the Governor gave these criticising contractors, they told his Excellency that it would cost approximately \$12,000 a mile to build the type of road which they recommended.

At \$10,000 per mile, 1,800 miles of main highways would cost every copper cent of the eighteen million dollars and leave not a penny for the construction of 900 miles of laterals.

Here, then, is the situation. The California Highway Commission on the one hand is railed at and abused, as if they were picking pockets, because they have not ordered surveys for the state highway by various diversions to satisfy conflicting and irreconcilable local demands, increasing the eighteen hundred miles of trunk roads to over twenty-one hundred miles, and adding upwards of \$3,000,000 to the total cost of building these said trunk roads alone.

On the other hand, the contractors rush in blindly, without apparent knowledge or respect for the law that must control those who are officially responsible, crying that are Commission ought to be spending \$12,000 a mile instead of \$7,600 a mile to construct these highways.

At \$12,000 per mile \$18,000,000 will build 1,500 miles of roads.

But to put various ambitious towns on the state highway and to "keep peace in the family," the trunk lines must be stretched as a series of kinks and zigzags to a total aggregation of 2,150 miles of kinks and zigzags.

But there is money only to build 500 miles of road of the kind the contractors want. Therefore there would be on this basis, 650 miles of trunk lines and 900 miles of laterals, more than one-half of the entire mileage of the state highway system, and which there would remain not one dollar of the \$18,000,000.

The most serious and concerned onlooker will readily discover that this

engineering and financial problem all but impossible of solution even with the greatest conceivable skill, economy and administrative ability.

But when upon top of the inherent Commission at the outset faced an endless and unescapable difficulties which beset the Commissioners are piled the burden of satisfying the clamorous petitioners of hundreds of towns to have the highway run in as many impossible directions, and to build a kind of road that best suits the notions and purposes of those who are stocked up with large road building plants of a certain sort, it is taxing human patience to the limit.

### The Policy of the Commission.

The management of this state highway enterprise concerns primarily the public which foots the bills.

In order to make the \$18,000,000 cover the cost of the best possible state highway system, the following policy was programmed at the outset by the Commission:

1. To prevail upon all counties to pledge themselves to procure all rights of way and construct all necessary bridges for the state highway in their various jurisdictions.

2. To lay out the entire system of trunk roads and laterals in accordance with the mandates of common sense, the State Highway Act and the opinion of the Attorney General by "the most direct and practicable routes."

3. To organize every department under the Commission on a merit and efficiency basis, in line with the promise and the efforts of the administration to apply clean, practical, business methods to the management of public affairs.

4. To declare that the State will step into the breach and defend any contractor in the courts, without cost to him, against any suits for damages or royalties for the invasion of real or alleged rights under paying patents.

5. To make definite arrangements with the various railroad companies for a special reduced freight schedule for all road building materials, equipment, etc., transported for the construction of the state highway.

6. To enter into contract with the lowest bidders for a vast wholesale supply of crushed rock, gravel, etc., by the definite terms of which these materials should be supplied to the State far below the price usually paid by contractors on other public or private works.

7. To propose to the cement companies to place large orders for cement to be delivered and paid for within a stated period, and demanding their closest estimates in consideration of such guarantees of large orders, positively placed and promptly paid for.

8. To let contracts for construction of the state highway in ten mile units, and give all contractors the benefit of the reductions in freight rates and first cost of rock, gravel and cement under the aforesaid arrangements with transportation companies and materialmen, thus affording the small contractor as far as possible an equal chance

with the large contracting concerns.

9. To maintain a testing laboratory, and scientifically examine and prove according to established standards all rock, sand, gravel, cement, asphalts, oils, etc., that may be used in state highway construction.

The public deserves to know just how consistently and just how successfully the Commission thus far has adhered to its program as above outlined. Not to solicit plaudits nor encomiums, but simply to inform the public as to the real situation, it is pertinent and proper to state the following facts:

### How the Counties Have Co-operated.

Not a single county in California has rejected the overtures of this Commission to furnish all rights of way and construct all necessary bridges in their several jurisdictions without cost to the State. These savings of time and money to the State by this generous and prompt co-operation from the various counties are enormous and incalculable.

In nearly every county through which a trunk line or any lateral of the state highway has been considered, the Commission has been appealed to to act as umpire in settling the contentions of rival communities which sought to have the state highway routed by various diversions.

With only a few exceptions every county in the State has acquiesced in and agreed to the proposition maintained by the Commission that the state highway is in fact as well as in name **A State Highway**.

They readily saw the point that it was absolutely necessary for each town, city and county to hold its own local desires and interests as to the location of the state highway subordinate to the larger and all inclusive purpose of the state highway system.

It was agreed that a trunk line of the state highway could not be diverted and distorted merely to meet the requirements of local traffic without abandoning and violating the letter and spirit of the Highways Act as well as the basic needs of the highway system itself.

These various counties through their supervisors, chambers of commerce and boards of trade in effect said to the Commission, as the only solution of their own internal and irreconcilable differences as to where the state highway should go: "Locate the state highway through this county where the Highway Commission thinks best to serve the purposes of a trunk road so which all the counties may tie their local highway systems."

Upon this principle only is it possible to link all sections of the State together in a system of good roads that will afford the freest intercommunication between each section with every other section.

Thus it was that the counties which and not only generously assumed the expense of furnishing rights of way and building bridges still further contributed magnanimously to the success of the state highway enterprise by declaring for the most "direct and

practicable" routing to the end that the total mileage and the consequent cost of construction might be reduced to the maximum, to the still further end that these roads should be constructed in as high class a manner as possible, and should be extended in fairness and equity to reach all sections of the State as contemplated by the State Highway Act.

Confirming this opinion several counties have recently voted bonds for the permanent improvement of their local highways; and many other counties are actively preparing to do likewise.

Riverside and Orange counties; Kern and Santa Barbara; Fresno and Tulare; Santa Cruz and Monterey; Solano, Contra Costa and Alameda; Sonoma, Mendocino and Humboldt; Butte, Shasta and Siskiyou; San Mateo, Merced, Tuolumne and Imperial are all public-spiritedly grappling with the good roads problem, and planning to join their local road systems to the State's trunk highways.

Honor is due to Los Angeles, San Diego and San Joaquin counties as pioneers in county road improvement. These three counties alone are bonded in the aggregate for six and one-half million dollars for the betterment of their roads, a sum considerable in excess of one-third the entire amount available under the State Highways Act, for the construction of the entire state highway system.

This fact alone is sufficient to indicate to the most obtuse mind that it is little short of a crime to route the state highway by a deviation of a single mile to satisfy purely a local interest. To follow such a practice would inevitably deny in toto the benefits of the state highway fund to entire communities and counties.

#### Organization of Field and Office Forces.

Concerning the organization of the office and field forces of the Commission, it is sufficient in passing to say that the fact that the employees of the Commission have uniformly been employed upon recommendations as to their efficiency, skill and experience, and that the uniform rule of the Commission to promote and discharge employees without discrimination, solely upon their merits, has occasioned general surprise and favorable comment throughout the State.

It is simply asserting what is common knowledge to say that in no administration of the government of the State of California prior to the present one would it have been possible to have undertaken and prosecuted any great public work, such as this state highway enterprise, under these conditions.

However, the Commission fully recognizes that efficiency in the public service cannot be divorced from the spirit of loyalty to the principles of good government. Working harmony in the ranks, and a zeal for earnest, faithful service, is best promoted in any organization by uniformly requiring that every employee shall stand the test of fidelity as well as efficiency.

Fidelity is an indissoluble element of efficiency in practical affairs as well as consistency in morals.

#### As to Paying Patents and Injunction Suits.

In the first issue of the California Highway Bulletin, which appeared last October, the Commission announced its policy of standing in between the small contractor and the powerful paying

concerns assuming to do business under the protection of certain patents, and declared its purpose to defend any and all suits that might be launched in the courts to enforce the payment of any damages or royalties that might be claimed as infringements of such patents. The Commission did not undertake to deny the validity of any of these patents, but simply asserted that, if there were any valid claims for royalties, etc., the State would be responsible.

In this connection, the Commission stated: "Often a suspicion exists that both the contractors and the persons claiming patents are increasing their incomes unduly at the cost of the people." The threat of starting an injunction suit for the collection of damages or royalties often operates either to scare the contractor out of bidding, or cause him to enter into collusion with other contractors to control the situation. Thus far the Commission has not been called upon to defend any such suit.

#### Reduced Freight Rates Obtained.

Under the terms of a special tariff schedule the various railroad companies of California have united in conceding to the California Highway Commission carload rates for the transportation of all kinds of road building materials, machinery and equipment for road construction, which amounts to a saving of several hundred thousand dollars. It is worthy of note that various contractors, who are building bridges for the counties to be used by the state highway, are also given these reduced rates, which often amount to a saving of 50 cents per ton.

#### Road Materials at Bedrock.

In November of the past year, the Commission entered into a contract with one of the largest crushed rock producers in the world for a supply of one-half million tons of crushed rock to be delivered at the option of the Commission within a stated period at the rate of 45 cents per ton.

The Commission further has entered into contracts with various companies supplying gravel, to deliver the same at the option and at the order of the Commission for the construction of the state highway at the rate of 27½ cents per ton. That these prices are bedrock and hard to beat is evident. With all the rivalry of competing firms, the Commission is unable to find any of them prepared to supply these materials at a less price.

While the cement companies maintain their prices rather rigidly, the Commission is buying its cement at comparatively low figures, considerably below the current market prices.

#### Testing All Materials Used.

Furthermore, the Commission maintains a laboratory for the testing of all materials that enter into the construction of the state highway. All cement, sand, rock, gravel, asphalt and oils are examined by this department of the Commission and scientifically tested for the purpose of insuring that all materials shall be up to the standard of quality demanded by the specifications of the Commission.

#### Giving the Smaller Contractors a Fair Chance.

In order that there shall be a free and open field in the bidding for all contracts to build portions of the state highway, it is the policy of the Commission, first, to let these contracts in units of about ten miles. A contrac-

tor of moderate means can usually handle a job of this size. By giving the contractor the benefit of the relief of furnishing materials and their delivery by the transportation companies, the capital required by a contractor to handle a contract is greatly reduced and he is thereby placed in a more independent position. Furthermore, he is relieved of the temptation to hold out materials, or use inferior substitutes, for the reason that the State furnishes these materials and there is no opportunity for him to dishonestly increase his profits.

#### Engineer Morton's Significant Testimony.

It is significant that Mr. R. M. Morton, Highway Engineer of the San Joaquin County Highway Commission, which is just completing the expenditure of upwards of two million dollars in the construction of its system of county highways, should testify that so far as his reading, his knowledge, and his experience enable him to judge, the California Highway Commission is breaking all records made by the counties or by other states in reducing the cost of road building. Mr. Morton frankly says that, considering the type of roads the Commission is building and the high class manner in which they are constructed, it is surprising that the cost is held down to the figures at which the work is done.

#### An Encouraging Outlook.

With an increasing number of counties preparing to co-operate with the State Treasurer in the matter of floating the state highway bonds, under assurances that all the money available from the sale of these bonds through the efforts of the counties will be applied exclusively to the construction of the state highway in these counties, and with the brightening prospect that disputed routings will, at an early date, be definitely and finally determined, it may be safely predicted that before the end of the year 1914 splendid progress will have been made, not only by this Commission but by all our enterprising counties from Siskiyou to San Diego in the permanent improvement of our public highways and toward the consummation of the dominant ambition of every community of California to be ready and on dress parade for 1915. (From California Highway Bulletin.)

## Fiscal Year Building Report, 1913-1914.

### Chief Inspector of Buildings Submits Report to Board of Public Works.

Chief Inspector of Buildings, John P. Morgan, of the Bureau of Building Inspection, in submitting his fiscal year report to the Board of Public Works gives an accurate description of all building operations throughout San Francisco for the fiscal year ending June 30th, 1914.

His report shows 5,721 permits issued at an approximate cost of \$30,198,694, of this there was collected \$25,971.50 for fees on the various permits.

His complete report is as follows:

Character of Permit Number	Cost
Class "A" Bldgs	14 \$ 2,404,890.00
Class "B" Bldgs	17 749,965.00
Class "C" Bldgs	201 5,501,846.00

Frame Constr	2017	6,807,657.00
Alterations, additions repairs (ac'd)	3391	1,635,473.00
P. P. I. E. Bldgs.	41	8,798,700.00
Public Bldgs.	8	4,277,663.00
Total	5721	\$30,198,694.00
Fees collected on above		\$25,755.80
Fees collected for bill board inspection		118.00
Total		\$25,873.80

In addition to the above more important matters this Bureau received applications and petitions as follows:

To raze structures.....	281
To move and reset.....	37
Applications rejected and with- drawn .....	132
General complaints received and attended to .....	414
Total number of application filed.....	6490

In addition to the above Horgan states:

"The rejected and withdrawn applications were in direct violation of the Building Law and could not be made to comply, and over and above these I found varied implied infractions of the law in approximately 50% of the total number of applications filed, and which were subsequently revised, and finally approved by this Bureau.

In the past year this Bureau had considerable success in the removal of temporary frame structures from within the Fire Limits, and there now remains but a few scattered throughout the business district, which are to be vacated and torn down as their leases expire.

The usual close attention has been given by the Bureau to all complaints and protests entered by the different sectional improvement Clubs, with the result that many nuisances and violations of law have been abated which were not evident until brought to our attention in this manner.

**Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.**

## APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 1 story and base, brick and steel, \$10,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, M. S. Shaw, 235 Pine street. The building will be erected on the south side of O'Farrell street east of Van Ness avenue, and will have a frontage of 52½ feet and a depth of 120 feet. There will be a total of forty suites of two and three rooms. All apartments will have wall beds and private bath rooms. There will be steam heat and a hot water supply, elevator service and portable vacuum cleaning. Bath rooms will be finished in tile with composition floors. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and the owner will start the work at once under the Day Labor system.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$12,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, A. Sandbrook. The building will be erected at the southwest corner of Jackson and Mason streets, covering an area of 25 by

The recent ultimatum issued by the Board against all cloth signs being erected in the City and which do not comply in every respect with the ordinances has so impressed the merchants and those engaged in the business of erecting them that a much better standard has been adopted throughout the City, both in appearance and character, and as such, has considerably lessened the agitation by the Art League and other civic organizations against them.

In the supervision of Tenements, Hotels and Lodging Houses, the Bureau has adopted a card record system, and by which all essential features of a building are checked and recorded, and any necessary corrections made at the time such are laid out in the building, starting with the foundation lines, for courts, yards, shafts, etc., and continued through and until the building is ready for occupancy, and a certificate of acceptance asked from the Board. This lessens the possibility of errors and omissions from the law during erection, and the consequent trouble in changing and reconstructing various portions of the building when all is completed.

During the year all contracts for Public Buildings and for the Panama-Pacific International Exposition have been recorded in this Bureau, and in consequence, the total of building operations in the City and County are more clearly shown.

Following a recent visit with the Commissioners to a number of frame lodging houses which were erected shortly after the fire of 1906, it is the intention of this Bureau to draft an ordinance to be submitted to the Board of Supervisors for their approval, with a view to have these buildings comply as far as practicable with the present Building Laws, and thereby insuring greater safety to the occupants."

57½ feet. There will be two stories on the first floor and four suites of four rooms each on the upper floors. Interior finish will be of pine throughout. All suites will have private baths and wall beds. Bath rooms will have tile wainscot and composition floors. Plans provide for a hot water system. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, P. D. Bernhard. The building will be erected on Carl near Shrader street, and will have a frontage of 27 by 112½ feet. There will be seven suites of three and four rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. All apartments will have wall beds and private baths. Bath rooms will have tile floors and wainscot. Simplex windows are specified. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be taken shortly.

**SAN FRANCISCO**—Apartment house, 6 story and base. Class C construction, \$60,000. Architect, Douglass, Seattle, Wash. Owners, D. and S. Investment Co., 1152 Phelan Bldg., S. F. The building will be erected at the southwest corner of Ellis and Hyde streets, covering an area of 57½ by 74½ feet. There will be stores on the first floor. Plans show a light steel frame with brick exterior walls faced with pressed brick. Interior will be arranged for two and three room apartments and finished in pine and hardwood. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile. Plans are complete and in the hands of the owners who are now taking figures on the work.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, brick. Cost not stated. Architect, Richard D. King, I. W. Hellman Bldg., L. A. Owner, L. Fighiera. The building will be erected at the corner of 7th and Westmoreland streets, covering an area of 56 by 131 feet, and has been designed to contain a total of 18 suites arranged in apartments of two, three, four and five rooms. Interiors will be finished in pine and mahogany. There will be steam heat, elevator service, a hot water supply and vacuum cleaning. All apartments will have private baths and wall beds. Bath rooms will be finished in tile. There will be a swimming pool in the basement. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete.

## Contracts Awarded.

**OAKLAND, CAL.**—Apartment house, 4 story and base, brick, \$14,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Dr. F. G. Baird. Contractor, Edward Sommerstrom, 202 East 12th street, Oakland. Contract price, \$14,000. Note: The contractor is now taking subfigures on the work.

**OAKLAND, CAL.**—Apartment house, 2 story and base, brick and frame, \$15,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Mrs. E. S. Fenton. Contractor, Fred Muller, Syndicate Bldg., Oakland. Contract price, \$15,000. Note: The contractor is now taking subfigures on the work.

## BANKS.

**WHITE SULPHUR SPRINGS, NAPA CO., CAL.**—Bath house and swimming tank, frame and concrete construction. Cost not stated. Architect, J. M. Turton, 141 Main street, Napa. Owners, White Sulphur Springs Co. Plans have been completed and figure are now being taken for a reinforced concrete swimming tank 50 by 100 feet, and for bath houses to be erected at the same place. Plans can be secured from the architect.

## BONDS.

**SACRAMENTO, CAL.**—Urging that a bond election for \$2,425,000 to construct 271.55 miles of permanent roads and 64 bridges in Sacramento County, the County Highway Commission, composed of A. W. Stewart, A. Van Marcken and T. B. Richards, has filed its report with the County Supervisors. The report was referred to the Board as a whole, who will take up the matter with the District Attorney, E. S. Welchhorst. It is understood that the

Supervisors will favor the calling of a bond election.

**CURTIS CREEK SCHOOL DISTRICT, TUOLUMNE CO., CAL.**—An election will be held here on August 10th for the voting of bonds in the sum of \$7,500 for the purpose of erecting a school house and the necessary equipment. Bonds are to be of the denomination of \$750 and will bear interest at the rate of 6 per cent per annum. Chas. W. Harvey, Chas. Meyer and B. A. Valverde are the Trustees of the District.

**MOUNTAIN VIEW, SANTA CLARA CO., CAL.**—At a special election held in the Mountain View School District to vote on the proposition to issue bond amounting to \$5,000 for a new building, the issue carried by a vote of 54 for the issue and 27 against.

**REDONDO BEACH, LOS ANGELES CO., CAL.**—A bond election held here to vote bonds of \$75,000 for the construction of a new grammar school building carried by a majority of 38 votes.

**LONG BEACH, LOS ANGELES CO., CAL.**—The City Council here has passed a resolution calling for an election to bond the city for \$1,100,000 for the purchase of the bath house company's property and the erection of an auditorium on the site.

**EL CENTRO, IMPERIAL CO., CAL.**—District Attorney Swing has received word from Wilson-Cramer Company, of Denver, that their attorneys have approved the bonds of the Holtville District. The bonds are for \$50,000, to be used for the construction of a new school building to be erected in the eastern part of this city.

**DOWNNEY, LOS ANGELES CO., CAL.**—An election will be held in the Downey School District on August 11th to vote on the question of issuing and selling bonds to the amount of \$35,000 to be used in the construction of school buildings. The bonds are to be of denomination of \$1,000 each. Interest 5½% payable annually. O. P. Towne, J. M. Reeves and Jos. Smith are the trustees of the district.

**RIVERSIDE, RIVERSIDE CO., CAL.**—An election held in Banning to vote on question of issuing bonds to the amount of \$3,000 carried by a large majority. A new school building will be erected.

**GALLATIN SCHOOL DISTRICT, LOS ANGELES CO., CAL.**—An election will be held here on August 10th to vote bonds of \$10,000 to be used in the construction of a new school building. Bonds are to be of denomination of \$1,000 each, numbered from 1 to 10, bond No. 10 running 12 years. Interest 5½% payable annually. W. H. Morrow, O. P. Williams and J. G. Nelson are the trustees of the district.

**TEHAMA CO., CAL.**—The State Board of Control has purchased \$10,000 of the municipal water works bonds of Tehama. The bid of the State has been accepted by the Tehama authorities.

The Board of Control is also bidding for the \$25,000 bonds of Napa to be used in the construction of bridges by that city.

**GLENDALE, LOS ANGELES CO., CAL.**—A bond election held in this city on July 21st for voting bonds of \$248,000 for the purchase of the systems of the four private water companies supplying the city and for the purchase of new equipment and laying of additional mains. There were 1,313 votes cast in favor of the issue and 612

against, giving the necessary two-thirds majority with 89 votes to spare. The city will take over the properties at once.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—An election will be held on August 10th in the Pacoima School District to vote on the question of issuing and selling bonds to the amount of \$22,000. Funds to be used in the construction of a school building. Bonds are to be of denomination of \$1,000 each, numbered from 1 to 22, bond No. 22 being payable twenty-four years from date issued. Interest 5½% payable annually. C. W. Vaughn, H. P. Canby and E. C. Bowles are the trustees of the district.

**UPLAND, SAN BERNARDINO CO., CAL.**—A mass meeting will be called here by the Board of Trustees to discuss the proposition of voting bonds in the sum of \$15,000 for the erection of a city hall and fire house.

**MERCED, MERCED CO., CAL.**—The Board of Supervisors will soon call a special election in the Fifth Supervisorial District to vote bonds in the sum of \$400,000 for the improvement of highways. The work will include forty miles of highway from the Mountain House to the San Joaquin River, and twenty miles of road in the Dos Palos section and twenty miles in the Los Banos section.

**HOLTVILLE, IMPERIAL CO., CAL.**—A special election will be held here on August 17th to vote bonds of \$2,000 to be used in the construction of a bridge across the Alamo River.

**WHITTIER, LOS ANGELES CO., CAL.**—A bond issue in the sum of \$50,000 was voted at the special election here on July 1st and carried. The money will be used in the construction of a new fireproof school building.

**ALBANY, ORE.**—By a vote of 190 to 84 this city approved a bond issue of \$50,000 to erect a new school building to replace the Central Public School. The new building will be of brick construction.

**HERMOSA BEACH, LOS ANGELES CO., CAL.**—At a meeting of the Board of Trustees, August 25th was the date set for the voting of bonds of \$10,000 to cover the erection of a new city hall and fire station.

**BLYTHE, RIVERSIDE CO., CAL.**—An election will be held in Rocky Comfort School District on August 15th for the voting of bonds to the amount of \$4,000 for the erection of a school building.

**EL CENTRO, IMPERIAL CO., CAL.**—Bids will be received here by the Board of Supervisors on August 10th for the purchase of bonds of the Westmoreland School District amounting to \$5,000. M. S. Cook is the Clerk.

**PRESCOTT, YAVAPAI CO., ARIZ.**—A bond issue for \$250,000 for the erection of a county court house carried here by a large majority.

**LIVE OAK SCHOOL DISTRICT, SUTTER CO., CAL.**—An election held here to vote bonds of \$5,000 to be used in the construction of a school building carried by a vote of 73 to 38.

**MECCA ROAD DISTRICT, RIVERSIDE CO., CAL.**—Bonds voted here for \$50,000 to be used in the construction of roads carried by a vote of 68 to 34. This issue will provide funds for the much needed lateral roads to connect the outlying districts with the town of Mecca and other parts of the valley.

**GRATON, SONOMA CO., CAL.**—At an

election held here on July 25th for the purpose of voting bonds of \$3,000 to be used in making additions to the present school building, the issue was defeated by a vote of 30 in favor of the issue and 53 against. It is thought that another election will be held at an early date.

**PETALUMA, SONOMA CO., CAL.**—A special election for city improvement, which includes the elimination of Thompson Creek, placing of electrolators and paving of East Washington street, has been definitely decided upon by the City Council.

According to the estimates the cost of these improvements will run as follows: Paving of Washington street, \$20,000; \$45,000 for Thompson Creek and \$10,000 for electrolators.

**REDONDO, LOS ANGELES CO., CAL.**—Bonds have been voted here for a new \$40,000 grammar school building. Plans for the building have already been prepared by Architect L. B. Pemberton.

**SANTA MONICA, LOS ANGELES CO., CAL.**—An election held here to vote bonds of \$150,000 for proposed auditorium was defeated. There were 1,045 votes cast in favor of the issue and 1,150 against. It was proposed to construct the auditorium on the Municipal Pier.

**WATTS, LOS ANGELES CO., CAL.**—An election held here to vote bonds of \$50,000 carried by a large majority. Funds will be used in the construction of a high school building.

**ETNA MILLS, SISKIYOU CO., CAL.**—The citizens here voted a bond issue for \$21,000 to be used in the construction of sewers. Out of 186 votes cast but 23 were against the proposed issue.

**ORLAND, GLENN CO., CAL.**—Up to July 30th no bids were received here for the purchase of bonds amounting to \$15,000. It is thought that they will be sold to the State Board of Control, this body agreeing to purchase same if no other bids were accepted.

**KENTFIELD SCHOOL DISTRICT, MARIN CO., CAL.**—Sealed proposals will be received by T. J. Fallon, Treasurer of Marin County, until August 6th for the purchase of bonds amounting to \$17,000. Bonds will be in denomination of \$500 to \$1,000, numbered from one to twenty-one, each bearing interest at 5 per cent per annum. Funds will be used in the erection of a school building and improvements.

**FRANKLIN SCHOOL DISTRICT, SUTTER CO., CAL.**—Sealed proposals will be received here by the Board of Supervisors for the sale of bonds amounting to \$2,500, which will take place before the Board on August 25th. There are five bonds to be sold, each of the denomination of \$500, bearing interest at the rate of 6 per cent per annum, payable semi-annually.

## BRIDGES AND DAMS.

**CHICO, BUTTE CO., CAL.**—Bridge, concrete construction. Cost not stated. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans and specifications have been approved for a reinforced concrete bridge in the Esplanade at Chico. Bids are now being taken and will be opened by the Board of Supervisors on August 7th. Plans can be secured from the County Surveyor.

**SAN JOSE, SANTA CLARA CO., CAL.**—Road culvert, reinforced concrete. Cost not stated. Engineer, County Sur-

Yeyon, San Jose. Owner—Santa Clara County. Bids will be received on August 17th by the Board of Supervisors for constructing a road culvert on the Harwood Road south of Branham Lane. Plans and specifications can be secured from the County Clerk.

**SAN JOSE, SANTA CLARA CO., CAL.**—Rubble wall, concrete and earth. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Plans and specifications have been completed for a rubble wall to be erected on Campbell Creek. Plans are now out for figures and bids will be opened on August 17th. Plans and specifications can be secured from the County Clerk.

**FILLMORE, VENTURA CO., CAL.**—Trestle bridge, reinforced concrete pile. Cost not stated. Engineer, County Surveyor, Ventura. Owners, Ventura County. Plans have been completed and have received the approval of the Board of Supervisors for 600-foot extension to the Bardsdale bridge near Fillmore. Bids will be opened on August 8th. Plans and specifications can be secured from the Clerk of the Board of Supervisors.

**FAIR RIVER MILL, SHASTA CO., CAL.**—Bridge, steel or timber construction. Cost not stated. Engineer, County Surveyor, Redding. Owners, Shasta County. Plans have been accepted by the Board of Supervisors for a new bridge over the Pitt River. Bids will be taken for either a wooden structure or steel span. The bridge will be 105 feet long. Bids will be called for at once.

#### Contracts Awarded.

**MADERA, MADERA CO., CAL.**—Bridges, 9, reinforced concrete. Cost not stated. Engineer, County Surveyor, Madera. Owners, Madera County. The Supervisors of Madera County have awarded nine bridge contracts—six to the Pacific Coast Construction Co. of Fresno and three to James Williamson of Rockaway Beach, San Mateo Co. The Pacific Coast Construction Co.'s contracts are as follows. Over Ash Slough, 600 feet reinforced concrete, \$14,641; first slough south of Berenda, reinforced concrete, \$2,246; second slough south of Berenda, reinforced concrete, \$2,950; Cottonwood Creek, 175 feet, reinforced concrete, \$5,700; Pine Gold Creek, reinforced concrete, \$5,900; and Walker Creek, reinforced concrete, \$6,290. James Williamson's contracts were as follows: Cottonwood Creek, reinforced concrete, \$6,341; Berenda slough, reinforced concrete, \$11,984, and Cottonwood Creek, reinforced concrete, \$5,653.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Bridge and culvert, reinforced concrete and steel, \$3,800. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Contractors, Barrett & Hilt. Sharon Bldg., S. F. Contract price, \$3,800.

**SAN JOSE, SANTA CLARA CO., CAL.**—Bridge extension and culvert, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, John Doyle, San Jose. Contract price, culvert, \$1,863; bridge extension, \$613.

**ALHAMBRA, LOS ANGELES CO., CAL.**—Culvert, reinforced concrete, \$30,000. Engineer, City Engineer Charles E. Hewes, Alhambra. Owners, City of Alhambra. Contractors, Messers-Rice Co., Story Bldg., L. A. Contract price, \$30,000.

### CHURCHES.

**CALEXICO, IMPERIAL CO., CAL.**—Church, 1 story and base, hollow tile construction, \$12,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Congregational Church of Calexico. The building will contain the main auditorium and Sunday school rooms. Interior will be finished in pine with ornamental plaster. There will be some marble and tile. Exterior of the building will be faced with cement plaster. Art glass windows are specified. Plans are being prepared. A. C. Wright is the pastor.

**SAN DIEGO, SAN DIEGO CO., CAL.**—Mission restoration, \$50,000. Architect, L. B. Benton, 114 North Spring street, L. A. Owners, Mission San Diego de Alcala. There are several buildings comprising the group known as the Mission San Diego de Alcala and all the buildings will be repaired. It is the intention of the commission now charged with raising funds for this work to adhere as nearly as possible to the workmanship and architectural style of the original buildings.

### FACTORIES & WAREHOUSES.

**OAKLAND, CAL.**—Factory, 4 story and base. Class A construction. Cost not stated. Architects, Lewis P. Hobart and Charles H. Cheney, Crocker Bldg., S. F. Owners, Shredded Wheat Co. This will be the first of a large group of Class A buildings to be erected on the property bounded by 12th and 14th streets, Popular and Union. The first building will cover a ground area of 81 by 201 feet and will be used as the factory, administration building and offices. Construction will be fireproof throughout with reinforced concrete walls, floors and hollow tile interior partitions. A large roof garden will be one of the features of the building. Structural plans were prepared by the company's engineers and the local architects will do the architectural work and superintendence. The designs will be in the Mission style. Other buildings which will be erected on the property shortly will include an office building and a number of cottages. Special machinery to be installed has been designed by the company's engineers. Further mention will be made of the work when plans are ready for figures.

**LOS ANGELES, CAL.**—Factory and warehouse, 3 story and base, brick. Cost not stated. Architects, William Curlett & Son, Merchants' Trust Bldg., L. A. Owners, Rudgear-Merle Co., S. F. The building will be erected at the corner of Alameda and Palmetto streets, covering an area of 160 by 272 feet. Construction will be of the class C type. Metal window sash and frames will be specified. There will be elevator service and fire doors. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

### FLATS.

**SAN FRANCISCO**—Flats, 3 story and base, frame, \$7,000. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, Frank Garritta. The building will be erected on the east side of Scott street south of Chestnut, having a frontage of 25 feet and a depth of 54 feet. There will be a store on the first floor and two modern flats of five and six

rooms on the upper floors. Interior finish will be of pine throughout. There will be open fire places and tile mantels. Terrazzo steps are specified. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$6,500. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, A. Radioff. The building will be erected on Parker avenue near Geary, and has been designed for two six-room flats, each with a private garage in the basement. Interiors will be finished in pine with hardwood floors in the living and dining rooms. There will be open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architects, J. E. Kraft & Son, Phelan Bldg., S. F. Owner, Dr. J. N. Power. The building will be erected on 5th avenue near I street, and has been designed to contain two modern five and six room flats. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, Harry A. Larson, 3875 25th street, S. F. The building will be erected on the south side of 17th street west of Shrader, and will contain two flats of five rooms each with bath. Pine and redwood will be used for interior finish. There will be some oak floors. Plans provide for open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**OAKLAND, CAL.**—Flats, 2 story and base, frame, \$10,000. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, William Greuner. The building will be erected on the east side of Claremont street south of Forest and has been designed to contain two large flats of ten rooms each. Interiors will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. A central heating system, probably furnace heat, will be installed. Bath rooms will be finished in tile. Open fire places and tile or brick mantels will be used. Exterior of the building will be covered with rustic. Plans are being prepared and when complete the work will be done by Day Labor.

### GOVERNMENT WORK AND SUPPLIES.

#### Berkeley, Cal., Post Office.

In the construction of the U. S. post office at Berkeley, Cal., for which the Van Stan-Houghton Co., San Francisco, Cal., has the contract, oil-burning apparatus manufactured by the Fess System Co. motor and oil-burning apparatus manufactured by Holtzer-Cabot

Electric Co., and non-conducting covering manufactured by Kearsbey & Mattison Co. will be used.

#### Astoria, Ore., Elevators.

As previously reported, the contract for the installation of a hydraulic freight lift, pumping plant, etc., in the U. S. custom house, Astoria, Ore., was awarded to the Otis Elevator Co., Washington, D. C., who will use fixtures and material manufactured by the following named firms in the prosecution of the work: Plumbing fixtures, Crane Co.; hydraulic lift, Otis; pump motor, Otis; pump motor controller, Sundh Electric Co.; hand power lift, Otis.

#### Denver, Colo., Mechanical Equipment.

As previously reported, the contract for the mechanical equipment of the U. S. post office at Denver, Colo., was awarded to the Christ Irving Plumbing & Heating Co., Denver, Colo., at \$177,934. In the prosecution of the work fixtures and material manufactured by the following named firms will be used: Plumbing fixtures, Federal-Huber Co.; garbage-burning water heater, Kewanee Boiler Works; sump pump, American Well Works; motor and rheostat, General Electric Co.; charging scales for boiler room, Fairbanks Co.; boiler, John O'Brien Boiler Works Co.; furnaces for boilers, Hawley Down-Draft Furnace Co.; damper regulator, Webster; pressure gauges, Marsh; exhaust head for vapor pipe, Sarge; direct-column pattern radiators, wall radiators, and hot-blast cast iron heaters, American Radiator Co.; gate valves, check valves, and safety valves, Crane Co.; blow-off and globe valves, Crane Co.; multi-blade fans, Buffalo Forge Co.; fan motors and rheostats, General Electric Co.; air washers, Warren-Webster Co.; air washer pumps, do; motors and rheostats, General Electric Co.; cabinet, Electrical Mfg. Co.; tablet, Trumbull Mfg. Co.; conduit, Western Conduit Co.; wire, General Electric Co.; cables, do; fuses, Conduit Electric Mfg. Co.; watt-hour meters, Sangamo Electric Co.; voltmeters, General Electric Co.; switchboard, Mountain Electric Co.; circuit breakers, General Electric Co.; knife switches, Trumbull Electric Mfg. Co.; plug receptacles and push-button switches, Arrow.

#### Phoenix Indian School Building.

The contract for the construction of a brick industrial building at the Phoenix Indian School, Ariz., has been awarded to Charles H. Odam, Phoenix, Ariz., at \$14,900.

#### Salt Lake City, Utah, Vault Shelving.

The contract for installing vault shelving in the U. S. post office at Salt Lake City, Utah, has been awarded to Van Dorn Iron Works, Cleveland, Ohio, at \$1,400.

#### San Diego, Wharf.

It has been decided by the bureau of yards and docks, Navy Department, to abandon the project for the construction of a small timber wharf at San Diego as advertised under specification 2054. Plans to accompany same will, therefore, not be issued.

#### Bozeman, Mont., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., July 20, for the construction, including

plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting fixtures, and approaches of the U. S. post office at Bozeman, Mont.:

Bid 1, Dieter & Wenzel Construction Co., Wichita, Kan.

2, Reynolds, Sypher & Shackleton, Butte, Mont.

3, Leikland, Kleppe & Co., Great Falls, Mont.

4, George Hinchliff Co., 1408 Security Building, Chicago, Ill.

5, M. L. Hollady, Greensboro, N. C.  
Proposal No. 1 (using light-colored limestone for all exterior stonework, except where granite is required)—Bid 1, \$69,989; 2, \$71,647; 3, \$67,400; 4, \$71,000; 5, \$67,023.

Proposal No. 2 (using light-colored sandstone for all exterior stonework, except where granite is required)—Bid 1, \$71,000; 2, \$73,066; 3, \$67,200; 4, \$68,500.

For alternate No. 1 (substituting Keene's cement for hard plaster on walls of all finished rooms in first and second stories, as specified), add—Bid 1, \$758; 2, \$1,440; 3, \$1,000; 4, \$300; 5, \$541.20.

For alternate No. 2 (painting all plastered surfaces of walls, ceilings, etc., in all finished rooms, etc., throughout the building, as specified), add—Bid 1, \$2,200; 2, \$2,100; 4, \$900; 5, \$1,500.

For alternate No. 3 (substituting rough surface face brick for the selected common brick required for facing exterior walls above first floor level, as specified), add—Bid 1, \$1,450; 2, \$1,100; 3, \$850; 4, \$1,400; 5, \$1,200.

Amount included in the proposal for furnishing and installing of all interior lighting fixtures—Bid 1, \$650; 2, \$950; 3, \$725; 4, no bid; 5, no bid.

### —HALLS & SOCIETY BLDGS—

**SAN FRANCISCO**—City Hall interior stone work. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at Wednesday's meeting of the Board of Public Works for the interior stone work on the City Hall show McGilvray Stone Co. low on both propositions. They will probably be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

**CROCKETT, CONTRA COSTA CO., CAL.**—Association building, 2 story and base, frame, \$22,000. Architect, W. H. Crim, Jr., 125 Kearny street, S. F. Owners, Young Men's Christian Association. The building will be designed to contain class rooms, social rooms, library, a large auditorium and gymnasium. Interior will be finished in pine and redwood with some maple floors. There will be a central heating system and hot water supply. A large swimming tank will also be included. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**OAKLAND, CAL.**—Auditorium work. Class A construction, \$1,500,000. Supervising Architect J. J. Donovan, Oakland. Plans have been completed and approved for the following work in connection with the completion of the Municipal Auditorium: Elevators, curtain hoists, marble and tile work, cement finish, finish hardware, painting, seating, plaster and lathing and electric work. Bids are now being called

for and will be opened by the Oakland Council on August 20th. Plans and specifications can be secured from the Supervising Architect. An official proposal appears in another column of this issue.

**SAN JOSE, SANTA CLARA CO., CAL.**—Lodge hall, 2 story and base, reinforced concrete, \$50,000. Architects, Atken & Richards, Theatre Bldg., San Jose. Owners, San Jose Eagles all Association. The building will cover a considerable ground area and will be of fire-proof construction. First floor will be occupied by stores. Upper floor will be arranged for offices of the organization, lodge rooms, social hall and banquet room. Interior will be finished in pine and hardwood with a maple floor in the banquet hall. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken by the architects.

**SACRAMENTO, CAL.**—Elevator equipment. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids opened on July 30th by the State Board of Control for installing elevators in the State Library show the Pacific Gurney Co. of San Francisco the only bidder. Their figure was \$8,300 and has been rejected. The work will be re-advertised.

**FRESNO, FRESNO CO., CAL.**—Post office remodeling, brick construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened on August 11th for repairs and remodeling of the United States post office at Fresno. Plans and specifications are on file with the Postmaster at Fresno or can be secured from the Supervising Architect at Washington. An official proposal will be found in this issue.

### HOSPITALS

#### Contracts awarded.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Hospital dairy building, 1 story, concrete. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Contractors, Boxton, Dillon & Boxton, Hearst Bldg., S. F. Contract price, \$18,940. A complete list of the figures opened for this work will be found under the heading of Sacramento, Stockton and Northern California in this issue.

### HOTELS.

**LAKE TAHOE, PLACER CO., CAL.**—Inn, 2 story, log construction, \$10,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected on the shore of the lake and will contain offices, dining room, lobby and social rooms on the first floor. Upper floor will be arranged for guest rooms. The entire building will be finished in rustic style. There will be a large stone fire place in the lobby. Running water will be supplied to all rooms. Plans are now being prepared. Further mention will be made of the work.

**SAN FRANCISCO**—Hotel, 5 story and base brick and steel, \$100,000. Architect, W. H. Crim, Jr., 125 Kearny street, S. F. Owner, I. I. Dehall, Los

Angels. The building will be erected at the southwest corner of Market and 12th streets, extending through to Stevenson street. The Market street frontage will be 26 feet, 165 feet on 12th street and 75 feet on Stevenson. A light steel frame will be used with brick exterior walls faced with pressed brick and terra cotta. There will be seven stories on the first floor and a total of 160 guest rooms on the upper floors. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, vacuum cleaning, a hot water system and patent store fronts. Marble and tile wainscot will be used. Bath rooms will have the floors and wainscot. Working drawings are nearly complete and figures will be called for in the course of two or three weeks. Further mention will be made of the work.

**SAN FRANCISCO**—Hotel, 6 story and base, brick and steel, \$100,000. Architect, Edward T. Paulkes, Crocker Bldg., S. F. Owner, Dr. F. C. Keek. The building will be erected at the corner of O'Farrell and Leavenworth streets, and has been designed to contain in the neighborhood of 175 guest rooms, all of which will have private baths. There will be a light steel frame and brick exterior walls. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will be finished in tile. Ornamental plaster will be used in the entrance lobby. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**LODI, SAN JOAQUIN CO., CAL.**—Hotel and stores, 4 story and base, brick and steel, \$75,000. Architect, E. B. Brown, Yosemite Bldg., Stockton. Owners, Lodi Hotel Co. The building will cover an area of 50 by 100 feet and will contain a number of stores besides the hotel lobby and dining room on the first floor. Upper floors will contain in the neighborhood of 120 guest rooms, a number of which will have private baths. Interior finish will be of pine with some hardwood. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans have been completed and figures on the general contract will be called for at once. Foundation work is complete and a contract for the structural steel has been awarded to the Ralston Iron Works.

**LOS ANGELES, CAL.**—Hotel, 3 story and base, Class C construction. Cost not stated. Architect, Leonard L. Jones, 1125 Central Bldg., L. A. Owner, Arthur W. Fisher. The building will be erected on Hope street with a frontage of 60 feet and a depth of 150 feet. The building will contain office, lobby, parlors and about 88 guest rooms, 50 per cent of which will have private baths. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water system. All bath rooms will have tile floors and wainscot. Exterior will be faced with pressed brick. Plans are being prepared.

An Australian has invented a waterproof electric motor to drive brushes against the hulls of vessels to clean them without dry docking.

## RAILROAD CONST. STATIONS AND EQUIPMENT.

**MODESTO, STANISLAUS CO., CAL.**—Passenger station, 1 story and base, reinforced concrete. Cost not stated. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Completed plans have been sent to Modesto for the new passenger station to be erected between I and J streets. The building will be in the Mission style and will cover an area of 50 by 150 feet. There will be two waiting rooms, agents' office and baggage room. Interior will be finished in pine and redwood. Tile floor will be used. There will be a central heating system. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now being figured.

### Contracts Awarded.

**SAN FRANCISCO**—Passenger station, 2 story and base, reinforced concrete. Cost not stated. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractor, William A. Newsom, Sharon Bldg., S. F. Contract price, \$59,650. Note: This contract includes only the brick work, carpentry, mill work, glass and glazing and tile roof. Other parts of the work will probably be done by the owners under the Day Labor system.

## RESIDENCES.

**SAN FRANCISCO**—Residence, 1½ story and base, frame, \$2,000. Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. The dwelling will be erected on Vienna street north of Persia, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with shiplap and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on Hillaway avenue near Carl. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Residence, 1½ story and base, frame, \$7,000. Architect, H. H. Gutterson, 50 Post street, S. F. Owner, Duncan McDuffie. The dwelling will be erected in St. Francis Wood and has been designed to contain eight rooms, two baths and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine with hardwood veneer and hardwood floors in the living room, dining room, library and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and

brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$20,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Matthew A. Little. The dwelling will be erected at the southwest corner of Devisadero and Green streets and will contain 14 rooms, 3 baths and sleeping porch. A garage will occupy the basement. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be a hot water system of heating. Open fire places and tile or brick mantels will be used. Bath rooms will be finished in tile and will be equipped with showers. Imported tapestries will be used on the walls. Exterior of the house will be covered with pressed brick veneer. Plans are nearly complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$7,000. Architect, H. H. Gutterson, 50 Post street, S. F. Owner, Duncan McDuffie. The dwelling has been designed to contain eight rooms, two baths and sleeping porch, and will be erected in St. Francis Wood. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, William P. Nolan, 1530 Fillmore street, S. F. The dwelling will be erected on the west side of 17th avenue south of Anza, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residences, 4, 2 story and base, frame, \$8,000 to \$12,000 each. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Matthew A. Little. These dwellings will be erected on a Fifty Vara lot recently purchased by Mr. Little. Pine, hardwood and white enamel will be used for interior finish. Red gum will be used in the halls. There will be furnace heat and hot water heater, open fire places, tile and brick mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath and brick veneer. Work will be done by Day Labor. Foundation work has been started on the first two dwellings.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$4,000. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, Helen S. Treat. The dwelling has been designed for a seven room house and will be erected on the east side of 16th avenue north of Clement. The dwelling will be finished

in pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot and floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans have been out for figures and a contract will be awarded shortly.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman & Bro., 742 Market street, S. F. The dwelling will be erected on the east side of 23rd avenue north of Irving and has been designed to contain six rooms ad bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$1,600. Architect, none. Owner, J. M. Peters, 1010 Balboa street, S. F. The dwelling has been designed for a seven-room house and will be erected on 16th avenue near California street. Interior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner and work will be done by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mr. Martin. The dwelling has been designed to contain eight rooms and bath and will be erected on Piedmont avenue. Interior will be finished in pine with some hardwood veneer. There will be hardwood floors and open fire places. Furnace heat is specified. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

**OAKLAND, CAL.**—Bungalow, 1 story and base, frame, \$2,000. Architect, L. F. Hyde, Dalziel Bldg., Oakland. Owner, S. Caraventa. The dwelling has been designed to contain five rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place and tile or brick mantel. Tile wainscot will be used in the bath room. Exterior of the house will be covered with rustic. Plans are complete and the architect is taking figures on the work.

**SAN LORENZO, ALAMEDA CO., CAL.**—Bungalow, 1 story and base, frame, \$3,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, Mr. Crane. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors

will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are being prepared.

**OAKLAND, CAL.**—Residence, 1 story and base, frame, \$2,000. Architect, L. F. Hyde, Dalziel Bldg., Oakland. Owner, Mrs. Ellis. The dwelling will contain six rooms and bath, and will be erected on Alameda avenue near High street. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 1½ story and base, frame, \$3,250. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Anna M. Clark. The dwelling will be erected at the corner of Colusa and Posen streets, and has been designed for a seven-room house. Interior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Bungalow, 1 story and base, frame. Cost not stated. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, Dr. A. Miles Taylor. The dwelling will contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood. There will be an open fire place and tile or brick mantel. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with re-sawn rustic. Plans are complete and figures will be taken at once.

**SAN JOSE, SANTA CLARA CO., CAL.**—Residences, 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: J. F. Clark, 308 South 11th street, seven-room house, \$2,000; A. O. Kent, 146 South 22nd street, five-room house, \$2,000; J. J. Hanson, 140 North 16th street, four-room cottage, \$1,500, and V. D. Brown, 723 Gifford, five-room cottage, \$1,600. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Thomas Hamill, 268 25th avenue, S. F. The dwelling will be erected on the west side of 22nd avenue north of Anza street, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile mantel. Bath room will have tile wainscot and composition floors. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the

work by Day Labor. Materials are now being purchased.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$25,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Joseph O. Tobin. The dwelling will be erected on California street, and has been designed to contain fourteen rooms, several baths and a sleeping porch. Interior will be finished in pine, hardwood and white enamel. Hardwood and in-laid floors will be used in the principal rooms. There will be a central heating system, either steam or hot water, and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile and will be equipped with showers. A vacuum cleaning system and hot water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**OAKDALE, STANISLAUS CO., CAL.**—Residence, 2 story and base, frame, \$5,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Edward Gobin. The dwelling will contain seven rooms and bath. Interior finish will be of pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are now being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Residence, 2 story and base, frame, \$8,000. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, R. H. Cross, 1304 28th street, Oakland. The dwelling will be erected at the northeast corner of Claremont and Hillcrest, and has been designed for a ten-room house with two baths and sleeping porch. Interior finish will be of pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**OAKLAND, CAL.**—Bungalow, 1 story and base, frame, \$2,500. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, Peter Anderson. The dwelling will be erected on 61st street and has been designed for a five-room house with bath. Interior will be finished in pine throughout. Some hardwood floors will be used. There will be a large open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**OAKLAND, CAL.**—Residence, 2 story and base, frame, \$3,500. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, Roger Colt. The dwelling has been designed for a seven-room house and will be erected at the corner of Staten and Palm streets. Interior will be finished in pine and redwood. There will be oak floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot. An automatic water heater will

be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**PARADISEA, LOS ANGELES CO., CAL.**—Residences, 2, 2 story and base, frame and plaster, \$29,000 each. Architect, Leonard L. Jones, Central Bldg., L. A. Owners' names withheld. Each of these houses will contain eleven rooms and two baths. Interiors will be finished in pine and hardwood with hardwood floors. There will be three open fire places and tile mantels. Bath rooms will have tile wainscot and floors and will be equipped with showers. Automatic water heaters will be installed. Exteriors of the houses will be covered with cement plaster on metal lath. Clay tile roofs will be specified. Plans are being prepared and construction will be started about September 1st.

#### Contracts Awarded.

**BEVERLY HILLS, LOS ANGELES CO., CAL.**—Residence, 2 story and base, frame and plaster, \$5,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, Edmund Locke. Contractor, T. C. Voorhees, 904 West 56th street, L. A. Contract price, \$15,000.

### SCHOOLS.

**SAN FRANCISCO—**School, 3 story and base, brick and steel, \$50,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Paul's Parish, Father M. D. Connelly in charge. The building will be erected at the northwest corner of 29th and Church streets. There will be a number of class rooms, main assembly hall and auditorium. Interior will be finished in pine and hardwood with maple floors in the class rooms. Plans provide for steam heat, an oil burning system and hot water supply. Plans have been completed and turned over to the owners who are doing the work by Day Labor and segregated contract. Exterior of the building will be faced with pressed brick.

**CLOVIS, FRESNO CO., CAL.**—Manual training department, 1 story, frame. Cost not stated. Architect, W. F. Bowen, Rowell Bldg., Fresno. Owners, Clovis High School District. Plans have been completed and are now out for figures for a one-story frame manual training building to be erected on the High School grounds. Interior of the building will be finished in pine. Exterior will be covered with cement plaster. Bids will be opened on August 5th. Plans can be secured from the architect. On the same day bids for furnishing manual training tools and supplies for the district will be opened. Complete particulars can be secured by addressing Secretary John E. Rutledge at Clovis.

**TRES PINOS SCHOOL DISTRICT, SAN BENITO CO., CAL.**—School, 1 story, frame. Cost not stated. Architect's name not given. Owners, Tres Pinos School District. The building has been designed to contain three rooms. Interior finish will be of pine throughout. The building will be heated by stoves. Composition blackboards will be used. A pressed brick will be constructed, but is not included in the contract for the building. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the County Superintendent of Schools at Hollister. Bids will be opened on August 5th.

**SONOMA, SONOMA CO., CAL.**—School, 2 story and base, brick. Cost not stated. Architect, A. C. Lutgenes, 525 Market street, S. F. Owners, Sonoma School District. This building has been described here before when plans were first out for figures. The time for opening bids has been extended and plans can be secured from the architect in San Francisco.

**FRESNO, FRESNO CO., CAL.**—School addition, 2 story, brick. Cost not stated. Architects, Glass & Butner, Rowell Bldg., Fresno. Owners, City of Fresno. Bids opened for this work show Smith & Jones low at \$23,697. Bids were taken under advisement.

**BURLINGAME, SAN MATEO CO., CAL.**—School, 1 story, frame and plaster. Cost not stated. Architects, John Edwards and Ernest Norberg, San Mateo. Owners, Burlingame School District. The building will be erected in the Burlingame Meadows District and will contain three rooms. Interiors will be finished in pine throughout. There will be composition blackboards. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**PITTSBURG, CONTRA COSTA CO., CAL.**—School, 2 story and base, brick. Cost not stated. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Pittsburg School District. The building has been described in these columns before when plans were first out for figures. Bids ran too high and were rejected. There will be eight class rooms, assembly hall and principal's office. Interior will be finished with maple floors in the class rooms. Plans provide for a central heating system and modern school plumbing. Exterior of the building will be faced with pressed brick. Revised plans are now out for figures and bids will be opened on August 12th. Plans and specifications can be secured from the architect.

**ALHAMBRA, LOS ANGELES CO., CAL.**—School buildings, 1 and 2 story and base, brick, \$100,000. Architect, Norman F. Marsh, 212 Broadway, L. A. Owners, Alhambra School District. Working drawings are complete for the new High School group to be erected at Alhambra. Plans for the gymnasium have been revised, making it a two-story structure to be used by the city and the High School. Interiors will be finished in pine with hardwood floors. There will be the most modern school plumbing and fixtures. All buildings will be heated by steam furnished by a central heating plant housed in a separate building. Exteriors will be faced with blue brick. Bids will be called for this work.

**RANCHO LA BREA, LOS ANGELES CO., CAL.**—Girls school, 2 story and base, brick, \$60,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owner, Marlborough School for Girls, Mrs. Mary S. Caswell, principal. The building will be designed in the Colonial style in the shape of a hollow square, with a one story gymnasium building in the rear. The extreme dimensions will be 156 by 170 feet. Interior will be arranged for class rooms, assembly hall, living rooms and teachers' rooms. A number of sleeping porches, which will face an open patio, will be a feature of the building. Interior finish will be of pine. There will be a central heating system and modern school plumbing. Exterior of the building will be faced with cement

plaster. Plans are nearly complete.

**HOLTVILLE, IMPERIAL CO., CAL.**—School, 2 story and base, hollow tile construction, \$25,000. Architects, Allison & Allison, Hibernal Bldg., L. A. Owners, Holtville School District. The building will contain twelve classrooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be modern school plumbing. Exterior of the building will be faced with cement plaster. Plans are being completed. The sum of \$43,000 is available for constructing the building and purchase of the site.

#### Contracts Awarded.

**SUNNYVALE, SANTA CLARA CO., CAL.**—School, 1 story and base, frame and concrete, \$15,680. Architects, F. D. Wolfe & Son, San Jose. Owners, Sunnyvale School District. Contractor, V. E. Parrish, Sunnyvale. Contract price, \$15,680.

**MODESTO, STANISLAUS CO., CAL.**—Open air schools, 2, 1 story, frame. Cost not stated. Architect, none. Owners, City of Modesto. Contractors, W. J. Kerry and L. F. Free, Modesto. Contract price, \$2,165.

**CHEROKEE SCHOOL DISTRICT, GLENN CO., CAL.**—School, 1 story and base, reinforced concrete, \$6,628. Architect, Clarence L. Styles, 2116 Parker avenue, Berkeley. Owners, Cherokee School District. Contractor, W. R. Zumwalt, Willows. Contract price, \$6,628.

**LOS ANGELES, CAL.**—School additions, 1 story, brick and frame, \$43,425. Architect, Architectural Dept. Board of Education, L. A. Owners, City of Los Angeles. Contractors, May & Grimm, Union Oil Bldg., L. A. Contract price, \$43,425.

**TUSTIN, ORANGE CO., CAL.**—School, 2 story and base, brick, \$45,000. Architects, Elwing & Tedford, Santa Ana. Owners, Tustin School District. Contractor, George Keuchel, Orange. General construction, \$35,420, heating and ventilating, John McFadden, Santa Ana, \$3,925.

### SEWERS, STREET WORK AND WATER SYSTEMS.

**CALIFORNIA—**Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on August 24th at 2 p. m. for constructing state highways in the following counties: Santa Barbara, 6.5 miles; San Benito, 4 miles; Kern, 17.3 miles; and in San Diego, 1.6 miles. An official proposal for this work appears in another column of this issue. Plans and specifications together with full particulars can be secured by addressing the State Highway Commission at Sacramento.

**FAIRFAX MARIN CO., CAL.**—Subdivision work, \$100,000. Engineer, E. J. Morser, Monadnock Bldg., S. F. Owners, eastern capital represented by Ferguson-Brunner Co. S. F. A number of eastern capitalists have purchased the famous old Fairfax Park tract embracing about 100 acres, and are about to put the property on the market in acre tracts for suburban homes. Surveyors are now engaged in making the surveys for roads, side-walks and sewers. There will be a large amount of grading, macadamizing and concrete work. Bids will be taken in about two weeks.

W. R. BRODE, Pres. LOUIS R. HOLM, Sec. R. J. BRODE, Vice-Pres.

**BRODE IRON WORKS**Established 1886—Incorporated 1913  
Tel. Kearny 2464.

Fabricators and Contractors of Structural Steel and Ornamental Iron Work

Offices &amp; Works: 31-37 Hawthorne St., bet. Howard &amp; Folsom Sts., San Francisco, Cal.

**SACRAMENTO, CAL.**—Sewer pumping machinery. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids opened for furnishing and installing pumping machinery in the Riverside avenue sewer station show Telchert & Ambrose of Sacramento low at \$42,000. Keating & Holt were the only other bidders at \$45,000.

**RICHMOND, CONTRA COSTA CO., CAL.**—Sewer work, \$50,000. Engineer, City Engineer, Richmond. Owners, City of Richmond. The City Engineer has plans nearly complete for sewer extensions in the western part of the city, and will submit the same to the City Council at their next meeting. The work has been estimated to cost \$50,000.

**VALLEJO, SOLANO CO., CAL.**—Intersecting sewer. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Plans have been completed for intersecting sewer No. 2, and figures are being taken. Bids will be opened on August 10th instead of August 20th as at first advertised. Plans and specifications can be secured from the City Clerk.

**VISALIA, TULARE CO., CAL.**—Sewer system extensions. Cost not stated. Engineer, City Engineer McCabe, Visalia. Owners, City of Visalia. City Engineer McCabe of Visalia is rapidly completing plans for an extensive new sewer system to be installed. Several new real estate additions to Visalia have made the extensions of sewers necessary.

**OAKLAND, CAL.**—Road repairs. Cost not stated. Engineer, County Surveyor, Oakland. Owners, Alameda County. Plans are complete and figures will be opened by the Board of Supervisors on August 10th for repairs to the Niles Canyon Road in Alameda County. Plans and specifications can be secured from the County Clerk.

**CALEXICO, IMPERIAL CO., CAL.**—Pipe line water supply, \$25,000. Engineer, City Engineer, Calexico. Owners, City of Calexico. The City Engineer has been instructed to prepare plans at once for a pipe line or an enclosed conduit from the central main canal to the city's reservoirs which will greatly improve the city's water supply. Bids will be called for shortly.

**Contracts Awarded.**

**STOCKTON, SAN JOAQUIN CO., CAL.**—Street improvement, \$80,341.29. Engineer, City Engineer, Stockton. Owners, City of Stockton. The Federal Constructing Co. of San Francisco has been awarded a contract for street improvements in the Oaks on their bid of \$80,281.98. The contract includes asphalt macadam, gravel alleys, concrete walks, curbs and gutters. The contractors will put in a new plant at Stockton to handle this work and any additional work in that section of the state.

**RICHMOND, CONTRA COSTA CO., CAL.**—Street improvements. Cost not stated. Engineer, City Engineer, Richmond. Owners, City of Richmond. Two street contracts were awarded at the last meeting of the City Council. The Municipal Improvement Co. was awarded

the contract for the improvement of Pullman avenue on their bid of \$54,592.42, and L. L. Page was awarded the contract for the improvement of Clinton avenue at \$16,193.17.

**WILLOWS, GLENN CO., CAL.**—Street improvement, \$18,000. Engineer, City Engineer, Willows. Owners, City of Willows. Contractors, Clarke & Henery Construction Co., Sacramento. Contract price, \$18,000.

**STORES.**

**SAN FRANCISCO**—Loft addition, 1 story, brick. Cost not stated. Architect, Phillip Overman, Shreve Bldg., S. F. Owners, Crocker Estate. The present one-story building at the southeast corner of Ecker and Jessie street will be altered and a one-story addition constructed. The upper floor and basement will be occupied by a printing establishment. Interior will be finished in pine. There will be a freight elevator. Exterior of the building will be faced with stock brick. Plans are complete and a contract will be awarded shortly.

**PHOENIX, ARIZ.**—Stores and offices, 3 story and base, Class A construction, \$175,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Dwight B. Heard. The building will be erected on Central avenue, covering an area of 70 by 146 feet. Construction will be of the Class A type throughout with a complete steel frame, reinforced concrete wall and floors. There will be several stores in the first floor and a total of 156 offices on the upper floors. Interiors will be finished in pine and hardwood with metal trim and metal window frames and sash. Marble and tile will be used in the stores and entrance lobby. Plans provide for steam heat, elevator service, vacuum cleaning and water supply. Exterior will be faced with pressed brick. Plans have been revised and new figures will be called for shortly.

**THEATRES.**

**MARTINEZ, CONTRA COSTA CO., CAL.**—Theatre, 1 story, brick, \$5,000. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owner, Mrs. Cornelia Gray. The building has been designed for a motion picture house and will contain one store besides the theatre. Interior will be finished in pine throughout. A cement floor will be used. Ornamental plaster is specified. Special electric work will be installed. There will be a modern system of ventilation. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**BERKELEY, ALAMEDA CO., CAL.**—Theatre, 1 story and base, Class C construction, \$12,000. Architect, W. H. Hatchell, Jr., First National Bank Bldg., Berkeley. Owners, J. A. Elliott and George Clark. The building will be erected at the corner of Durant and Telegraph, covering a large ground

area. The building will contain one store besides the motion picture theatre. Interior will be finished in pine and ornamental plaster. A modern system of ventilation will be installed. Special electric work is specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and in the hands of the owners who are taking segregated figures on the work.

**LONG BEACH, LOS ANGELES CO., CAL.**—Theatre, 3 story and base, Class A construction, \$125,000. Architect, Irving J. Gill, 913 South Figueroa street, L. A. Owner, Homer Laughlin. The proposed building will be erected at the corner of Fourth and Pine streets, and is being promoted by Archie Levy. A proposition to market a bond issue of \$120,000 will be submitted to the Long Beach Chamber of Commerce, and if accepted working drawings will be prepared. Further mention will be made of this work if the bond issue is floated.

**SEALED PROPOSALS.****PROPOSALS FOR AUDITORIUM WORK.**

PURSUANT to Resolution No. 5527 N. S., passed July 22, 1914, the Council of the City of Oakland will receive bids for furnishing all of the material, labor and workmanship required in connection with the construction, erection and finish of Elevators and Cement Finishes; Plastering and Lathing; Painting; Seating; Plastering and Lathing and Electrical Work for the Auditorium Building to be erected on the grounds of Perini Park, located on the southerly side of Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for Auditorium," (specifying work bid upon) addressed to the Council and deposited by the bidder or his agent, with said Council, in session, between 11 o'clock a. m. and 12 o'clock Noon, Pacific Time, on the 20th day of August, 1914, in the room of the Council in the City Hall, 400 North Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by and in accordance with the plans, drawings and specifications prepared therefore and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent of the aggregate amount of the proposal. Said check shall be forfeited to and retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of guaranty to be provided by the City and as required by the Charter of the City of Oakland, within twenty days after receiving notice of award.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond of guaranty to the City for the faithful performance of the contract and in an amount equal to twenty-five per centum (25%) of the amount named in that agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon the furnishing materials to be used upon the said work and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bound set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgment and specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after July 28, 1914, within a reasonable time after application, and upon a deposit of Twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant; additional copies will be furnished provided the applicant pays the cost of reproduction, such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the plans and specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder, as required by Section 12 of the Charter of the City of Oakland. FRANK M. SMITH, City Clerk.

#### PROPOSALS FOR OIL BURNING PLANT.

**OIL BURNING PLANT**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until **8 p. m., August 25, 1914**, for the publicly opened, for an oil-burning plant for heating boiler in the United States post office and custom house at Eureka, Cal. In accordance with specification and drawing, copies of which may be obtained at this office or at the office of the custodian at Eureka, Cal., in the discretion of the supervising architect. O. WENDEBOTH, supervising architect.

C., until **11 o'clock a. m., August 29, 1914**, and then and there publicly opened, for coal-hoisting tower for the naval coal depot, San Diego, Cal. Plans and specifications may be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

#### NOTICE TO CONTRACTORS.

#### PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213 in the Service Building Fillmore and Chestnut Streets, San Francisco, California, at **10 a. m., Wednesday, August 11th, 1914**, for furnishing and installing lighting fixtures in the Exposition Auditorium Building in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific Interna-

tional Exposition Company in the sum of ten (10) per cent of the amount of the sum of bids will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract. The surties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which sum will be returned to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of twenty-five dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER, Chairman. (\*)

#### STATE OF CALIFORNIA.

#### DEPARTMENT OF ENGINEERING. CALIFORNIA HIGHWAY COMMISSION.

#### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which times they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State laws as follows:

**Unit 11 o'clock A. M., August 10, 1914.** Mendocino County from 2 1/2 miles north of Hopland to Ukiah (I-Men-1-B) about 11.4 miles in length, to be graded and a portion paved with Portland cement concrete.

Humboldt County from Miranda to Beverly (I-Hum-1-C), about 13 1/2 miles in length, to be graded.

Santa Clara County from Santa Clara to San Jose (IV-S-Cl-2-A), about 1.9 miles in length, to be built of Portland cement concrete with asphaltic wear surface.

Santa Clara County from the northern county boundary to San Jose (S-Cl-3-A), about 6.8 miles in length, to be built of Portland cement concrete.

Costa Contra County from San Pablo Creek to Pinole (IV-C-3-A), about 3.6 miles in length, to be graded.

**Unit 2 o'clock P. M., August 10, 1914.** Humboldt County from Shively to Jordan Creek (I-Hum-1-D), about 3.7 miles in length, to be graded.

Alameda County from Greenville to Livermore (IV-Ala-5-A), about 5.9 miles in length, to be built of Portland cement concrete.

Santa Barbara County from El Capitan Creek to Alcatraz (V-S-B-2-F), about 9.3 miles in length, to be graded. Contra Costa County from Calaveras to Irvine (VII-Ora-2-B), about 9.4 miles in length, to be built of Portland cement concrete.

Imperial County from Myers Creek to Coyote Wells (VII-Imp-12-A), about 6.9 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office, and they may be seen at the offices of the Division Engineer in the divisions in which the work is situated. The Division Engineers' offices are located at Willets, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The submission of prospective bidders is called to the attention of the Division Engineer. "Notice to Contractors" annexed to the blank form of proposal, for full description of bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for

the best interests of the State. CHARLES L. BARNBY, NEWELL D. DARRINGTON, CHAULES F. STEIN, California Highway Commission. AUSTIN C. FLEMMING, Highway Engineer. CHARLES C. CAULETON, Acting Secretary. (\*)

#### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Phoenix, Ariz., until **2 o'clock p. m., August 17, 1914**, for the construction of the Cave Creek cutoff of the Arizona Canal, Salt River Project, Ariz., and the necessary laterals in connection therewith, involving approximately 121,000 cubic yards of excavation and 20,000 cubic yards of concrete structures. The work is situated near the town of Glendale, Ariz. For particulars address the United States Reclamation Service, Phoenix, D. C., or Phoenix, Ariz., P. H. NEWELL, director.

#### PROPOSALS FOR MACHINERY.

All bids must be addressed to R. B. Phipps, Secretary of the Board, and plainly marked on the envelope: "Proposals for the Construction of the Carnegie Public Library, Corning." Signed R. B. FRIPP, Sec.

#### PROPOSALS FOR LOCK MACHINERY.

**LOCK MACHINERY**—U. S. Engineer Office, Burke Building, Seattle, Wash.—Sealed proposals for machinery and valves for Lake Washington Canal locks will be received at this office until **12 m., August 10, 1914**, and then publicly opened. Information on ap-

lication at engineer's office, Seattle, Wash. J. E. CAVANAUGH, major, engineers.

### PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 19th day of August, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of a tunnel and appurtenances under Twin Peaks in the City and County of San Francisco.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within six hundred (600) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful per-

formance of contract has been fixed at \$500,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

### PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals indorsed "Proposals for Erecting Five Industrial Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 15, 1914, and then and there publicly opened, for erecting five industrial buildings at the United States naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

### SAN FRANCISCO.

RESIDENCE—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. The dwelling will be erected on Vienna street north of Persia, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with shiplap and rustic. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, P. Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six-room house with bath and will be erected on Hillway avenue near Carl. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—1½ story and base, frame, \$7,000. San Francisco. Architect, H. H. Gutterston, 50 Post street, S. F. Owner, Duncan McDuffie. The dwelling will be erected in St. Francis Wood, and has been designed to contain eight rooms, two baths and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine with hardwood veneer and hardwood floors in the living room, dining room, library and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$20,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Matthew A. Little. The dwelling will be erected at the southwest corner of Devisadero and Green streets, and will contain fourteen rooms, three baths and sleeping porch. A garage will occupy the basement. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be a hot water system of heating. Open fire places and tile or brick mantels will be used. Bath rooms will be finished in tile and will be equipped with showers. Imported tapestries will be used on the walls. Exterior of the house will be covered with pressed brick veneer. Plans are nearly complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$7,000. San Francisco. Architect, H. H. Gutterston, 50 Post street, S. F. Owner, Duncan McDuffie. The dwelling has been designed to contain eight rooms, two baths and sleeping porch, and will be erected in St. Francis Wood. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, William P. Nolan, 1530 Fillmore street, S. F. The dwelling will be erected on the west side of 17th avenue south of Anza, and has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot. Exterior of the house will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCES—4, 2 story and base, frame, \$8,000 to \$12,000 each. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Matthew A. Little. These dwellings will be erected on a Fifty Vava lot recently purchased by Mr. Little. Pine, hardwood and white enamel will be used for interior finish. Red gum will be used in the halls. There will be furnace heat and hot water heater, open fire places, tile and brick mantels. Bath rooms will be finished in tile. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath and brick veneer. Work will be done by Day Labor. Foundation work has been started on the first two dwellings.

RESIDENCE—2 story and base, frame, \$4,600. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, Helen S. Treat. The dwelling has been designed for a seven-room house and will be erected on the east side of 16th avenue north of Clement. The dwelling will be finished in pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. The wainscot and floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans have been out for figures and a contract will be awarded shortly.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Oscar Heyman & Bro., 742 Market street, S. F. The dwelling will be erected on the east side of 23rd avenue north of Irving and has been designed to contain six rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being taken.

RESIDENCE—2 story and base, frame, \$4,600. San Francisco. Architect, none. Owner, J. M. Peters, 1010 Balboa street, S. F. The dwelling has been designed for a seven-room house, and will be erected on 16th avenue near California street. Interior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner and work will be done by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—4 story and base, brick and steel, \$40,000. San Francisco. Architect, C. O. Clausen, Hearst Bldg., S. F. Owner, M. S. Shaw, 235 Pine street. The building will be erected on the south side of O'Farrell street east of Van Ness avenue and will have a frontage of 52½ feet and a depth of 120 feet. There will be a total of forty suites of two and three rooms. All apartments will have

wall beds and private bath rooms. There will be steam heat and a hot water supply, elevator service, and portable vacuum cleaning. Bath rooms will be finished in tile with composition floors. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and the owner will start the work at once under the Day Labor system.

**APARTMENT HOUSE**—3 story and base, frame, \$12,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, A. Samburek. The building will be erected at the southwest corner of Jackson and Mason streets, covering an area of 25 by 57½ feet. There will be two stores on the first floor and four suites of four rooms each on the upper floors. Interior finish will be of pine throughout. All suites will have private baths and wall beds. Bath rooms will have tile wainscot and composition floors. Plans provide for a hot water system. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—3 story and base, frame, \$10,000. San Francisco. Architect, C. S. McNally. Mechanics' Institute Bldg., S. F. Owner, P. D. Bernhard. The building will be erected on Carl near Shrader street, and will have a frontage of 27 by 112½ feet. There will be seven suites of three and four rooms. Interior finish will be of pine and redwood. Some hardwood floors will be used. All apartments will have wall beds and private baths. Bath rooms will have tile floors and wainscot. Simplex windows are specified. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be taken shortly.

**FLATS**—3 story and base, frame \$7,000. San Francisco. Architect, C. O. Clausen. Hearst Bldg., S. F. Owner, Frank Giaritta. The building will be erected on the east side of Scott street south of Chestnut, having a frontage of 25 feet and a depth of 54 feet. There will be a store on the first floor and two modern flats of five and six rooms on the upper floors. Interior finish will be of pine throughout. There will be open fire places and tile mantels. Terrazzo steps are specified. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$6,500. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, A. Radivoj. The building will be erected on Parker avenue near Geary, and has been designed for two six-room flats, each with a private garage in the basement. Interiors will be finished in pine with hardwood floors in the living and dining rooms. There will be open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architects, J. E. Kraft & Son, Phelan Bldg., S. F. Owner, Dr. J. N. Power. The building will be erected on 5th avenue near I street, and has been designed to contain two modern five and six room

flats. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

**FLATS**—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, Harry A. Larson, 2878 25th street, S. F. The building will be erected on the south side of 17th street west of Shrader, and will contain two flats of five rooms each with bath. Pine and redwood will be used for interior finish. There will be some oak floors. Plans provide for open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**HOTEL**—5 story and base, brick and steel, \$100,000. San Francisco. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owner, L. I. Dehail, Los Angeles. The building will be erected at the southwest corner of Market and 12th street extending through to Stevenson street. The Market street frontage will be 26 feet, 165 feet on 12th street and 75 feet on Stevenson. A light steel frame will be used with brick exterior walls faced with pressed brick and terra cotta. There will be seven stores on the first floor and a total of 160 guest rooms on the upper floors. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, vacuum cleaning, a hot water system and patent store fronts. Marble and tile wainscot will be used. Bath rooms will have tile floors and wainscot. Working drawings are nearly complete and figures will be called for in the course of two or three weeks. Further mention will be made of the work.

**HOTEL**—6 story and base, brick and steel, \$100,000. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Dr. F. C. Keck. The building will be erected at the corner of O'Farrell and Leavenworth streets, and has been designed to contain in the neighborhood of 175 guest rooms, all of which will have private baths. There will be a light steel frame and brick exterior walls. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will be finished in tile. Ornamental plaster will be used in the entrance lobby. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

**CITY HALL INTERIOR STONE WORK**—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at Wednesday's meeting of the Board of Public Works for the interior stone work on the City Hall show McGilvray Stone Co. low on both propositions. They will probably be awarded the contract. A complete list of these figures will be found under the heading of San Francisco in this issue.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Archi-

tect none. Owner, Thomas Hamill, 268 25th avenue, S. F. The dwelling will be erected on the west side of 22nd avenue north of Anza street, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile mantel. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base, frame, \$25,000. San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Joseph O. Tobin. The dwelling will be erected on California street, and has been designed to contain fourteen rooms, several baths and a sleeping porch. Interior will be finished in pine, hardwood and white enamel. Hardwood and inlaid floors will be used in the principal rooms. There will be a central heating system, either steam or hot water, and open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile and will be equipped with showers. A vacuum cleaning system and hot water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**SCHOOL**—3 story and base, brick and steel, \$50,000. San Francisco. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, St. Paul's Parish, Father M. D. Connolly in charge. The building will be erected at the northwest corner of 29th and Church streets. There will be a number of class rooms, main assembly hall and auditorium. Interior will be finished in pine and hardwood with maple floors in the class rooms. Plans provide for steam heat, an oil burning system and hot water supply. Plans have been completed and turned over to the owners who are doing the work by Day Labor and segregated contract. Exterior of the building will be faced with pressed brick.

**LOFT ADDITION**—1 story, brick. Cost not stated. San Francisco. Architect, Phillip Overman, Shreve Bldg., S. F. Owners, Crocker Estate. The present one-story building at the southeast corner of Ecker and Jessie streets will be altered and a one-story addition constructed. The upper floor and basement will be occupied by a printing establishment. Interior will be finished in pine. There will be a freight elevator. Exterior of the building will be faced with stock brick. Plans are complete and a contract will be awarded shortly.

### Contracts Awarded.

**PASSENGER STATION**—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Engineering Department, Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractor, William A. Newsom, Sharon Bldg., S. F. Contract price, \$59,650. Note: This contract includes only the brick work, carpentry, mill work, glass and glazing and tile roof. Other parts of the work will probably be done by the owners under the Day Labor system.

# City Bids Opened.

the house will be covered with rustic. Plans are complete and the architect is taking figures on the work.

**BUNGALOW**—1 story and base, frame, \$3,000. San Lorenzo, Alameda Co., Cal. Architects, Hurd-Hinson Bros., 170 13th street, Oakland. Owner, Mr. Crane. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are being prepared.

**RESIDENCE**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, L. E. Hyde, 1001 Bldg., Oakland. Owner, Mrs. L. E. Hyde. The dwelling will contain six rooms and bath, and will be situated on Alameda avenue near H 24 street. There will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places

and tile mantels. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

**RESIDENCE**—1½ story and base, frame, \$3,250. Berkeley, Alameda Co., Cal. Architects, Elite Planners, 1541 5th avenue, Oakland. Owner, Anna M. Clark. The dwelling will be erected at the corner of Colusa and Posen streets and has been designed for a seven room house. Interior finish will be largely of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**FLATS**—2 story and base, frame, \$10,000. Oakland, Cal. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, William Greuner. The build-

ing will be erected on the east side of Claremont street south of Forest, and has been designed to contain two large flats of 10 rooms each. Interiors will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. A central heating system, probably furnace heat, will be installed. Bath rooms will be finished in tile. Open fire places and tile or brick mantels will be used. Exterior of the building will be covered with rustic. Plans are being prepared and when complete the work will be done by Day Labor.

**AUDITORIUM WORK**—Class A construction, \$1,500,000. Oakland, Cal. Supervising Architect, J. J. Donovan. Oakland. Owners, City of Oakland. Plans have been completed for the following work in connection with the completion of the Municipal Auditorium: Elevators, curtain hoists, marble and tile work, cement finish, finish hardware, painting, seating, plaster and lathing and electric work. Bids are now being called for and will be opened by the Oakland Council on August 20th. Plans and specifications can be secured from the Supervising Architect. An official proposal appears in another column of this issue.

**THEATRE**—1 story and base. Class C construction, \$12,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, J. A. Ellston and George Clark. The building will be erected at the corner of Durant and Telegraph, covering a large ground area. The building will contain one store besides the motion picture theatre. Interior will be finished in pine and ornamental plaster. A modern system of ventilation will be installed. Special electric work is specified. Exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and in the hands of the owners who are taking segregated figures on the work.

**FACTORY**—4 story and base. Class A construction. Cost not stated. Oakland, Cal. Architects, Lewis P. Hobart and Charles H. Cheney, Crocker Bldg., S. F. Owners, Shredded Wheat Co. This will be the first of a large group of Class A buildings to be erected on the property bounded by 12th and 14th, Poplar and Union streets. The first building will cover a ground area of 81 by 201 feet, and will be used as the factory, administration building and offices. Construction will be fireproof throughout with reinforced concrete walls, floors and hollow tile interior partitions. A large roof garden will be one of the features of the building. Structural plans were prepared by the company's engineers and the local architects will do the architectural work and superintendence. The design will be in the Mission style. Other buildings which will be erected on the property shortly will include an office building and a number of cottages. Special machinery to be installed has been designed by the company's engineers. Further mention will be made of the work when plans are ready for figures.

**RESIDENCE**—2 story and base, frame, \$8,000. Berkeley, Alameda Co., Cal. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, R. H. Cross, 1301 28th street, Oakland. The dwelling will be erected at the northeast corner of Claremont and Hillcrest, and has been des-

signed for a ten-room house with two baths and sleeping porch. Interior finish will be of pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**BUNGALOW** — 1 story and base, frame, \$2,500, Oakland, Cal. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, Peter Anderson. The dwelling will be erected on 61st street and has been designed for a five-room house with bath. Interior will be finished in pine throughout. Some hardwood floors will be used. There will be a large open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**RESIDENCE** — 2 story and base, frame, \$2,500, Oakland, Cal. Architect, Alvin J. Stern, 1542 Broadway, Oakland. Owner, Roger Coit. The dwelling has been designed for a seven-room house and will be erected at the corner of Staten and Palm streets. Interior will be finished in pine and redwood. There will be oak floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**ROAD REPAIRS**—Cost not stated. Oakland, Cal. Engineer, County Surveyor. Oakland. Owners, Alameda County. Plans are complete and figures will be opened by the Board of Supervisors on August 10th for repairs to the Niles Canyon Road in Alameda County. Plans and specifications can be secured from the County Clerk.

#### Contracts Awarded.

**APARTMENT HOUSE**—4 story and base, brick, \$14,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Dr. P. G. Baird. Contractor, Edward Sommarstrom, 262 East 12th street, Oakland. Contract price, \$14,000. Note: The contractor is now taking subfigures on the work.

**APARTMENT HOUSE**—2 story and base, brick and frame, \$15,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Mrs. E. S. Fenton. Contractor, Fred Muller, Syndicate Bldg., Oakland. Contract price, \$15,000. Note: The contractor is now taking subfigures on the work.

## MARIN, CONTRA COSTA AND SONOMA COUNTIES.

ASSOCIATION BUILDING—2 story and base, frame, \$22,000. Crockett, Contra Costa Co., Cal. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owners, Young Men's Christian Association. The building will be designed to contain class rooms, social rooms, library, a large auditorium and gymnasium. Interior will be finished in pine and redwood with some maple floors. There will be a central heating system and hot water supply. A large swimming tank will also be included. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOL—2 story and base, brick. Cost not stated. Sonoma, Sonoma Co., Cal. Architect, A. C. Latgens, 523 Market street, S. F. Owners, Sonoma School District. This building has been described here before when plans were first out for figures. The time for opening bids has been extended and plans can be secured from the architect in San Francisco.

THEATRE—1 story, brick, \$8,000. Martinez, Contra Costa Co., Cal. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owner, Mrs. Cornelia Gray. The building has been designed for a motion picture house and will contain one store besides the theatre. Interior will be finished in pine throughout. A cement floor will be used. Ornamental plaster is specified. Special electric work will be installed. There will be a modern system of ventilation. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

BATH HOUSE AND SWIMMING TANK—Frame and concrete construction. Cost not stated. White Sulphur Springs, Napa Co., Cal. Architect, L. M. Tutton, 111 Main street, Napa. Owners, White Sulphur Springs Co. Plans have been completed and figures are now being taken for a reinforced concrete swimming tank 50 by 100 feet and for bath houses to be erected at the same place. Plans can be secured from the architect.

SCHOOL—2 story and base, brick. Cost not stated. Pittsburg, Contra Costa Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Pittsburg School District. The building has been described in these columns before when plans were first out for figures. Bids ran too high and were rejected. There will be eight class rooms, assembly hall and principal's office. Interior will be finished in pine with maple floors in the class rooms. Plans provide for a central heating system and modern school plumbing. Exterior of the building will be faced with pressed brick. Revised plans are now out for figures and bids will be opened on opened on August 12th. Plans and specifications can be secured from the architect.

SEWER WORK—\$50,000. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. The City Engineer has plans nearly complete for sewer extensions in the western part of the city and will submit the same to the City Council at their next meeting. The work has been estimated to cost \$50,000.

INTERSECTING SEWER—Cost not stated. Vallejo, Solano Co., Cal. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Plans have been completed for intersecting sewer No. 2, and figures are now being taken. Bids will be opened on August 10th instead of August 20th as at first advertised. Plans and specifications can be secured from the engineer.

SUBDIVISION WORK—\$100,000. Fairfax, Marin Co., Cal. Engineer, E. J. Morser, Monadnock Bldg., S. F. Owners, Eastern capital represented by Ferguson-Brunner Co., S. F. A number of eastern capitalists have purchased the famous old Fairfax Park tract, embracing about 400 acres, and are about to put the property on the market in acre tracts for suburban homes. Surveyors are now engaged in making the surveys for roads, sidewalks and sewers. There will be a large amount of grading, macadamizing and concrete work. Bids will be taken in about two weeks.

## Contracts Awarded.

STREET IMPROVEMENTS—Cost not stated. Richmond, Contra Costa Co., Cal. Engineer, City Engineer, Richmond. Owners, City of Richmond. Two street contracts were awarded at the last meeting of the City Council. The Municipal Improvement Co. were awarded the contract for the improvement of Pullman avenue on their bid of \$54,593.42, and L. L. Pace was awarded the contract for the improvement of Clinton avenue at \$18,193.17.

## FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

POST OFFICE REMODELING—Brick construction. Cost not stated. Fresno, Fresno Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened on August 11th for repairs and remodeling of the United States post office at

Fresno. Plans and specifications are on file with the Postmaster at Fresno, or can be secured from the Supervising Architect at Washington. An official proposal will be found in this issue.

MANUAL TRAINING DEPARTMENT—1 story, frame. Cost not stated. Clovis, Fresno Co., Cal. Architect, W. F. Bowen, Rowell Bldg., Fresno. Owners, Clovis High School District. Plans have been completed and are now out for figures for a one-story frame manual training building to be erected on the High School grounds. Interior of the building will be finished in pine. Exterior will be covered with cement plaster. Bids will be opened on August 8th. Plans can be secured from the architect. On the same day bids for furnishing manual training tools and supplies for the district will be opened. Complete particulars can be secured by addressing Secretary John E. Rutledge at Clovis.

RESIDENCE—2 story and base, frame, \$5,000. Oakdale, Stanislaus Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Edward Gobin. The dwelling will contain seven rooms and bath. Interior finish will be of pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are now being prepared.

PASSENGER STATION—1 story and base, reinforced concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Completed plans have been sent to Modesto for the new passenger station to be erected between 1 and 3 streets. The building will be in the Mission style and will cover an area of 50 by 150 feet. There will be two waiting rooms, agents' office and baggage room. Interior will be finished in pine and redwood. Tile floor will be used. There will be a central heating system. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now being figured.

SEWER SYSTEM EXTENSIONS—Cost not stated. Visalia, Tulare Co., Cal. Engineer, City Engineer McCabe, Visalia. Owners, City of Visalia. City Engineer McCabe of Visalia is rapidly completing plans for an extensive new sewer system to be installed. Several new real estate additions to Visalia

### Contracts Awarded.

OPEN AIR SCHOOLS—2, 1 story, frame. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, none. Owners, City of Modesto. Contractors, W. J. Kerry and L. F. Free, Modesto. Contract price, \$2,168.

SCHOOL ADDITION—2 story, brick. Cost not stated. Fresno, Fresno Co., Cal. Architects, Glass & Butner, Rowell Bldg., Fresno. Owners, City of Fresno. Bids opened for this work show Smith & Jones low at \$28,697. Bids were taken under advisement.

BRIDGES—9, reinforced concrete. Cost not stated. Madera, Madera Co., Cal. Engineer, County Surveyor, Madera. Owners, Madera County. The Supervisors of Madera County have awarded nine bridge contracts—six to the Pacific Coast Construction Co. of Fresno and three to James Willison of Rockaway Beach, San Mateo Co. The Pacific Coast Construction Co.'s contracts are as follows: Over Ash Slough, 600 feet, reinforced concrete, \$14,641; first slough south of Berenda, reinforced concrete, \$2,246; second slough south of Berenda, reinforced concrete, \$2,950; Cottonwood Creek, 175 feet reinforced concrete, \$5,700; Fine Gold Creek, reinforced concrete, \$5,900; and Walker Creek, reinforced concrete, \$6,290. James Willison's contracts were as follows: Cottonwood Creek, reinforced concrete, \$8,341; Berenda Slough, reinforced concrete, \$11,984; and Cottonwood creek, reinforced concrete, \$5,693.

## SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BRIDGE—Concrete construction. Cost not stated. Chico, Butte Co., Cal. Engineer, County Surveyor, Oroville. Owners, Butte County. Plans and specifications have been approved for a reinforced concrete bridge in the Esplanade at Chico. Bids are now being taken and will be opened by the Board of Supervisors on August 7th. Plans can be secured from the County Surveyor.

INN—2 story, log construction, \$10,000. Lake Tahoe, Placer Co., Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected on the shore of the lake and will contain offices, dining room, lobby and social rooms on the first floor. Upper floor will be arranged for guest rooms. The entire building will be finished in rustic style. There will be a large stone fire place in the lobby. Running water will be supplied to all rooms. Plans are now being prepared. Further mention will be made of the work.

**ELEVATOR EQUIPMENT**—Cost not stated. Sacramento, Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids opened on July 30th by the State Board of Control for installing elevators in the State Library show the Pacific Gurney Co. of San Francisco the only bidder. Their figure was \$8,300, and has been rejected. The work will be re-advertised.

**HIGHWAY WORK**—Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on August 24th at 2 p. m. for constructing state highways in the following counties: Santa Barbara, 6.5 miles; San Benito, 4 miles; Kern, 17.3 miles, and in San Diego, 1.6 miles. An official proposal for this work appears in another column of this issue. Plans and specifications together with full particulars can be secured by addressing the State Highway Commission at Sacramento.

**SEWER PUMPING MACHINERY**—Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Bids opened for furnishing and installing pumping machinery in the Riverside avenue sewer station show Teichert & Ambrose of Sacramento low at \$12,000. Keating & Holt were the only other bidders at \$15,000.

**HOTEL AND STORES**—4 story and base, brick and steel, \$75,000. Lodi, San Joaquin Co., Cal. Architect, E. B. Brown, Yosemite Bldg., Stockton. Owners, Lodi Hotel Co. The building will cover an area of 50 by 100 feet, and will contain a number of stores besides the hotel lobby and dining room on the first floor. Upper floors will contain in the neighborhood of 120 guest rooms, a number of which will have private baths. Interior finish will be of pine with some hardwood. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and floors. Patent storefronts are specified. Exterior of the building will be faced with pressed brick. Plans have been completed and figures on the general contract will be called for at once. Foundation work is complete and a contract for the structural steel has been awarded to the Ralston Iron Works.

**BRIDGE**—Steel or timber construction. Cost not stated. Fall River Mill, Shasta Co., Cal. Engineer, County Surveyor, Redding. Owners, Shasta County. Plans have been accepted by the Board of Supervisors for a new bridge over the Pitt River. Bids will be taken for either a wooden structure or steel span. The bridge will be 105 feet long. Bids will be called for at once.

**Contracts Awarded.**  
**HOSPITAL DAIRY BUILDING**—1 story, concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Contractors, Boxton, Dillon & Boxton, Hearst Bldg., S. F. Contract price, \$18,940. A complete list of the figures opened for this work will be found under the heading of Sacramento, Stockton and Northern California in this issue.

**STREET IMPROVEMENT**—\$80,381.98. Stockton, San Joaquin Co., Cal. Engineer, City Engineer, Stockton. Owners, City of Stockton. The Federal Constructing Co. of San Francisco has

been awarded a contract for street improvements in the Oaks on their bid of \$80,381.98. The contract includes asphalt macadam, gravel alleys, concrete walks, curbs and gutters. The contractors will put in a new plant at Stockton to handle this work and any additional work in that section of the state.

**SCHOOL**—1 story and base, reinforced concrete, \$6,628. Cherokee School District, Glenn Co., Cal. Architect, Clarence L. Styles, 2416 Parker avenue, Berkeley. Owners, Cherokee School District. Contractor, W. R. Zumwalt, Willows. Contract price, \$6,628.

**STREET IMPROVEMENT**—\$18,000. Willows, Glenn Co., Cal. Engineer, City Engineer, Willows. Owners, City of Willows. Contractors, Clarke & Henery Co., Sacramento. Contract price, \$18,000.

## COMPLETION NOTICES.

### SACRAMENTO COUNTY.

**RECORDED** **ACCEPTED**  
 July 22, 1914—S 23½ FEET LOT 1, K. L. 2nd and 3rd Sts., Sacramento.  
 Henry & Emilie Goldstein to Chas A Vanina.....July 16, 1914

### ELEVATOR BIDS WILL BE REJECTED.

**SACRAMENTO, CAL., July 30th, 1914**  
 The Pacific Gutney Co. of San Francisco were the only firm submitting a bid for the elevator work at Sacramento. Their bid was \$2,500 and was rejected as being above the amount available. New figures will be advertised for shortly.

## LOS ANGELES AND SOUTHERN CALIFORNIA.

**TRESTLE BRIDGE**—Reinforced concrete pile construction. Cost not stated. Fillmore Ventura Co., Cal. Engineer, County Surveyor, Ventura, Owners, Ventura County. Plans have been completed and have received the approval of the Board of Supervisors for a 600-foot extension to the Bardsdale bridge near Fillmore. Bids will be opened on August 8th. Plans and specifications can be secured from the Clerk of the Board of Supervisors.

**APARTMENT HOUSE**—2 story and base brick. Cost not stated. Los Angeles, Cal. Architect, R. and D. King, 1 W. Hellman Bldg. L. A. Owner, L. Fiedler. The building will be erected at the corner of 11th and Westmoreland streets, covering an area of 56 by 71 feet and has been designed to contain a total of 18 suites, arranged in apartments of two, three, four and five rooms. Interiors are to be finished in pine and mahogany. There will be steam heat, elevator service, a hot water supply and vacuum heating. All

apartments will have private baths and wall beds. Bath rooms will be tiled in tile. There will be a swimming pool in the basement. Exterior of the building will be faced with cement plaster in imitation of cut stone. Plans are complete.

**CHURCH**—1 story and base, follow the construction. \$12,000. Calexico Imperial Co., Cal. Architects, Allison & Allison, Hibernal Bldg., L. A. Owners, Congregational Church of Calexico. The building will contain a main auditorium and Sunday school rooms. Interior will be finished in pine with ornamental plaster. There will be some marble and tile. Exterior of the building will be faced with cement plaster. Art glass windows are specified. Plans are now being prepared. A. C. Wright is the pastor.

**MISSION RESTORATION** — \$50,000. San Diego, San Diego Co., Cal. Architect, A. B. Benton, 114 North Spring street, L. A. Owners, Mission San Diego de Alcalá. There are several buildings comprising the group known as the Mission San Diego de Alcalá and all of the buildings will be repaired. It is the intention of the commission now in charge of raising funds for this work to adhere as nearly as possible to the workmanship and architectural style of the original buildings.

**FACTORY AND WAREHOUSE** — 2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, William Curlett & Son, Merchants' Trust Bldg., L. A. Owners, Rindge-Merle Co., S. E. The building will be erected at the corner of Alameda and Palmetto streets, covering an area of 160 by 272 feet. Construction will be of the class C type. Metal window sash and frames will be specified. There will be elevator service and fire doors. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

**HOTEL**—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, 1125 Central Bldg., L. A. Owner, Arthur W. Fisher. The building will be erected on Hope street with a frontage of 60 feet and a depth of 150 feet. The building will contain office, lobby, parlors and about 88 guest rooms, 50 per cent of which will have private baths. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water system. All bath rooms will have the floors and wainscot. Exterior will be faced with pressed brick. Plans are being prepared.

**RESIDENCES**—2, 2 story and base frame and plaster, \$20,000 each. Pasadena, Los Angeles Co., Cal. Architect, Leonard L. Jones, Central Bldg., L. A. Owners' names withheld. Each of these houses will contain eleven rooms and two baths. Interiors will be finished in pine and hardwood with hardwood floors. There will be three open fire places and tile mantels. Bath rooms will have tile wainscot and floors and will be equipped with showers. Automatic water heaters will be installed. Exterior of the houses will be covered with cement plaster and metal lat. Clay tile roofs will be specified. Plans are being prepared and construction will be started about September 1st.

**SCHOOL BUILDINGS**—1 and 2 story and base, brick. \$10,000. Alhambra, Los Angeles Co., Cal. Architect, Norman P. Marsh, 232 Broadway, L. A. Owners, Alhambra School District.

Working drawings are complete for the new High School group to be erected in Alhambra. Plans for the gymnasium have been revised, making it a two-story structure to be used by the city and the High School. Interiors will be finished in pine with hardwood floors. There will be the most modern school plumbing and fixtures. All buildings will be heated by steam furnished by a central heating plant housed in a separate building. Exterior will be faced with blue brick. Bids will be called for this week.

**GIRLS' SCHOOL**—2 story and base, brick, \$60,000. Rancho La Brea, Los Angeles Co., Cal. Architects, Austin & Fennell, Wright and Callender Bldg., L. A. Owner, Marlborough School for Girls, Mrs. Mary S. Caswell, principal. The building will be designed in the Colonial style in the shape of a hollow square with a one-story gymnasium building in the rear. The extreme dimensions will be 156 by 170 feet. Interior will be arranged for class rooms, assembly hall, living rooms and teachers' rooms. A number of sleeping porches, which will face on an open patio, will be a feature of the building. Interior finish will be of pine. There will be a central heating system and modern school plumbing. Exterior of the building will be faced with cement plaster. Plans are nearly complete.

**SCHOOL**—2 story and base, hollow tile construction, \$25,000. Holtville, Imperial Co., Cal. Architects, Allison & Allison, Hibernal Bldg., L. A. Owners, Holtville School District. The building will contain twelve class rooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be modern school plumbing. Exterior of the building will be faced with cement plaster. Plans are being completed. The sum of \$43,000 is available for constructing the building and purchase of the site.

**SCHOOL**—2 story and base, brick, \$45,000. Tustin, Orange Co., Cal. Architects, Elwing & Tedford, Santa Ana, Owners, Tustin School District. Contractor, George Kuechel, Orange, general construction, \$38,420; heating and ventilating, John McFadden, Santa Ana, \$3,925.

**PIPE LINE WATER SUPPLY**—\$25,000. Calexico, Imperial Co., Cal. Engineer, City Engineer Calexico, Owners, City of Calexico. The City Engineer has been instructed to prepare plans at once for a pipe line or an enclosed conduit from the central main canal to the city's reservoirs which will greatly improve the city's water supply. Bids will be called for shortly.

**STORES AND OFFICES**—5 story and base, Class A construction, \$175,000. Phoenix, Ariz. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Dwight B. Heard. The building will be erected on Central avenue, covering an area of 70 by 116 feet. Construction will be of the class A type throughout with a complete steel frame, reinforced concrete walls and floors. There will be several stores on the first floor and a total of 156 offices on the upper four floors. Interiors will be finished in pine and hardwood with metal trim and metal window frames and sash. Marble and tile will be used in the stores and entrance lobby. Plans provide for steam heat, elevator service, vacuum cleaning and water supply. Exterior will be faced with pressed brick. Plans have been revised and new figures will be called for

shortly.

**THEATRE**—3 story and base. Class A construction, \$125,000. Long Beach, Los Angeles Co., Cal. Architect, Irving J. Gill, 913 South Figueroa street, L. A. Owner, Homer Laughlin. The proposed building will be erected at the corner of Fourth and Pine streets and is being promoted by Archie Levy. A proposition to market a bond issue of \$120,000 will be submitted to the Long Beach Chamber of Commerce and if accepted working drawings will be prepared. Further mention will be made of this work if the bond issue is floated.

#### Contracts Awarded.

**CULVERT**—Reinforced concrete, \$30,000. Alhambra, Los Angeles Co., Cal. Engineer, City Engineer Charles E. Hewes, Alhambra. Owners, City of Alhambra, Contractors, Mesmer-Rice Co., Story Bldg., L. A. Contract price, \$30,000.

**RESIDENCE**—2 story and base, frame and plaster, \$5,000. Beverly Hills, Los Angeles Co., Cal. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, Edmund Locke. Contractor, T. C. Voorhes, 904 West 56th street, L. A. Contract price, \$15,000.

**SCHOOL ADDITIONS**—1 story, brick and frame, \$43,425. Los Angeles, Cal. Architect, Architectural Dept. Board of Education, L. A. Owners, City of Los Angeles, Contractors, May & Grimwood, Union Oil Bldg., L. A. Contract price, \$43,425.

### SEATTLE AND WASHINGTON.

**APARTMENT HOUSE**—6 story and base. Class C construction, \$80,000. San Francisco. Architect, Douglass, Seattle, Wash. Owners, D. and S. Investment Co., 1152 Phelan Bldg., S. F. The building will be erected at the southwest corner of Ellis and Hyde streets, covering an area of 57½ by 74½ feet. There will be stores on the first floor. Plans show a light steel frame with brick exterior walls faced with pressed brick. Interior will be arranged for two and three room apartments and finished in pine and hardwood. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile. Plans are complete and in the hands of the owners who are now taking figures on the work.

#### A "SEA OF DOUBT."

Criticising the Trade Commission Bill and especially the unfair competition clause, Senator Colt of Rhode Island is reported to have "declared that after the supreme court had taken fifteen years to get a basis for interpreting the Sherman Law, it seemed that Congress, by using the term 'unfair competition,' was setting out on a sea of doubt and uncertainty."

One chief demand of the country is for a method of regulation of big business that will not require fifteen years for finding a basis of control.

The basis of control or of interpretation found by the supreme court after fifteen years is today practically identical with the unfair competition clause of the pending measure. Reversing its earlier interpretation a majority of the court finally ruled that trust methods, or corporation methods, should be considered in the light of reason—that is,

each case was to be determined by considering whether it was a reasonable or an unreasonable restraint of trade.

Now, as to the competitive methods of business, this trade commission bill takes this discretionary control from the slow processes of the courts and places it with an administrative board, whose machinery for finding out and for reaching a decision is much swifter and better equipped for the work than the court machinery.

There is certainly now "a sea of doubt." At the least the Trade Commission Bill seems to have discovered a much more easily navigated "river of doubt."

#### SECRETARY OF THE INTERIOR GIVES INTERESTING FACTS.

Secretary Lane in a recent interview gave out the following facts on the Nation's mineral products:

"The Nation's output of mineral products of various kinds is a fair measure of industrial activity. For several months now the Department of the Interior, through the Geological Survey, has been issuing its final statistics of the 1913 mineral production which confirms in detail the preliminary estimates issued early in January for the principal minerals. In the large majority of cases these authoritative figures tell in one way or another the same story of industrial prosperity. In coal production the increase has been general, and it is this very fact that serves as an unmistakable index of general health in the industrial world. But as State after State is shown to have had its banner coal year—West Virginia, Illinois, Ohio, Kentucky, Alabama, Virginia, Oklahoma, New Mexico, Montana, Texas, Utah, and Pennsylvania in both bituminous and anthracite, the record becomes spectacular. Ohio for instance had its floods, yet there was a substantial 6 per cent increase in coal output, and the miners averaged more working days in 1913 than in 1912. Twelve other States showed increases varying from 3 per cent in Iowa to 12 per cent in Indiana and over 15 per cent in Washington, and only Colorado, Maryland, North Dakota, Nevada, Idaho, and Missouri show decreased output, the Colorado labor troubles explaining the only significant decrease. In a similar way, the figures of coke production give large increases, and coke, it may be noted, is a step nearer the metal industry. Petroleum production in 1913 exceeded all records, an increase of 25 million barrels and 72 million dollars over the 1912 returns.

In metal mining, the iron and zinc mines had a banner year, while gold, silver, lead and copper showed a decline in many of the largest producing States. Structural materials on the other hand exhibit marked gains almost without exception. Thus 1913 was the banner year for cement, which gains more than 11 per cent over 1912, and record outputs are also shown for lime, building sand and gravel, sand-lime brick, and glass sand. Other mineral products for which 1913 was a record-breaking year, are bauxite and aluminum, sulphuric acid, feldspar, mica, pottery, and talc and soapstone, while substantial increases are reported for gypsum, phosphate rock, abrasives, braytes, slate, and salt. These production figures all express well-maintained activity in mines,

smelter, furnace, and mill and prove that the American people are utilizing more of the Nation's great natural resources than ever before. A few weeks later when figures are at hand for all of the mineral products, it is expected that 1913 will be found to have outstripped both 1912 and 1907 which have hitherto held the record."

#### RUSSIAN MANUFACTURING.

The number of manufacturing establishments (exclusive of mines) under factory inspection in Russia was 17,356 in 1912, with 2,151,191 operatives, as against 16,000, with 2,051,191 operatives in 1911. A comparison of the wages paid to operatives show that the aggregate earnings in establishments where fines are in force amounted to \$196,730,000 in 1912, this being an increase of \$6,180,000, as compared with \$190,550,000 earned in 1911, while the average earnings per operative rose from \$129 in 1911 to \$131 in 1912. If the average earnings per operative in establishments where fines are not enforced are the same as in establishments where operatives are fined, the total earnings of all operatives for 1912 amounted to \$282,735,000, or an increase of \$7,150,000 over 1911. The factory statistics for 1908, as reported by the Ministry of Commerce and Industries, show that the aggregate annual production of all establishments (including mines and metal works) amounted to \$2,218,105,000. The output for 1912 of the factories and works employing 2,151,000 operatives was estimated by the same ministry at \$2,644,010,000. The net production, after deducting the cost of materials and fuel, was calculated at \$764,260,000 for 1908 and at \$910,320,000 for 1912.

#### "REPTILE" FUNDS.

It must seem a trifle unpleasant to Frenchmen to have the charge made on fairly competent authority that a great newspaper like the Figaro should be in the pay of a foreign government. Of course, there could be only one reason for the use of such a "reptile" fund as the Hungarian government is supposed to spend on foreign newspapers. That would be to have news distorted and suppressed in the interest of the Hungarian government.

A pretty bad state of affairs, of course. Americans can look down on it from a lofty moral height. American newspapers don't sell out to foreign governments. Their "reptile" funds would go begging here.

But—all "reptile" funds are not the possessions of scheming governments. In this country they are controlled by large domestic interests that have desired to influence public opinion. One such fund approaching in size that of the Hungarian government was recently uncovered under the direction of the old management of the New Haven Railroad.

Happily such expenditures never have proved profitable, although gullible managers of great corporations are still occasionally lured into them. The trouble is that the American public is too wise. It is "on" in a minute to a newspaper kept by the interests, and the paper at once loses any influence it might have had. Honesty really is the best policy—in newspapers as in every other department of human activity.—Kansas City Star.

## CONSTRUCTION WORK ABROAD.

## SOCIETE ISLANDS.

[Consular James H. Goodier, Papeete, Tahiti.]

## Harbor Improvement Plans for Port of Papeete.

Supplementing a prior report (see Daily Consular and Trade Reports for Feb. 13, 1914,) the following concerning the plans relative to the improvements projected for the port of Papeete, Tahiti (French Oceania), is of interest:

As stated, the question of establishing at Papeete a port of call, a coal depot etc., has been examined by the Societe d'Etudes pour la creation de ports dans les Colonies Francaises, a French company having its head office in Paris. As also noted, this society 1911 sent to Tahiti investigating engineers, the French Government also sending an official mission in 1912, whose report approved established a port of call here.

In March, 1914, the French Chamber of Deputies and Senate ratified the concession of the port or harbor to the above-named Societe d'Etudes under the following conditions: Said society to organize and incorporate a French company, minimum cash 3,000,000 francs (\$479,000), half fully paid before the company may issue any bonds. The president, chief director, and majority of the board of directors must be French citizens.

The harbor concessions carries the exclusive privilege, for 50 years, of supplying coal in the French establishments in Oceania under the reserve of the right left to importers who receive goods by their own chartered vessels to supply coal to their steamers outside of the islands of Tahiti and Moorea.

## Program of Expenditures.

The works of first establishment are divided into: (1) Works of first urgency, estimated cost, 6,000,000 francs (\$1,155,000,) and (2) works of second urgency, estimated cost, 4,300,000 francs (\$829,300). The French Government will decide on the necessity and time for undertaking the works of second urgency, and said works will probably not be undertaken unless the harbor assumes great importance.

The Government itself is to take charge of the works of first urgency, to which this colony will contribute 900,000 francs (\$173,700), which will be spent in constructing lighthouses, one each on the islands of Fatu Hiva, Mota Hiva, Tetiaroa, and Moorea. Other works of first urgency are to be: Widening pass up to 150 meters (meter equals 3.28 feet); deepening of pass to 13 meters; buying of pass; enlargement and repair of existing quays; repairing ship; improvement of existing quays; repairing ship; improvement of existing waterworks; to insure an adequate frontage of 140 meters by creation of a coal depot having a water frontage of 140 meters by 8 meters deep on a width of 60 meters; erection of workshops; construction of necessary buildings for harbor work providing necessary working plant, tools, etc., one steamer for laying buoys; one steam tug.

Works of second urgency to be: Deepening of pass to 15 meters on a width of 150 meters, construction of quays to a great depth; lengthening of coal depot; establishment of an oil depot; extension of workshops.

The company is to prosecute this work under the control of the Government, which also would direct the greater part of the works of second urgency.

## Wireless Station, Lighthouses, Docks, and Coal Depot.

It is expected to start forthwith at Papeete the erection of a wireless station powerful enough to communicate with Noumea in New Caledonia and perhaps even with the United States. A similar high-power station will be erected at Noumea, each station to cost about \$200,000. The Government reserves the right to build the wireless stations and lighthouses, but as yet no decision has been reached between the Government and the company as to which is to provide the floating dock contemplated or to build the new ship. All other works of second urgency are to be done by the company.

In order to prevent the company from increasing to the detriment of the harbor, the expenses attendant upon the coal depot, it has been stipulated (1) that these expenses shall not exceed 1,700,000 francs, (2) that the construction of workshops and necessary buildings for the exploitation work shall not be over 100,000 francs (77,200) and also as regards works of second purposes shall not exceed 200,000 francs (\$38,600).

All expenses of these various works in charge of the Government and company will be met by an issue of the company's bonds, guaranteed by the Government. The Government assumes charge of the service of these bonds in remitting to the company half-yearly annuities, reckoned at the rate of 41-2 per cent (outside of the retirement of said bonds in 50 years).

## Situation as regards the Colony.

First. The colony pays a contribution of 900,000 francs for works of first establishment. It further gives to the company the use of lands and buildings pertaining to the harbor, for which it may have no further need.

Second. Besides, the colony engages to contribute yearly 35,000 francs towards the guaranty given by the Government.

Third. When the sales of coal shall have reached approximately 115,000 tons, this contribution shall cease, and thereafter the colony will contribute for the benefit of the Government, as soon as it shall have received the advances made before.

Fourth. On the other hand, the colony will benefit by all the indirect advantages due to the creation of a much-frequented harbor. New commercial relations to visit the port will tend to reduce freight rates to France, America, New Zealand, and Australia. To-day the lowest rate to France is about 85 francs (\$16.40 per ton, and it is hoped to reduce this to 15 francs (\$2.88) after the harbor is more widely used. A simple reduction of 10 francs (\$1.92) per ton on existing freight rates, would mean an annual economy of about 650,000 francs (\$123,400).

There is no exaggeration in estimating at fully \$200,000 the benefits which local commerce and trade will receive annually through the establishment of the harbor improvements and other works planned for this port.

Further details of the proposed harbor improvements, including tolls, expenditures, etc., may be had from

from the Bureau of Foreign and Domestic Commerce, Washington, D. C.)

## THE CORROSION OF ALUMINIUM.

Recent researches prove that aluminium is subject to two kinds of corrosion; one of these resulting from a uniform attack all over the surface, while the other is localized in scales and spots. It is to be noted that the second case is generally produced upon metal which is mechanically worked by drawing or rolling. As in the case of iron, it seems that the metal must be exposed to air and dampness at the same time, for one alone will not produce it. Carbonic acid is a leading element in the corrosion. Worked aluminium scales off in the direction in which the mechanical action has been carried out.

REGISTERED PATENT CHIMNEY  
ERECTORS.

The following firms are registered in the Bureau of Building Inspection of the Board of Public Works as "Patent Chimney Erectors" in San Francisco: Dresser McDunnell, 39-40 Isis street; Richmond Sheet Metal Works, 236 Clement street; Rege Bros. & Co., 1625 Powell street; Chas. Moelrie (Modern Sheet Metal Works), 852 Clement street; Ingleside Sheet Metal Works (F. T. Estey, Manager), 806 Holloway street, and W. H. Yates, 943 Cole street.

## PLANS FILED FOR C. P. I. E. BLDGS.

The following plans have been filed with the Building Department of the Board of Public Works by the Panama-Pacific International Exposition Co.: Toyland Platform, \$100,000; Illinois State Building, \$89,000, and Battle of Gettysburg, \$15,000.

Now that the war cloud is lowering over Europe there seems to be prospect of peace in war ridden Mexico. The elimination of Huerta seems to have eliminated intrigue for the time being and there seems to be some prospect of a permanent peace. If a constitutional government can be established and the Mexicans are assured that they have some prospect of owning land in their own country, there may be a chance to develop them into some sense of responsibility.

If the Carranza government is a success every body will be pleased but William Randolph Hearst. And if intrigue and assassination is eliminated from the aspirants to political favor a long step will have been made in the civilization of the Mexican Republic.

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

## What Advertising Can Do For the Retail Firm.

### NEWSPAPERS, MAGAZINES, PROGRAMS, BILLBOARDS:

The newspapers, magazines, programs and bill boards of your locality can give you general publicity for the purpose of establishing the name and location of your firm and the general line of the goods it carries. They can also, and this refers specially to newspapers, advertise your prices and different lines of goods, and call attention to special sales, bargains and reductions.

As your advertisement in any particular newspaper, magazine, program or on any particular bill-board may be read or seen by only certain persons, the entire population of your town or city cannot be reached in this way, except by using space in all of the newspapers, magazines or differently situated bill-boards in your city.

### LETTERS, POST CARDS, FOLDERS, CIRCULARS:

These may be used to great advantage, by carefully compiling a list of persons who would be desirable customers and who would reasonably have patronage you wish to go after. If a letter, post card, circular or folder is so worded as to convey the idea to the receiver, that you consider them a friend and client of your establishment, much impression will be added to your offers and you can build up a family of followers, that I personally believe, could not be accomplished by any amount of newspapers, magazines, bill boards or general publicity. Of course, the treatment of such parties when they come to your store in response to such personal invitations, must bear out your attitude toward them. Your salesmen must understand that if such customer in any way hint or disclose that they have come in response to such letter or printed invitation, that they must be made to feel that they are getting a special attention. I do not disparage the use of newspapers, magazine, program or bill-board advertising, but my point is that other mediums as letters, post cards, circulars, folders may be used hand-in-hand, under a proper apportionment of your entire expenditure, to your very great financial advantage.

Compiling lists and mailing out matter entails much more labor and attention, than inserting ads in publications, but the additional effort expended in this way, if your advertising matter is properly prepared to meet the view point of its receiver and contains the necessary pulling power, will be worth the trouble and should result in satisfactory returns to you.

### DIRECT RESULT GETTING:

In using letters, post cards, folders, circulars, select those parties with

whom you wish to do business, and submit a definite, concrete offer to them, and provide for a means of closing that offer and realizing your profit. This allows you to pick out a large number of people, submit your proposition to them and continue to follow up submitting it to them, until you have effected a sale or found that a sale cannot reasonably be made.

By such advertising you can talk your proposition to thousands in a single day and you can learn who is interested and who will not take your line.

Proper advertising enlarges your field of action, enabling you to make more money.

LOYD C. COMEGYS.

### NEW SETTIN-BERLIN CANAL.

From the engineering standpoint the new canal is a fine achievement. It has been carried in the most daring manner over hill and vale. Some two kilometers behind the railway station at Eherswalde the canal passes over the railway line, which has to be sunk at this point to the extent of 1.75 meters. It is a truly marvelous sight to see the trains puffing by underneath while overhead the heavily laden boats go sailing and steaming on their way. No less marvelous is the manner in which the canal has been constructed through the beautiful Ragose Valley, where the little river Ragose is conducted under the canal by means of a specially constructed cement channel. A dam 28 meters in height has been constructed right through the valley for a length of 1000 meters, and along this, high above the level of the valley, the canal has been laid. The finest piece of engineering work is, however, to be seen in the locks near Nieder-Pinow. Here the canal had to be sunk to the depth of fully 36 meters in order to descend to the level of the Valley of the Oder. This sinking has been brought about by means of a series of locks, each one of which has a drop of nine meters. The entire length of the new canal is 100 kilometers, and the entire cost amounts to 42,500,000 marks. The traffic along this new route is already showing a rapid development, everywhere new industrial plants are springing up. In Berlin and Spandau new and extensive docks have been constructed; an express service has been organized between Berlin and Stettin, and new steamship and towing companies have been organized for service on this canal.—Continental Correspondence.

### THE SUEZ CANAL TRAFFIC.

The report of the Suez Canal Company for 1913 states that ten years ago vessels recording more than 4000 tons were not 22 per cent of the total passing through the canal, last year they were over 44 per cent. Ships of over 6000 tons ten years ago were but one per cent of the total; last year they were five per cent. In 1912 the average time was cut down by 35 minutes to 16 hours and 19 minutes, which was maintained last year. Last year 5083 ships used the canal. The year 1912, while the total trade done was less than in 1912, showed a marked gain in the tonnage of loaded merchant ships. The quantity of merchandise carried was 25,755,000 tons, a record figure. The heavy business

was bound east and south. It included coals from Great Britain, sugar from Adriatic ports, petrol from Russia and the United States and phosphates from Algeria and Tunisia. A special feature was the size of the consignments to India and farther Eastern ports of worked metals, machinery and railway material. Burma, Siam, Indo-China and East Africa are increasing their trade with Europe, China and Japan are steadily and largely expanding their business, while India has from the first been a main supplier of traffic. The region directly tributary to the canal is also developing new industries.—Bradstreet's.

### LUGES NATIONAL TYPE OF U. S. ARCHITECTURE.

### Sculptor Diedrich Is to Give Country Benefit of Fame.

PARIS, July 22.—William Hunt Diedrich, a young American sculptor, who has won fame after six years of work here in comparative obscurity, says:

"I have a number of commissions on hand now, but as soon as possible I intend to return to America. Being an American, I consider that whatever ability I may have should be devoted to work in America.

Although I have devoted much time to sculpture, the kind of work which attracts me most is architectural decoration, and that is what I intend to do chiefly in America.

"American architecture should be more emancipated. I have nothing to say against steel-work and sky-scraper, for they are the natural outcome of the national requirements, but in almost every other respect American architecture is laboring under European traditions completely out of keeping with the temperament of the American temperament. A Greek temple would look ridiculous in a country of pine trees.

"America should develop a national style of architecture, inspired by American nature, as the Gothic and old Norman styles were suggested by the conditions of the countries and the temperament of the peoples who created them. The Southern States require a much more exotic style of architecture than they have at the present day."

Diedrich suddenly sprang into prominence in the Parisian art world after exhibiting in last autumn's salon a dog composition. Franz Jourdain, the president of the Salon, wrote an enthusiastic letter about the work, as did many other leading artists, and there was much competition among connoisseurs for the right to purchase the statue at the price placed upon it by the artist. Among the competitors were Baron Robert de Rothschild, Baron Fould Springer and the ladies' tailor, Poirer. Finally Rothschild was allowed to buy the work on the understanding that the sculptor should carve another animal group for Springer.

He is now engaged on architectural decorations for Henri Rothschild's new summer mansion near Trouville-Deauville.

Diedrich, who was exhibiting in the Salon for the first time, was honored by being immediately made a member in recognition of his work.

He is a grandson of William Hunt of Boston, the artist decorator of the Albany Capitol.

## GYP-SUM INDUSTRY PROSPERES.

Value of Output in 1913 Reported by Geological Survey at Six and Three-Fourths Million Dollars.

Gypsum, the rock that makes plaster of Paris, was mined in the United States in 1913 to the extent of 2,599,508 short tons, an increase of 98,751 tons over the production of 1912, according to R. W. Stone, of the United States Geological Survey. The total value of gypsum and gypsum products produced in 1913 was \$6,714,822, compared with \$6,563,908 in 1912, an increase of \$210,914. Gypsum sold crude without calcining and used principally as an ingredient in Portland cement and paint and as sand plaster amounted to 462,136 short tons, valued at \$697,066, which is a good increase over the business of 1912. About 35 per cent of the gypsum sold crude in 1913 was used for Portland cement at an average value of \$1.19 a ton. The quantity sold for this purpose is steadily increasing. The quantity of gypsum sold crude for sand plaster has remained nearly stationary for four years, but the average price dropped in 1913 from \$2.02 to \$1.75 a ton.

There was an increase of 42,175 tons in the amount of calcined gypsum sold in 1913, yet the average price per ton was \$3.42—the same as in 1912. A total of 1,680,157 short tons was calcined for wall plaster, Keenes cement, plaster of Paris, etc. About 1,250,000 tons of this amount was used for mixed wall plaster, the so-called cement plaster and hard wall plasters of the building trades.

It is interesting to note that only 10 years ago (in 1903) did the output of the gypsum industry first pass the million-ton mark. The present production of over 2,500,000 tons, as shown by the figures, goes very largely into the manufacture of Portland cement and of hard wall plasters. So long as concrete construction remains in public favor the demand of Portland cement manufacturers for gypsum as an ingredient assures the gypsum industry of good business at points near Portland cement mills, and the increasing sales of hard wall plaster speak well for its success.

A marked advance in the quantity and value of gypsum imports was made in 1913. There was an increase of 34,686 tons of unground gypsum over importations of 1912, the total importation of unground gypsum in 1913 being 447,383 short tons, valued at \$473,594.

These figures will later appear in a chapter of "Mineral Resources" on the gypsum industry in 1913. The chapter will also contain descriptions of the occurrences of gypsum in 22 States and in Alaska.

## Minor Jobs About Town

2941 Mission; extend running derrick; owner, V. Lagomarsino, 566 London; cost, \$100.

117 Gates; raise and underpin dwlg.; owner, J. Dietz; cost, \$160.

7553 Geary; add 2 rooms; owner, Walter & Colvert; Premises; contractor, E. C. Ray, 454 39th Ave.; cost, \$200.

1907 McAllister; concrete foundation and floor; owner, M. Meger, 138 McAllister; cost, \$250.

436 Esworth; raise dwelling; owner, S. Moulton; Premises; contractor, A. Dragi, 733 Cheney; cost, \$100.

450 Broadway; minor changes; owner, Angelo Belmonte; Premises; cost, \$100.

102 Pope; electric sign; owner, Fritz Kitting; Premises; contractor, W. M. Flaherty, 126 Hillcrest Drive; cost, \$100.

East, bet. Merchant and Washington; erect signs; owner, Pockwitz Hoffman Co.; Premises; cost, \$100.

N Willow 100 W Octavia; one-story frame private garage; owner, W. Macauley, 1128 Eddy; contractor, L. Salomon, 1303 Ellis; cost, \$250.

1100 Valencia; new front; owner, M. S. Blachard; cost, \$100.

121 14th; repair fence and shed; owner, Gleeson Estate Co., 1002 Masonic Ave.; cost, \$125.

301 Columbus; electric sign; owner, C. F. Dipalo, Premises; contractor, Moise-Klinkner Co., 1212 Market; cost, \$225.

W Orizaba 200 S Stanley; one-story and basement frame dwelling; owner, Mrs. D. Fuchs, 1671 45th Ave.; contractor, Geo. F. Gaylard, 1671 45th Ave.; cost, \$200.

SE Eddy and Fillmore; electric sign; owner, C. F. Murrick; Premises; contractor, Moise Klinkner Co., 1212 Market; cost, \$150.

419 Presidio Ave.; alter hot house and repair for garage; owner, Lawrence Lalume, 3319 Sacramento; cost, \$125.

1880 Quesada; one-story frame shed; owner, L. Bergallo, Premises; cost, \$150.

2184 Union; electric sign; owner, L. Boggione, Premises; contractor, Moise-Klinkner Co., 1212 Market; cost, \$175.

921 Leavenworth; enlarge entrance; owner, F. Meitman, Premises; cost, \$100.

NW Geary and O'Farrell; new doors and enlarge kitchen; owner, H. Mottet, 3rd and Howard; contractor, Moller & Sons, 520 Jessie; cost, \$200.

2006 19th; raise and alter dwelling; owner, Jos. Crap; cost, \$210.

3669 Sacramento; terrazzo steps; owner, Mrs. L. O. Sobrier, Premises; cost, \$100.

N Washington, bet Taylor and Jones underpin present building; owner, Mr. Hunter, 1234 Washington; contractor, D. J. and T. Sullivan, 1940 Folsom; cost, \$250.

846 Kearny; electric sign; owner, K. Michel, Premises; contractor, Brumfield, 18 7th; cost, \$100.

127 Ellis; alter store; owner, J. C. Furness, Premises; contractor, H. P. Haas, 38 Pearl; cost, \$150.

2000 Lyon; reshingle roof; owner, S. Pilger, Premises; cost, \$175.

168 29th; concrete wall and ratproof store and flat; owner, Harry Tuck, 218 29th Ave.; contractor, L. D'Andrea, 29 Lizzie; cost, \$290.

249 Mississippi; concrete bulkhead; owner, Wm. Symon, Premises; contractor, P. J. Kelley, 658 Elizabeth; cost, \$150.

1908 Green; new steps; owner, Mrs. Coughlin; cost, \$115.

424 Geary; electric sign; owner, W. H. Peterson, Premises; contractor, Novelty Elec. Sign Co., 165 Eddy; cost, \$100.

W Mission 105 N 30th; repair and add one room; owner, A. Eby, 812 Delores; cost, \$250.

1502 Market; alter front; owner, J. W. Hyman, 143 Broderick; contractor, Pink & Schindler, 228 13th; cost, \$200.

2137 Sutter; concrete floor and enlarge room; owner, G. G. Commandery Co., Premises; contractor, Ira W. Coburn, 602 Hearst Bldg.; cost, \$145.

313 Noriega; change steps and add porch; owner, Geo. S. Clinton, Premises; cost, \$100.

25 Woodland Ave.; new front; owner, E. Meacham, Premises; cost, \$100.

N Washington 141 W Taylor; concrete foundation and brick piers; owner, F. L. and L. C. Heuter, 322 Pine; contractor, D. J. & T. Sullivan, 1940-44 Folsom; cost, \$200.

2285 Chestnut; alter front of building; owner, Tom Roppas; cost, \$120.

S Lincoln Way 95 W 3rd Ave.; one-story frame garage; owner, Marguerite R. Wharn, 253 Lincoln Way; cost, \$150.

34 Turk; repair fire damage; owner, Cypress Lawn Cemetery Ass'n.; contractor, J. Trounson, 121 5th; cost, \$258.

1697 Haight; minor alterations; owner, Mr. Harris, 1399 McAllister; contractor, S. P. Sorenson, 589½ Haight; cost, \$100.

1850 19th Ave.; alter windows; owner, Arthur Lang, Premises; cost, \$125.

1203 Market; new front, tile under window; owner, S. Glegg and J. Hladilo, Premises; contractor, Frank F. Budinsky, 1675 Mission; cost, \$150.

944 Chestnut; one-story frame garage; owner, Mrs. M. A. Hume, 960 Chestnut; cost, \$150.

258 Market; construct platform; owner, Merchants National Bank; contractor, R. M. Coggin, 202 2nd; cost, \$100.

28 Belden Place; concrete sidewalk; owner, L. C. Babin Co., 423 Kearny; cost, \$100.

1440 Market; add gallery to store; owner, Pacific Motor Supply Co., Prem.; contractor, Frank Elvin, 4017 18th; cost, \$142.

1723 Post; tar and gravel roof; owner, J. Franks; contractor, L. Salomon, 1302 Ellis; cost, \$250.

257 Bismark; add two rooms; owner, L. M. Inaugers and wife; cost, \$250.

5712 California; add bath room; owner, J. M. O'Brien, Premises; contractor, Boyer & Sons, 2407 California; cost, \$200.

N Pixley 98 E Steiner; one-story frame stable; owner, G. Moreci, Prem.; cost, \$100.

59 4th; electric sign; owner, George Cazoraky, Premises; contractor, Moise Klinkner Co., 1212 Market; cost, \$225.

46 Coleridge; alter for store room; owner, P. Bandani, Premises; cost, \$175.

N Post 50 E Kearny; remove and replace sidewalk lights; owner, Dr. T. S. Schumate; contractor, John McGuigan & Co., 142 Silliman; cost, \$255.

## Up and Down the Coast.

WOODLAND, Yolo Co., Cal.—Hewitt Davenport, President of the Keystone Investment Company, is now in this city to start the construction of a sewer and water system in Beamer's Park. T. E. Clark & Co., of Sacramento, have been awarded the contract for the work. The Capital Sewer & Pipe Works, also of Sacramento, will furnish the pipe for the work.

SAN RAFAEL, Marin Co., Cal.—Bids will be received by the City Council until August 3rd, for the furnishing and installation of mechanical equipment in the San Rafael Bath House, located at the intersection of Second Street and the Toll Road. Eugene W. Smith is the City Clerk.

## Editorial Comment.

Whether or not the Chronicle has made a virtue of necessity or the Spring Valley Water Company has failed to make good with it the strange coincidence has come about that the organ of M. H. De Young has come out for the people in the water controversy. The facts and figures shown by the Chronicle demonstrate that the company is trying to hold up the city for from 10 to 20 million dollars. The question will be up for ratification by the people. In 1907 the corporation offered to sell its holdings to the city for 32 millions of dollars. Now it withdraws about half of its lands and offers to sell the balance for \$34,500,000—and take half of the money impounded. It is not at all probable that the people will stand for this hold up. And if they do not it is up to the Board of Supervisors to devise some way out of the difficulty.

We have a competent and capable City Engineer. He states that the plans are in readiness to put through the Sierra project. If we are going to be held up for 20 million, why not use this money in getting this supply?

And in the meantime what has become of the condemnation suits against Spring Valley? What is the Board of Supervisors paying an attorney \$1000 a month for to file these suits and bring them to trial? What is the City Attorney of the City and County of San Francisco doing?

It is about time that the people of the City of San Francisco inquire what is the business of a City Attorney? When the judge of a federal court criticizes openly the inactivity of the city's legal representative, as Judge Van Fleet did in the gas cases; when such deals as that pulled off by the Telephone Company can be put through and the Attorney's office goes to sleep on the job; when every public service corporation seems to be able to get about what it wants from the city, and there is no energy displayed in defending the city's rights, it is about time for the people to sit up and ask who represents them in a legal capacity.

The need of water is the most vital need that the city faces. We have had a long and bitter fight against selfish interests for permission to get a supply. We now confront the proposition of being held up by the water company because of our necessities or set to work to construct a new system. Twenty millions of dollars will do a good deal to build a new plant.

Some idea of the horrors of war can be gained by little details of the first dispatches. In the Belgian towns that were captured it was reported that citizens who resisted were shot

by the German soldiers, in many instances women and children were killed and the town burned.

Here is a small neutral power invaded by the war lord of a powerful nation, its treaties of neutrality trampled in the dust, and the only reason given that it furnished an easier means of access into France. It means cities razed and obliterated, property destroyed, and fruitful fields changed into battlefields and charnel houses. Certainly this act of the war lord of Europe is the greatest argument for socialism that has been made in a century. And if the concert of nations does not produce disarmament in the future the education of the people should produce a revolt against this order of things.

## THE SAME PRAYER.

Over their slaughtered children, one great cry  
From either enemy;  
From either host, thigh-deep in filth and shame;  
One prayer, one and the same;  
With Thee, with Thee, Lord God of Sabaoth  
It rests to answer both.  
Out of the obscene seas of slaughter, hear,  
From East and West one prayer:  
"O God, deliver thy people. Let thy sword Destroy our enemies, Lord."  
From "Prelude" to "The Wine Press," by Alfred Noyes.

The Czar of Russia has called his people to arms and the churches and people have offered up prayers to the god of battles to be with them in their hour of need. The Emperor of Austria has declared that his desire is for peace, but that fate has declared it otherwise. The German Emperor has declared that the war has been forced upon Germany and the French and Belgians and all the other countries are offering up prayers to the same god to defend their firesides from the invader. And to read the dispatches and watch the moving events on the map of Europe it would seem that the wars of the middle ages are being repeated.

Religion is a strange attribute of the human mind. Here in this day and age of the world an all wise and all merciful God is implored by his worshippers to destroy their enemies, who are fellow worshippers of the same deity and in the same church.

A war of conquest now convulses the world. Mechanical inventions have made progress in the arts of war and of peace that has been phenomenal. These inventions are now put to the destructive uses of a barbaric age and it now remains to be seen whether or not the world will advance after this lapse into the night of barbarism.

## Experiments With Concrete For Roads Conducted By the U. S. Office of Public Roads.

Address by J. T. Voshell, Senior Highway Engineer, U. S. Office of Public Roads, Washington, D. C.  
From Proceedings of National Conference on Concrete Roads, Chicago, Feb. 12-14, 1914.

Prior to 1911 the Office of Public Roads had no money available to pay any part of the cost of constructing experimental roads. All that it could do was to furnish engineering and laboratory aid to co-operate with such communities as were desirous of its co-operation and were willing to furnish all labor and materials. Therefore the character of the experiments in road construction conducted by this office, prior to this time, were more or less controlled by the wishes of the local communities and no extensive experiments with concrete were made.

A description of these early experiments will be of little interest except it be from an historical standpoint and as illustrative of early attempts at building concrete roads. No very definite conclusions can be drawn from them as to what may be expected of more recent work and possibly their greatest value has been to illustrate the wrong way of building concrete roads rather than the right way. For example, all of the earlier sections were built by depositing on a prepared subgrade or foundation a fairly dry mixture of concrete which was spread and tamped in place by hand, and although great care was exercised in this work the surfaces of the roads so built were not smooth and therefore not in a condition to best resist the wear of traffic.

The Office of Public Roads has constructed experimental concrete roads at Ithaca, N. Y., Washington, D. C., in the Borough of Richmond, New York City, Bergen County, N. J., Borough of Queens, New York City, and Montgomery County, Maryland. As already indicated the methods employed in the first experiments have not proved satisfactory, but in order to show the evolution in the methods of construction a brief description of all of the experiments will be given.

In 1909 Cornell University invited the office to co-operate with it to ascertain the relative value of different road building materials and of different road surfaces. The invitation was accepted and some twenty-five experimental sections of roads were built, two of which were of concrete. The concrete sections were built on Forest Home Drive, just west of Sibley College, and have been subjected to a rather hard automobile traffic and a considerable amount of country traffic. These sections, one 576 feet in length and the other 55 feet in length, consist of a foundation course of crushed limestone and a wearing course of concrete laid to a finished depth of 4 inches. The concrete of the 576-foot section is composed of 1 part of cement, 2 parts of sand and 5 parts of crushed limestone and that of the 55-foot section is composed of 1 part of cement, 2 parts of sand, and 6 parts of cinders. The cement was a standard brand of Portland cement conforming to the requirements of the usual specification. The crushed limestone for the coarse aggregate was furnished in two sizes, one ranging from  $1\frac{1}{4}$  to  $2\frac{1}{4}$  inches and the other

from  $\frac{1}{2}$  to  $1\frac{1}{4}$  inches. The percentages of voids were determined for each size of stone and for various mixtures of the two sizes. It was found that the percentage of voids was lowest in a mixture consisting of 5 parts of the larger stone and 3 parts of the smaller and this mixture was used in the work. The cinders were from the University heating plant.

All of the concrete was mixed in a stationary batch-mixer, hauled about 300 feet in a dump wagon and dumped upon a mixing board from which it was shoveled into place and leveled with steel hand rakes. It was then tamped by hand, after which it was rolled with a hand roller until the surface was fairly smooth. The work was done in the late fall and the concrete, as soon as it was laid, was covered with leaves to protect it from freezing. The leaves were not sprinkled and were removed after a period of 15 days. Traffic was then permitted over the road.

It had been planned to apply several different bituminous materials to a corresponding number of short sections of the road surface, but approaching winter and inability to secure the materials prevented the carrying out of all of these experiments except one. This experiment consisted of applying an oil-asphalt to a section of the road surface 30 feet in length. The oil-asphalt, having a penetration of 16.8 millimeters at 25 degrees centigrade, was heated to about 300 degrees Fahrenheit, applied at the rate of 1 gallon per square yard and covered with stone chips. The surface of the concrete was damp and cold and the oil-asphalt did not adhere to it and by the following spring the greater part of it had worn away.

During the summer of 1910 different sections of the concrete surface were treated with a refined semi-asphaltic oil, an oil asphalt, a refined coal tar, and a refined water-gas tar. The results of these experiments were not very satisfactory as the bituminous coats were soon worn through along the center of the road and at the end of the year there was not much evidence to show that they had been applied except a thin dead mat along each side of the pavement. Since that time the entire concrete surface has been annually treated with a bituminous material.

At the present time the concrete road does not present as good an appearance as is now obtained by modern approved methods of construction, but it has nevertheless proved serviceable and does not show excessive wear. Soon after the limestone concrete section was laid a longitudinal crack appeared about 3 feet from the south edge, which led to the development of a long shallow rut. This was due to a poor foundation along this side of the road. The cinder concrete section has a smoother and generally more attractive surface than the other, but appears to have worn down about  $\frac{1}{2}$  inch more than the limestone concrete section. No transverse cracks

have been observed in either section.

During 1909 the Office of Public Roads conducted a series of laboratory experiments to determine the effect of mixing with ordinary concrete a residual petroleum at the rate of from 3 to 5 quarts per bag of cement. It was found that the strength of the concrete was not materially impaired, that it absorbed much less water and that the early shrinkage due to setting was much reduced. Therefore it seemed probable that this oil-cement concrete might be better suited as a surfacing material for roads than plain concrete and the experiments conducted during 1910 and 1911 were for the purpose of giving this material a practical test.

In co-operation with the District of Columbia, seven sections of concrete pavement, having a total length of 356 feet, were laid on Meridian Place. Six of these sections were of oil-cement and one of plain concrete. A description of these experiments will not be given, as in less than a year after the pavement had been laid, sixteen openings, each more than a square yard in area and distributed throughout the length of the pavement, were made for the purpose of repairing a sewer. No attempt was made to restore the pavement to its original condition and therefore no proper conclusion could be drawn as to the relative values of the different sections or of the value of the pavement as a whole.

In co-operation with the Borough of Richmond, New York City, four sections of oil-cement concrete, having a total length of 441 feet, were laid at Port Richmond on that part of Innis street lying between Morning Star road and John street. The sections differ from each other in that a different brand of cement was used in each, and in that each contained a different oil content. A residual petroleum oil and a cut-back petroleum residue were each used in two sections in an amount equal to 10 and 15 per cent by weight of the cement. The concrete of each section consisted of 1 barrel of cement, 8 cubic feet of sand, 16 cubic feet of crushed stone ranging in size from  $\frac{1}{4}$  to  $1\frac{1}{2}$  inches, and 40 to 60 pounds of oil. It was mixed in a stationary batch-mixer, wheeled to its place in the road and spread in a uniform depth of 4 inches, after which it was tamped until mortar flushed to the surface. The work of laying the concrete was carried on over the full width of the street and no header was set against which the day's work would be finished. Neither were transverse or longitudinal expansion joints constructed. On account of omitting the header a sloping point was formed and as a result the pavement has worn excessively at these joints. Quite a number of longitudinal and transverse cracks have appeared and a section about 50 feet in length, near the center of the experiments, has cracked so that the cracks form a very good outline of a huge spider-web. In one section the concrete seems to be of very poor quality and a number of

shallow holes have developed. Taken as a whole these sections are in poor condition.

In co-operation with Bergen County, N. J., in June, 1910, the wooden floors of two small bridges were removed and replaced with oil-cement concrete. One bridge is 25 and the other 37 feet in length. The concrete was laid 6½ inches thick at the center and 1½ inches at the sides on iron sheathing and reinforced with chicken fence wire. The concrete was composed of 1 part cement, 2 parts of sand and 4 parts of crushed trap rock ranging in size from 1 to ¾ inch, and oil to the amount of 15 per cent by weight of the cement. It was mixed by hand, shoveled into place and well tamped. When inspected in January, 1911, these floors showed little evidence of wear, and no signs of cracks. All the wear that was noticeable was that where the floors join the macadam roadway the edges are slightly rounded.

In 1911, in co-operation with the Borough of Queens, New York City, a section of oil-cement concrete, 17½ feet in length and 21 feet in width, was laid on Hillside avenue. This avenue is the principal thoroughfare from New York City proper to Long Island, and a traffic census taken showed that an average of 1,836 vehicles pass over it each day.

The concrete was composed of 1 part of cement, 2 parts of sand, and 4 parts of trap rock ranging in size from ¾ to ¾ inch and oil to the amount of 10 per cent, by weight, of the cement. It was mixed in a stationary batch-mixer and wheeled to its place on the road in wheelbarrows, spread with rakes to a uniform thickness of 4 inches, and tamped until it was well compacted. To correct the slight irregularities in the surface a mortar mixed in the proportions of 2 bags of cement, 2½ cubic feet of sand, 7½ cubic feet of trap rock screenings, and 8 quarts of oil was spread over the entire surface to a depth of about ½ inch and brought to a smooth surface by floating with a wooden float. On a section about 10 feet in length, the irregularities in the surface due to tamping were corrected by casting over the surface a dry grout composed of 1 part cement and 2 parts of trap rock screenings. When traffic was admitted to the road these chips were soon thrown aside and were of little if any benefit. Only one expansion joint was constructed and that near the center of the section. It consisted of two courses of wood block 3 inches wide and 4 inches in depth laid on a sand cushion. The joints between the block and the concrete were filled with a native fluxed asphalt having a penetration of 13.0 millimeters. This expansion joint is now in as perfect condition as when it was first constructed. The edges of the concrete seem to have been perfectly protected.

In May, 1912, this pavement was inspected and it was found there were several small areas which showed considerable wear and the entire surface was treated with bituminous materials. A refined coal-tar, an oil asphalt and a tar asphalt preparation were respectively applied to different sections of the surface and covered with sand or stone chips. By June, 1913, there were several small areas in the coal tar section from which the tar was missing, practically all of the tar-asphalt preparation was gone and about

50 per cent of the area of the oil-asphalt section was bare. The entire surface of the section was then cleaned off and a refined coal tar applied to one-half and a refined water-gas tar to the other half at the rate of ½ gallon per square yard, and covered with plenty of rather coarse sand. In January, 1914, the entire section was in very good condition.

Beginning with 1911, Congress has annually appropriated money whereby the office has been able to pay part of all of the cost of constructing sections of road for the purpose of determining the relative values of the various road building materials and the various road surfaces. Since this time the office has undertaken and carried out more extensive experiments than had before been possible and has also been able to dictate the nature of the experiments.

Accordingly in 1912, in co-operation with Montgomery County, Maryland, a series of experiments were carried out to determine the relative value of bituminous concrete, cement concrete and brick road surfaces when laid according to the best modern practice. These experimental sections, having a total length of 6,195 feet, were laid in Kensington road, beginning at Bradley lane and extending to Chevy Chase lake. The road has a double track street car line down the center of it and the section paved is a strip, 20½ feet in width, on the west side of the street car line.

All of the work was done by a contracting company, which had had extensive experience in paving work, according to plans and specifications prepared by the Office of Public Roads. And while the work was well and faithfully done, no extraordinary effort was made to secure a "sandpapered" job, and the work is representative of what should be expected from a good contractor.

The concrete section, 3,350 feet in length, was built not only to determine the relative value of concrete as a material for surfacing roads, but to determine the relative value of plain concrete and oil-cement concrete, the relative values of gravel, crushed limestone and crushed trap rock for coarse aggregate, whether or not expansion joints were necessary, and, if so, the proper spacing for them, and to determine the relative values of various bituminous materials when used for a carpet or paint coat on the concrete surface. Therefore sections of plain and oil-cement concrete were built, on which the various bituminous materials were applied, and in which the above mentioned coarse aggregates were used, and the entire section was built without any joints excepting such construction joints as were necessary at the end of each day's work.

In the plain concrete the materials were mixed in the proportion of 1 part of cement, 1½ parts of sand and 2 parts of coarse aggregate and sufficient water to form a concrete of a "mushy" consistency. In the oil-cement concrete the same materials were mixed in the same proportions as in the plain concrete, and in addition a residual petroleum oil was added at the rate of 5 pints of oil per bag of cement. The coarse aggregates ranged in size from that passing a 1½ inch screen to that retained on a ½-inch screen, the sand was good concrete sand obtained from the Potomac River,

and the cement was a standard brand which met the requirements of the "U. S. Government Specifications for Portland Cement." All of the concrete was mixed in a street paving mixer, equipped with a rotary distributing device, which deposited the concrete practically in place upon the subgrade. After the concrete had been deposited to a depth of slightly more than 5 inches, it was carefully "struck off" with a "strike-board." The surface was then floated with a wooden float.

To determine the changes in length of any section of the concrete road due to changes of temperature, brass plugs were embedded in the concrete, just before the final floating, in two rows 5 feet from the edges of the pavement, one row with a 10-foot spacing and the other with a 50-foot spacing.

When the concrete had partially set it was covered with a paraffined canvas, which remained in place until the concrete was hard enough for the surface not to be damaged by men walking upon it. The canvas was then removed and the concrete covered with a 2-inch layer of sand or earth, which was kept wet for a period of 14 days. The construction joints were made by setting a header perpendicular to the subgrade and at an angle of 80 degrees with the center line of the road.

When the sprinkling was discontinued and the concrete began to dry out, transverse cracks began to appear. The cracks did not appear at regular intervals, and their location was undoubtedly somewhat controlled by joints in a concrete gutter, which had previously been built along the road and against which the pavement was laid, as a majority of the cracks in the pavement appeared opposite joints in this gutter. By the time the concrete had thoroughly dried out, the cracks were an average distance of 75 feet apart. A few more cracks appeared during the following winter, since which time none has developed. At the present time the average length of the monolithic sections is 43 feet where gravel was used as a coarse aggregate, and 121 feet where crushed stone was used as a coarse aggregate. The shortest monolith is in a gravel section and is 15 feet in length, while the longest monolith is in the crushed stone section and is 220 feet in length.

Measurements have been taken from time to time between the brass plugs, heretofore referred to, with a 10-foot strain gauge so designed as to measure accurately to 1-1000 of an inch, and it has been found that the concrete changes in length with a change of temperature in an amount quite near what would be obtained by applying the factor for the coefficient of expansion of concrete, and making a reasonable allowance for friction on the subgrade, thereby showing that concrete contracts more at the time of setting than it expands due to subsequent rises in temperature.

Of course the width of the cracks changes as changes in temperature occur, but ordinarily they appear to be from 1-16 to 1-4 inch in width. The largest cracks occur between the ends of the longest monolithic sections—those occurring at the ends of the 220-foot monolith have an average width of about 1-4 inch. If these cracks were to become filled with relatively incompressible material, it is evident that compressive stresses would be developed in the concrete and would have to

be taken up by the elasticity of the material. The maximum and minimum temperatures of the pavement so far observed were respectively 115 degrees and 25 degrees Fahrenheit, and the pavement shows no signs of having, in the last, been damaged by this variation of temperature.

The edges of the cracks have been broken off to some extent by traffic, though not to such an amount as to be of much damage to the pavement. Those in the sections in which gravel was used as a coarse aggregate have broken off to a much greater extent than those in the crushed rock sections, and all have broken off more than the edges of the construction joints in the same sections.

Last May, a refined coal-tar, a refined water-gas tar preparation, a fluxed native asphalt and an oil asphalt were respectively applied to different sections of the plain and oil-cement concrete which had been laid the previous November. The surface of the concrete was thoroughly cleaned by sweeping and washing, and the bituminous materials were applied hot by means of a hand distributor at the rate of  $\frac{1}{2}$  gallon per square yard, after which a layer of stone chips or  $\frac{3}{8}$ -inch gravel was spread over the surface and rolled with a 5-ton roller.

In addition to the 8 sections above mentioned, bituminous materials were applied to 2 other sections of the concrete surface. The sections were cleaned as above described and the surface of one was painted with an emulsified native asphalt at the rate of about 1-10 gallon per square yard, and the other with a light refined water-gas tar at the rate of about 1-5 gallon per square yard, after which a fluxed native asphalt was applied as above described at the rate of about  $\frac{1}{2}$  gallon per square yard.

At the present time there is no apparent difference between the corresponding sections applied to the surfaces of the plain concrete and the oil-cement concrete. There is, however, a difference between the sections coated with the different bituminous materials. The sections to which the refined water-gas tar preparation was applied are in a very good condition, as there are relatively few bare areas, the bituminous material is flexible and adhesion between it and the concrete surface is good. The refined coal-tar sections are in fair condition, but there are numerous small bare areas, and while adhesion between the tar mat and the concrete surface is good, the tar appears to be rather "dead." The sections treated with the fluxed native asphalt and the oil-asphalt are in good condition on the east two-thirds of the road, but on the west third there are a number of rather large bare areas. The asphalts are flexible, but do not appear to adhere well to the concrete surface. The section to which a paint coat of light refined water-gas tar was applied is in good condition — the bituminous materials are flexible, adhesion with the concrete surface is good and few bare areas occur. The section to which a paint coat of emulsified asphalt was applied is in fair condition on the east half of the road, while on the west half about 40 percent of the concrete surface is bare. Adhesion between the asphalt mat and the paint coat appears to be poor,

A section, 50 feet in length, was treated with a crude water-gas tar at the rate of about 1-10 gallon per square yard. This penetrated the concrete to such an extent that the surface at the present time has a dark brown color. There was not sufficient material to form a mat, and it does not appear that this treatment is of any value in protecting the concrete surface from wear. However, it appears to be an efficient method of coloring a concrete road to obviate the more or less objectionable glare due to the sun shining on a white concrete pavement.

From the experiments conducted by the Office of Public Roads the following conclusions appear to be justified: The surface of the road should be smooth and uniform, and to obtain this in a most practical manner rather wet concrete should be used. The coarse aggregate should be relatively small, preferably one in which all of the particles will pass a 14-inch screen. The concrete should be rich in cement in order that the mortar may be sufficiently strong and tough to resist, to a considerable degree, the wear of traffic and to hold the particles of the coarse aggregate in place. Transverse contraction joints should be constructed, but expansion joints seem unnecessary. Particular attention should be given to the curing of the concrete by covering it and keeping it wet to insure that the mortar will have the essential qualifications of strength, hardness, and toughness, and in order that sufficient tensile strength may be developed before initial shrinkage occurs to prevent cracks from being formed between joints. These conclusions are only qualitative. It is hoped, however, that these experiments may eventually furnish suffi-

cient data to warrant, at least, a few definite quantitative conclusions.

#### Discussion.

Mr. McIntyre: I would like to ask Mr. Voshell if he noticed the same condition which I did upon the sections covered with the bituminous covering? I noticed that the traffic, the heavy loaded teams, came along in one direction, that is, from the south of the station, which was down at the bottom of the hill at the end of the road. The bituminous mat came off, in places where that heavy traffic was, but on the other side of the road, which took light driving, the bituminous mat stayed in position.

Mr. Voshell: Yes, sir, that is correct.

Mr. Spackman: I would like to ask Mr. Voshell whether there is any difference between heavy hauling on a plain concrete surface and a surface covered with a bituminous carpet?

Mr. Voshell: The section covered with the bituminous carpet is on about a 2 per cent grade, and the greater part of the balance of the concrete is on a 3 per cent grade. We made inquiry of some of the teamsters using the road and they expressed themselves as seeing no particular difference, except that in very cold weather they found the sections having a bituminous carpet slightly more slippery than the plain concrete sections.

Mr. Gerber: I would like to ask how the oil was applied to the concrete, whether in an emulsion or after the water was applied?

Mr. Voshell: In the oil-cement concrete the oil was poured into the mixing drum after the charge was thoroughly wet. Care was exercised to prevent any oil coming in contact with dry aggregate.

**Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.**

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base. Class C construction. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Mission street between 6th and 7th streets, and has been designed for a store on the first floor. Upper two floors will be arranged for a number of two and three room suites with wall beds and private baths. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be taken shortly.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$18,000. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owner, P. C. Tucker. The building will be erected at the corner of Rush and Gough streets and will have wall beds and private bath rooms. Interior will be finished in pine and hardwood veneer with some oak floors. Plans provide for steam heat and a hot water system. Bath rooms will be finished in tile with composition

floors. Exterior of the building will be covered with shingles. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame. Cost not stated. Architect, John J. Foley, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Filbert street near Leavenworth, and has been designed for two suites of three rooms on the first and second floors and a large eight-room residence to be occupied by the owner on the third floor. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. The building will be heated by gas steam grates. All suites will have wall beds. Bath rooms will be finished in tile and composition floors. Exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$60,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Dr. Clark Burnham. The building will be erected at the northwest corner of Larkin and Chestnut streets and will cover a large ground area. Interior will be arranged for a number of two and three room suites with wall beds and private bath rooms. Interior will be finished in pine and redwood. Some oak floors will

be used. There will be steam heat and automatic elevator. All bath rooms will be finished in tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**BATH HOUSES.**

**SAN RAFAEL, MARIN CO., CAL.**—Bath house mechanical equipment. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. All bids received for furnishing and installing mechanical equipment and plumbing in the new Municipal Bath House have been rejected. On the advice of Architect O'Connor the city will undertake the work by Day Labor. Materials will be purchased at once.

**BRIDGES, DAMS AND HARBOR WORK.**

**MARE ISLAND NAVY YARD, CAL.**—Quay wall, concrete construction, \$10,000. Engineer, Dept. of Public Works, Mare Island. Owners, United States Government. The Public Works Department has announced the completion of plans and specifications for the new quay wall. These plans have been sent to the Navy Department at Washington for approval. An estimated cost of \$10,000 is placed on the work. Construction will be of concrete. Part of the work will be done by private contract and part by the Navy Yard force. Work will be started about September 1st.

**CHICO, BUTTE CO., CAL.**—Bridge, concrete construction. Cost not stated. Engineer, County Surveyor M. C. Polk, Oroville. Owners, Butte County. County Surveyor M. C. Polk is preparing plans for a new forty-foot span to be erected over the Big Chico at Bidwell Park. Construction will be of concrete. Bids will be advertised for as soon as plans can be completed.

**WALNUT GROVE, SACRAMENTO CO., CAL.**—Bridge, steel construction. Cost not stated. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Plans have been completed and have received the approval of the Board of Supervisors for the construction of a highway bridge over the Sacramento River at Walnut Grove. Plans and specifications can be secured from the County Surveyor at Sacramento. Bids will be opened on August 20th.

**HILLSBOROUGH, SAN MATEO CO., CAL.**—Bridge, retaining wall and drainage. Cost not stated. Engineer, City Engineer, 202 Hearst Bldg., S. F. Owners, City of Hillsborough. Bids will be opened on August 18th for constructing a concrete bridge, retaining wall and necessary drainage on the County Road near Hillsborough. Plans and specifications can be secured from the City Engineer, Hearst Bldg., S. F., or from the City Clerk, 440 Hottel Bldg., S. F.

**Contracts Awarded.**

**WALNUT CREEK, SANTA CLARA CO., CAL.**—Bridge, steel and concrete, \$3,922.50. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Contractor, G. H. Field, San Jose. Contract price, \$3,922.50.

**PORTLAND, ORE.**—Docks, 2, steel and concrete, \$140,000. Engineers, Elliott & Scoggins, McKay Bldg., Portland. Owners, B. Lombard Co. Con-

tractors, The Elliott Contracting Co., Portland. Contract price, \$140,000.

**CHURCHES.**

**UKIAH, MENDOCINO CO., CAL.**—Church, 1 story and base, reinforced concrete, \$12,500. Architect, John J. Foley, 16 Kearny street, S. F. Owners, Roman Catholic Church of Ukiah. Original plans for this building provided for a frame building, but these have since been revised and the work will be carried out in concrete. The main auditorium will seat 350 people and will be finished in pine with ornamental plaster. There will be a central heating system. Art glass windows will be used. Exterior has been designed in the Mission style and will be faced with cement plaster. Plans are being completed.

**STOCKTON, SAN JOAQUIN CO., CAL.**—Church, 2 story and base, brick and concrete, \$25,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Gertrude's Parish. The building has been designed in the Mission style and will contain besides the main auditorium, Sunday school rooms and social rooms. Interior will be finished in pine and redwood with ornamental plaster in the auditorium. Plans provide for steam heat and modern plumbing. Art glass windows will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

**BONDS.**

**REDDING, SHASTA CO., CAL.**—The Supervisors have canvassed the election returns of July 14th for the Anderson-Cottonwood Irrigation District. The vote was 482 to 17. When the amount is determined a bond election will be called. As nearly as can be estimated on the preliminary survey made before the election was called, the system will cost about \$350,000.

**WILLOWS, GLENN CO., CAL.**—Jacin-to School District, between Willows and Bayliss, will vote August 22nd on the proposed issuing of \$5,000 in bonds to erect a new school building.

**UPLANDS, SAN BERNARDINO CO., CAL.**—Wednesday, August 12th, is the date set for the voting of bonds to the amount of \$35,000 by the voters of Cucamonga to be used in the purchase of a site and the construction of a school building.

**NAPA, NAPA CO., CAL.**—A bid for the first street bonds, amounting to \$25,000, has been received by the City Council from the State Industrial Accident Company. The bonds were voted last December.

**SAN FERNANDO, LOS ANGELES CO., CAL.**—The taxpayers here have voted to instruct the Trustees to call a bond election for a new school building. The issue will be for bonds amounting to \$150,000.

**UPLANDS, SAN BERNARDINO CO., CAL.**—On Monday, August 30th, a mass meeting will be held in this city to discuss a proposed bond issue of \$10,000. Funds to be used in the purchase of fire equipment, construction of a new city hall and the purchase of a steam roller.

**RED BLUFF, TEHAMA CO., CAL.**—The Supervisors have accepted the resolution, as drawn up by District Attorney Fish, to call a bond election. The resolution calls for \$170,000 to

construct the bridges along the State Highway and a few others in the county that were thought necessary by the board. The proposition will be put up to the people in ten separate propositions, as follows: For the sand slough east of this city and two small sloughs, \$128,500; Mill race on Cone ranch, \$2,000; Toomes creek, near Vina, \$5,000; small bridges from Corning to the Glenn county line, \$8,000; Burrows creek, near Newville, \$1,000; Cold creek and south fork of Cottonwood creek, \$1,000; Salt creek, on Harrison gulch road, \$2,500; Oat creek, near Proberta, \$200, and on Dibble and Blue Tent creeks, \$13,000.

**VISALIA, TULARE CO., CAL.**—The special committee of the Board of Trade appointed to confer with the City Trustees in regard to improving the sewer system, has adopted a resolution asking the Trustees to call a special election for the purpose of voting bonds in the sum of \$89,000 for sewer improvement. The money is to be expended as follows: \$25,000 for the construction of laterals, \$12,000 for a septic tank, \$32,000 for a sewer farm, and \$20,000 for the extension of the main sewer to the sewer farm.

**MONROVIA, LOS ANGELES CO., CAL.**—The special committee appointed by the City Council has recommended that a special election be called for the purpose of voting bonds in the sum of \$55,000 for the improvement of the city streets. A portion of the work is to be paid for by the property owners and if the bonds carry the city will be able to commence improvements on the streets to cost \$85,000. It is recommended that White Oak avenue be paved from city limits to city limits, the cost being estimated at \$60,000.

**TEMECULA UNION SCHOOL DISTRICT, RIVERSIDE CO., CAL.**—The Temecula Union School District, formed in February by the joining of the Pujol and Santa Gertrudes Districts, is advertising a school election for August 27th, at which time the people will be asked to vote \$10,000 in bonds for the purchase of school grounds and the erection of a school building.

**SACRAMENTO, CAL.**—Notice has been received by the City Commission from the State Board of Control, that the State is now ready to purchase \$50,000 worth of levee improvement bonds.

The State was asked to buy part of the \$150,000 improvement bonds which the city had difficulty in disposing of, and the Attorney General was asked whether or not such action was legal. A favorable opinion was rendered and the State is taking over the bonds as a result. The bonds will be turned over to the State immediately and the \$50,000 will be used in the levee raising project now being conducted by Sacramento.

**OAKDALE IRRIGATION DISTRICT, STANISLAUS CO., CAL.**—The State Bond Commission and State Engineer have recommended that the Oakdale Irrigation District's bonds be accepted as securities for State banking institutions. The report states that the irrigation works are comprehensive in design, complete in essential features and in operation, and the unfinished portions are being constructed. The quantity of water available is an average of 2.16 acre feet a year for 57,000 acres, the duty of which can be

increased by improvements in the canals and by scientific application and economical use. The report says the ditches are constructed are ample to carry the water required for irrigation.

**WARRENTON, ORE.**—The bond issue of \$150,000, carried at a special election held recently for the purpose of extending the water system by the construction of a gravity water system from Lewis and Clark Rivers by way of Fort Stevens and New Astoria (Hammond.) The bonds will be dated 20 years and will bear 6 per cent interest.

**ALBANY, ORE.**—By a vote of 190 to 84 this city approved a bond issue of \$50,000 to erect a new school building. It will replace the present Central School, the site of which has been purchased by the city for a City Hall. It will be of brick construction.

**HOOD RIVER, ORE.**—Hood River County has voted \$75,000 in bonds, the proceeds to be used for the completion of the Columbia River highway in this county.

**LEWISTON, MONTANA**—An election will be held here in November for the purpose of bonding in the sum of \$40,000 for construction of a dormitory building and \$40,000 for addition to the present high school building.

**POCATELLO, IDAHO**—Council here has called a special election for August 25th to vote on the question of issuing bonds of \$100,000 for acquiring local water works system, owned by the Pocatello Water Company, or for the construction of a new plant. The city will also vote on the same day \$10,000 to provide funds for the purchase of Jail cells and improving of the present jail building; also for the voting of \$20,000 to pay cost of improving streets.

**CALIFORNIA**—At the November election the people of California will vote upon the question of issuing bonds in the sum of sixteen million dollars. The buildings and improvements are needed, but it is up to the people to say whether or not the money will be provided. The following is a statement of what the various sums are to be used for:

#### Three Million for Buildings at Sacramento.

Not to exceed three million dollars for new State buildings to be erected at Sacramento on land to be given to the State by the city of Sacramento. The bonds to run for fifty years and bear interest at the rate of 4 per cent. **One Million for State Building at San Francisco.**

Not to exceed one million dollars for the erection of a State building in the city of San Francisco. The bonds to bear interest at the rate of 4 per cent and to run for fifty years.

#### \$750,000 for Fair Ground Improvements at Sacramento.

Seven hundred and fifty thousand dollars for purchase of more land, improving the same and erection of additional buildings for the State Fair grounds at Sacramento.

#### \$10,000,000 for Harbor Improvements at San Francisco.

Not to exceed ten million dollars for improving the Harbor at San Francisco. The interests and principal to be paid from the harbor fees. The State simply guarantees the payment. **\$1,250,000 for State Building at Los Angeles.**

One million two hundred and fifty thousand dollars for a State building

at Los Angeles.

#### \$1,500,000 for University Buildings.

One million eight hundred thousand dollars for the erection of buildings for the State University at Berkeley. **WATSONVILLE, SANTA CRUZ CO., CAL.**—The Board of Aldermen at its regular meeting held here on August 11th decided to call a special bond election for the purchase of fire fighting equipment and the construction of a bridge over the Pajaro River.

The new bridge will be of concrete construction, with seven 60-foot arches supported by five piers in the river channel. It will be 120 feet in length and will cost in the neighborhood of \$38,000. No date has been set for the election.

**ORLAND, GLENN CO., CAL.**—Mayor T. J. Hicks of this city has returned from Sacramento, where he went regarding the sewer bonds which were recently voted in Orland. The amount was \$15,000 and when the Trustees met last week to sell the bonds there were no bidders. Mayor Hicks then went to Sacramento and consulted the State Board of Control and there sold the bonds to the State. Bids for the construction of the extension work will be called for immediately.

**RICHMOND, CONTRA COSTA CO., CAL.**—That it will be necessary to call the special bond election for the issuance of \$100,000 more bonds for the improvement of the harbor is the belief of the City Council and the City Attorney, D. J. Hall.

Some time ago the Industrial Commission urged that a bond election be called for the purpose, alleging that Congress would not appropriate the \$100,000 allowed in the rivers and harbors bill unless a like sum was put up by the city of Richmond. The City Attorney has stated that a provision has been made in the original harbor estimate of \$770,000, for buying tidelands in case it was found that the private corporations controlled the water front property and not the State. Recent decision has lead him to believe that the city will win its fight for the tidelands. If this occurs the city will have \$150,000 to put towards the dredging, or \$50,000 more than is needed. No date will be set for the election until the tideland matter is settled.

**KENTFIELD SCHOOL DISTRICT, MARIN CO., CAL.**—Treasurer T. J. Fallon of Marin County will receive bids for the sale of \$17,000 in bonds until Friday, August 14th, at 2 o'clock p. m. Bonds are in the denomination of \$500 and \$1,000, interest payable annually at 5 per cent.

## FACTORIES & WAREHOUSES.

**OAKLAND, CAL.**—Warehouse, 5 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, Bekin Van and Storage Co., 190 Otis street, S. F. The building will be erected at the corner of 22nd and Grove streets and will cover a considerable ground area. Construction will be fireproof throughout with concrete walls, floors and roof slabs. Interior partitions will be of concrete and hollow tile. Separate compartments will be provided for storage. Plans provide for elevator service. Exterior of the building will be faced with cement plaster. Bids will be probably taken by the owners.

**VERNON, LOS ANGELES CO., CAL.**—Factory group, 3, 1 story, steel and

corrugated iron. Cost not stated. Architect, George W. Harding, Washington Bldg., L. A. Owners, Pinney-Boyle Mfg. Co., 1325 Palmetto street, L. A. These nine buildings will cover an area of 300 feet square. A one-story office building will also be erected. Each building will have a light steel frame with the exterior covered with corrugated iron. Cement floors will be used. Special machinery will be installed, but will not be included in this contract. Plans are nearly complete and figures are now being taken for the structural steel.

## FIRE HOUSES AND JAILS.

**SAN FRANCISCO**—Jail plumbing. Cost not stated. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids were opened at last Wednesday's session of the Board of Public Works for completing the plumbing in the City and County Jail. The lowest figure was submitted by Wittman-Lyman Co. at \$9,465. They will probably be awarded the work.

**MARYSVILLE, YUBA CO., CAL.**—Jail alterations and cells, \$1,500. Architect, none. Owners, City of Marysville. The city authorities have decided to improve the present City Jail by altering the interior and installing steel wire mesh and adding several steel cells. Bids will probably be called for on the work.

**RED BLUFF, TEHAMA CO., CAL.**—Jail cells, steel, \$20,000. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Tehama County. All bids have been rejected for furnishing and installing 36 steel cells. The lowest figure was received from the Ralston Iron Works of San Francisco for \$20,000. This is the third time that bids have been rejected on this work. New figures will be called for shortly. Four firms submitted figures.

## FLATS.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Thomas Scoble, 363 14th avenue, S. F. The building will be erected on the east side of 16th avenue north of Balboa, and has been designed to contain two modern flats. The building will cover an area of 25 by 65 feet. Interior will be finished in pine with some redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SAN FRANCISCO**—Flats, 2 story and base, frame, \$5,250. Architect, T. Patterson Ross, 310 California street, S. F. Owner, Mrs. Kate de Barillas. The building will be erected at the southeast corner of Hyde and Lombard streets, covering an area of 25 by 61 feet. Basement will be occupied by a private garage. Upper floors will contain three modern flats of five and six rooms. Interiors will be finished in pine and redwood with some elm panels and hardwood floors. There will be open fire places and the mantels. Bath rooms will be finished in tile. Ex-

terior of the building will be covered with shingles and cement plaster on metal lath. Plans are complete and figures have been taken under advisement.

**OAKLAND, CAL.**—Flats, 2 story and base, frame, \$6,500. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, J. Samps. The building will be erected on Lake Shore avenue near Rand, and has been designed for an apartment flat building. Interior will contain a number of three and four room flats. Pine and hardwood veneer will be used for interior finish. Oak floors will be specified. There will be open fire places and tile mantels. Each flat will have a private bath finished in tile. Exterior of the building will be covered with cement plaster on metal lath. Plans have been revised and new figures will be taken at once.

## GOVERNMENT WORK AND SUPPLIES.

### Transmission Line Material.

The following bids were opened under advertisement No. 310 at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing transmission line material for the Okanogan project:

Bid 1. The Brookfield Glass Co., New York City.

2. Western Electric Co., Los Angeles, Cal.

3. Pittsburgh High Voltage Insulation Co., Derry, Pa.

4. Central Electric Co., Chicago, Ill.

5. Electric Appliance Co., San Francisco, Cal.

6. Pacific States Electric Co., San Francisco, Cal.

7. B. F. Kierluff, Jr., & Co., Los Angeles, Cal.

Item 1. 600 D. P. glass insulators—Bid 1, \$16.50, New York, 10 days; 2, \$25.02, Los Angeles, 50 days; 3, \$15, Muncie, Ind., 1 day; 5, \$21.78, San Francisco, 1 day; 6, \$23.43, San Francisco, 1 day; 7, \$19.50, Long Beach, Cal., 3 days.

Item 2. 400 pins for insulators—Bid 1, \$28.50, Chicago, 1 day; 5, \$37.46, Victor, N. Y., 15 days; 6, \$48.65, San Francisco, Cal., 60 days; 7, \$74, Los Angeles, 15 days.

Item 3. 450 pony glass telephone insulators—Bid 1, \$6.75, New York, 10 days; 2, \$9.97, Los Angeles, 50 days; 4, \$6, Muncie, 1 day; 5, \$8.68, San Francisco, 1 day; 6, \$9.21, San Francisco, 1 day; 7, \$7.10, Long Beach, 5 days.

Item 4. 350 wood brackets—Bid 2, \$8.60, Los Angeles, 50 days; 4, \$5.25, Chicago, 1 day; 5, \$7, San Francisco, 1 day; 6, \$14, San Francisco, 60 days; 7, \$5.85, Chicago, 10 days.

Item 5. 110 galvanized iron ridge irons, with pine—Bid 4, \$30, Chicago, 1 day; 5, \$34.57, Victor, N. Y., 15 days; 6, \$55.86, San Francisco, 60 days; 7, \$32.50, Chicago, 10 days.

Item 6. 48 goose egg strain insulators—Bid 2, \$4.52, Los Angeles, 1 day; 3, \$2.16, Derry, 30 days; 4, \$3, Chicago, 1 day; 5, \$4.32, San Francisco, 1 day; 6, \$4.32, San Francisco, 1 day; 7, \$3.60, Los Angeles, 3 days.

Item 7. 24 porcelain strain insulators—Bid 2, \$9.60, Los Angeles, 1 day; 3, \$7.92, Derry, 30 days; 4, \$30, Chicago, 1 day; 5, \$14.80, San Francisco, 1 day; 6, \$48, San Francisco, 60 days; 7, \$9.60, Los Angeles, 3 days.

Item 8. 48 galvanized anchor rods—Bid 2, \$40.32, Los Angeles, 1 day; 4, \$22.56, Chicago, 1 day; 5, \$34.79, San

Francisco, 1 day; 6, \$27.56, San Francisco, 1 day; 7, \$21.50, Chicago, 1 day.

Item 9. 326 galvanized cross-arm braces—Bid 2, \$35.37, Los Angeles, 1 day; 4, \$21, Chicago, 1 day; 5, \$35.37, San Francisco, 1 day; 6, \$27.85, San Francisco, 1 day; 7, \$22.10, Chicago, 1 day.

Item 10. Bolts, screws and washers—Bid 1, \$10.66, Los Angeles, 21 days; 1, \$27.50, Chicago, 1 day; 5, \$11.29, San Francisco, 5 days; 6, \$32.19, San Francisco, 1 day; 7, \$26.70, Chicago, 10 days.

Conners Bros., Co., 153 W. Kingsbridge road, Bronx, New York City.

## HALLS & SOCIETY BLDGS.

**SACRAMENTO, CAL.**—Lodge hall and stores, 1 story and base. Class A construction, \$70,000. Architect, Washington J. Miller, 45 Kearny street, S. F. Owners, Native Sons Hall Association. The building will be erected at the corner of 11th and J streets, and has been arranged for a number of stories on the first floor. Upper floors will be arranged for lodge rooms, a large ball room, banquet hall and social rooms. The balance of the upper floors will contain offices. Interior will be finished in pine and hardwood. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for within a month.

SIXSON, SISKIYOU CO., CAL.—Lodge halls, 2 or 3 story and base, reinforced concrete. Cost not stated. Architect,

J. W. Plachek, 1221 Spring street, Berkeley, owners, Sisson Eagles Hall Association. The building is still in the preliminary stage and the organization is raising funds for the construction. If the project is carried through there will be a number of stores on the first floor while the upper two floors will be arranged for lodge rooms and offices of the organization. Interior will be finished in pine and hardwood. There will be steam heat and a hot water supply. Exterior of the building will probably be faced with cement plaster. Further mention will be made of the work.

#### Contracts Awarded.

ASTORIA, ORE.—Association building, 2 story and base, reinforced concrete, \$19,024. Architects, MacNaughton & Raymond, Title and Trust Bldg., Portland. Owners, Young Men's Christian Association. Contractor, A. W. Kutsche, Yvon Bldg., Portland. Contract price, \$19,024.

SAN FRANCISCO—Lodge hall addition, 3 or 4 story. Class A construction, \$75,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Concordia Club. Plans have been practically completed for an addition to the Concordia Club at the southeast corner of Van Ness and Post street. The building will have a complete steel frame and stone exterior walls. Interior will be arranged for additional apartments, club rooms and social hall. Interior will be finished in hardwood and pine. There will be steam heat and vacuum cleaning. Plans will be out for figures about the 15th of August.

### HOSPITALS

SAN FRANCISCO—Hospital, 4 and 6 story and base. Class A construction, \$600,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Regents of the University of California. The building will be erected at the Affiliated Colleges, and when complete will be one of the finest hospitals in the country. Construction will be fireproof throughout with a complete steel frame and walls of brick and concrete faced with pressed brick and terra cotta. Interior partitions will be of hollow tile. Floors and roof will be of concrete. The latest and most modern plumbing fixtures and hospital equipment will be installed throughout. The Regents have announced that working drawings will be completed shortly and that construction will be started within two or three months. Bids will be advertised for by the Regents, the official proposal appearing in the columns of this publication and of the Daily Pacific Builder.

SAN FRANCISCO—Hospital, 1 story and base, reinforced concrete. Cost not stated. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the new Prothro Emergency hospital, which is to be erected at the corner of 20th and Kentucky streets. Interior will be finished in pine with considerable marble. There will be modern hospital equipment and plumbing. Steam heat and a hot water supply will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids will

be opened by the Board of Public Works on August 12th.

DACOTE, ALAMEDA CO., CAL.—Dormitory, 2 story and base, brick and concrete. Cost not stated. Architect, Humphreys, Wells-Fargo Bldg., S. F. Owners, Masonic Home. Bids opened for this work show Thomas Day's Sons and R. P. Hurbut Co. the two low men. A contract has not been awarded but will be within a few days.

HANFORD, KINGS CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$10,000. Architect, Ernest J. Kump, Fresno. Owners, St. Dominic Sisters. The building will be a fireproof structure of reinforced concrete, and will contain two wards besides a large number of private rooms. Interior will be finished in pine and hardwood with some tile wainscot. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile. Special hospital equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are nearly complete and bids will be called for shortly.

### HOTELS.

OAKLAND, CAL.—Hotel, 2 story and base, reinforced concrete, \$15,000. Architects, O'Brien Bros., Clunie Bldg., S. F. (owner's name withheld). The building will be erected on Webster street and has been designed to contain four stores on the first floor and in the neighborhood of twenty rooms on the upper floor. Interior will be finished in pine and redwood. There will be several baths with tile wainscot and composition floors. Patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Hotel, 7 story and base, steel and brick. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Charles C. Judson Co. The building will be erected at the southwest corner of Taylor and Post streets with a frontage of 45 feet 10 inches on Taylor and 70 feet on Post. There will be stores on the first floor besides the hotel entrance and lobby. Upper floors will contain in the neighborhood of 175 guest rooms, a large percentage of which will have private baths. Interior will be finished in pine and hardwood. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will have tile wainscot and floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

#### Contracts Awarded.

CALEXICO, IMPERIAL CO., CAL.—Hotel, 3 story and base, brick, \$25,000. Architect, none. Owner, Mr. Stuart. Contractor, H. J. Edwards, Calexico. Contract price, \$25,000.

SEATTLE, WASH.—Hotel, 10 story and base. Class A construction. Cost not stated. Architect, J. L. McCauley, New York Bldg., Seattle. Owners, Rainier Heat and Power Co. Contractors, Littlefsen & Geering, Leary Bldg., Seattle. Contract price not stated.

### LIBRARIES.

SACRAMENTO, CAL.—Library alteration and elevator work. Cost not stated. Architect, State Architect George B. McDougall, Sacramento.

Owners, State of California. Bids for installing an elevator and remodeling the State Library will be opened in Sacramento on September 4th at 12 o'clock. Plans and specifications can be secured from the State Architect at Sacramento.

### PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State Exhibit building, 1 and 2 story, frame and plaster. Cost not stated. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, State of Michigan. The building will be somewhat different from the other state buildings in so much as it is to be constructed from funds pledged by the various Michigan manufacturers, and will be used as a display building as well as a reception hall for Michigan visitors. Exterior will be covered with cement plaster. Plans are nearly complete and figures will shortly be called.

SAN FRANCISCO—Wind screens. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans and specifications have been completed for installing wind screens in the Horticulture Gardens at the Exposition Grounds. Bids will be opened on August 11th. An official proposal appears in another column of this issue.

SAN FRANCISCO—Lighting fixtures. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Bids were opened on August 11th for installing lighting fixtures in the Exposition Auditorium in the Civic Center. A complete list of these bids will appear in the next issue of the Building and Industrial News.

SAN FRANCISCO—Association building, 2 story, frame and plaster, \$20,000. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Young Women's Christian Association. The building will be erected inside the Exposition Grounds and will be somewhat similar to the Press Building. Interior will be finished in pine throughout. There will be a hot water supply. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Exhibit building, 2 story, frame and plaster, \$35,000. Architect, A. W. Burgren, Holbrook Bldg., S. F. Owner, Denmark. Plans for the building are nearly complete and will shortly be out for figures. The building will cover an area of 84 by 125 feet. Interior will be finished in pine. Exterior of the building will be covered with cement plaster.

### POST OFFICES.

SAN FRANCISCO—Subtreasury screens and shelves. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed and are now out for figures for installing wire screens, metal shelves, counters and partitions in the Subtreasury building. Bids will be opened on August 15th. Plans and specifications for this work can be secured from room 403 San Francisco Post Office or from the Supervising Ar-

chitect at Washington, D. C. An official proposal for the work appears under another heading in this issue.

## RESIDENCES.

**SAN FRANCISCO**—Residence, 2 story and base, frame, \$2,000. Architect, none. Owners, M. and H. Nelson, 350 Prospect avenue, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on the east side of 16th avenue near Balboa street. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be open fire places and tile mantels. Bath room and kitchen will be finished in tile. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

Castner, Jr., has been commissioned to prepare plans for a new sewer system to be constructed in Calistoga. He is now at work on the surveys. A large septic tank will also be constructed. It is the intention of the City Trustees to embrace all of the town in the system.

**BERRYESSA ROAD, SANTA CLARA CO., CAL.**—Road improvement. Cost not stated. Engineer, County Surveyor, San Jose. Owners, Santa Clara County. Bids will be received by the Board of Supervisors until August 17th for constructing improvements to the Berryessa Road in Road District No. 3. Plans and specifications can be secured from the County Surveyor at San Jose.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Incinerator work. Cost not stated. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Santa Cruz. Bids for constructing an incinerator plant were taken under advisement by the City Council. Three bids were received as follows: Migerrelli Co., \$7,200; Universal Engineering Co., \$16,000, and Z. O. Field, \$7,965. All bids are in excess of the amount available. At the same meeting a contract was awarded to the Ganewell Co. of San Francisco, for installing a new fire alarm system on their bid of \$7,980.

**PORTLAND, ORG.**—Water supply system, \$125,000. Engineer, Clark, Portland. Owners, City of Portland. Commissioner Daly has approved plans

W. R. BRODE, Pres.      LOUIS R. HOLM, Sec.      R. J. BRODE, Vice-Pres.

## BRODE IRON WORKS

Established 1886—Incorporated 1913  
Tel. Kearny 2464.

**Fabricators and Contractors of Structural Steel and Ornamental Iron Work**

**Office & Works: 31-37 Hawthorne St., bet. Howard & Folsom Sts., San Francisco, Cal.**

outlined by Chief Engineer Clark of the Water Bureau for improvement of the distributing service costing \$125,000. These improvements will consist mainly of the extension of the big 30-inch main from its present terminus at Fremont and East 59th street, north one-fourth mile and west two and one-half miles to the Vernon standpipe. It is also planned to extend a 16-inch main through the Irvington district. At the present time there is no material on hand for the construction of these two mains and the numerous small laterals which it will be necessary to lay. An estimate is now being prepared by the City Auditor, who will be directed to call for bids.

### Contracts Awarded.

**REDWOOD CITY, SAN MATEO CO., CAL.**—Highway construction, \$16,462.50. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Contractor, Daniel Flynn. Contract price, \$16,791.60.

**PORTLAND, ORE.**—Paving, \$39,218.92. Engineer, City Engineer, Portland. Owners, City of Portland. Contractors, Oregon Paving Co., Portland. Contract price, \$39,218.92.

**VANCOUVER, B. C.**—Sewer extensions, \$309,052.72. Engineer, City Engineer, Vancouver. Owners, City of Vancouver. Contractors, Hodgson, King & McPhelan Bros., 319 Pender street, West Vancouver. Contract price, \$309,052.72.

**SANTA CRUZ, SANTA CRUZ CO., CAL.**—Water pipe, \$33.85 per ton. Engineer, City Engineer, Santa Cruz. Owners, City of Santa Cruz. Contractors, United States Pipe Co., S. F. Contract price, \$33.85 per ton.

### STORES.

**SAN FRANCISCO**—Store fixtures, \$4,500. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Shumate's Pharmacy. Plans for extensive store fixtures to be installed in the new Physicians' Building at the north-west corner of Powell and Sutter streets have been completed and figures taken. Bids are now in and under advisement. A contract will be awarded shortly.

**OAKLAND, CAL.**—Stores, 1 story and base, brick. Cost not stated. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owner, Jesse Steinhart, Monadnock Bldg., S. F. This building will contain a number of modern stores finished in pine and hardwood. There will be patent store fronts and plate glass windows. Exterior of the building will probably be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**LOS ANGELES, CAL.**—Stores and offices, 8 story and base. Class A construction. Cost not stated. Architects, Reid Bros, California-Pacific Bldg., S. F. Owner, Hulett C. Merrill. The building will be erected at the north-east corner of 8th and Broadway, covering a large ground area. There will be a number of high class stores on

the first floor and modern offices on the upper floors. Interior will be finished in pine and hardwood. Marble and tile will be used extensively. There will be steam heat, elevator service, metal window frames and sash and a vacuum cleaning system. ### SEALED PROPOSALS.

#### PROPOSAL FOR BUILDING.

**OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.**

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on **Wednesday, the 12th day of August, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of the **Potrero Emergency Hospital** to be located at Twentieth and Kentucky streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within one hundred and fifty (150) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$1,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works. **F. J. CHURCHILL**, Secretary.

#### PROPOSALS FOR CONCRETE MIXERS

SEALED proposals for two concrete mixers for Street Repair Department will be opened in open session of the Board of Supervisors **August 17, 1914, at 3 p. m.** Proposal blanks will be furnished on Application.

**J. S. DUNNIGAN**, Clerk.

#### PROPOSALS FOR METAL SHELVING.

**METAL SHELVING, ETC.** Treasury Department, office of the Surveys and Accounts, Washington, D. C. Sealed proposals will be received at this office until **3 o'clock p. m. on the 18th day of August, 1914**, and then opened for metal counters, screen partitions,

shelving, etc., for the U. S. subtreasury at San Francisco, Cal. Drawings and specifications may be had at the office of the supervising superintendent of construction, room 402 post office and court house, San Francisco, Cal., or at this office, in the discretion of the supervising architect, J. WENDEROTH, Supervising Architect.

#### PROPOSALS FOR WATER PIPE.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of August, 1914, for doing the following work, to wit:

The furnishing and delivering of cast-iron water pipe for the Auxiliary Water Supply System.

Progressive payments will be made, and work must be done in accordance with the specifications of the Board of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days from the receipt of written notice from the Board of Public Works and completed within sixty (60) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$100,000.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposals and forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

#### PROPOSALS FOR CANAL SUPPLIES.

PANAMA CIRCULAR, 564—Proposals for Steel Cable, Poultry Netting, Nails, Screws, Bolts, Rivets, Pig Lead, Pipe Fittings, Steel Lockers, Locks, Hammers, Hatchets, Saws, Files, Tool Handles, Hoses, Gall Cocks, Shower Heads, Window Glass, Lantern Globes, Manila Rope, Packing, Emery Cloth, Oilcloth, Sandpaper, Railway Flags, Paper Drinking Cups, Blank Books, Paper, Thumb Tacks and Lumber.—Sealed proposals will be received at the office of the general purchasing officer, the Panama Canal, Washington, D. C., until 10:30 a. m., August 21, 1914, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 564) may be obtained from this office or the offices of the assistant purchasing agent, 1056 North Point street, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BORGES, major, corps of engineers, U. S. Army, general purchasing officer.

#### PANAMA-PACIFIC INTERNATIONAL NOTICE TO CONTRACTORS.

##### EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition at Room 302 in the Service Building Fillmore and Chestnut Streets, San Francisco, California, at 9:00 A. M., Tuesday, August 14, for erecting Wind Screens in Horticulture Gardens in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that if a bid on the accepted proposal or bid which check will be returned upon the suc-

cessful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract, the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 302, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$25.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plan and failing to submit bona fide bids will forfeit the deposit of Twenty-five Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,

Chairman.

#### PROPOSALS FOR CANAL SUPPLIES.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Phoenix, Ariz., until 2 o'clock p. m., August 24, 1914, for the construction of the Wallace-Freder Canal on the Salt River Project, Arizona. The work is located near Phoenix, Ariz., and involves the excavation of approximately 65,000 cubic yards of material, 275 cubic yards of concrete and reinforced concrete in structures, 80 square yards of grouted paving, laying 150 linear feet of 15-inch concrete pipe and the construction of four bridges, including the use of 16,450 feet b. m. lumber and 9,600 pounds of steel and iron. For particulars address the United States Reclamation Service, Phoenix Ariz., or Washington, D. C. F. H. NEWELL, director.

#### STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING.

##### CALIFORNIA HIGHWAY COMMISSION.

##### NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until 2 o'clock p. m., after noted, at which times they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State Highway as follows:

Yuba County from Berlin to Colusa Junction (H-Col-7-B), about 12.6 miles in length, to be built of Portland cement concrete.

Yuba County from the southerly county boundary to Morrison's Crossing (H-Yub-2-A), about 2.3 miles in length, to be built of Portland cement concrete.

San Joaquin County from Mendocino Creek to Paso Robles (V-S-J-2-B), about 10.0 miles in length, to be built of Portland cement concrete.

Kern County from the southerly county boundary to a hole south of 3 miles south of Rose Station (VI-Ker-1-A), about 10.7 miles in length, to be graded.

Orange County from Irvine to Santa Ana (VII-Orn-2-C), about 7.4 miles in length, to be built of Portland cement concrete.

Yuba County from Folsom to the easterly county boundary (H-Sac-11-A), about 6.5 miles in length to be built of Portland cement concrete.

Solano County from Yacaville to Patavina (H-Sol-7-D), about 9.2 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Divisadero to Orcutt (V-S-B-2-A), about 2.6 miles in length, to be built of Portland cement concrete.

Santa Barbara County from Slacks Creek to El Capitlan Creek (V-S-B-2-A), about 10.2 miles in length, to be graded.

Los Angeles County from Castaic School to Section 17, T. 8 N., R. 12 E., S. B. & M. (VIII-L-A-1-B), about

12.8 miles in length, to be graded.

Plans may be seen, and forms of proposals, bonds, contract, and specifications may be had, at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willis, Dunsmuir, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on blank form furnished by the Commission. The special attention of prospective bidders is directed to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

EDWARD D. FARLEY, NEWELL D. DARLINGTON, CHARLES F. STERN, California Highway Commission, AUSTIN B. CARR, Highway Engineer, CHARLES C. CARLETON, Acting Secretary. (\*)

Dated: July 21, 1914.

#### PROPOSALS FOR AUDITORIUM WORK.

PURSUANT to Resolution No. 857 N. S., passed July 22, 1914, the Council of the City of Oakland will receive bids for furnishing all of the materials, labor and workman to be required in connection with the construction, erection and finish of Elevators and Curtain Hoists; Marble and Tiling; Cement and Plastering; Hardware; Painting; Seating; Plastering; and the Electrical Work for the Auditorium Building to be erected on the grounds of Peralta Park, located on the southerly side of Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for Auditorium," (specifying work bid upon) addressed to the Council and deposited by the bidder or his agent, with said Council while in session, before 2 o'clock p. m., and 2 o'clock p. m., Pacific Time, on the 20th day of August, 1914, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workman to be consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefore and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent of the aggregate amount of the proposal. Said check shall be forfeited to and retained by the City if the successful bidder fails or refuses to execute the contract, or if he requires to form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty days after receiving notice of award.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract, in an amount equal to twenty-five per centum of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to execute the contract, the same guaranteeing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum of the amount named in said agreement.

A bound set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgements

and specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 14th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after July 25th, 1917, within a reasonable time after application, and upon a deposit of Twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant; additional copies will be furnished provided the applicant pays the cost of reproduction, such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder, as required by Section 126 of the Charter of the City of Oakland. FRANK M. SMITH, City Clerk.

#### PROPOSALS FOR OIL BURNING PLANT.

**OIL BURNING PLANT**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 2 p. m. August 25, 1917, and then publicly opened, for an oil-burning plant for heating boiler in the United States post office and custom house, Eureka, Cal., in accordance with specification and drawing, copies of which may be obtained at this office or at the office of the custodian at Eureka, Cal., in the discretion of the supervising architect. O. WENDEROTH supervising architect.

#### PROPOSALS FOR ICE PLANT.

**ICE AND STORAGE PLANT**—Sealed proposals indorsed "Proposals for Ice-Making and Cold-Storage Plant" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 29, 1917, and then publicly opened, for building and equipping an ice-making and cold-storage plant at the United States naval station, Pearl Harbor, Hawaii. Appropriation available, \$5,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD chief of bureau.

#### PROPOSALS FOR CANAL WORK.

**CANAL WORK**—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Phoenix, Ariz., until 2 o'clock p. m. August 20, 1917, for the construction of the Cave Creek cutoff of the Arizona Canal, Salt River Project, Ariz., and the necessary laterals in connection therewith, including an appropriation of 131,000 cubic yards of excavation and 300 cubic yards of concrete in structures. The work is situated near the town of Glendale, Ariz. For particulars address the United States Reclamation Service, Washington, D. C. or Phoenix, Ariz. F. H. NEWELL, director.

#### PROPOSALS FOR BUILDING.

**BUILDING, ETC.**—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. August 22, 1917, for the construction complete (including mechanical equipment, except elevator, lighting fixtures and approaches), of the United States post office and court house at Medford, Ore. Three-story and basement building, ground area 5,500 square feet, first floor fire proof, stone, ornamental terra cotta and brick facing, and composition roof. Drawings and specifications may be obtained from the custodian of site at Medford, Ore., or at this office, in the discretion

of the supervising architect. Drawings and specifications will be ready for delivery after July 8, 1917. O. WENDEROTH, supervising architect.

#### PROPOSALS FOR HOISTING TOWER.

**HOISTING TOWER**—Sealed proposals indorsed "Proposals for Coal-Hoisting Tower" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. August 29, 1917, and then publicly opened, for a coal-hoisting tower for the naval coal depot, San Diego, Cal. Plans and specifications may be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

#### NOTICE TO CONTRACTORS.

SEALED bids will be received by the Board of Trustees of the Carnegie Public Library of Corning, California, up to and including Thursday, August 13, 1917, at 8 o'clock p. m. said bids then and there to be publicly opened and read for furnishing the necessary materials and labor for the construction thereof, to wit:

One one-story and basement building for library purposes according to plans and specifications now on file with the Secretary of said Board of Trustees.

Bids must be on both reinforced concrete throughout and a combination of concrete for basement and brick for the upper story.

Cash, a bidder's bond or certified check in the sum of ten (10) per centum of the bid must accompany each bid.

Blueprints and specifications may be obtained by application to the Secretary of the Board, or may be seen at the office of Clarence L. Stiles, Architect, 2146 Parker street, Berkeley, California.

All bids must be addressed to R. B. Frupp, Secretary, Corning, California, and plainly marked on the envelope: "Proposals for the Construction of the Carnegie Public Library, Corning."

Signed R. B. FRUPP, Sec.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department under distinct headings, such as Banks, Churches, Hotels, etc.

### SAN FRANCISCO.

**STATE EXHIBIT BUILDING**—1 and 2 story, frame and plaster. Cost not stated. San Francisco. Architects, Ward & Blohm, Alaska Commercial Bldg., S. F. Owners, State of Michigan. The building will be somewhat different from the other state buildings in so much as it is to be constructed from funds pledged by the various Michigan manufacturers, and will be used as a display building as well as a reception hall for Michigan visitors. Exterior will be covered with cement plaster. Plans are nearly complete and figures will shortly be called.

**WIND SCREENS**—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans and specifications have been completed for installing wind screens in the Horticulture Gardens at the Exposition Grounds. Bids will be opened on August 11th. An official proposal appears in another column of this issue.

**LIGHTING FIXTURES**—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Bids were opened on August 11th for installing lighting fixtures in the Exposition Auditorium in the Civic Center. A complete list of these figures will appear in the next

Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

issue of the Building and Industrial News.

**APARTMENT HOUSE**—3 story and base. Class C construction. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Mission street between 6th and 7th streets, and has been designed for stores on the first floor. Upper two floors will be arranged for a number of two and three room suites with wall beds and private baths. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be taken shortly.

**APARTMENT HOUSE**—3 story and base, frame, \$15,000. San Francisco. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owner, F. C. Tucker. The building will be erected at the corner of Rush and Gough streets and will be arranged for a number of two and three room apartments. All suites will have wall beds and private bath rooms. Plans provide for steam heat and a hot water system. Bath rooms will be finished in tile with composition floors. Exterior of the building will be covered with shingles. Plans are complete and figures are being taken.

**APARTMENT HOUSE**—3 story and base, frame, cost not stated. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Filbert street near Leavenworth, and has been designed for two suites of three rooms on the first and second floors and a large eight-room residence to be occupied by the owner on the third floor. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. The building will be heated by gas steam grates. All suites will have wall beds. Bath rooms will be finished in tile and have composition floors. Exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

**JAIL PLUMBING**—Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids were opened at last Wednesday's session of the Board of Public Works for completing the plumbing in the City and County Jail. The lowest figure was submitted by Wittman-Lyman Co. at \$9,465. They will probably be awarded the work.

**FLATS**—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Thomas Scoble, 363 14th avenue, S. F. The building will be erected on the east side of 16th avenue north of Balboa, and has been designed to contain two modern flats. The building will cover an area of 25 by 65 feet. Interior will be finished in pine with some redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**ASSOCIATION BUILDING**—2 story, frame and plaster, \$20,000. San Francisco. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, Young Women's Christian Association. The building will be erected inside the Exposition Grounds and will be somewhat similar to the Press Building. Interior will be finished in pine throughout. There will be a hot water supply. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

**APARTMENT HOUSE**—3 story and base, frame, \$60,000. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Dr. Clark Burnham. The building will be erected at the northwest corner of Larkin and Chestnut streets and will cover a large ground area. Interior will be arranged for a number of two and three room suites with wall beds and private bath rooms. Interior will be finished in pine and redwood. Some oak floors will be used. There will be steam heat and automatic elevator. All bath rooms will be finished in tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**FLATS**—3 story and base, frame, \$8,250. San Francisco. Architect, T. Patterson Ross, 316 California street,

S. F. Owner, Mrs. Kate de Barillas. The building will be erected at the southeast corner of Hyde and Lombard streets, covering an area of 25 by 61 feet. Basement will be occupied by a private garage. Upper floors will contain three modern flats of five and six rooms. Interiors will be finished in pine and redwood with some elm panels and hardwood floors. There will be open fire places and tile mantels. Bath rooms will be finished in tile. Exterior of the building will be covered with shingles and cement plaster on metal lath. Plans are complete and figures have been taken under advisement.

**HOSPITAL**—4 and 6 story and base. Class A construction, \$600,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Regents of the University of California. The building will be erected at the Affiliated Colleges, and when complete will be one of the finest hospitals in the country. Construction will be fireproof throughout with a complete steel frame and walls of brick and concrete faced with pressed brick and terra cotta. Interior partitions will be of hollow tile. Floors and roof will be of concrete. The latest and most modern plumbing fixtures and hospital equipment will be installed throughout. The Regents have announced that working drawings will be completed shortly and that construction will be started within two or three months. Bids will be advertised for by the Regents, the official proposal appearing in the columns of this publication and of the Daily Pacific Builder.

**HOSPITAL**—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed for the new Potrero Emergency Hospital, which is to be erected at the corner of 26th and Kentucky streets. Interior will be finished in pine with considerable marble. There will be modern hospital equipment and plumbing. Steam heat and a hot water supply will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids will be opened by the Board of Public Works on August 12th.

**SUBTREASURY SCREENS AND SHELVES**—Cost not stated. San Francisco. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed and are now out for figures for installing wire screens, metal shelves, counters and partitions in the Subtreasury building. Bids will be opened on August 18th. Plans and specifications for this work can be secured from room 403, San Francisco Post Office or from the Supervising Architect at Washington, D. C. An official proposal for the work appears under another heading in this issue.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owners, M. and H. Nelson, 560 Prospect avenue, S. F. The dwelling has been designed for a six-room house with bath and will be erected on the east side of 16th avenue near Balboa street. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and

dining room. There will be open fire places and tile mantels. Bath room and kitchen will be finished in tile. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

**RESIDENCE**—2 story and base. Class A construction, \$150,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, Mary L. Phelan. This work has been mentioned here before when the architect was first commissioned to prepare plans. The working drawings have been completed and are now out for figures. The dwelling will be fireproof and will contain in the neighborhood of 25 rooms, a large number of bath rooms and servants' quarters. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. A central heating system will be installed. Exterior will be faced with cement plaster.

**RESIDENCES**—2, 2 story and base, frame, \$4,000 each. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. These two houses will be erected on Urbano Drive and each has been designed to contain eight rooms, bath and sleeping porch. Interiors will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, J. C. Kirby, 2152A Market street, S. F. The dwelling has been designed for a six-room house with bath, and will be erected on 25th avenue near Geary street. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Tile will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**RESIDENCE**—2 story and base, frame, \$3,000. San Francisco. Architect, J. C. Flueger, 782 7th avenue, S. F. Owner, Frank J. McHugh, 372 7th avenue, S. F. The dwelling will be erected on the east side of 17th avenue near Anza, and has been designed to contain seven rooms and bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

**CONCRETE MIXERS**—Cost not stated. San Francisco. Engineer, none. Owners, City and County of San Francisco. Bids will be opened by the Board of Supervisors on August 17th for furnishing the Street Repair Department with two concrete mixers. Full particulars can be secured from

the Clerk of the Board of Supervisors. An official proposal appears in another column of this issue.

**CAST IRON WATER PIPE**—Cost not stated. San Francisco, Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened by the Board of Public Works on August 12th for furnishing and delivering to the City a quantity of cast iron water pipe for the Auxiliary Water Supply System. Plans can be secured from the City Engineer.

**STORE FIXTURES**—\$15,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owners, Shumate's Pharmacy. Plans for extensive store fixtures to be installed in the new Physicians' Building at the northwest corner of Powell and Sutter streets have been completed and figures taken. Bids are now in and under advisement. A contract will be awarded shortly.

**LODGE HALL, ADDITION**—3 or 4 story, Class A construction, \$75,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Concordia Club. Plans have been practically completed for an addition to the Concordia Club at the southeast corner of Van Ness and Post street. The building will have a complete steel frame and stone exterior walls. Interior will be arranged for additional apartments, club rooms and social hall. Interior will be finished in hardwood and pine. There will be steam heat and vacuum cleaning. Plans will be out for figures about the 15th of August.

**EXHIBIT BUILDING**—2 story, frame and plaster, \$35,000. San Francisco. Architect, A. W. Burgren, Holbrook Bldg., S. F. Owner, Denmark. Plans for the building are nearly complete and will shortly be out for figures. The building will cover an area of 84 by 135 feet. Interior will be finished in pine. Exterior of the building will be covered with cement plaster.

**HOTEL**—7 story and base, steel and brick. Cost not stated. San Francisco. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Charles C. Judson Co. The building will be erected at the southwest corner of Taylor and Post streets with a frontage of 45 feet 10 inches on Taylor and 70 feet on Post. There will be stores on the first floor besides the hotel entrance and lobby. Upper floors will contain in the neighborhood of 175 guest rooms, a large percentage of which will have private baths. Interior will be finished in pine and hardwood. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. All bath rooms will have tile wainscot and floors. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

## City Bids Opened.

**Wittman Lyman Co. Low on Completing Plumbing Work at the City and County Jail.**

Besides the usual amount of bids for street paving and sidewalk work only one set of figures were opened by the Board of Public Works and that for the completing of the plumbing at the City and County Jail. Wittman-Lyman Co. submitted the lowest figure at \$9,-

165. Following is a complete list of the bids as opened:

**Completing Plumbing at City and County Jail.**  
 Alex. Coleman ..... \$ 9,960  
 Scott Company ..... 16,360  
 P. W. Snook Co. .... 9,495  
 Wittman Lyman Co. .... 9,165

### OAKLAND AND ALAMEDA COUNTY.

**WAREHOUSE**—5 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect's name not given. Owner, Rekin Van and Storage Co., 190 Old street, S. E. The building will be erected at the corner of 22nd and Grove streets and will cover a considerable ground area. Construction will be fireproof throughout with concrete walls, floors and roof slabs. Interior partitions will be of concrete and hollow tile. Separate compartments will be provided for storage. Plans provide for elevator service. Exterior of the building will be faced with cement plaster. Bids will probably be taken by the owners.

**FLATS**—2 story and base, frame, \$6,000. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, J. Somps. The building will be erected on Lake Shore avenue near Rand, and has been designed for an apartment flat building. Interior will contain a number of three and four room flats. Pine and hardwood veneer will be used for interior finish. Oak floors will be specified. There will be open fire places and tile mantels. Each flat will have a private bath finished in tile. Exterior of the building will be covered with cement plaster on metal lath. Plans have been revised and new figures will be taken at once.

**HOTEL**—2 story and base, reinforced concrete, \$15,000. Oakland, Cal. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected on Webster street and has been designed to contain four stores on the first floor and in the neighborhood of twenty rooms on the upper floor. Interior will be finished in pine and redwood. There will be several baths with tile wainscot and composition floors. Patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

**DORMITORY**—2 story and base, brick and concrete. Cost not stated. Decoto, Alameda Co., Cal. Architect, Humphreys, Wells-Fargo Bldg., S. F. Owners, Masonic Home. Bids opened for this work show Thomas Day & Sons and R. P. Hurbut Co. the low men. A contract has not been awarded but will be within a few days.

**BUNGALOW**—1 story and base, frame, \$2,000. Oakland, Cal. Architect, Harvey Partridge Smith, Blake Bldg., Oakland. Owner, W. H. Picard. The dwelling has been designed for a six-room house with bath and sleeping porch and will be erected on Hardy street near Claremont avenue. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be

used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$12,000. Oakland, Cal. Architect, Robert L. Holt, 2113 Center street, Oakland. Owner, Dr. David Hadden. The dwelling will be erected in Rock Ridge Park, and has been designed to contain ten rooms, three baths and sleeping porch. A garage will also be erected on the property. Interior will be finished in pine and hardwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat, a hot water supply and open fire places. Mantels will be of tile or brick. Automatic water heaters will be installed. Bath rooms will be finished in tile. Exterior of the house and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

**RESIDENCE**—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Harold Havens. The dwelling will be erected on North Cragmont and has been designed for an eight-room house with two baths and sleeping porch. Interior finish will be of pine and hardwood. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of tile. Automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

**RESIDENCE**—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. B. Spitzer, 2154 Ashby avenue, Berkeley. The dwelling will be erected on Oxford street east of Indian Rock avenue, and will contain seven rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by day labor.

**RESIDENCE**—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. L. Eschbacher. The dwelling will be erected on Fairbanks avenue and has been designed to contain seven rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

**RESIDENCE**—2 story and base, frame, \$6,000. Berkeley, Alameda Co., Cal. Architect, Frank S. Forster, 1417 Arch street, Berkeley. Owner Leandro Campanari. The dwelling will contain eight rooms, two baths and sleeping porch. Interior finish will be of pine, white enamel and elm. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will

**MARIN, CONTRA COSTA AND SONOMA COUNTIES.**

QUAY WALL — Concrete construction, \$10,000. Mare Island Navy Yard, Cal. Engineer, Dept. of Public Works, Mare Island. Owners, United States Government. The Public Works Department has announced the completion of plans and specifications for the new quay wall. These plans have been sent to the Navy Department at Washington for approval. An estimated cost of \$10,000 is placed upon the work. Construction will be of concrete. Part of the work will be done by Private contract and part by the Navy Yard force. Work will start about September 1st.

BUNGALOW — 1 story, frame. Cost not stated. Ross, Marin Co., Cal. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mr. Golden. The house has been designed as a bungalow apartment and will contain but three rooms. All rooms will be fitted with wall beds. There will be some oak floors and pine trim. An open fire place and brick mantel will be used. Exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are being prepared.

BUNGALOW — 1 story and base, frame. Cost not stated. Mill Valley, Marin Co., Cal. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Mr. Waters. The dwelling will contain six rooms and sun porch. Interior will be finished in pine and redwood. Some oak floors will be used. There will be an open fire place and tile mantel. Bath room will have tile wainscot. Exterior of the house will be covered with rustic. Plans are being prepared.

SCHOOL — 1 story, frame and plaster, \$10,000. Kentfield, Marin Co., Cal. Ar-

chitect, Erwin Schafer, Plaza Bldg., Oakland. Owners, Kentfield School District. The building has been designed for a four-room school with an assembly hall. Interior will be finished in pine throughout. Maple floors may be used in the class rooms. There will be a warm air system of heating. Composition blackboards and modern school plumbing will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on August 22nd. Plans and specifications can be secured from the architect or George E. Bennett, 72 Fremont street, S. F., or T. W. West, Clerk of the Board of Education at Kentfield.

SCHOOL — 1 story, frame. Cost not stated. Steuben School District, Sonoma Co., Cal. Architect's name not given. Owners, Steuben School District. The building has been designed for a two-room school and will be heated by stoves. Interior will be finished in pine. Composition blackboards will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on August 15th. Plans can be secured from either the County Superintendent of Schools at Santa Rosa or from H. G. Comstock, Clerk of the Board of Santa Rosa, R. F. S., No. 3.

SEWER SYSTEM AND SEPTIC TANK—Cost not stated. Calistoga, Napa Co., Cal. Engineer, W. H. Castner, Jr., Healdsburg. Owners, Town of Calistoga. Engineer W. H. Castner, Jr., has been commissioned to prepare plans for a new sewer system to be constructed in Calistoga. He is now at work on the surveys. A large septic tank will also be constructed. It is the intention of the City Trustees to embrace all of the town in the system. BATH HOUSE MECHANICAL EQUIPMENT—San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. All bids received for furnishing and installing mechanical equipment and plumbing in the new Municipal Bath house have been rejected. On the advice of Architect O'Connor the city will undertake the work by Day Labor. Materials will be purchased at once.

**Contracts Awarded.**

## FRESNO, MODESTO, STANIS- LAUS AND CENTRAL CALIFORNIA.

BRIDGE --- Concrete construction.

Cost not stated. Chico, Butte Co., Cal.

Engineer, County Surveyor M. C. Polk,

Oroville. Owners, Butte County,

County Surveyor M. C. Polk is pre-

paring plans for a new forty-foot

span to be erected over the Big Chico

at Bidwell Park. Construction will be of concrete. Bids will be advertised for as soon as plans can be completed.

**HOSPITAL**—2 story and base, reinforced concrete, \$10,000. Hanford, Kings Co., Cal. Architect, Ernest J. Kump, Fresno. Owners, St. Dominic Sisters. The building will be a fire-proof structure of reinforced concrete and will contain two wards besides a large number of private rooms. Interior will be finished in pine and hardwood with some tile wainscot. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will be finished in tile. Special hospital equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are nearly complete and bids will be called for shortly.

#### Contracts Awarded.

**STORES AND APARTMENTS** — 2 story and base, brick and steel, \$18,000. Turlock, Stanislaus Co., Cal. Architect, L. K. Kondrajan, Fresno. Owner, Toprahonian. Contractor, Charles Crozier, Fresno, concrete work. Berkeley Steel Co., structural steel, and Hollenbeck & Bush, Fresno, carpentry and mill work. Contract prices not given.

#### SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

**BRIDGE**—Steel construction. Cost not stated. Walnut Grove, Sacramento Co., Cal. Engineer, County Surveyor, Sacramento. Owners, Sacramento County. Plans have been completed and have received the approval of the Board of Supervisors for the construction of a highway bridge over the Sacramento River at Walnut Grove. Plans and specifications can be secured from the County Surveyor at Sacramento. Bids will be opened on August 20th.

**JAIL ALTERATIONS AND CELLS**—\$1,500. Marysville, Yuba Co., Cal. Architect, none. Owners, City of Marysville. The city authorities have decided to improve the present city jail by altering the interior and installing steel wire mesh and adding several steel cells. Bids will probably be called for on the work.

**LODGE HALL AND STORES** — 4 story and base, Class A construction, \$70,000. Sacramento, Cal. Architect, Washington J. Miller, 45 Kearny street, S. F. Owners, Native Sons Hall Association. The building will be erected at the corner of 11th and 4 streets, and has been arranged or a number of stores on the first floor. Upper floors will be arranged for the lodge rooms, a large ball room, banquet hall and social rooms. The balance of the upper floors will contain offices. Interior will be finished in pine and hardwood. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for within a month.

**LODGE HALL**—2 or 3 story and base, reinforced concrete. Cost not stated. Sisson, Siskiyou Co., Cal. Architect, J. W. Placheuk, 1211 Spring street, Berkeley. Owners, Sisson Eagles Hall Association. The building is still in the preliminary stage and the organization is raising funds for the construction. If the project is carried through there will be a number of stores on the first floor while the upper

two floors will be arranged for lodge rooms and offices of the organization. Interior will be finished in pine and hardwood. There will be steam heat and a hot water supply. Exterior of the building will probably be faced with cement plaster. Further mention will be made of the work.

**LIBRARY ALTERATION AND ELEVATOR WORK**—Cost not stated. Sacramento, Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Bids for installing an elevator and remodeling the State Library will be opened in Sacramento on September 4th at 12 o'clock. Plans and specifications can be secured from the State Architect at Sacramento.

**RESIDENCE** — 1 story and base, frame, \$2,500. Sacramento, Cal. Architect, none. Owner, N. L. Bishop, 2616 D street, Sacramento. The dwelling will contain six rooms and bath, and will be erected at 3412 T street. Interior will be finished in pine throughout. There will be an open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

**SCHOOL LIGHTING FIXTURES**—Cost not stated. Sacramento, Cal. Architect, E. C. Hemmings, 1293 J street, Sacramento. Owners, City of Sacramento. Bids are now being taken for furnishing and installing lighting fixtures in the Sacramento Union High School. Bids will be opened on August 17th. Plans and specifications can be secured from the architect.

**SCHOOL AND SCHOOL ALTERATIONS**—Cost not stated. Franklin School District, Sutter Co., Cal. Architect, none. Owners, Franklin School District. Plans for a one-story building and for alterations to the present school building have been approved by the Board of Education. Bids will be opened on August 15th at 10 a. m. Plans and specifications can be secured from the Clerk of the Board at Franklin.

**HIGHWAY WORK**—Cost not stated. California. Engineer, State Highway Engineer, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on August 31 by the State Highway Commission at Sacramento for highway construction in the following counties: Colusa, 12.6 miles; Yuba, 3.3 miles; San Luis Obispo, 10 miles; Kern, 2.3 miles; Orange, 7.4 miles; Sacramento, 6.8 miles; Solano, 8.2 miles; Santa Barbara, 3.5 miles; and Los Angeles, 12.8 miles. Complete particulars can be secured from the State Highway Commission. An official proposal appears in another column of this issue.

**JAIL CELLS**—Steel, \$20,000. Red Bluff, Tehama Co., Cal. Architect, R. A. Herold, Forum Bldg., Sacramento. Owners, Tehama County. All bids have been rejected for furnishing and installing 36 steel cells. The lowest figure was received from the Ralston Iron Works of San Francisco for \$29,000. This is the third time that bids have been rejected on this work. New figures will be called for shortly. Four firms submitted figures.

**CHURCH**—1 story and base, reinforced concrete, \$12,500. Ukiah, Mendocino Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners,

Roman Catholic Church of Ukiah. Original plans for this building provided for a frame building, but these have since been revised and the work will be carried out in concrete. The main auditorium will seat 350 people and will be finished in pine with ornamental plaster. There will be a central heating system. Art glass windows will be used. Exterior has been designed in the Mission style and will be faced with cement plaster. Plans are being completed.

**CHURCH**—2 story and base, brick and concrete, \$25,000. Stockton, San Joaquin Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Gertrude's Parish. The building has been designed in the Mission style and will contain besides the main auditorium, Sunday school rooms and social rooms. Interior will be finished in pine and redwood with ornamental plaster in the auditorium. Plans provide for steam heat and modern plumbing. Art glass windows will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

#### LOS ANGELES AND SOUTH- ERN CALIFORNIA.

FACTORY GROUP—9, 1 story, steel  
and corrugated iron. Cost not stated.  
Vernon, Los Angeles Co., Cal. Archi-  
tect, George W. Harding, Washington  
Bldg., L. A. Owners, Pinney-Boyle  
Mfg. Co., 1325 Palmetto street, L. A.  
These nine buildings will cover an area  
of 500 feet square. A one-story office  
building will also be erected. Each  
building will have a light steel frame  
with the exterior covered with corru-  
gated iron. Cement floors will be  
installed, but will not be included in  
this contract. Plans are nearly com-  
plete and figures are now being taken  
for the structural steel.

SCHOOLS—4, 1 and 2 story and base,  
brick, \$80,000. Alhambra, Los Angeles  
Co., Cal. Architects, Allison & Allison,  
Hibernian Bldg., L. A. Owners, Al-  
hambra School District. These build-  
ings will contain from four to eight

class rooms. Interiors will be fin-  
ished in pine with maple floors in the  
class rooms. There will be steam heat  
and modern school plumbing. The  
larger building will also contain man-  
ual training and domestic science  
rooms. Exteriors will be faced with  
pressed brick. Plans are complete and  
are in the office of the Superintendent  
waiting final approval.

SCHOOL—1 story, brick or concrete.  
Cost not stated. La Habra, Los An-  
geles Co., Cal. Architect, J. Flood Walk-  
er, 303 East 4th street, Santa Ana.  
Owners, La Habra School District. The  
building will contain six class rooms  
and an assembly hall seating 450 peo-  
ple. There will be departments for  
Manual training and domestic science.  
Interior will be finished in pine with  
maple floors in the class rooms. A  
central heating system will be pro-  
vided. Exterior of the building will be  
faced with cement plaster. Plans are  
complete and figures are being taken.  
Bids will close on August 15th. Plans  
can be secured from the architect.

SCHOOL—2 story and base, brick,  
hollow tile or concrete, \$40,000. Com-  
pton, Los Angeles Co., Cal. Architects,  
Tuttle & Angels, Delta Bldg., L. A.  
Owners, Compton School District. The  
building will contain, besides the usual  
class rooms, departments of domestic  
science and manual training. There  
will be steam heat and modern school  
plumbing. Interior will be finished in  
pine with maple floors in the class  
rooms. Exterior of the building will  
be faced with cement plaster or pressed  
brick. Plans are now being prepared.  
Further mention will be made of the  
work.

SCHOOLS—2, 1 story and base, brick.  
Cost not stated. Pasadena, Los  
Angeles Co., Cal. Architects, Marston  
& Van Pelt, Chamber of Commerce  
Bldg., Pasadena. Owners, Pasadena  
School District. These two buildings  
have been mentioned here before.  
Plans have been called in for revision.  
This work will be completed in the  
course of two weeks and new figures  
will be called. Further mention will  
be made of the work at that time.

STORES AND OFFICES—8 story and  
base, Class A construction. Cost not  
stated. Los Angeles, Cal. Architects,  
Reid Bros, California-Pacific Bldg., S.  
F. Owners, Hulett C. Morrill. The  
building will be erected at the north-  
east corner of 8th and Broadway, cov-  
ering a large ground area. There will  
be a number of high class stores on  
the first floor and modern offices on the  
upper floors. Interior will be finished  
in pine and hardwood. Marble and  
tile will be used extensively. There  
will be steam heat, elevator service,  
metal window frames and sash and a  
vacuum cleaning system. Plans pro-  
vide for a steel frame and brick ex-  
terior walls faced with pressed brick  
and terra cotta. Plans have been re-  
vised and are now in the hands of the  
Spring Street Co., 702 South Spring  
street. Subcontracts will be let.

STORES AND OFFICES—7 story and  
base, Class A construction. Cost not  
stated. Los Angeles, Cal. Architect,  
Frederick Noonan and William Rich-  
ards, Brockman Bldg., L. A. Owners,  
J. W. Robinson Co. The building will  
be erected at the corner of 7th and  
Grand streets and will cover an area  
of 333 feet by 155. Walls, floors and  
roof will be of reinforced concrete.  
Interior will be finished in pine and  
hardwoods. Marble and tile will also  
be used for trim. Plans provide for

steam heat, elevator service, a hot water supply, vacuum cleaning and metal window sash and frames. Exterior will be faced with pressed brick. Plans are complete and will go out for figures this week.

**THEATRE**—1 story and base, brick and steel, \$25,000. Glendale, Los Angeles Co., Cal. Architect, Robert J. Kitts, 723 Stewart street, Glendale. Owner, Henry C. Jensen. The building will cover an area of 33 by 150 feet and has been designed for a high class motion picture house. Interior will be finished in pine and ornamental plaster. There will be special electric work and a modern system of ventilation. Exterior will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

#### Contracts Awarded.

**HOTEL**—3 story and base, brick, \$25,000. Calexico, Imperial Co., Cal. Architect, none. Owner, Mr. Stuart. Contractor, H. J. Edwards, Calexico. Contract price, \$25,000.

**RESIDENCE**—2 story and base, brick, \$12,696. Los Angeles, Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owner, Roy Stevens. Contractors, Kling Co., Union League Bldg., L. A. Contract price, \$12,696.

**SCHOOL**—2 story, brick and frame, \$51,200. Los Angeles, Cal. Architect, A. H. Daun, L. A. Owners, Los Angeles School District. Contractor, Charles S. McCully, 2751 St. Francis avenue, L. A. Contract price, \$51,200.

**SCHOOL**—1 story, frame and plaster, \$10,000. El Segundo, Los Angeles Co., Cal. Architect, E. L. Hopkins, Delta Bldg., L. A. Contractor, Paul Martin, 1666½ West 12th street, L. A. Contract price, \$10,000.

**SCHOOL**—1 story and base, brick, \$37,541. Pasadena, Los Angeles Co., Cal. Architects, Marston & Van Pelt, Chamber of Commerce Bldg., Pasadena. Owners, Pasadena School District. Contractor, Josh Simpson, 622 Van Nuys Bldg., L. A. Contract price, \$37,541.

**INTERIOR FINISH FOR OFFICE BUILDING**—\$80,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Commercial Fireproof Building Co. Contractors, Los Angeles Mill Co., 1512 Industrial street, L. A. Contract price, \$80,000. Note: This work will be installed in the new building under construction at the corner of 5th and Spring streets.

### PORTLAND AND OREGON.

**SCHOOL**—2 story and base, brick, \$25,000. Rainier, Ore. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, Rainier School District. The building will cover an area of 122 by 58 feet. Manual training rooms, domestic science rooms and gymnasium will occupy the basement. There will be five class rooms and teachers' rooms on the first floor, while the second floor will contain two class rooms, study hall and laboratories. The building will be heated by steam. Interior will be finished in pine with maple floors in the class rooms. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

**WATER SUPPLY SYSTEM**—\$125,000. Portland, Ore. Engineer, Clark, Portland. Owners, City of Portland. Commissioner Daly has approved plans outlined by Chief Engineer Clark of

the Water Bureau for the improvement of the distributing service costing \$125,000. These improvements will consist mainly of the extension of the terminals at Fremont and East 53th streets, north one-fourth mile and west two and one-half miles, to the Vernon standpipe. It is also planned to extend a 16-inch main through the Irvington district. At the present time there is no material on hand for the construction of these two mains and the numerous small laterals which it will be necessary to lay. An estimate is now being prepared by the City Auditor, who will be directed to call for bids.

**STORES AND OFFICES**—3 story and base. Class B. Cost not stated. Klamath Falls, Ore. Architects, Veghte & Co., Klamath Falls. Owners's name withheld. The building will be arranged for a number of stores on the first floor and offices above. Interior will be finished in pine with tile floors. There will be steam heat and metal window sash and frames. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

#### Contracts Awarded.

**ASSOCIATION BUILDING**—2 story and base, reinforced concrete, \$19,024. Astoria, Ore. Architects, MacNaughton Raymond, Title and Trust Bldg., Portland. Owners, Young Men's Christian Association. Contractor, A. W. Kutsche, Yeon Bldg., Portland. Contract price, \$19,024.

**PAVING**—\$39,218.92. Portland, Ore. Engineer, City Engineer, Portland. Owners, City of Portland. Contractors, Oregon Paving Co., Portland. Contract price, \$39,218.92.

### SEATTLE AND WASHINGTON.

#### Contracts Awarded.

**HOTEL**—10 story and base. Class A construction. Cost not stated. Seattle, Wash. Architect, J. L. McCauley, New York Bldg., Seattle. Owners, Rainier Hotel and Power Co. Contractors, Luthersen & Geering, Leary Bldg., Seattle. Contract price not stated.

**SEWER EXTENSIONS**—\$309,052.72. Vancouver, B. C. Engineer, City Engineer, Vancouver. Owners, City of Vancouver. Contractors, Hodgson-King & McPhelan Bros., 319 Pender street, West Vancouver. Contract price, \$309,052.72.

Political and political situations are for the time being submerged in the events of the European war. Things will move rapidly over there and perhaps within the year there will be changes in the map of Europe if not permanent changes in the form of government.

England has of necessity been forced into the conflict. And the English government seems to have acted with the utmost fairness to all concerned.

Italy has declared herself to be neutral. Belgium and Luxemburg have been invaded by Germany and while the Kaiser states that the Germans have been forced into the conflict the act of every other nation seems to negative his assertion and it appears that the Germans themselves have forced the war.

It may be that this baptism of blood will advance the world and show the folly of present day methods of statesmanship in Europe. It is to be hoped

that if such things must be that these events will result in revolution and that the hereditary monarchies will give place to representative government where the will of a prince will be replaced by the representatives of the people.

Hundreds of thousands of lives will no doubt be sacrificed. Billions of dollars worth of property will be destroyed. Numberless men will be maimed and crippled for life—wives, and mothers and children be deprived of their means of support. And all for what? For some prince that wears a tin helmet to assert his personality in a world war.

If the hand of fate moves in the destiny of men it means that in the years to come humanity will climb out of this servitude to tradition and fear and will act on the broader ground of humanity and justice.

The aeroplane and submarine are likely to play an important part in the present war. And how much the aeroplane will prove a protection against the submarine remains to be seen.

It is undoubtedly true that, under certain conditions, it is possible from a good altitude to perceive objects at a certain depth below the surface, but this is mainly the case with calm, clear water, with a favorable light. In the choppy grey waters which abound around British coasts, a submarine would rarely be detected, more especially as the view from the pilot's and observer's seats is, in the majority of cases, most defective at the present time, and the fierce slip-stream from the propeller revolving in front, added to the high speed of travel, render the use of goggles imperative. But, in the opinion of a writer in the London Daily Telegraph, minor difficulties such as these may, and no doubt will, be overcome in time, and experience alone can show in how far the aeroplane will serve as a protection against submarines.

Just why the reply of Serbia to the demands of Austria should not have been sufficient is hard to see. In any event Austria has spilled the beans and now Europe is ablaze with war. Conventions and treaties have no weight in the balance under present circumstance and the small nations whose integrity has been maintained by a balance of power are preparing to defend their lives. Austria and Serbia have now passed out of sight in the melee and the center of the stage is taken up by the conflict of the bigger brothers.

It will be interesting to note in the next few days what the effect of this preparedness for war means. Germany has crossed the frontier into France for the purpose of crushing her before Russia can mass troops on her own frontier. And it remains to be seen whether or not she can repeat the movement of 1870.

To an outsider it would appear that Germany has undertaken a big contract. The memory of the humiliation of 1870 is fresh in every Frenchman's mind. And the chances are that every loyal Frenchman will die in the ditch rather than permit the German army to enter Paris.

Statecraft is a great game in Europe. It has about as much regard for the rights of parties as the brigands of the middle ages. And the intrigue of the courts bring about such

crises as the present one where it means the wholesale destruction of life and property and the liberties of whole peoples are sacrificed.

At the present time our own Senate is discussing the proposition of paying to Colombia the sum of 25 million dollars for land that was necessarily taken for the Panama canal.

After all the idea of human liberty that our forefathers gave to the world when they founded this republic has borne fruit and has advanced the world. Here is our attitude toward Mexico where conditions were almost intolerable. Had it been a European power it would have gone down and annexed Mexico at the slightest pretext. Instead of paying Colombia for the land condemned it would have taken the whole thing. And the attitude of our own government under these circumstances as compared with that of European countries is something of which every American can well be proud.

It is sometimes a good thing to get an outsider's view of things. The Sacramento Bee, which usually speaks its mind and is fair so far as its view point is concerned, has this to say of the recent regulation of our Police Commission:

"The Police Commission of San Francisco again has allowed dancing in the uptown cafes around Mason and Eddy streets. The old order prohibiting the selling of liquor and dancing in the same room still applies to the Barbary Coast.

The Police Commission has yet to learn that morality is not geographical. An offense on Mason street is as reprehensible as on Pacific. Brighter lights, finer furnishings and gayer crowds do not change the nature of these uptown places.

Beyond that it is in the fashionable places where the greater evil exists, and where is the far more dangerous menace to girlhood and young womanhood.

Along the Barbary Coast women do not enter who were not bad previously.

It is in the uptown cafes and places for dining and entertainment of that character where the temptation first comes. It is there where the recruits are obtained that finally drift to the Barbary Coast.

To stop all this music and drinking, etc., etc., on the Barbary Coast and to permit it to go unrestrained in the haunts uptown, is simply to declare that those who have a chance to remain good women shall have all the temptations placed in their path to become bad; while all these temptations—which no longer are temptations to them—shall be removed from the path of bad women probably beyond all hope of reformation."

One prospective effect of the war in Europe on the exposition will be that there will not be any place else to go but to the exposition. We may not have the naval parades or much demonstration of the dreadnaughts of the sea, but there will be ample demonstration of the arts of peace. And after the European armies have been decimated and the horrors of war have been brought home to the world individually there will be ample reason

son for everybody to comment on the prosperity and well being of a big nation that is not founded upon military strength, but upon the idea of personal liberty. It ought to be a good place for a peace congress and agreement for disarmament after the lapse into barbaric war.

The death of the wife of President Wilson comes as a shock and a heavy blow to the chief executive. She was a woman fit to grace the head of a great democracy. Self-poised and sensible to high degree she lent to the society of Washington the charm of a woman of common sense and culture who knows no aristocracy save that of good breeding and good sense. The nation sympathizes with its chief executive in his personal bereavement and feels with him a common loss.

The following is from the Sacramento Bee:

"Mrs. Joseph R. Knowland is accompanying her husband on his tour of the State, and making speeches with him and for him in his ambition to be United States Senator.

Mrs. Knowland has been telling the newspapers throughout the State what a remarkable man her husband is, and also that they have a remarkable boy; and she says:

I play for Billie's political meetings. (Billie Knowland is 6 years old. He is making speeches at home for his father.)

Billie always has to have music for his meetings, and when he talks he demands silence. Here is a speech he made the other night:

"Ladies and Gentlemen: Mr. Knowland is the greatest man living. You all know about George Washington and Abraham Lincoln. He's greater than them, for they're both dead and he's alive."

Isn't that a pretty good political speech for a boy?

Respectfully passed up to the reader without comment."

#### CITY WORK CONTEMPLATED.

Plans Are Underway in City Department of Architecture.

Plans and full size details are being prepared as the work progresses upon the following buildings: Polytechnic High School, Glen Park School, Edison School, Washington Irving School, Oriental School, yard work at the Edison School, shop building for the Department of Electricity; also upon Engine House No. 48, Fire Alarm Station, San Francisco Hospital yard work, City and County Jail, Public Square of the Civic Center and Donahue Fountain.

Marshall School—General working drawings and specifications complete; full size details being prepared as the work progresses.

Central Fire Alarm Station—General working drawings and specifications complete; full size details being prepared as work progresses.

City and County Jail Building—General plans and specifications for the general construction complete and contract awarded. Plans and specifications for plumbing, electric work, heating, and mechanical equipment being prepared, same will be ready for receiving bids very shortly.

Polytechnic High School—Specifications being prepared for lathing and plastering and general interior finish throughout; also plans and specifications being completed for the completion of the electrical equipment, plumbing, and mechanical equipment; same will be ready for receiving bids within a few days.

Engine House No. 12—Plans and specifications complete for the general construction; full size details being prepared as the work progresses.

Cooper School—Plans and specifications for general construction complete and contracts awarded. Full size details being prepared as the work progresses.

San Francisco Hospital—Plans and specifications for the general yard work complete and contract awarded; full size details being prepared as the work progresses.

Civic Center—Plans and specifications for the general improvement of the Public Square completed and contracts awarded. Drawings for the electric lighting and the plumbing are being prepared and will shortly be ready for bids.

Donahue Fountain—Plans and specifications being prepared for the general revision of same and will soon be ready for receiving bids.

Department of Electricity Shop Building—General plans and specifications being prepared. Same are well under way and will be ready for bids very shortly.

Burnett School Yard Work—Plans and specifications being prepared for fire escapes and yard improvements and are approximately 50 per cent complete.

Washington Irving School—General working drawings and specifications complete. Full size details being prepared as the work progresses.

Oriental School; Engine House No. 48—General working drawings and specifications have been completed and full size details are being prepared as the work progresses.

As an advertising novelty, an umbrella has been patented to be placed over electric lights in stores to diffuse their illumination.

Government experts are investigating Sweden's alum shale deposits in the hope of obtaining an illuminating oil, sulphur and other products.

Romby will erect road mirrors at dangerous street intersections to warn traffic of vehicles approaching from around corners.

## Weekly Talks on Efficiency and Advertising

by Lloyd C. Comegys

# What Letters, Post-Cards, Circulars and Folders Can Do.

### LETTERS:

A letter is the most personal and valuable instrument that you may utilize to dispose of your offerings, acquire information or settle difficulties, outside of sending a personal representative or calling yourself.

With letters, you may call upon thousands of people, in a single day, gain admittance to the busy office and receive the attention of either the proprietor himself, or one of his trusted lieutenants. Many times your representative would be unable to even get into the office and would not be given a hearing at all.

A letter also, by having come through the mail, certifies that it is direct from you and valid, and its statements and offers contained are accepted without question, and the party is relieved of worry as to what you have offered, by reason of his having the written evidence of same, which would be accepted in court, if necessary.

The statements of your representatives or salesmen are not always accepted for their full intended value, and unless left in writing, do not inspire that feeling of security that the letters will.

The letter has also the advantage that should it arrive at an inopportune time, it will be laid on the desk, to be taken care of in the regular order of business. Salesmen could never wait the convenience of all their customers in this manner.

In using letters, if you desire a reply or an order signed, an insert should be enclosed and so worded as to make it necessary for the party receiving it to do but little else than designate his selection of goods and sign his name.

### POST CARDS:

Post cards for some propositions are as good, if not actually better, than sealed letters; but you must know whether this applies to your particular proposition and if the attitude of the receiver would be as favorable as when being approached through a sealed letter.

### FOLDERS, CIRCULARS:

Folders and circulars are less personal than letters, but may utilize cuts and tabulated matter, including price lists, general data, and instructions as to your proposition, that could not be conveniently put in letter form. It is very proper and desirable that when sending such it be accompanied by a personal letter clearly and concisely calling attention to the main features of your offer.

### DIRECT RESULT GETTING:

In using all the above you should select those parties with whom you

wish to do business and submit a definite, concrete offer to them, and provide a means of closing that offer and realizing your profit. This allows you to pick out a large number of men, submit your proposition to them, and continue to follow up submitting it to them, until you have effected a sale or found that a sale cannot reasonably be made. Properly used such advertising can make more money for you, than possibly any other single business facility that there is. By such advertising you can talk your proposition to thousands in a single day. You can learn who is interested and who will not take your line.

You can eliminate the time of seeing those who won't buy.

You can eliminate the cost of seeing those who won't buy.

Your time is your capital and what is saved is added capital for additional endeavors.

— LLOYD C. COMEGYS.

## THE RAILROAD COMMISSION.

### President Eshelman Tells of Its Powers and What it Has Accomplished.

"It can be stated on authority that at no time in the history of the State has there been such a development in public utility enterprises as in the period since March 23, 1912, when the Railroad Commission was given jurisdiction over stock and bond issues of public utilities," declared President John M. Eshelman of the Commission speaking last Saturday before the San Francisco Chamber of Commerce.

"I will quote you the figures. In the two years and three months to June 30, 1914, applications were made to the Commission for authority to issue securities of all kinds to the amount of \$398,000,000.

"The Commission authorized the issue of \$284,000,000 of securities. It has denied or dismissed applications for \$32,000,000, and the balance are waiting decision.

"For the steam railroads of this state in that period there has been authorized \$126,000,000 of securities, for electric railways, \$11,000,000, for gas and electric companies, \$50,000,000.

"Certainly that does not look like arrested development," said Eshelman, whose address was upon the question, "Does Regulation Hurt Business?"

"A public utility is monopolistic in its nature," he continued. "It deals directly with the individual. Alone, the individual is powerless. Simple justice requires that the state provide a tribunal as between the public utility and its patrons.

"Regulation has begun by substituting the sovereignty of the state for the sovereignty of the corporation.

"You do not have to go on your knees to anybody to ask for that which is rightfully yours. The humblest citizen can stand on equal footing before the largest corporate interest. That is the deep-down, bed-rock, immutable principle upon which regulation must rest.

"The state's jurisdiction over public utilities embraces the regulation of rates, the regulation of service, and the regulation of finances.

"There has not been a single readjustment of rates which has not been founded upon abundant facts to sustain the adjustment. Only one rate reduction made by the California Commission has been appealed to the courts,

and from the Commission was completely upheld.

The reduced rates fixed by the Commission have gone into effect as the operating rates, and those are the rates you, as patrons of the railroads, telephone companies, telephone and electric companies, are paying today.

Regulation has given you a cheaper 1912 rate into the San Joaquin valley. It has lowered your shipping cost into the Sacramento Valley.

Your long distance telephone rates have been reduced to a fairer basis. Prior to the ruling of the Commission Wells Fargo and Company was reaping annually a profit in California of 120 per cent. Now if it hurt business to reduce that profit down to 10 per cent, it was a business that ought to have been hurt.

"We have found some freight rates in this state so abnormal as to constitute a positive barrier to honest business enterprise. Some producers in the Owens River Valley were unable to get their crops to market at Los Angeles by reason of abnormal freight rates.

"The reduced rate is making markets available to you men of San Francisco. At the same time these lower rates enable the grower, the orchardist and the farmer to get their produce to market to better advantage.

"A total of more than 700 miles of railway have been undertaken and carried forward under the regulation of the California Commission. And this is only a part of actual development. The sums for new equipment will approximate \$15,000,000. Gas and electric companies are spending \$80,000,000 for projects under regulation.

"Gentlemen, the day has passed when you can issue stocks and bonds with a shovel in California, and the sooner we come to realize it the better. The only business that has been hurt is the business of the flim-flam promoter.

"A representative of a very large corporation said recently that the Commission's supervision of a bond sale has saved the corporation \$300,000.

"The new question you gentlemen must answer is not to be "Does Regulation Hurt Business," nor "Is Regulation Desirable," but already we may read in the sentiment of the day the new question, "Shall it Be Regulation or Shall It Be Public Ownership?"

## PHILIPPINE LUMBER INDUSTRY.

There are some 60,000 square miles of timber standing in the Philippines, of which two-thirds is virgin forest, according to a pamphlet, "Lumbering Industry of the Philippines," just issued by the Bureau of Foreign and Domestic Commerce, of the Department of Commerce, as No. 38 of its Special Agents Series. The commercial output of lumber has been steadily increasing and has practically quadrupled in the last seven years, amounting to over 112,000,000 board feet in 1913.

Although the hardwood products of the Philippine forests rank with the best in the world for cabinet work, construction and various uses in which durability is an essential factor, very little of the yearly output has reached the outside world, as the home demand is more than sufficient to absorb the whole present supply. The industry is capable of very great expansion, according to those now engaged in the

business. The director of forestry estimates the amount of timber that could be removed annually without diminishing the productivity of the forests at ten times the present output. Capital is the principal factor necessary to develop the industry.

American sawmill and woodworking machinery will find a promising market as the lumbering industry develops according to the publication. In general the American machinery so far used has been very well liked, and nearly all sawmill and woodworking machinery now imported comes from the United States. About the same kind of equipment for sawmills as is used in the United States is in demand, but band-saws and solid-tooth circular saws, although more efficient, can be used but very little because of the class of labor available and the difficulty of making repairs.

#### NEW ROADS FOR WISCONSIN.

More than \$1,000,000 worth of new roads, about 1,400 miles, will be built in Wisconsin in 1914, announces the state highway commission. This is 500 miles more than were built in 1913, in which more than \$2,000,000 was spent.

The state will distribute among the counties about \$1,240,000. Requests for more than \$1,550,000 of state aid have been made, but the state will fall short by \$350,000. This amount will be made up by the counties. More than 1,400 separate pieces of road were completed in 1913.

### Up and Down the Coast.

**RICHMOND,** Contra Costa Co., Cal.—H. J. Jones & Co., of Australia, are contemplating the erection of a large jam and jelly plant in this city. The capital of the company is \$5,000,000 and it is expected that they will erect buildings here amounting to \$500,000. A. J. Cox is the San Francisco representative of the company.

**RIVERSIDE,** Riverside Co., Cal.—Building permits in this city for the month of July amounted to \$20,167. Of this amount fifteen of these permits were for new buildings.

**SAN FRANCISCO**—The repeal of an ordinance requiring the payment of a license fee of \$125 a year by every contractor engaged in the work of erecting patent chimneys was requested by a delegation of sheet metal workers who appeared before the Building Committee of the Supervisors. It was stated that small operators were unable to pay this amount and were forced out of business. It was suggested by the delegation that a fee of 50 cents be placed, to cover the cost of inspection, on each flue erected. The matter has been laid over until the meeting of August 18th.

**CHICO,** Butte Co., Cal.—The Business Men's Association of this city held a special meeting last week to discuss the proposed ferry between Butte and Glenn counties, which they have been endeavoring to put through for the past two years. A right of way was decided upon through the James D. Phelan ranch, but was practically turned down by Phelan. A committee has been appointed to select a new site. The committee is composed of D. J. Murphy, Martin C. Polk, Supervisors R. P. Holmes and D. H. Evans.

**RED BLUFF,** Tehama Co., Cal.—The report of Timber Cruiser Ranken shows \$21,000,000 feet of timber on one section in the eastern part of the country. He said that the assessed valuation of this piece of land was \$6,000, and the estimated valuation now will amount to \$21,000, making a gain of \$15,000. Ranken reports having cruised 52,000 acres of timber with his crew of twenty-two cruisers and in most all cases there will be large gain in valuation.

**MODESTO,** Stanislaus Co., Cal.—Building permits in this city for the month of July shows a substantial increase, in a report compiled by City Clerk W. O. Thompson. According to the statistics the aggregate valuation of the buildings for which the permits were issued last month is \$15,150, as against \$17,700 in June and \$2,200 in July of last year.

**FRESNO,** Fresno Co., Cal.—Building activities in this city for the month of July, as shown in a report by Building Inspector Scott, amounted to \$155,565, of this amount \$145,765 was invested in the erection of new buildings, leaving \$11,790 which was used in the repairs and alterations of old structures. Since the first of the year this city issued permits to the valuation of \$893,166.

**WOODLAND,** Yolo Co., Cal.—Word has been received here by L. H. Stevens, of the Woodland Library Trustees, that the additional grant of \$12,000 has been granted by Andrew Carnegie. Plans for the building are now being prepared and bids will be taken at an early date.

**SACRAMENTO,** Cal.—Plans are practically completed for the establishment of a municipal machine shop in connection with the Corporation Yard at 31st and R streets in this city. City Machinist Glackin has charge of the work.

**OROVILLE,** Butte Co., Cal.—Bids will be received here by the Butte County Supervisors at the Court House for the construction of a concrete bridge, 50 feet long and 46 feet wide over Chico Creek in the Esplanade at Chico, until August 7th. Bids will also be received on the same date for the construction of a concrete and steel trestle 260 feet long in the Parrott Grant Lane, eight miles west of Durham. C. F. Felding is the Clerk.

**REDBLUFF,** Tehama Co., Cal.—A road extend from Red Bluff to Eureka, a distance of 170 miles, is the plans of State Engineer McClure and Road Engineer Edward Goodwin. These engineers have recently returned from a trip through Trinity county. Ciring which they inspected the proposed highway.

The eastern extension of the main road in Trinity county from Peanut to Beegum, a distance of 25 miles, now a 25 per cent grade, will be cut to a 6 per cent grade. Tehama has agreed to build a road from Red Bluff to Beegum, and the people of Humboldt will fix fifteen miles of road connecting with the Red Bluff-Eureka highway.

These road projects will be presented to the next Legislature and appropriations for construction will be asked.

**WILLOWS,** (Glenn Co., Cal.)—Contractor W. R. Zumwalt, who is building the \$60,000 Willows High School, has been awarded the contract for erecting a new school building in the

Brooke District. The new building will be of reinforced concrete and will cost about \$6,628. Construction will start immediately.

**REDDING** (Shasta Co., Cal.)—The Supervisors have accepted the County Surveyor's plans for another Pitt River bridge. The new bridge, either steel or wood, will span the stream on the old Winter's toll road, five miles below Fall River Mills. The span is 165 feet.

**COLUSA** (Colusa Co., Cal.)—Work has been started on the Long Bridge, between Williams and Colusa. The old bridge has been removed and the laying of the foundations for the new one are now in progress.

**WILLOWS** (Glenn Co., Cal.)—The City Trustees have awarded the contract for paving Tehama street from Oak to Willow streets, a distance of three blocks. Clark & Henery of Sacramento, were the successful bidders, their bid being \$18,000.

**ETNA MILLS,** Siskiyou Co., Cal.—Bonds voted here in the sum of \$21,000 carried by a large majority. The proceeds of the election will be used in the construction of sewers.

**RICHMOND,** Contra Costa Co., Cal.—L. L. Page has been awarded the contract for improving Clinton avenue, his bid being \$16,193.17.

**RICHMOND,** Contra Costa Co., Cal.—Survey plans for a sewer for the western part of Richmond, which will cost \$50,000, are now ready to submit to the City Council by the Engineering Department. The proposed sewer will empty into San Pablo Bay and will drain large districts at that point, portions of North Richmond and the Brown and Andrade Tracts.

#### NEW ILLUMINANTS.

As a substitute for the ordinary glass lamp globe there has been introduced in Germany a globe made of thin, translucent marble. The light produced from this globe is declared by experts to be almost the exact counterpart of daylight. Another Germany novelty in illuminating consists of a screen coated with an aluminum powder which, when placed before a light, transmits a glare exactly like daylight, by means of which even colors can be judged with perfect accuracy.

Should these German discoveries prove to be all that has been claimed for them, they will doubtless be universally adopted. Artificial light that is a perfect substitute for daylight is what the world has been waiting for. Physicians are agreed that impaired eyesight and shattered nervous systems are caused by the defective, man-made light. In the workshop, in the church, in the theatre and in the home artificial daylight would be adopted as eagerly as the old-fashioned carbon filament lamps were abandoned for the tungsten, as completely as clear glass globes have been replaced by glazed or opaque globes, and as gratefully as the indirect system of lighting is being substituted for the direct system.—Philadelphia Press.

A United States Government engineer has patented and dedicated to the public easily transported apparatus for mine rescue work in cases where the regular hoisting apparatus has been damaged.

## Editorial Comment.

The building record for July in San Francisco amounted to over 3 million dollars. The figures were made up of the following particulars: Brick and concrete construction, \$1,016,703; frame, \$753,671; alterations, \$131,174; total of private construction, \$1,931,548. To this is added Panama Exposition contracts of \$556,174; city buildings, \$79,730; State buildings, \$484,000, making a grand total of \$3,085,402. This is the best statement of any month of the year to date except March when the total amounted to \$3,507,763.

This is about on an average with the cities throughout the Union. Official reports made from 72 cities throughout the country to the American Contractor, Chicago, show the best statement of the current year. The comparative figures are given herewith:

City	July, 1914	July, 1913
Akron .....	\$ 405,960	\$ 725,565

German scientists and medical men have done much to alleviate the suffering of mankind and have accomplished much in the line of scientific investigation. The world has progressed rapidly of late in the line of preventing disease, it has taken cognizance of the fact that certain industries are dangerous to the persons employed therein and provisions have been made to protect the people injured in these occupations. Disease prevention has been the line upon which the great constructive work of the world has been going on. But this kind of effort is not agreeable to the aristocracy that have enjoyed special privileges so long. It takes away from it the apology for its existence. And in the history of the world the eras of reform have always been followed by a war or a war scare.

So it would seem that the present war is as much the bringing about of the military aristocracy to prevent further humanitarian legislation as anything else. Money spent for war on disease can not be spent for arms and ammunition and wholesale murder. Expenditures for supplies for the protection of mothers and infants can not be used for the slaughter of innocents.

The present war means debts and maimed, diseased, and crippled humanity. It means the turning back of progress for more than a generation. It means the waste of money and of human life in a vain struggle to satisfy the greed of a handful of barbarian kings.

Germany is crying "Hoch der Kaiser," and all the rest of Europe is crying "Eke der Kaiser."

## Contractors' Bonds As Substitutes For Liens.

The Lien as Basis of Credit, the Difficulties of Framing Law and Its History.

Henry A. Alexander, Attorney, Atlanta, Georgia.

The impression that the liens of materialmen are a special and unmerited privilege is a misconception. They are in reality only one of a number of expressions of two fundamental legal principles: First, that the law should give the creditor every possible aid in the collection of his debt short of interference with innocent third parties and the normal course of business; and second, that in the sale of property, as long as the purchase price remains unpaid, the rights of the vendor are superior to those of the vendee. They stand upon the same basis as the vendor's lien and the attachment of property upon default of payment of purchase price. Where these principles are not enforced, it is not because of the unwillingness of the law, but because of the nature of the thing sold. Property which is consumed in its use cannot be attached to a vendor's lien, not because the vendors have not the right, but because the thing itself cannot be found. It so happens with the materialman that his goods have a permanent form and that he can give notice of his claim to third persons by its registration on the public records, and there is no reason why the principles referred to should not be applied to his case.

### The Lien as Basis of Credit.

But merely to show that the materialman is not a recipient of special favors falls far short of a complete statement of his position. His effective protection tends to promote the permanent improvement of land, and is a vital factor in the development and growth of the community. A materialman's lien constitutes, in proportion to its effectiveness, a basis of credit, both for the owner of real estate, who, though lacking sufficient cash capital, is thus enabled to improve it, and for the contractor, who, though he be without capital, may on the faith of the security afforded them by the law, obtain from materialmen the necessary supplies for the execution of his contract. The direct result is to bring into the business of contracting many persons of character and ability who would otherwise be excluded.

That is not alone the demands of materialmen that sustain the lien laws is shown by the fact that many of them hold the view that their business could be conducted upon a far more satisfactory basis if there were none at all, thus compelling them to look solely to the personal credit of the contractor in extending credit. This, however would be unfortunate for the public in throwing the business of contracting into the hands of the limited number of those contractors with capital and resources who could satisfy materialmen that their accounts would be duly paid, thereby eliminating from the business thousands of competent and honest men,—a condition which would tend directly to increase the cost of building. It is these considerations, in the writer's opinion, which, in the face of the feeling that they are

a special and arbitrary privilege, have kept the lien laws upon the statute books of every State in the Union.

### Difficulties of Formulating Law.

It is true, however, that the nature of the subject is such as to make it exceedingly difficult, if not practically impossible, to formulate a lien law that will be at once just, effective, and practicable. Under those now existing, the factors entering into the liens of materialmen furnishing supplies through contractors are so numerous and complicated that successful establishment is the exception. It is probably true that only a minor proportion of those claimed and filed could withstand a thorough contest. The greater part of such efficacy as they have grows out of the fact that when entered on the court records they constitute a cloud upon the title and a possible source of danger to subsequent purchasers or mortgagees, thereby, through their unwillingness to take chances, causing attorneys, in the examination of titles, though doubting the validity of the lien, to require its cancellation and removal.

The drafting of a just and effective lien law is a task beset with problems, most of which permit a solution only by a choice of difficulties. Among the lesser is the determination of how far the privilege of the lien should extend along the chain of contractors between the principal contractor and the sub-contractors and materialmen under him. Another is, whether the lien should be retroactive and relate back to the date of the beginning of work or the furnishing of material, or take effect only from its filing and entry on the public records. Another is the proper rule of priority between the lien and a prior mortgage as to the improvements themselves for which the lien is claimed. Another arises when the contractor fails to complete his contract, with part of the contract price still remaining in the hands of the owner, leaving materialmen's liens unpaid which were recorded prior to his default. The question then is, Shall the owner be allowed to take this balance to complete the contract, or must he apply it to the payment of the recorded liens? Another is the proper method of fixing the amount of the lien when the contract price is found to be insufficient to discharge all—whether by the amount due the contractor by the owner at the time of the service of notice by the materialmen, or, after completion of the work, by a marshaling of the liens and an apportionment of the balance of the contract price among them. But the fundamental difficulty is this. In its ultimate analysis, every lien law is in effect a garnishment or impounding of the contract price in the hands of the owner in order to apply it to the claims of those from whom the principal contractor has procured the labor and material entering into his work. In most of the States, this garnishment or impounding is effected by a written notice to the owner, served upon him by the material man or subcontractor

a short period after the completion of the work, and thereupon a lien for their account arises in their favor, limited by the owing by the owner to the principal contractor at the time of the receipt of the notice. In other States, the garnishment or impounding is effected by mere operation of law, the statute making it the duty of the owner, without notice from the materialmen or subcontractors, to retain a sufficient sum to pay their accounts.

### Weakness of Systems.

The underlying weakness of both these systems is that, to an indeterminate extent, they seek to require the owner to retain in his possession for the benefit of the subcontractors and materialmen funds which, by the terms of his contract, or by the practical necessities of the case in order to prevent the stopping of work, he is compelled from time to time, to pay out to the contractor. In those cases where the contractor is honest or solvent and the cost of the work does not exceed the contract price, the results may be satisfactory. But where the contractor is dishonest or insolvent, or the cost of the work exceeds the contract price, or there is collusion, either between the owner and the contractor, against the materialmen, or between the contractor and the materialman against the owner, these laws can afford but very little protection. Herein lies the inherent defect of all lien laws,—a defect which the writer is inclined to think cannot be overcome. On account of these various difficulties, all legislation on this subject has been simply a swinging back and forth of the pendulum between alternate evils,—between laws that seem to favor unduly the materialmen and those that seem to favor unduly the owner. It is no surprise, therefore, to find, for example, that while, in the state of Georgia, an attachment law enacted in 1799 has served all needs for more than 115 years with not over half a dozen amendments there have been no less than forty-nine acts relating to the protection of materialmen. The same is true in greater or lesser degree in practically every other state. In Kentucky, there have been no less than seventy-seven attempts to enact a satisfactory materialmen's lien law.

Conceding that the securing of materialmen affects to a large degree the general welfare and that the theory on which all modern lien laws are based—the impounding of the contract price in the hands of the owner—is largely impracticable, it becomes an important consideration to find a substitute.

Toward the accomplishment of this end, certain legislation of the state and Federal governments during the last twenty years, and the practice of the bonding companies of the country, offer valuable suggestions.

### History of Legislation.

In 1891, the Federal government enacted a law requiring persons contracting with the government for do-

ing public work to incorporate in their bond, conditioned for the faithful performance of their contract, an additional obligation that he would make prompt payment to all persons furnishing labor and material in the execution of the contract, and giving them a direct right of action on the bond. The considerations underlying this legislation were doubtless, first, the providing of a substitute for the ordinary lien, which does not exist against public property; and, second, to avoid the moral wrong of the government taking the supplies and labor of subcontractors and materialmen when their claims had not been settled by the principal contractor. That legislation has proven a marked success, and its results have been excellent in every way. In 1905, the original act was amended, defining more clearly the rights of the respective parties under the bond and the proper procedure to enforce them. In 1899, the state of Tennessee enacted a similar statute, with the additional provision that the failure of the public officer in charge of the work to exact such a bond should constitute a misdemeanor. In 1810, the legislature of Georgia passed a similar bill, introduced by the writer, who was then a member. In its final form there was no provision for criminal liability for default in exacting the bond, which was left to stand upon the basis of ministerial duty. In 1903, a like act was passed in the state of Oregon.

In 1894, the legislature of the state of Louisiana enacted a law which carries the idea one step further. By it, the private builder was required, upon the penalty of subjecting himself to a direct personal liability to materialmen and subcontractors, to exact from the principal contractor a bond with approved security, conditioned to promptly pay the bills of laborers and materialmen, who were given a direct right of action on the bond. The far-reaching significance of this act lay in the fact that it applied the idea embodied in the Federal act of 1894 to the owners of private property. It was operative only in cities having more than 50,000 inhabitants which confined it to the city of New Orleans. In 1896, it was amended to include cities having more than 10,000 inhabitants. In 1906 and 1908, its scope was further enlarged; and by the act of 1912, its operation was made general throughout the state, the only limitation being that the contract should exceed \$1,000. When it is remembered that the life of the average lien law is not over four or five years, the comparatively long period that this system of securing materialmen has continued and its gradual extension seem strong evidence of its satisfactory working. Moreover, the testimony of materialmen, bonding companies, and attorneys in Louisiana is that it has proven a distinct success.

#### The Louisiana Statute.

In considering whether the Louisiana statute offers a solution of this vexed problem, an important circumstance to be noted is that the bond required is to a great extent the same that the surety companies of the country have been writing for contractors in favor of private builders for a number of years, and with generally satisfactory results. This latter bond, on which a premium of  $\frac{1}{2}$  of 1 per cent of the contract price is charged, is con-

ditioned for the performance by the contractor of his contract, and the delivery of the structure erected by him free from all liens. In most states, it has been decided that this bond, being a contract between the owner and the contractor, subcontractors and materialmen not being parties thereto, have no right of action upon it. In other states, a contrary rule prevails. In the latter, the practical effect of this bond, when given, is that of the Louisiana statute. In giving to subcontractors and materialmen a right of action on the bond, the Louisiana statute seems but a natural evolution, and effectuates the real intent and spirit of the voluntary bonds. It is significant that in Louisiana all the bonding companies in the United States are writing these statutory bonds for the same premium as the voluntary bond when the penalty of the bond is less than or equal to one-half the contract price, that is for  $\frac{1}{2}$  of 1 per cent on the whole contract price. Where the penalty of the bond exceeds one-half of the whole contract price, the premium is 1 per cent of the penalty of the bond, and where the penalty of the bond is greater than the contract price, the

premium is 1 per cent of the contract price.

In its practical operation, the premium of the bonding company is doubtless added by the contractor to the cost of the building, and is thus finally paid by the owner. It seems reasonable to expect that its effect elsewhere would be, as in Louisiana, to introduce a high degree of safety and certainty into building operations. Whatever disposition it would create on the part of materialmen to be careless as to the contractor to whom they sold would be more than counterbalanced by the disposition of bonding companies and others who should undertake to become sureties to scrutinize the character and competence of the contractor. It would also be reasonable to expect that, with the practical certainty of payment, there would come a tendency to lower the price of building supplies. If the effect of such legislation would be to secure all of these important benefits at the cost only of a premium of not exceeding 1 per cent on the cost of the building, it would seem to be well entitled to the careful consideration of other states.—Case and Comment.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

### APARTMENT HOUSES.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$14,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. The building will be erected on the north side of California street east of Leavenworth, covering an area of 27½ by 84 feet. There will be six apartments of three rooms each. All suites will have wall beds and private bath rooms. Interior of the apartments will be finished in pine with some elm panels and hardwood floors. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and pressed brick veneer. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 5 story and base, brick and steel, \$75,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner's name withheld. The building will cover a ground area of 60 by 100 feet, and will have a light steel frame with brick exterior walls. Interior has been arranged for a total of sixty suites of two and three rooms. There will be wall beds and private bath rooms. Pine, elm and oak will be used for interior finish. All bath rooms will have tile wainscot and composition floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

**SAN FRANCISCO**—Apartment house, 2 story and base, frame, \$17,000. Architect, Albert Schroeffer, Foxcroft Bldg., S. F. Owner, L. D. Stoff, 215 Montgomery street. The building will be erected at the southeast corner of Clayton and Grove streets, and will contain eight large apartments with

private garages in the basement. Interior of the suites will be finished in pine and elm panels with oak floors in the living rooms and dining rooms. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. All apartments will be equipped with wall beds. Exterior of the building will be covered with rustic and a brick veneer. Plans are complete and work will be done by Day Labor.

**SAN FRANCISCO**—Apartment house, 5 or 6 story and base, brick and steel. Cost not stated. Architect, Joseph Cahen, 15 Kearny street, S. F. Owners, Joseph Cahen and A. Tonn. The building will be erected at the northwest corner of Sutter and Jones streets covering an area of 127½ by 137½ feet. The property has recently been purchased and the new owners have not fully decided to build on the entire area or only a portion. The building will be arranged for suites of two, three and four rooms with private baths and wall beds. Interior finish will be largely of pine with some elm panels and oak floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and wall beds. Exterior will probably be faced with pressed brick and terra cotta. Plans are now being prepared.

**SAN FRANCISCO**—Apartment house, 3 story and base, frame, \$10,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner's name withheld. The building will be erected on 26th avenue near Lake, and has been designed for apartment flats. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be open fire places in the living rooms. Mantels will be of tile. All apartments will have wall beds and private baths. The wainscot and composition floors will be used in the bath rooms. Exterior of the building will be covered with rustic and ce-

ment plaster on metal lath. Plans are being prepared.

**BERKELEY, ALAMEDA CO., CAL.**—Apartment house, 3 story and base, frame, \$25,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on College avenue near Claremont, covering an area of 70 by 70 feet. Interior will be arranged for two and three room suites. Pine and elm panels will be used for interior finish. All suites will have wall beds and private baths. Bath rooms will have tile wainscot and composition floors. Plans provide for steam heat and a hot water supply. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

**OAKLAND, CAL.**—Apartment house light fixtures, ornamental iron work, wall paper and furnishings. Cost not stated. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, C. Lange. The building at the corner of Grand avenue and Park View Terrace is now nearly completed, and the architect is taking figures for the above mentioned work.

**SAN FRANCISCO**—Apartment house, 4 story and base, brick and steel, \$45,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Metropolis Investment Co., 333 Kearny street, S. F. The building will be erected at the northwest corner of Hyde and Sacramento streets, covering an area of 37½ by 90 feet. There will be a total of nine apartments of two, three and four rooms. All suites will have wall beds and private baths. Plans provide for steam heat and a hot water supply. An automatic elevator will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

**SAN FRANCISCO**—Apartment house alteration. Cost not stated. Architect, Oscar Haupt, Phelan Bldg., S. F. Owner's name withheld. The present three story frame dwelling located on Haight street near Fillmore will be altered into a modern apartment house. The work will require plastering, painting, interior finish, plumbing and electric work. Wall beds will be used. Plans are being prepared.

**VENICE, LOS ANGELES CO., CAL.**—Apartment house, 2 story and base, brick. Cost not stated. Architect, W. S. Garrett, Currier Bldg., L. A. Owner, J. M. Elliott. The building will be erected on Trolleyway near Horizon, and has been designed to contain stores on the first floor and a number of two and three room suites on the upper floor. Interior will be finished in pine throughout. Plans provide for wall beds and private baths. There will be steam heat, patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

**HOLLYWOOD, LOS ANGELES CO., CAL.**—Apartment house, 2 story and base, brick. Cost not stated. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner, J. Small. The building has been designed to contain stores on the first floor and apartments of two and three rooms above. Interior will be finished in pine. There will be wall beds and private baths. Bath rooms will be finished in tile with composition floors. Plans provide for steam heat and a

hot water system. Exterior will be faced with pressed brick. Plans are being prepared.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, brick and steel. Cost not stated. Architect, Richard D. King, L. W. Hellman Bldg., L. A. Owner, L. Elghiera. The building will be erected at the southeast corner of 7th and Westmoreland, covering an area of 55 by 131 feet. There will be a total of 75 rooms, which will be arranged in suites of three, four and five rooms. Interior will be finished in pine and hardwood with hardwood floors in the larger suites. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, Peter W. Ehlers and A. W. Rieve, California Bldg., Owner, R. D. Manning. The building will be erected on Beaudry street, and will cover an area of 40 by 150 feet. Besides the apartments of two and three rooms, the building will contain a large lobby and amusement room. Interior will be finished in pine with some hardwood veneer. Plans provide for steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. All suites will have wall beds and private baths. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

**SAN FRANCISCO**—Apartment house, 4 story and base. Class C construction, \$47,000. Architects, Zanolini & Jewett, 604 Montgomery street, S. F. Owner, Mrs. Mary A. Bradbury. The building will be erected at the northwest corner of Polk and California streets, having a frontage of 112½ feet on Polk and 50 feet 9 inches on California. There will be seven stores on the first floor besides the entrance. Upper floors will be arranged for two and three room apartments with private bath and wall beds. Interior finish will be of pine throughout. Plans provide for steam heat and a hot water service. An automatic elevator will be installed. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

#### Contracts Awarded.

**LOS ANGELES, CAL.**—Apartment house, 3 story and base. Class C construction. Cost not stated. Architect, L. L. Jones, Central Bldg., L. A. Owner, Mrs. Allie Tompkins. Contractors, Munson & Cattanch, Douglas Bldg., L. A. Contract price not stated.

**SEATTLE, WASH.**—Apartment house, 3 story and base, brick and steel, \$85,000. Architect, J. A. Creutzler, New York Bldg., Seattle. Owner, Claude C. Ramsay. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, \$85,000.

#### BONDS.

**RICHMOND, CONTRA COSTA CO., CAL.**—The Board of Water Commissioners have instructed City Attorney Hall, as manager of the commission, to

prepare a resolution establishing September 22nd as the date on which the water election will be held.

The narrow margin of votes by which the recently proposed issue failed to carry has been assurance to the commissioners that the public, while feeling the necessity of establishing a dependable water system, will this time vote in favor of the bonds. The bonds are for \$2,500,000.

**BEAUMONT, RIVERSIDE CO., CAL.**—A bond election held in this city last week for lighting bonds in the sum of \$2,000; and for the grading, scarifying and graveling of streets at \$8,000 carried by a large majority.

On the lighting bonds the vote was 177 in favor of the issue and 63 against; road bonds, 166 for the issue and 72 against. As soon as the bonds are disposed of actual construction will commence.

**PETALUMA, SONOMA CO., CAL.**—A special election will be held in this city some time in November for the purpose of voting bonds amounting to \$75,000 to be used in improvements.

The bonds will be voted as follows: \$20,000 for the improvement of Washington street from Hopper to Main; \$45,000 for the elimination of Thompson Creek, and \$10,000 for one hundred electroliers.

**FRANKLIN SCHOOL DISTRICT, SLUTTER CO., CAL.**—Sealed proposals will be received by the Board of Supervisors on August 27th for the purchase of bonds amounting to \$5,000. Funds are to be used in the construction of a school building. D. D. Green is the County Clerk.

**GROVILLE, BUTTE CO., CAL.**—The Manzanita School District has voted a bond issue of \$12,000 for the purpose of erecting a new school building. The issue carried by a vote of 48 to 21.

**HENDERSON SCHOOL DISTRICT, SHASTA CO., CAL.**—Bonds of \$4,500 have been sold to the Bank of Lodi for par and accrued interest. Attorney G. M. Steele represented the district.

**DAVIS SCHOOL DISTRICT, YOLO CO., CAL.**—The issue of this school district's bonds of \$7,500 has been sold to the Stockton Savings Bank at par and accrued interest, and a premium of \$128 was paid. Attorney H. R. McNoble represented the district.

**OAKDALE, STANISLAUS CO., CAL.**—Petitions which were being circulated throughout this city have been practically completed for the bond election to be called to vote \$40,000 to entirely complete the Oakdale irrigation system, which will take in every part of the district.

The additional funds are to be used in the building of laterals on land now ready to be developed, and in the construction of spillways, which will permit the ditches to run level full all the time.

The election will be held sometime in November.

**SACRAMENTO, CAL.**—Preparations to have the Board of Supervisors issue a proclamation for a bond election September 16th for \$3,125,000 for good roads in Sacramento County are being made by the Sacramento County Highway Commission. The election will probably take place September 26th.

**ORANGE, ORANGE CO., CAL.**—An ordinance has been passed by the Board of City Trustees providing for the issuance of bonds in the sum of \$10,000 for purpose of erecting and

completing a reinforced concrete bridge on East Chapman avenue, across Santiago Creek, in the city of Orange. C. W. Hallman is the City Clerk.

**DOWNNEY, LOS ANGELES CO., CAL.**—An election held here on August 11th, bonds of \$25,000 for the purchasing of a site and the erecting of a new school building, carried by a large majority. The land adjoins the present site of the high school.

**ORANGE, ORANGE CO., CAL.**—A resolution, instructing the City Clerk to advertise the sale of \$10,000 Chapman avenue bridge bonds, has been adopted by the Supervisors here.

**OCEANSIDE, SAN DIEGO CO., CAL.**—Petitions are being circulated by the Oceanside Improvement Club asking the Trustees to call a special election for the purpose of voting bonds in the sum of \$15,000 for the erection of a city hall and pavilion, each to cost about \$7,500. It is proposed that both be of reinforced concrete construction.

**OKADALE, STANISLAUS CO., CAL.**—Arrangements have been practically completed for the holding of an election in September in the Okadale Irrigation District to vote bonds in the sum of \$100,000 for the completion of the irrigation system. The funds will be used for the construction of laterals and spillways.

**MOUNTAIN VIEW, SANTA CLARA CO., CAL.**—The Mountain View School District is preparing to hold a bond election September 5th to vote \$8,000 bonds for much needed school improvements.

**MERCED, MERCED CO., CAL.**—A special school bond election was held in Merced for the purpose of voting on the proposition of \$2,500 bonds to purchase the old First Presbyterian Church property, which occupies one corner of the lot occupied by the grammar school building and grounds. The proposition carried by 98 to 5.

**MADERA, MADERA CO., CAL.**—The Trustees of Madera, after discussing the proposed \$100,000 bond issue, decided to postpone the calling of an election till late in the fall or nearly next spring. It is believed that the bonds would not carry at this time, and even if they were voted, difficulty might be experienced in making a sale.

**SACRAMENTO, CAL.**—A failure to include sufficient money in the \$1,032,000 annexed district drainage improvement bonds to pay for main laterals will force the city to raise approximately \$200,000 for this purpose, according to Commissioner of Finance F. E. Shaw.

Shaw said no provision was made for main laterals in the bond issue. The \$1,032,000 will only be sufficient to buy the pump site, put in the plant, construct the adjoining run-off tank and lay the main trunk line in the annexed district.

The main laterals will cost about \$200,000, and this sum must be raised by the city.

**BUTTE, MONT.**—Question of \$200,000 bonds for construction of sewer system was defeated at a recent election.

**LONG BEACH, LOS ANGELES CO., CAL.**—The special election for the purpose of allowing residents of Long Beach to accept or reject a proposition to purchase Long Beach bath house for auditorium purposes for \$700,000 and invest an additional \$400,000 in

erection of an auditorium has been set for September 22nd.

**PASADENA, LOS ANGELES CO., CAL.**—The Board of Education has decided to ask the people to vote additional bonds in the sum of \$30,000 to permit erection of proposed Lamanda Park and Altadena schools in accordance with original plans and specifications. Only \$75,000 is available for the buildings, which will cost \$101,111 according to bids received for the construction of the buildings.

**REPUBLIC, WY.**—Bonds in the sum of \$36,000 have been sold for the construction of a school building here. Plans are being prepared.

**POCATELLO, IDAHO** — The City Council has called a special election to be held August 25th, for the purpose of voting bonds for the following work: Bonds for \$15,000 for the purchase and building of a public park; \$20,000 for grading and paving of streets; \$10,000 for new jail improvements. Wm. H. Jackson is the City Clerk.

## BRIDGES AND DAMS.

**SAN FRANCISCO**—Ferry Slips Nos. 6 and 7, \$51,400. Engineer, Assistant State Engineer Newman. Ferry Bldg., S. F. Owners, State of California. Bids opened by the State Board of Harbor Commissioners for constructing Ferry Slips Nos. 6 and 7 show the San Francisco Bridge Co. low at \$51,400. They will probably be awarded the work. A complete list of these figures appears under the heading of San Francisco in this issue.

**OAKLAND, CAL.** — Wharf, timber construction. Cost not stated. Engineer, City Engineer James E. Sutton. Oakland. Owners, City of Oakland. Plans prepared by City Engineer James E. Sutton of Oakland have been approved by the City Council. Original plans were found to be too light for the purpose to which the wharf will be put. Specifications are now being written and bids will be called for very shortly.

**OROVILLE, BUTTE CO., CAL.** — Bridges, steel and reinforced concrete. Cost not stated. Engineer, County Surveyor. Oroville. Owners, Butte County. The Board of Supervisors approved plans for the Hooker Oak bridge over the Big Chico Creek and for the Mahle bridge over Honcut Creek at Honcut. The former will be 50 feet long, constructed of reinforced concrete and steel and will cost about \$2,000. The Honcut bridge will be 150 feet long and constructed of steel, costing \$7,000. Bids will be called for at once.

**STOCKTON, SAN JOAQUIN CO., CAL.** — Bridges, steel and concrete. Cost not stated. Engineers, County Surveyors of San Joaquin and Contra Costa Counties. Owners, Contra Costa and San Joaquin Counties. The Secretary of War has granted the permit to construct two steel highway bridges over the Old and Middle Rivers between Contra Costa and San Joaquin Counties. The bridges will be of combination type for road and electric cars, and each will be 26 feet wide and 330 feet long with draw spans of 260 feet. Approaches will be 135 feet long. Bids will be called for as soon as the County Surveyors can complete plans and specifications. Further mention will be made of the work.

**STOCKTON, SAN JOAQUIN CO., CAL.** — Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer, Stockton. Owners, City of Stockton. Plans have been completed for a reinforced concrete bridge to be erected over Mormon Channel on Sutter street. Plans have been approved by the City Council and figures are now being taken. Bids will be opened on August 21st. Plans and specifications can be secured from the City Clerk.

**ESPARTO, YOLO CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Woodland. Owners, Yolo County. The bridge will be erected over Cache Creek north of Esparto, and has been designed for a road bridge. Plans are complete and figures are being taken. Bids will be opened on August 27th. Plans and specifications can be secured from the County Clerk.

**MARYSVILLE, YUBA CO., CAL.**—Bridge, reinforced concrete. Cost not stated. Engineer, County Engineer, Yuba City. Owners, Yuba County. The time for figuring the construction of the new reinforced concrete and steel bridge which is to be erected over the Yuba River at D street has been extended until September 8th. Two bids were received by the Supervisors, but were returned unopened to the bidders.

**BEAR CREEK, CONTRA COSTA CO., CAL.**—Bridge, concrete and timber. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans and specifications for the new Bear Creek bridge are complete and out for figures. Bids will be opened on September 8th. The bridge will be 45 feet long and 16 feet wide. Plans and specifications can be secured from the County Clerk at Martinez.

**SUISUN, SOLANO CO., CAL.**—Wharf, timber construction. Cost not stated. Engineer, none. Owner, E. D. Le Clare, Suisun. E. D. Le Clare will build a public wharf as soon as the City Trustees can adjust certain rights. If the permit is granted as asked for the wharf will be 150 feet long, otherwise a 100-foot structure will be built. Construction will be of timber.
